Complete 27 credits as outlined on the General Education table.<sup>2</sup> 27

**Total Credits 120**

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Note

- 54 credits must be completed at the 200 level or higher.

## Sequence Chart

| First Year                                                                                           |           |                                                                           |           |

# Mathematics

Chair: Susan Marshall, Department of Mathematics

The Bachelor of Science curriculum in mathematics is designed to provide an introduction to classical and modern mathematics and to provide a foundation for graduate study or careers in various areas of application.

The Concentration in Statistics gives students both a strong foundation in mathematics and specialized, advanced knowledge in pure and applied statistics. Students will be well prepared to enter data analysis and statistics fields, as well as graduate statistics programs.

## Programs Majors

- Bachelor of Science in Mathematics (p. 268)
- Bachelor of Science in Mathematics with a Concentration in Statistics (p. 270)
- B.S. in Mathematics and Education with Endorsement in Elementary Education (<https://catalog.monmouth.edu/undergraduate-catalog/science/mathematics/mathematics-education-bs-endorsement-elementary-education-mathematics/>)
- Bachelor of Science in Mathematics and Education with Endorsement in Secondary Education in Mathematics (p. 269)

## Minors

- Mathematics (p. 271)
- Statistics (p. 271)

## Faculty

**Joseph Coyle**, Professor.

Dean, School of Science. B.S., Miami University; M.S., Ph.D., University of Delaware. Interests include numerical analysis and inverse problems.  
jcoyle@monmouth.edu

**Torrey Gallagher**, Associate Professor. B.S., Temple University; M.A., Ph.D., University of Pittsburgh. Research interests include functional analysis, or more specifically, fixed point theory.  
togallag@monmouth.edu

**David Marshall**, Associate Professor. B.A., California State University at Fullerton; Ph.D., University of Arizona. Interests include number theory, commutative algebra, and the theory of bilinear and quadratic forms.  
dmarshall@monmouth.edu

**Susan Marshall**, Associate Professor and Chair. B.S. Wake Forest University; Ph.D., University of Arizona. Interests include number theory, arithmetic geometry, and the learning and teaching of proof.  
smarshal@monmouth.edu

**Emanuel Palsu-Andriescu**, Senior Lecturer. B.S., M.S., A.I.I., Cuza University, Romania; Ph.D., University of Rochester. Interests include microlocal analysis, Colombeau generalized functions, and Fourier integral operators.  
epalsu@monmouth.edu

**Wai Kong Pang**, Associate Professor. B.S., Brigham Young University; M.S., Ph.D., Texas Tech University. Interests include functional data analysis, and multi-sample problems in Hilbert spaces.  
wpang@monmouth.edu

**Kara Teehan**, Specialist Professor. B.A., Stockton University; M.A., Rutgers University, American College of Education; Ph.D., Rutgers University  
kteehan@monmouth.edu

**Laura Turner**, Associate Professor. B.S., Acadia University, M.S., Simon Fraser University; Ph.D., Aarhus University. Interests include the history of mathematics, especially 19th and 20th centuries.  
lturner@monmouth.edu

**Francis Valliquette**, Associate Professor. B.S., M.S., Université de Montréal; M.S., Ph.D., University of Minnesota. Research interests lie at the interface of applied mathematics, differential geometry, and discrete geometry. In particular, Dr. Valliquette is interested in the theory of transformation groups and their applications to differential equations and their finite difference approximations.  
fvallique@monmouth.edu

**Sandra Zak**, Lecturer. B.A., M.A., San Diego State University; Ph.D., University of New Hampshire. Interests include operator algebras, C\*-algebras, curriculum development, and the mathematical preparation of teachers.  
szak@monmouth.edu

## Courses

### MA-050 Pre-Algebra Mathematics

**Credits: 3**

Term Offered: All Terms

Course Type(s): None

The language of mathematics, terms and symbols, the real number system, arithmetic operations on real numbers, including exponents and roots, emphasis on fractions and decimals, and evaluation of expressions. Special topics on divisibility, figurate numbers, and introduction to college algebra. Three hours per week, plus mandatory attendance with mathematics lab. This course cannot be used to satisfy graduation requirements.

### MA-100 Quantitative Reasoning and Problem Solving

**Credits: 3**

Prerequisite(s): MA-050 passed with a grade of C- or higher or MA-LVL2 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Basic mathematical concepts studied through solving problems in collaborative groups; examination of decision-making and problem-solving techniques and various formats for representing quantitative information.

### MA-101 College Algebra

**Credits: 3**

Prerequisite(s): MA-050 passed with a grade of C- or higher or MA-LVL2 or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

The axioms and properties of the real number system. Manipulating expressions representing quantities; functions and their representations as rules, graphs or tabulations; linear and polynomial functions; zero, factoring techniques, and graphical properties of polynomials; the logarithm and exponential; solving systems of equations; sequences and summations; and combinations and permutations. Calculators required for selected topics. This course cannot be used in satisfaction of the general education mathematics requirement.

**MA-103 Foundations of Elementary Mathematics****Credits: 3**

Prerequisite(s): MA-050 passed with a grade of C- or higher or 3 credits in Math

Term Offered: Spring Term

Course Type(s): None

Careful examination of mathematical ideas behind the mathematics taught in grades K-8, and their history and applications to daily life.

Intended primarily for future elementary-school teachers to provide them with a better understanding of the mathematics they will teach.

This course will also be of value for any student who wants a better understanding of these ideas. Focus on understanding and exploring the mathematics behind computation through problem solving, projects, group explorations, use of manipulatives, and some use of technology. Topics include: number systems, measurement, probability, statistics, and geometry. Not open to freshmen.

**MA-105 Mathematical Modeling in the Social Sciences****Credits: 3**

Prerequisite(s): MA-050 passed with a grade of C- or higher or MA-LVL2 or MA-LVL3 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Exploration and aspects of algebra, mathematical modeling, and data analysis, which are important in the social sciences. Topics include: an introduction to data, the use of variables, assorted kinds of graphs to represent data, the concept of function, the problem of fitting functions to data, representing change over time, rates of change, linear functions and linear models, piecewise-linear functions, and an introduction to non-linear functions. Pedagogical methods to be used include: projects using real data, computer explorations, and group work. MA-LVL4 may not take this course.

**MA-107 Mathematics in the Arts****Credits: 3**

Prerequisite(s): MA-050 or MA-LVL2 or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: Spring Term

Course Type(s): None

Study of artistic design in architecture, painting, sculpture, and crafts; math of music.

**MA-109 Pre-Calculus Mathematics****Credits: 4**

Prerequisite(s): MA-101 passed with a grade of C- or higher or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

The real number system, algebraic expressions, exponents, radicals, solution of equations, solutions of inequalities, functions, graphing of functions, and trigonometry. Not open to students who have successfully completed MA-125.

**MA-115 Pre-Calculus Modeling for the Biological Sciences****Credits: 3**

Prerequisite(s): MA-101 passed with a grade of C- or higher or MA-LVL 3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Provides a development of an understanding of linear, exponential, logarithmic, polynomial and trigonometric functions related to biological phenomena. The development is from an algebraic, graphical and modelling perspective. In addition, the solutions of equations and inequalities related to these functions are studied. Use of related technology is included.

**MA-116 Calculus for the Biological Sciences****Credits: 3**

Prerequisite(s): MA-115 or MA-109 passed with a grade of C- or higher or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Introduction to calculus, from a primarily graphical perspective, through applications to biological and ecological phenomena. Topics include: differentiation, integration, and differential equations.

**MA-117 Quantitative Analysis for Business I****Credits: 3**

Prerequisite(s): MA-101 or MA-105 passed with a grade of C- or higher or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Linear equations and models, systems of linear equations and applications, matrices and techniques for solving systems of equations, linear programming and applications, quadratic functions and models, and exponential and logarithmic models. A computer laboratory component is incorporated. Designed for students majoring in Business Administration; other students by permission of the Mathematics Department.

**MA-118 Quantitative Analysis for Business II****Credits: 3**

Prerequisite(s): MA-117 passed with a grade of C- or higher, or permission of the department

Term Offered: All Terms

Course Type(s): None

Functions, limits, continuity, polynomial calculus, including optimization models, anti-derivatives, area and applications to business models; introduction to probability and statistics as applied to business models.

**MA-120 Introduction to Mathematical Reasoning****Credits: 4**

Prerequisite(s): MA-101 passed with a grade of C- or higher or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Introduction to reasoning, proof, and exposition in mathematics. Topics include: Boolean logic, set theory, counting techniques, functions, mathematical induction, permutations, and the proofs of various elementary theorems.

**MA-125 Calculus with Analytic Geometry I****Credits: 4**

Prerequisite(s): MA-109 or MA-115 passed with a grade of C- or higher or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Functions, limits, continuity, and the differential and integral calculus of algebraic, trigonometric, and exponential functions.

**MA-126 Calculus with Analytic Geometry II****Credits: 4**

Prerequisite(s): MA-125 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Functions, limits, continuity, and the differential and integral calculus of algebraic, trigonometric, exponential functions.

**MA-130 Applied Discrete Mathematics****Credits: 3**

Prerequisite(s): MA-109 or MA-117 passed with a grade of C- or higher or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Introduction to reasoning, proof, and exposition in mathematics. Topics include: Boolean logic, set theory, counting techniques, functions, mathematical induction, permutations, and the proofs of various elementary theorems.

**MA-151 Statistics with Applications****Credits: 3**

Prerequisite(s): MA-101 or MA-105 passed with a grade of C- or higher or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Analysis of data, probability, random variables, normal distribution, sampling theory, confidence intervals, and statistical inference. Not open to computer science majors or to students required to complete MA-125, except software engineering majors.

**MA-198 Special Topics in Mathematics (100 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in mathematics to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If there is a prerequisite for this course it will be announced in the course schedule.

**MA-199 Independent Study in Mathematics****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study in a topic not substantially treated in a regular mathematics course; for students with superior ability; weekly consultation required. Prior permission of the directing professor and department chair is required to take this course.

**MA-203 Foundations of Elementary Mathematics I****Credits: 3**

Prerequisite(s): MA-050 or MA-LVL2 or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Careful examination of mathematical ideas behind the mathematics taught in grades K-6, their history, and applications to daily life. Intended primarily for future elementary-school teachers to provide them with a better understanding of the mathematics they will teach. This course, along with MA-204, Foundations of Elementary Mathematics II, will also be of value for any student who wants a better understanding of these ideas. Focus on understanding and exploring mathematics through problem solving, projects, group explorations, use of manipulatives, and some use of technology. MA-203 concentrates on problem solving, whole number arithmetic and theory, discrete math, integers, fractions, decimals, and algebraic concepts. MA-203 does not count toward the mathematics major or minor requirements. Students who take MA-203 are not eligible to take MA-205. Prerequisite: MA-050 or MA-LVL2 or MA-LVL3 or MA-LVL4 passed with a grade of P

**MA-204 Foundations of Elementary Mathematics II****Credits: 3**

Prerequisite(s): MA-203 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Careful examination of mathematical ideas behind the mathematics taught in grades K-6, their history and applications to daily life. Intended primarily for future elementary-school teachers to provide them with a better understanding of the mathematics they will teach. This course, along with MA-203, Foundations of Elementary Mathematics I, will also be of value for any student who wants a better understanding of these ideas. Focus on understanding and exploring mathematics through problem solving, projects, group explorations, use of manipulatives, and some use of technology. Topics in MA-204 include: fractions, ratios and percent, data analysis, counting and probability, geometry of shape, measurement, and measurement geometry (perimeter, area, surface area, volume). MA-204 does not count toward the mathematics major or minor requirements. Students who have taken MA-204 are not eligible to take MA-207.

**MA-205 Number Systems****Credits: 3**

Prerequisite(s): MA-050 or MA-LVL2 or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: Fall Term

Course Type(s): None

Careful examination of mathematical ideas behind the mathematics taught in grades K-6, and their history and applications in daily life. Intended primarily for future elementary school teachers to provide them with a better understanding of the underlying concepts of the mathematics they will teach. MA-205 concentrates on the various number systems of school mathematics: whole numbers, integers, fractions, decimals. It does this by examining, in other number bases, standard algorithms for addition, subtraction, multiplication and division, as well as alternative algorithms in base ten, including student-generated algorithms. The course will focus on developing educators' conceptual understanding and exploring the mathematics through problem solving, projects, group explorations, and use of manipulatives as practices for mathematics instruction. MA-205 does not count towards the mathematics major or minor requirements, except for the mathematics and elementary education major. Students who have taken MA-205 are not eligible to take MA-203.

**MA-206 Algebraic Thinking, Probability and Statistics****Credits: 3**

Prerequisite(s): MA-205 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Careful examination of mathematical ideas behind the mathematics taught in grades K-6, and their history and applications to daily life. Intended primarily for future elementary school teachers to provide them with a better understanding of the underlying concepts of the mathematics they will teach. MA-206 concentrates on the algebraic thinking, probability and statistics. It develops algebraic thinking by extending concepts from Number Systems (MA-205) via problem-solving, proportional relationships, pattern-recognition, generalization and identities. Probability introduces key concepts from discrete mathematics and applies proportional relationships. Statistics involves systematic organization of data. The course will focus on developing educators' conceptual understanding and exploring the mathematics through problem solving, projects, group explorations, and use of manipulatives as practices for mathematics instruction. MA-206 does not count towards the mathematics major or minor requirements.

**MA-207 Elementary Geometry****Credits: 3**

Prerequisite(s): MA-205 passed with a grade of C- or higher

Term Offered: Fall Term

Course Type(s): None

Careful examination of mathematical ideas behind the mathematics taught in grades K-6, and their history and applications to daily life. Intended primarily for future elementary school teachers to provide them with a better understanding of the mathematics they will teach. This is an activity-centered course. Content will focus on geometric shapes, motions and change, length, area and volume and their measurement. There is an emphasis on understanding a variety of problem solving strategies, conjectures, reasoning, mathematical representations including manipulatives, and communicating. MA-207 does not count toward the mathematics major or minor requirements. Students who take MA-207 are not eligible to take MA-204.

**MA-220 Probability and Statistics I****Credits: 3**

Prerequisite(s): MA-116 or MA-118 or MA-126 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

To provide an axiomatic, calculus-based approach to probability and introductory statistics. The course is built around the process of performing a statistical analysis; posing the question, collecting the data, describing the data, analyzing and modeling the data, and drawing inferences from the data regarding the original question. Specific topics covered include sampling, descriptive analysis of data, probability, random variables, discrete and continuous distributions, expectation, confidence intervals, one sample hypothesis testing, chi-square analyses, correlation and regression.

**MA-221 Linear Algebra****Credits: 3**

Prerequisite(s): MA-120 or MA-130; and MA-125 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Systems of equations, matrix algebra, linear transformations, Eigenvectors, linear programming, and computational methods.

**MA-225 Calculus with Analytic Geometry III****Credits: 4**

Prerequisite(s): MA-126 passed with a grade of C- or higher

Course Type(s): None

Infinite series, partial differentiation, multiple integration, and associated solid analytic geometry.

**MA-237 Programming and Technology in Mathematics****Credits: 4**

Prerequisite(s): MA-120 and MA-126 both passed with a grade of C- or higher

Co-requisite(s): MA-311 or MA-221 or MA-225

Term Offered: All Terms

Course Type(s): TL

Provides an introduction to the use of technology as it applies to mathematics. A major component of the course will be to build a solid foundation in the skills needed to apply mathematical concepts to programming. In addition, the use of technology in presentations, scholarly searches, and its role and limitations in computer and Internet security will be covered. Students will gain an appreciation of the important ethical and social issues involving the use of technology.

**MA-298 Special Topics in Mathematics (200 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in mathematics to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**MA-299 Independent Study in Mathematics****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study in a topic not substantially treated in a regular mathematics course; for students with superior ability; weekly consultation required. Prior permission of the directing professor and department chair is required to take this course.

**MA-301 Careers in Mathematics Seminar****Credits: 1**

Prerequisite(s): MA-220 and MA-221

Term Offered: Fall Term

Course Type(s): None

An orientation to career opportunities and graduate level programs and degrees available to students with a background in mathematics and statistics.

**MA-305 Mathematical Problem Solving****Credits: 3**

Prerequisite(s): MA-205, MA-206, and MA-207 all passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): WT

The final mathematics course in the four- course sequence for future elementary school teachers. Designed to strengthen their mathematical content knowledge, problem solving skills, conceptual understanding and ability to communicate about mathematics, through the investigation of mathematically challenging problems. Problems will require creative thinking and utilization of past content knowledge in new situations. Students will work in groups and individually, and write up their solutions. This course does not count towards the mathematics major or minor requirement.

**MA-311 Differential Equations****Credits: 3**

Prerequisite(s): MA-126 and MA-221 both passed with a grade of C- or higher

Term Offered: Fall Term

Course Type(s): None

Designed to provide students with the fundamentals of differential equations. The topics include elementary methods of solution, nth order linear equations, systems of linear equations, Laplace transform methods, numerical solutions, and initial and boundary value problems.

**MA-312 Numerical Analysis****Credits: 3**

Prerequisite(s): MA-126 and MA-221 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

The main objective of the course is to develop a basic understanding in the construction and analysis of processes used to solve mathematical problems with the aid of a computer. The focus will be on leveraging the mathematical framework to achieve efficient and accurate numerical algorithms. The course also includes exposure to basic programming techniques in the context of implementing several of the algorithms as well as exposure to various applications of mathematics.

**MA-314 Number Theory****Credits: 3**

Prerequisite(s): MA-120 or MA-130 and MA-221 both passed with a grade of C- or higher and EN-101 and EN-102, or permission of the instructor.

Term Offered: All Terms

Course Type(s): RD

Properties of integers, divisibility, prime numbers, congruence, and Diophantine equations.

**MA-317 Geometry****Credits: 3**

Prerequisite(s): MA-120 or MA-130 and either MA-221 or MA-225 passed with a grade of C- or higher.

Term Offered: All Terms

Course Type(s): None

Study of Euclid's axioms, fifth postulate and its substitutes, absolute geometry, projective geometry, constructions, and convexity.

**MA-318 Combinatorics and Graph Theory****Credits: 3**

Prerequisite(s): MA-120 or MA-130 or CS-202 passed with a grade of C- or higher, and MA-221 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Combinatorics is the study of countable discrete mathematical structures. Graph theory is the study of mathematical structures involving a collection of objects, known as the vertex set, along with a collection of pairs of vertices, known as the edge set. These two inseparable areas of mathematics are ripe with beautiful theory and endless applications. Students will learn the techniques required to answer questions in these fields, as well as appropriate applications.

**MA-320 Probability and Statistics II****Credits: 3**

Prerequisite(s): MA-116 or MA-118 or MA-126 passed with a grade of C- or higher, MA-151 or BE-251 or MA-220 passed with a grade of C- or higher, EN-101 and EN-102

Term Offered: Spring Term

Course Type(s): WT

A continuation of MA-220, including sample distributions, exploratory data analysis, estimation methods, regression and correlation, as well as applications to quality control.

**MA-321 Statistical Consulting****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Gives students a working knowledge of statistical consulting in the world outside of the classroom by working with real clients. Students will interview clients, translate client needs into statistical language, design statistical experiments, generate data collection plans, assist in data collection, analyze data, interpret their analyses, and present their finding to the client. Throughout the process students will interact with their clients regarding ongoing questions that occur. By the end of the course, students will be able to choose and apply appropriate statistical design and analysis methodologies. They will also be able to interpret, evaluate, and present their conclusions in oral and written form. Topics covered will depend upon client needs and may include designing experiments with power and sample size considerations, multiple and logistic regression, survival analyses, t- and chi-square tests, ANOVA/MANOVA/ANCOVA, and principal component analysis. This course may be repeated once for additional credit to either continue work on a long-term project, or to take part in a new statistical consulting project.

**MA-325 History of Mathematics****Credits: 3**

Prerequisite(s): MA-314 or MA-317 or MA-318 passed with a grade of C- or higher, and EN-101 and EN-102

Term Offered: Spring Term

Course Type(s): GU, WT

Surveys historical milestones in the development of mathematics from ancient times to the Nineteenth century, with modern topics as time permits.

**MA-327 Design and Analysis of Biological Experiments****Credits: 3**

Prerequisite(s): MA-151 or MA-220 or BE-251 passed with a grade of C or higher or permission of the instructors.

Term Offered: Spring Term

Course Type(s): MEBP

The purpose of this course is to learn about the statistical design & analysis of biological experiments. After learning mathematical techniques of designing experiments, and statistical analyses customized to them, students will be presented with a broad research question by the instructors. Literature surveys will be a critical part of the course to allow students to find pertinent, relevant, potentially publishable biological questions that address a specific aspect of the larger question posed by the instructors. Students will design their own experiment addressing their question, generate their own data collection plan, collect their data, and then analyze their data using statistical techniques taught in class. This course will involve field/lab work for data collection and computer work in the statistical analysis of the final data. Students will defend their question, design and analysis from both a statistical and biological perspective. At the end of the semester students will complete a formal manuscript in journal format. This course can be used to fulfill the Mathematics or Statistics minor and the Bio/MEBP elective. This course is a research based course and students must have demonstrated a strong interest in and potential for research. Also listed as BY-327.

**MA-334 Problem Solving Seminar****Credits: 3**

Prerequisite(s): MA-120 or MA-130; and MA-126 all passed with a minimum grade of C- or higher, and permission of the instructor

Course Type(s): None

Problem solving techniques and the ability to use them in applications lie at the core of learning and applying mathematics. The course covers important strategies for solving mathematical problems, most of which are only tangentially studied in the usual mathematics curriculum. The strategies are an assortment of both overarching themes and particular techniques of more limited applicability. Each strategy is covered in a theoretical context followed by implementation to specific problems. Polya's classic framework for the problem solving processes will be referenced and used throughout the course. This course is repeatable for credit.

**MA-350 Computation and Statistics****Credits: 3**

Prerequisite(s): MA-116 or MA-118 or MA-126 passed with a grade of C- or higher, and either MA-151 or BE-251 or MA-220 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Covers topics related to computational statistics, including obtaining large, realistic, real-time datasets, calculation and visualization of basic statistical features, regression, empirical distributions, and time-series features. Also covered will be principal components analysis (PCA), analysis of variance (ANOVA), correlation, prediction, and stochastic volatility estimation (GARCH). Portfolio theory will also be covered.

**MA-380 Research in Mathematics****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Mathematical or statistical research work carried out under the mentorship of a faculty research advisor. Research conducted by the students will be submitted for presentation, publication or review. The number of credits will be determined by arrangement with the advisor. Three hours/week per credit. This class is repeatable up to six credits total.

**MA-388 Cooperative Education: Mathematics****Credits: 3**

Prerequisite(s): MA-311 and MA-220, both passed with a grade of C- or higher if a Mathematics major; or MA-120 and MA-126, both passed with a grade of C- or higher if other major, a cumulative G.P.A. of 2.00 and Junior or Senior standing

Term Offered: Spring Term

Course Type(s): EX2

Affords the student an opportunity to apply mathematical theory to practical work-related experience. Includes both academic and experiential components. Involves ten hours per week of work experience. The academic aspect includes a reflective journal and a written report; repeatable for credit.

**MA-389 Internship in Mathematics****Credits: 1-3**

Course Type(s): EX1

Supervised practical experience in math; repeatable for credit. Student must have at least Junior status. Departmental approval is required to take this course.

**MA-398 Special Topics in Mathematics (300 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in mathematics to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**MA-399 Independent Study in Mathematics****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study in a topic not substantially treated in a regular mathematics course; for students with superior ability; weekly consultation required. If a prerequisite is required it will be announced in the course schedule.

**MA-407 Topology****Credits: 3**

Prerequisite(s): MA-221 and MA-225, both passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Topology is the study of the structure of space and is one of the major theoretical areas in modern mathematics. The course serves as both a rigorous foundation for advanced study in the field and as a survey of important techniques established since its inception. After building the necessary framework of point-set topology, the course will move on to selected topics such as the classification of surfaces, knot theory, and algebraic topology.

**MA-410 Modern Algebra****Credits: 3**

Prerequisite(s): MA-221, and either MA-314 or MA-317 or MA-318 or MA-407 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Beginning with the natural numbers, the integers and rational numbers are developed. Complex numbers and roots of unity are followed by groups, rings, and polynomials.

**MA-411 Group Theory****Credits: 3**

Prerequisite(s): MA-221, and MA-314 or MA-317 or MA-318 or MA-407, both passed with a grade of C- or higher

Course Type(s): None

Group Theory is the study of symmetry, and is one of the core branches of abstract algebra. The course will explore the theory and applications of groups. In addition to covering many examples of groups, course topics will include subgroups, group homomorphisms and isomorphisms, permutations, quotient groups, Sylow Theorems, and the structure of finitely generated abelian groups.

**MA-413 Complex Analysis****Credits: 3**

Prerequisite(s): MA-225 and either MA-314 or MA-317 or MA-318 or MA-407 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Complex numbers and plane, functions, derivatives, line integrals, and Cauchy integral theorem. Cauchy's formula, series, applications.

**MA-415 Real Analysis****Credits: 3**

Prerequisite(s): MA-225 and either MA-314 or MA-317 or MA-318 or MA-407 passed with a grade of C- or higher and EN-101 and EN-102, or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

Metric spaces, real number system, limits, functions, continuity, differentiation and integration, and counter-examples.

**MA-419 Introduction to Mathematical Modeling****Credits: 3**

Prerequisite(s): MA-220, MA-311, MA-221 all passed with a grade of C- or higher; Junior standing, and EN-101 and EN-102, or permission of the instructor

Term Offered: Spring Term

Course Type(s): EX5, WT

Introduction to mathematical modeling, which is a process in which a real-world situation is studied, simplified, and abstracted to the point that mathematical tools can be applied to gain understanding. Introduction to the process, first via a text and mini-projects, then in teams investigating problems from local industries or organizations.

**MA-421 Design of Experiments and ANOVA****Credits: 3**

Prerequisite(s): MA-116 or MA-118 or MA-126 passed with a grade of C- or higher and either MA-151 or BE-251 or MA-220 passed with a grade of C- or higher

Term Offered: Fall Term

Course Type(s): None

Provides a working knowledge of multivariate regression and ANOVA methods balanced with the theory underlying these techniques. Intended for students considering a career in statistics, including but not limited to biostatistics, financial mathematics and theoretical statistics. Topics include: an introduction to experimental design, power and effect size calculations, data screening and transformation to meet assumptions of the analyses, multivariate regression, multinomial logistic regression, multivariate survival analysis, ANOVA/ANCOVA/MANOVA/MANCOVA, and time permitting, an introduction to time series analysis. Extensive use is made of real-world case data from business/finance, health/biology, and education/psychology.

## MA-440 Regression and Time Series Analysis

**Credits: 3**

Prerequisite(s): MA-116 or MA-118 or MA-126 passed with a grade of C- or higher and either MA-151 or MA-220 or BE-251 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Covers topics related to multiple regression techniques, including testing the assumptions required for each to be valid. This includes applications to yield curve smoothing, pricing, and investment models, and the use of principal component analysis. Also covered are techniques for the analysis and modeling of time series data and forecasting.

## MA-460 Multivariate and Categorical Statistics

**Credits: 3**

Prerequisite(s): MA-116 or MA-118 or MA-126 passed with a grade of C- or higher and MA-151 or MA-220 or BE-251 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

This advanced statistics course provides students with skills in advanced multivariate analysis and its applications. Students will learn the material through projects using data from business, finance, and biology. Topics include MANOVA, discriminant analysis, cluster analysis, multidimensional scaling, and factor analysis. Topics may also include conjoint analysis, canonical correlation and structural equation modeling.

## MA-488 Cooperative Education: Mathematics

**Credits: 3**

Prerequisite(s): MA-220 and MA-311 passed with a grade of C- or higher if a Math major

Term Offered: Spring Term

Course Type(s): EX2

Affords the student an opportunity to apply mathematical theory to practical work-related experience. Includes both academic and experiential components. Involves ten hours per week of work experience. The academic aspect includes a reflective journal and a written report; repeatable for credit. Departmental approval is required to take this course. MA-311 and MA-320, both passed with a grade of C- or higher are required, if a mathematics major; or MA-120 and MA-126, passed with a grade of C- or higher, if another major; a cumulative GPA of 2.00 and Junior or Senior standing.

**MA-489 Internship in Mathematics**

**Credits: 1-3**

Course Type(s): EX1

Supervised practical experience in math; repeatable for credit.

Departmental approval and Junior standing are required to take this course.

**MA-498 Special Topics in Mathematics (400 Level)**

**Credits: 1-3**

Prerequisite(s): MA-126 and MA-221 both passed with a grade of C- or higher and Junior standing

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in mathematics to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**MA-499 Independent Study in Mathematics**

**Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study in a topic not substantially treated in a regular mathematics course; for students with superior ability; weekly consultation required. Prior permission of the directing professor and department chair is required to take this course.

| Complete 27-30 credits of free electives. <sup>3</sup>                       | 27-30      |
| <b>General Education Requirements (36 credits)<sup>4</sup></b>               |            |
| Complete 36 credits as outlined on the General Education table. <sup>4</sup> | 36         |
| <b>Total Credits</b>                                                         | <b>120</b> |

<sup>1</sup> If course selection satisfies a General Education requirement, additional free electives may be permitted. See advisor.

<sup>2</sup> MA-237 fulfills a General Education requirement, and if chosen, additional free electives may be permitted. See advisor.

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (<http://catalog.monmouth.edu/undergraduate-catalog/academic-programs-support-services-regulations/general-education-requirements/>) courses must be completed.

|----------------------|------------|
| <b>Total Credits</b> | <b>120</b> |
|----------------------|------------|

- <sup>1</sup> Minimum grade of "C" required for Education courses
- <sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.
- <sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.
- <sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

Additional Endorsements Available

- TSD - Teacher of Student with Disabilities - Secondary
- ESL - English as a Second Language - Secondary

Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (<http://catalog.monmouth.edu/undergraduate-catalog/academic-programs-support-services-regulations/general-education-requirements/>) courses must be completed.

## Notes

- 54 credits must be completed at the 200 level or higher.

## Medical Laboratory Sciences and Clinical Laboratory Sciences

Chair: Tsanangurayi Tongesayi, Department of Chemistry and Physics

The curricula in **Medical Laboratory Science** and **Clinical Laboratory Sciences** are quite similar. Both prepare students to work as skilled professionals in medically related laboratories. Students complete three years of course work, focused on chemistry and biology, followed by a one-year hands-on internship at one of several hospital sites. Professionals in these areas provide laboratory data that is essential to the diagnosis of diseases, management of patient therapy, and maintenance of health. Graduates of these rewarding programs are highly employable and enjoy excellent starting salaries. They also have the potential for further career advancement in the field.

The **Medical Laboratory Science** curriculum is offered in conjunction with one of our medical center affiliates. The curriculum requires completion of ninety-six credits of collegiate work prescribed by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) and is followed by an eleven-month internship period at an NAACLS-approved hospital program. Monmouth University confers the Bachelor of Science degree upon successful completion of the hospital program. Students have typically attended internships at:

Monmouth Medical Center  
Long Branch, NJ 07740  
Program Director: Emily Su

Jersey Shore University Medical Center  
Neptune, NJ 07753  
Program Director: Perla L. Simmons

The **Clinical Laboratory Sciences with a Concentration in Medical Laboratory Science** program is offered in collaboration with the Rutgers School of Health Related Professions (Rutgers-SHRP). The curriculum requires three years of pre-professional study followed by a fifteen-month internship at the Rutgers School of Health Related Professions. Monmouth University and the Rutgers-SHRP jointly confer the Bachelor of Science degree upon successful completion of the professional component. The internships for this program take place at:

Rutgers-School of Health-Related Professions  
Newark Campus  
Program Director: Deborah A. Josko

| Complete 36 credits as outlined on the General Education table. <sup>4</sup>                                                                                                             |                                                                | 36             |
| <b>Total Credits</b>                                                                                                                                                                     |                                                                | <b>128-129</b> |

<sup>1</sup> Students who have not completed all core requirements with a "C" grade or better will be ineligible for admission to the required internship program at Rutgers-SHRP.

<sup>2</sup> MA-116 Calculus for the Biological Sciences (3 cr.) or MA-125 Calculus with Analytic Geometry I (4 cr.) are to be taken by students who score 4 on the Math Placement Exam.

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed. The order given in the sequence charts for Gen\*Ed courses is advisory. Students may move those courses around to suit their interests.

<sup>5</sup> Students can take BY-216 in place of IT-102 but there will be an additional credit since BY-216 is a 4-credit course. Students are therefore encouraged to consult their advisors.

## Notes

- 54 credits must be completed at the 200 level or higher.

| Complete 36 credits as outlined on the General Education table. <sup>5</sup> | 36 |
|------------------------------------------------------------------------------|----|

|                      |                |
|----------------------|----------------|
| <b>Total Credits</b> | <b>120-121</b> |
|----------------------|----------------|

- <sup>1</sup> MA-116 Calculus for the Biological Sciences (3 cr.) or MA-125 Calculus with Analytic Geometry I (4 cr.) are taken by student who score 4 on the Math Placement Exam.
- <sup>2</sup> Completion of collegiate work prescribed by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) is followed by an eleven month training period in a NAACLS-approved hospital program. Successful completion qualifies graduates to take the American Society of Clinical Pathologists (ASCP) Board Certificate Exam.
- <sup>3</sup> ML-411 will partially complete Writing Intensive (WT) requirement in General Education Requirements.
- <sup>4</sup> Please consult with your advisor regarding the required number of free electives that must be completed.
- <sup>5</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed. The order given in the sequence charts for Gen\*Ed courses is advisory. Students may change the order of those course to suit their interests.
- <sup>6</sup> Students can take BY-216 in place of IT-102 but there will be an additional credit since BY-216 is a 4-credit course. Students are therefore encouraged to consult their advisors.

## Notes

- 54 credits must be completed at the 200 level or higher.

## Physics

Chair: Tsanangurayi Tongesayi, Department of Chemistry and Physics

Physics faculty members offer a curriculum leading to a minor in physics, which may be combined with any major. The minor in physics can be combined with a major in chemistry and education to prepare for the Teacher of Physical Science Certification. A minor in physics also complements the interests of students majoring in mathematics, software engineering, and a variety of other fields. The physics faculty support various undergraduate programs by offering specific courses required in other majors and courses designed to meet the general education natural sciences requirements. They also provide research opportunities for interested students.

## Programs

### Minor

- Physics (p. 277)

## Courses

### PH-101 Physics in Our Lives Credits: 3

Term Offered: All Terms

Course Type(s): NS

Presents major concepts and methodologies in physics and their importance in today's society. Introduction to principles of physics and their applications to today's technology using lectures and demonstration.

### PH-103 The Physics of Sound and Music Credits: 3

Term Offered: All Terms

Course Type(s): NS

Presents the topics of sound and music from a physics point of view. Covered topics are harmonic motion, waves (both traveling and standing), the human voice and ear, the production of music and musical scales and the physics of several representative instruments.

### PH-105 Physics for the Life Sciences I Credits: 3

Prerequisite(s): MA-101 or MA-109 or MA-115 or higher Math courses passed with grade of C- or higher.

Co-requisite(s): PH-105L

Term Offered: All Terms

Course Type(s): NS

An introduction to classical physics intended primarily for students majoring in the life sciences. Topics include: mechanics, dynamics, heat, electricity, magnetism, and optics.

### PH-105L Physics for the Life Sciences I Laboratory Credits: 1

Co-requisite(s): PH-105

Term Offered: All Terms

Course Type(s): None

Laboratory work to complement PH-105. Experiments in the fields of statics, dynamics, energy, momentum, heat, sound, electricity, magnetism, optics, and spectroscopy. Three hours per week.

### PH-106 Physics for the Life Sciences II Credits: 3

Prerequisite(s): PH-105 and PH-105L both passed with a grade of C- or higher

Co-requisite(s): PH-106L

Course Type(s): NS

An introduction to classical physics intended primarily for students majoring in the life sciences. Topics include, mechanics, dynamics, heat, electricity, magnetism, and optics.

**PH-106L Physics for the Life Sciences II Laboratory****Credits: 1**

Co-requisite(s): PH-106

Course Type(s): None

Laboratory work to complement PH-106. Experiments in the fields of sound, electricity, magnetism, optics, and spectroscopy. Three hours per week.

**PH-150 Principles of Astronomy****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

The historical development of astronomy and the modern concepts of the universe, including demonstrations and viewing sessions with optical telescopes.

**PH-199 Independent Study in Physics****Credits: 1**

Term Offered: All Terms

Course Type(s): None

Guided study of a selected topic in physics not substantially treated in a regular course, under the direction of a member of the Physics faculty. Prior permission of the directing professor and department chair is required to take this course.

**PH-211 General Physics with Calculus I****Credits: 3**

Prerequisite(s): MA-116 or MA-125

Co-requisite(s): PH-211L

Term Offered: Fall Term

Course Type(s): NS

The first of a two-semester sequence of courses that, taken together, provide a thorough introduction to classical physics using calculus. Topics covered include: one- and two-dimensional motion, Newton's laws and their applications, energy, momentum and impulse, rotational mechanics, and thermodynamics.

**PH-211L General Physics with Calculus I Laboratory****Credits: 1**

Co-requisite(s): PH-211

Term Offered: Fall Term

Course Type(s): None

Laboratory experiments to complement the topics covered in PH-211. Includes experiments in statics, dynamics, and thermodynamics.

**PH-212 General Physics with Calculus II****Credits: 3**

Prerequisite(s): PH-211 and PH-211L passed with a grade of C- or higher.

Co-requisite(s): PH-212L

Term Offered: Spring Term

Course Type(s): NS

The second of a two-semester sequence of courses that, taken together, provide a thorough introduction to classical physics using calculus. Topics covered include: sound and wave mechanics, electrostatics, circuits, magnetic forces and fields, Faraday's Law, reflection and refraction, and optics.

**PH-212L General Physics with Calculus II Laboratory****Credits: 1**

Co-requisite(s): PH-212

Term Offered: Spring Term

Course Type(s): None

Laboratory experiments to complement the topics covered in PH-212. Includes experiments in sound, electricity, magnetism, circuits, and optics.

**PH-270 Physical Oceanography****Credits: 3**

Prerequisite(s): BY-109, CE-111, CE-111L, CE-112, and CE-112L

Term Offered: Fall Term

Course Type(s): MEBP

Physical Oceanography provides a survey of physical, chemical and geological processes that define and affect the coastal ocean including ocean basins, beach formation and dynamic ocean processes (currents, waves, wind, weather). Environmental considerations include the role of the ocean in the association with global climate change issues, problems associated with coastal development, exploitation of marine resources, and ocean and coastal pollution.

**PH-298 Special Topics in Physics (200 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in physics to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**PH-299 Independent Study in Physics****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided study of a selected topic in physics not substantially treated in a regular course, under the direction of a member of the Physics faculty. Prior permission of the directing professor and department chair is required to take this course.

**PH-311 Theoretical Physics****Credits: 3**

Prerequisite(s): PH-212 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Presents physics topics aimed at the advanced undergraduate level. The subjects range over classical mechanics, electromagnetism, and statistical mechanics, with explicit links made to topics from PH-301. The course is calculus-based, and seeks to round out the physics education of physics minors.

**PH-312 Modern Physics****Credits: 3**

Prerequisite(s): PH-311 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Topics from physics of the twentieth century, including special relativity, the origins of quantum theory, quantum mechanics, atomic structure, nuclear physics, and elementary particles.

**PH-350 Research in Physics****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX5

Original research work, carried out under the mentorship of a faculty research advisor. Research conducted by the students may be submitted for presentation, publication, or review, as appropriate. The number of course credits will be determined by arrangement with the advisor. Three hours/week per credit, 1-3 credits.

**PH-399 Independent Study in Physics****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

Reading and research on a selected topic under the direction of a Physics faculty member. Prior permission of the directing professor and department chair is required to take this course.

**PH-499 Independent Study in Physics (400 Level)****Credits: 1-3**

Course Type(s): None

Reading and research on a selected topic under the direction of a Physics faculty member. Three hours per week per credit. Prior permission of the directing professor and department chair is required to take this course.

**Minor in Physics (MIN.PH)**

# Urban Coast Institute

Director: Tony MacDonald

The Urban Coast Institute (UCI) serves the public interest as a forum for research, education, and collaboration that fosters the application of the best available science and policy to support healthy and productive coastal ecosystems and a sustainable and economically vibrant future for coastal communities. The UCI efforts focus on the following program areas:

- Coastal and Ocean Management, Law, and Policy
- Coastal Marine Stewardship, Habitat and Water Quality
- Sustainable and Resilient Coastal Communities

## Institute Staff

**Tony MacDonald, Esq.** Director. J.D., Fordham University School of Law. Mr. MacDonald has over thirty years of executive and policy experience in coastal and ocean law and policy at the local, state, and federal level.

**Thomas Herrington**, Associate Director. Ph.D., Stevens Institute of Technology. Dr. Herrington is one of New Jersey's leading experts on coastal processes, beach management and ocean engineering. He has more than 25 years of experience in coastal sustainability and hazard mitigation research, including the analysis of storm surge and wave impacts on coastal communities.

**James Nickels**, Marine Scientist. M.S., Montclair State University Mr. Nickels has worked for over twenty-five years on marine research, monitoring, surveying, and field operations in both the public and private sectors. His expertise includes survey work in fisheries, plankton, benthic organisms, sediment, water quality, mitigation, and geophysics. He is a licensed hydrographer and Certified Floodplain Manager.

**Karl Vilacoba**, Communications Director. M.A., New Jersey Institute of Technology. Mr. Vilacoba has over fifteen years of experience in professional media, writing, and technical communications. He is the lead for the Urban Coast Institute (UCI) outreach and communications efforts related to ocean and coastal programs and activities.

Visit our website at <http://monmouth.edu/uci/> (<https://www.monmouth.edu/uci/>).

# LEON HESS BUSINESS SCHOOL

Dean: Raj Devasagayam, Ph.D.

Assistant Dean for Student Engagement: Janeth Merkle, M.B.A., M.M.

M.B.A. Program Director: Jonathan Daigle, Ph.D., M.B.A.

The Leon Hess Business School (LHBS) is currently ranked in the top 300 of the 2,000 schools of business in the United States, is a community of teacher-scholars educating students to develop strong leadership skills in achieving organizational excellence and sustainability: the integrated strategic management of interlocking economic, social, technological and ecological systems in which organizations operate. The LHBS is accredited by AACSB International – the Association to Advance Collegiate Schools of Business. AACSB accreditation is the hallmark of excellence in business education, and has been earned by less than 5 percent of the world's business programs. Today, there are 727 business schools in 48 countries and territories that maintain AACSB accreditation.

Within the LHBS are two Centers of Distinction.

1. The first is the Kislak Real Estate Institute. Students can obtain a Bachelor of Science in Business Administration with a Concentration in Real Estate and a Bachelor of Science in Business Administration with a Concentration in Finance and Real Estate. It is the first such program offered at any New Jersey College or university.
2. The second, the Center for Entrepreneurship is directed by Dr. Joseph McManus of the Management and Decision Sciences Department. The Center has been nationally recognized for its innovative teaching in the field of entrepreneurship and product designs.

The School of Business is most fortunate to have two professors who are endowed Chairs.

- Professor Donald Moliver holds the Steven and Elaine Pozyski Endowed Professor Chair in Real Estate.
- Professor Robert Scott holds the Arthur and Dorothy Greenbaum/Robert Ferguson/NJAR Endowed Chair in Real Estate Policy.

## Student Honor Society: Beta Gamma Sigma

The top 20 percent of MBA graduates and 10 percent of undergraduate junior and senior students are eligible for election to Beta Gamma Sigma, the International Honor Society for AACSB-accredited business schools.

<sup>1</sup> Completion of 30 credits of coursework in this minor with a final grade of B or better for each course in order to qualify for waivers of 18 graduate foundation courses in the MBA.

## Accounting

Chair: Nancy Uddin, Department of Accounting

### Mission Statement

The mission of the Department of Accounting is to prepare students for careers in public, private industry, and governmental and not-for-profit organizations. The department encourages and supports dynamic interaction between faculty and students. Faculty members contribute as leaders in the profession through research and community activities.

The Monmouth University Department of Accounting prepares students for today's varied and challenging careers in the accounting field including:

- **Public Accounting:** Opportunities range from the "Big 4" to regional and local firms which provide audit, tax, management, and forensic services to clients.
- **Private Accounting:** These options involve working within an individual company or non-profit organization.
- **Government Work:** Jobs are available working for the Internal Revenue Service, the NJ Division of Taxation, or other government agencies.
- **Education:** Graduates can continue for advanced degrees and return to academia for research and teaching opportunities.

Monmouth University accounting graduates will have met the educational requirements to sit for the rigorous Certified Public Accounting Examination (Students will have the opportunity to plan for meeting the additional requirements of 150 college credit hours, and work experience to become a CPA.)

The opportunities for accounting graduates are unlimited with the demand continuing at a strong level despite the current economic downturn.

- CPAs are highly respected and in demand.
- All financial decisions, for businesses and successful individuals, are dependent on accounting information.
- Accounting is the "language of business."
- Graduates with accounting skills are able to succeed in a career and life that offers wonderful opportunities.

## Programs Majors

- B.S. in Business Administration with a Concentration in Accounting (p. 283)
- B.S. in Business Administration with a Concentration in Accounting Analytics

### Minor

- Accounting (p. 284)

## Faculty

**Gilda M. Agacer**, Associate Professor (Graduate Faculty). B.A., University of East Philippines; M.I.B.S., Ph.D., University of South Carolina. Specializes in governmental accounting, advanced accounting analysis, and managerial cost analysis.

gagacer@monmouth.edu

**Carson Clements**, Lecturer. B.S., M.A., SUNY Brockport; PH.D, Miami University  
cclement@monmouth.edu

**Jangwook Lee**, Assistant Professor (Graduate Faculty). B.B.A., Korea University; Ph.D., Temple University.; M.S., Baruch College, M.A., Columbia University. Research interests include managerial equity incentives, managerial risk-taking, and corporate risk. Additional interests include textual analysis of corporate disclosures.  
jalee@monmouth.edu

**Xudong Daniel Li**, Associate Professor (Graduate Faculty). B.E., B.S., University of Science and Technology of China, M.B.A., University of California, Ph.D., University of North Texas. Research interests in auditing, firm choice, information transfer, financial reporting quality, managerial incentives/characteristics, and oil and gas. Broadly speaking, particular interests are (1) incorporated behavioral/psychological perspectives into theoretical explanations of various auditing and accounting contexts and (2) employing both economic and behavioral/psychology-based theories to develop testable hypotheses in examining the interplay of auditing and accounting via archival research methods and using archival data.  
xli@monmouth.edu

**Douglas Stives**, Senior Specialist Professor. M.B.A., Lehigh University; C.P.A., New Jersey. Teaching interests are in the areas of taxation.  
dstives@monmouth.edu

**Nancy Uddin**, Professor and Chair (Graduate Faculty). B.A., William Patterson University; Ph.D., Rutgers University. Research and teaching interests include the areas of auditing and accounting information systems.  
nuddin@monmouth.edu

**Minna Yu**, Professor (Graduate Faculty). B.A., M.S., Dongbei University, China; Ph.D., Kent State University. Teaching interests include managerial accounting, financial accounting, and international accounting. Current research interests include analyst forecasts, accrual anomaly, and corporate governance.  
miyu@monmouth.edu

## Courses

### BA-200 Survey of Accounting

**Credits: 3**

Term Offered: Spring Term

Course Type(s): None

An introductory class in accounting designed for non-business students, which focuses on accounting as a tool for communicating financial information about business organizations to people outside the business and to internal users to help them plan, control, or make decisions about operations. Not open to Business majors and only can be used toward the Business minors.

### BA-251 Accounting I

**Credits: 3**

Term Offered: All Terms

Course Type(s): None

This course is designed to provide students with both financial (external) accounting and managerial (internal) accounting theories and practices. The financial accounting topics include the principles and applications of current accounting theory and the accumulation and presentation of financial information through the four basic financial statements. Key coverage will be given to accounting issues related to particular accounts and to analytical procedures. The managerial accounting topics include the managerial accounting profession, building blocks of managerial accounting, job costing and activity-based costing as well as cost behavior analysis.

### BA-252 Accounting II

**Credits: 3**

Prerequisite(s): BA-251

Term Offered: All Terms

Course Type(s): None

This course is designed to further examine financial accounting and managerial accounting theories and practices. The financial accounting topics include accrual accounting, journal entries related to merchandising firms, receivables, liabilities, and equity. The managerial accounting topics include cost-volume-profit analysis, making short-term business decisions, budgeting, and performance evaluation.

### BA-261 Data Analytics for Accounting

**Credits: 3**

Prerequisite(s): IT-150 or CS-104, MA-117, and BA-251

Co-requisite(s): BE-251

Term Offered: Spring Term

Course Type(s): None

Computerization and the availability of data is changing the role of the accountant as information provider. We talk about how the accounting profession will change to complement the power of computerization and the plethora of data available. We use the AMPS (Ask, Master, Perform, Share) model to understand the data analytics process and how it is used to analyze all of the available information to address accounting questions. We emphasize the four types of analysis (descriptive, diagnostic, predictive and prescriptive) and how they are used to address accounting questions.

### BA-311 Intermediate Accounting I

**Credits: 3**

Prerequisite(s): BA-251, BA-252, and BA-261 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Financial accounting measurement, including asset valuation and determination of periodic income.

### BA-312 Intermediate Accounting II

**Credits: 3**

Prerequisite(s): BA-311 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Liability recognition and corporation equity measurement.

### BA-316 Individual Income Tax

**Credits: 3**

Prerequisite(s): BA-251 and BA-261 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

This is the first of two semesters of a study of Federal Income Taxation. It covers taxation of individuals and small businesses. Emphasis will be on tax research and planning for individuals. The purpose is to introduce undergraduate accounting students to a broad range on income tax topics. Because of the complexity and breadth of coverage, many topics will not be covered in great depth.

**BA-320 Managerial Cost Analysis****Credits: 3**

Prerequisite(s): BA-252 and BA-261 passed with a grade of C or higher  
Term Offered: All Terms

Course Type(s): None

Offers the student a fairly detailed knowledge of cost accounting principles and practices. A working knowledge of cost accounting is an essential element of the accounting student's education due to the importance of cost accounting in every organizational setting. Also, the information presented in the course is essential for successful completion of professional examinations such as the CPA and the CMA.

**BA-345 Forensic and Investigative Accounting****Credits: 3**

Prerequisite(s): BA-251 and BA-252, both passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Identifying, recording, settling, extracting, sorting, reporting and verifying past financial data or other accounting activities for settling current or prospective legal disputes or using such past financial data for projecting future financial data to settle legal disputes.

**BA-370 Accounting Information Systems****Credits: 3**

Prerequisite(s): BA-311 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Accounting systems analysis and design. Emphasis on database information structures, integrating accounting, and controls.

**BA-388 Cooperative Education: Accounting Concentration****Credits: 3**

Prerequisite(s): BA-252, BM-250, a minimum G.P.A. of 2.00, sixty or more earned credits, eighteen or more credits of Business Administration courses, and twelve or more credits of Accounting courses taken at Monmouth University

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. Departmental approval is required to take this course. This course may be repeated for credit.

**BA-401 Advanced Accounting****Credits: 3**

Prerequisite(s): BA-312 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Advanced issues in financial accounting, including business combinations, consolidated financial reports, governmental and not-for-profit accounting, and other relevant areas.

**BA-413 Auditing Theory****Credits: 3**

Prerequisite(s): BA-312 passed with a grade of C or higher and BA-370

Term Offered: All Terms

Course Type(s): None

Auditing standards and procedures associated with the examination of financial statements; the role and methods of the independent auditor; legal and ethical responsibilities.

**BA-417 Business Income Taxation****Credits: 3**

Prerequisite(s): BA-261 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

The second of two income tax courses, which covers the taxation of corporations, partnerships, estates and trusts. Tax and estate planning are emphasized with the study of various techniques, case studies and research projects. Retirement plans and international taxes are also included.

**BA-425 International Accounting****Credits: 3**

Prerequisite(s): BA-311 passed with a grade of C or higher; and EN-101 and EN-102

Term Offered: All Terms

Course Type(s): WT

Basic concepts of accounting principles, auditing environments, managerial objectives, and financial reporting requirements, applicable to multi-national corporations. Emphasis on corporations with headquarters domiciled in the United States, with limited attention to specialized offshore locations.

**BA-488 Cooperative Education: Accounting Concentration****Credits: 3**

Prerequisite(s): BA-252, BM-250 and a minimum G.P.A. of 2.00, sixty or more earned credits, eighteen or more credits in Business Administration courses; twelve or more credits in Accounting courses taken at Monmouth University

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course.

**BA-489 Internship in Accounting****Credits: 3**

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. This course is repeatable twice for credit. Departmental approval is required to take this course. Students must have Junior standing and a minimum G.P.A. of 2.00 in order to register for this course.

**BA-498 Special Topics in Accounting****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in accounting to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BA-499 Independent Study in Accounting****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

| Complete up to 12 credits of free electives. <sup>1</sup>                              |                                                      | 12      |
| <b>General Education Requirements (33 credits) <sup>2</sup></b>                        |                                                      |         |

Complete 33 credits as outlined on the General Education table. <sup>2</sup>

**Total Credits** **120**

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Notes

- 54 credits must be completed at the 200 level or higher.
- Business majors are required to complete at least 50% of their major and concentration requirements at Monmouth University.

## Sequence Chart

| First Year                                                                      |           |                                                                |           |

## Note

- Not available to students majoring in Business Administration.

## Economics, Finance, and Real Estate

Chair: Benedicte Reyes, Department of Economics, Finance, and Real Estate

Within the Leon Hess Business School, students can pursue a number of academic degrees including economics, finance, and real estate. The program provides an education that helps qualify its graduates for positions of leadership in private and public sectors.

Curricula are developed, taught, and regularly updated by a faculty with strong academic and business experience. They stress the development of critical thinking, sophisticated communication skills, and a flexible managerial perspective.

The undergraduate program in business administration is grounded in a broad-gauged education in the liberal arts and sciences designed to prepare students for responsible judgment in a wide variety of cultural and social settings.

## Programs Majors

- B.S. in Business Administration with a Concentration in Economics (p. 290)
- B.S. in Business Administration with a Concentration in Economics and Finance (p. 291)
- B.S. in Business Administration with a Concentration in Finance (p. 292)
- B.S. in Business Administration with a Concentration in Finance and Real Estate (p. 293)
- B.S. in Business Administration with a Concentration in Real Estate (p. 294)

## Minors

- Economics (p. 295)
- Finance (p. 295)
- Real Estate (<https://catalog.monmouth.edu/undergraduate-catalog/leon-hess-business/business-administration-real-estate-minor/>)

## Faculty

**Tjeerd Boonman**, Specialist Professor. B.A., M.S., University of Amsterdam; Ph.D., University of Groningen. Research focused on the development of early warning systems for currency crises and fiscal stress, modeling contagion and the use of real-time data.  
tboonman@monmouth.edu

**John Burke**, Senior Specialist Professor. B.A., S.U.N.Y.; M.B.A., Indiana University. His professional career spanned twenty-seven years on both the sell-side and buy-side of Wall Street. He spent ten years at PaineWebber, Inc., where he was a Managing Director, heading the Global Equity Derivatives group, with operations in New York, London, and Tokyo; he was also responsible for Proprietary Trading. He subsequently spent two years at Deutsche Bank, AG as Director and Co-Head of the Global Structured Products Group with operations in New York, Frankfurt, London and Tokyo, as well as running Proprietary Trading in New York. After twelve years on the sell-side, Professor Burke moved to the buy-side and formed the Rumson Capital LLC, a \$500mm hedge fund, engaging in global arbitrage strategies, which he ran for fifteen years.

jdburke@monmouth.edu

**Jonathan Daigle**, Associate Professor (Graduate Faculty).

Director, M.B.A. Program. B.S., M.B.A., The University of South Alabama; Ph.D., The University of Mississippi.  
jdaigle@monmouth.edu

**Yulin Li**, Assistant Professor (Graduate Faculty). B.S., Economics, M.S., Management, Southwestern University of Finance and Economics, China; M.S., Financial Engineering and Risk Analytics; M.S., Applied Mathematics, Rensselaer Polytechnic Institute, Ph.D., University of Texas at San Antonio.  
yli@monmouth.edu

**Bochen Li**, Lecturer. B.S., Shantou University; M.S., Polytechnic University; M.S., University of North Carolina, Charlotte; Ph.D., University of Cincinnati  
bli@monmouth.edu

**Yun Luo**, Assistant Professor (Graduate Faculty). B.S., Xiamen University; M.A., Georgetown University; Ph.D., University of California.  
yluo@monmouth.edu

**Débora Machado Nunez**, Assistant Professor. B.A., M.A., Federal University of Rio Grande do Sul (Brazil); Ph.D., Colorado State University.  
dmachado@monmouth.edu

**Donald Moliver**, Professor, Acting Director of Kislak Real Estate Institute; Steven J. and Elaine Pozyski Endowed Professorship in Real Estate (Graduate Faculty). B.A., Fairleigh Dickinson University, M.A., Ph.D., Virginia Polytechnic Institute. Research interests include real estate finance and valuation. CRE and MAI designations.  
dmoliver@monmouth.edu

**Patrick L. O'Halloran**, Associate Professor (Graduate Faculty). B.A., M.A., Ph.D., University of Wisconsin-Milwaukee. Principal research interests are in labor economics, discrimination, payment scheme, and econometrics.  
pohallor@monmouth.edu

**Benedicte Reyes**, Associate Professor and Chair (Graduate Faculty). B.A., Ecole Supérieure de Commerce de Reims, France; M.B.A., Temple University; Ph.D., Columbia University. Research interests include international corporate finance and capital markets deregulation.  
breyes@monmouth.edu

**Richard Roberts**, Specialist Professor. B.S. Pennsylvania State University; M.B.A., Columbia University. Monetary policy, money and banking.  
rroberts@monmouth.edu

**Robert H. Scott, III**, Professor, Arthur and Dorothy Greenbaum/Robert Ferguson/NJAR Endowed Chair in Real Estate Policy (Graduate Faculty). B.A., Western State College of Colorado; M.A., Ph.D., University of Missouri at Kansas City. Research interests include credit cards, start-up business financing, and interpreting the work of Kenneth Boulding.  
rscott@monmouth.edu

**Pham Trang**, Lecturer. BSBA, Banking Academy of Vietnam; MBA, University of Akron; PhD, University of Texas - El Paso.

**Guoyang Yang**, Assistant Professor. B.Eng., Hunan University; M.S., University of Washington; M.S., Ph.D., University of Cincinnati.

## Courses

### BE-200 Economics for Social Science

**Credits: 3**

Prerequisite(s): 3 credits from Math except MA-050 or MA-100  
Term Offered: All Terms

Course Type(s): None

Students are introduced to core economic concepts in four areas: (i) Introductory concepts include: decision-making under scarcity, the operation of markets and the price mechanism, and government's role in the economy. (ii) Microeconomics covers the economic analysis of consumption, production in the context of competitive and monopolistic markets, operation of labor markets, and poverty and income distribution. (iii) Macroeconomics introduces students to national product and income accounts; business cycles, inflation and unemployment; and monetary and fiscal policies. (iv) Global topics include: comparative advantage, trade and finance. Real-world applications are emphasized in all areas. For Non-Business majors.

### BE-201 Microeconomics

**Credits: 3**

Prerequisite(s): MA-100 or higher level mathematics course  
Term Offered: All Terms  
Course Type(s): SS.SV

Introduction to the operation of the price mechanism; examination of the individual economic units, laws of supply and demand, market structure, and cost analysis; contemporary problems examined.

### BE-202 Macroeconomics

**Credits: 3**

Prerequisite(s): MA-100 or higher level mathematics course  
Term Offered: All Terms  
Course Type(s): SS.SV

Determination of the components and level of national income; applications to the problems of inflation, unemployment, and economic stabilization; financial institutions in relation to their role in public policies.

### BE-251 Business Statistics

**Credits: 3**

Prerequisite(s): IT-100 or IT-150 and MA-117  
Term Offered: All Terms  
Course Type(s): None

Descriptive statistics, tables and charts, probability distributions, confidence intervals and hypothesis tests, linear and multiple regression, and analysis of variance.

### BE-289 Internship in Economics

**Credits: 3**

Course Type(s): EX1

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. This course is repeatable twice for credit. The student must have a minimum G.P.A. of 2.00 and have at least Junior standing to take this course. Departmental approval is required to take this course.

### BE-301 Labor Economics

**Credits: 3**

Prerequisite(s): BE-201 and BE-202  
Term Offered: Spring Term  
Course Type(s): GS

Economic and social effects of the modern industrial structure: labor groups, attitudes, problems, tactics, labor legislation, the development of industrial society of American Unionism, and the labor movement throughout the world.

**BE-304 Money, Credit, and Financial Institutions****Credits: 3**

Prerequisite(s): BE-202

Term Offered: All Terms

Course Type(s): None

Monetary economics and its institutions; the nature and function of money; commercial and central banking; the money markets; financial intermediaries; and international monetary institutions. Also listed as BF-304.

**BE-305 Intermediate Macroeconomics****Credits: 3**

Prerequisite(s): BE-202

Term Offered: Spring Term

Course Type(s): None

A study of the measurement of aggregate output and the determination of the level of aggregate income; price level movements and factors underlying rates of economic growth; influence of applicable public policies.

**BE-307 Managerial Economics****Credits: 3**

Prerequisite(s): MA-118 or MA-125 and BE-201

Term Offered: All Terms

Course Type(s): None

Application of contemporary economic theory to managerial decisions and to public policy affecting such decisions.

**BE-356 Mergers and Acquisitions****Credits: 3**

Prerequisite(s): BF-301 Passed with a minimum grade of C

Term Offered: All Terms

Course Type(s): None

Mergers and acquisitions represent a major force in today's economy. M&A transactions take place in all industries and at all levels of the business life cycle-from acquisitions of startups to the merger of mature firms. This course provides students with a general understanding of the main M&A issues, including strategy, valuation methods, synergies, liquidity and control, and the steps in the M&A project -from the acquisition search until the post-merger integration. The course also includes special topics that vary per semester, such as hostile take-overs, LBOs (Leveraged Buyouts) and SPACs (Special Purpose Acquisition Companies). Also listed as BF-356.

**BE-388 Cooperative Education: Economics Concentration****Credits: 3**

Prerequisite(s): BF-301 or Junior standing, a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University

Term Offered: Spring Term

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course.

**BE-398 Special Topics in Economics (300 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study or a particular subject or problem in economics, to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BE-401 Development of Economic Thought****Credits: 3**

Prerequisite(s): BE-201 and BE-202

Course Type(s): None

Economic ideas from the beginning of Western civilization to the present, including mercantilist writers Adam Smith, Malthus, Ricardo, Marx, and Keynes.

**BE-403 Economic Growth and Development****Credits: 3**

Prerequisite(s): BE-201, BE-202, EN-101 and EN-102, or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

The principal theories, factors, and problems of economic development. Empirical case studies emphasize the growth patterns in several countries, the impediments to economic growth in the underdeveloped countries, and the need to sustain growth rates in highly developed countries.

**BE-440 Bond Markets****Credits: 3**

Prerequisite(s): BE-251 and BF-301

Term Offered: Spring Term

Course Type(s): None

A comprehensive review and analysis of the U.S. Bond Markets with emphasis on traditional fixed income securities and their derivative products and applications. The course will explore these studies from both a theoretical as well as practical perspective. Also listed as BF-440.

**BE-451 Public Finance****Credits: 3**

Prerequisite(s): BE-202 and BA-252

Term Offered: Spring Term

Course Type(s): None

An analysis of the revenue, expenditure, and debt activities of government and their effects on resource allocation, income distribution, price stabilization, and economic growth. Also listed as BF-451.

**BE-455 Financial Econometrics****Credits: 3**

Prerequisite(s): BE-201, BE-202, BE-251, and BF-301; MA-118 or MA-125 with a minimum grade of C.

Term Offered: All Terms

Course Type(s): None

Provides an advanced undergraduate level introduction to the methodology and tools of econometrics required by economics and finance professionals. Topics include: linear regression, time series modeling, capital asset pricing models, and volatility and correlation modeling. R and R Studio/Posit are used extensively in class. Instructor assumes students have no previous knowledge of R. Also listed as BF-455.

**BE-480 Business Research: Economics****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Active participation in a research project chosen by and currently being pursued by the faculty sponsor. Student activities may include but are not limited to: literature search, data collection, data analysis, preparation of a manuscript, and delivery of a manuscript.

**BE-488 Cooperative Education: Economics Concentration Credits: 3**

Prerequisite(s): BF-301 or junior standing, a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University

Course Type(s): None

An opportunity to apply classroom theory in practice through actual experience; includes both academic and experiential education.

Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course. Junior standing or BF-301; a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University are required to take this course.

**BE-489 Internship in Economics Credits: 3**

Term Offered: Spring Term

Course Type(s): EX1

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning.

Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. Departmental approval is required to take this course. This course is repeatable twice for credit. Junior standing and a minimum G.P.A. of 2.00 is required to take this course.

**BE-498 Special Topics in Economics (400 Level) Credits: 1-3**

Prerequisite(s): BE-251 and BF-301 both passed with a grade of B or higher

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in economics to be announced prior to registration, conducted on either a lecture-discussion or a seminar basis.

**BE-499 Independent Study in Economics Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**BF-200 Survey of Finance Credits: 3**

Prerequisite(s): Any math course with a level higher than 100

Course Type(s): None

Introduction to business and personal finance, including forms of businesses, financial statements and cash flows, time value of money, elements of risk and return and valuation of stocks and bonds. This course is for non-business majors.

**BF-289 Internship in Finance Credits: 3**

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning.

Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. This course is repeatable twice for credit. The student must have a minimum G.P.A. of 2.00 and have at least Junior standing to take this course. Departmental approval is required to take this course.

**BF-298 Special Topics in Finance (200 Level) Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in finance to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BF-301 Principles of Finance Credits: 3**

Prerequisite(s): BA-251, BE-201, and MA-117 or MA-126

Term Offered: All Terms

Course Type(s): None

Introduction to financial management and operations of business corporations, including: concepts of time-value of money, valuation and rate of return, risk management, financial statement analysis, asset valuation models, capital budgeting, and international financial management.

**BF-303 Real Estate Investment and Taxation Credits: 3**

Prerequisite(s): BF-310 or BR-310

Term Offered: Spring Term

Course Type(s): None

Designed to introduce students to the world of real estate finance, including debt and equity issues, securitization and taxation. Also listed as BR-303.

**BF-304 Money, Credit, and Financial Institutions Credits: 3**

Prerequisite(s): BE-202

Term Offered: All Terms

Course Type(s): None

Monetary economics and its institutions; the nature of and function of money; commercial and central banking; the money markets; financial intermediaries; and international monetary institutions. Also listed as BE-304.

**BF-310 Real Estate Appraisal Credits: 3**

Prerequisite(s): BF-301 passed with a grade of C- or higher

Co-requisite(s): MA-118

Course Type(s): None

Principles and processes of real estate valuation. The sales comparison, cost, and income approaches to value will be examined in depth.

**BF-323 Analysis of Financial Statements Credits: 3**

Prerequisite(s): BF-301 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

Reading, analysis, and interpretation of financial statements of industrial and commercial business enterprises and of utilities and transportation.

**BF-324 Principles of Working Capital Management Credits: 3**

Prerequisite(s): BF-301 passed with grade of C or higher

Course Type(s): None

Exposure to major corporate decisions in restructuring and managing working capital and assessing the risks and returns of corporate decisions.

**BF-341 Insurance and Risk Management Credits: 3**

Prerequisite(s): BF-301 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Principles and practices of insurance; the basic legal obligations and rights of the insurer and the insured in various types of contracts; types of carriers; internal and field organizations; government regulations and related subjects.

**BF-356 Mergers and Acquisitions****Credits: 3**

Prerequisite(s): BF-301 Passed with a minimum grade of C

Term Offered: All Terms

Course Type(s): None

Mergers and acquisitions represent a major force in today's economy. M&A transactions take place in all industries and at all levels of the business life cycle-from acquisitions of startups to the merger of mature firms. This course provides students with a general understanding of the main M&A issues, including strategy, valuation methods, synergies, liquidity and control, and the steps in the M&A project -from the acquisition search until the post-merger integration. The course also includes special topics that vary per semester, such as hostile take-overs, LBOs (Leveraged Buyouts) and SPACs (Special Purpose Acquisition Companies). Also listed as BE-356.

**BF-388 Cooperative Education: Finance Concentration****Credits: 3**

Prerequisite(s): BF-301 a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University

Term Offered: Spring Term

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course.

**BF-389 Internship in Finance****Credits: 3**

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. This course is repeatable twice for credit. Departmental approval is required to take this course. Junior standing and a minimum G.P.A. of 2.00 is required to take this course.

**BF-398 Special Topics in Finance (300 Level)****Credits: 1-3**

Prerequisite(s): BF-301, Minimum grade C

Term Offered: Fall Term

Course Type(s): None

An intensive study of a particular subject or problem in finance to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis.

**BF-399 Independent Study in Finance****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**BF-421 International Finance****Credits: 3**

Prerequisite(s): BE-202 and BF-301 both passed with a grade of C or higher; and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

A study of the organization and operations of international monetary relations. Analyzes the alternative methods of short- and long-run payment adjustments; foreign exchange markets and international flow of funds; and theories of international liquidity.

**BF-422 Investments****Credits: 3**

Prerequisite(s): BF-301 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Basic investment principles: Investment objectives, determinants of value of investment media, range of investments available, relative values of securities, and personal investment administration. Students who have already taken BF-322 cannot register for this course. Students must take the Bloomberg Certification along with this course.

**BF-431 Managerial Finance****Credits: 3**

Prerequisite(s): BF-301 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Financial analysis, techniques, and principles as applied to short- and long-range planning and control; capital budgeting for long-term projects; valuation; determination of the firm's cost of capital; and the trade-off between risk and profitability.

**BF-435 Derivatives****Credits: 3**

Prerequisite(s): MA-118 or MA-125 and BF-301, each passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Introduction to the complex subject of financial derivatives. Emphasis on the Black-Scholes and the Binomial Option pricing models, option strategies, and the use of options and futures to hedge risk.

**BF-440 Bond Markets****Credits: 3**

Prerequisite(s): BE-251 and BF-301

Term Offered: Spring Term

Course Type(s): None

A comprehensive review and analysis of the U.S. Bond Markets with emphasis on traditional fixed income securities and their derivative products and applications. The course explores these studies from both a theoretical as well as practical perspective. Also listed as BE-440.

**BF-451 Public Finance****Credits: 3**

Prerequisite(s): BE-202 and BA-252

Term Offered: Spring Term

Course Type(s): None

An analysis of the revenue, expenditure, and debt activities of government and their effects on resource allocation, income distribution, price stabilization, and economic growth. Also listed as BE-451.

**BF-452 Portfolio Management - Hawk Capital Student Fund****Credits: 3**

Prerequisite(s): BA-251, BE-251, and BF-301 all passed with a grade of B or higher, and a G.P.A. above 3.30

Term Offered: All Terms

Course Type(s): None

Provides a real-world security analysis and portfolio management experience. Students learn and apply state of the art investment techniques, methods and tools in an actual hands-on environment managing a real portfolio in an environment replicating that of a professional investment firm.

**BF-455 Financial Econometrics****Credits: 3**

Prerequisite(s): BE-201, BE-202, BE-251, and BF-301; MA-118 or MA-125 with a minimum grade of C.

Term Offered: All Terms

Course Type(s): None

Provides an advanced undergraduate level introduction to the methodology and tools of econometrics required by economics and finance professionals. Topics include: linear regression, time series modeling, capital asset pricing models, and volatility and correlation modeling. R and R Studio/Posit are used extensively in class. Instructor assumes students have no previous knowledge of R. Also listed as BE-455.

**BF-480 Business Research: Finance****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Active participation in a research project chosen by and currently being pursued by the faculty sponsor. Student activities may include but are not limited to: literature search, data collection, data analysis, preparation of a manuscript, and delivery of a manuscript. Students must have Junior status or higher, approval of the instructor, department chair, and the Associate Dean or the Dean in order to register for this course.

**BF-488 Cooperative Education: Finance Concentration****Credits: 3**

Prerequisite(s): BF-301 or Junior standing; minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University

Term Offered: Spring Term

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course. Junior standing or BF-301; a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University.

**BF-489 Internship in Finance****Credits: 3**

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. This course is repeatable twice for credit. Departmental approval is required to take this course. Junior standing and a minimum G.P.A. of 2.00 is required to take this course.

**BF-498 Special Topics in Finance (400 Level)****Credits: 1-3**

Prerequisite(s): BE-251 and BF-301 both passed with a grade of B or higher and a minimum G.P.A. of 3.30

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in finance to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis.

**BF-499 Independent Study in Finance****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**BR-298 Special Topics in Real Estate****Credits: 1-3**

Term Offered: Fall Term

Course Type(s): None

An intensive study of a particular subject or problem in real estate to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BR-301 Real Estate Law****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Legal issues as they apply to the acquisition, financing, and sale of real estate.

**BR-303 Real Estate Finance Investment and Taxation****Credits: 3**

Prerequisite(s): BF-301 passed with a minimum grade of C.

Term Offered: Spring Term

Course Type(s): None

Designed to introduce students to the world of real estate finance, including debt and equity issues, securitization and taxation.

**BR-304 Real Estate Lease Analysis****Credits: 3**

Prerequisite(s): BR-301

Term Offered: All Terms

Course Type(s): None

Examines concerned leasehold transactions, including office, industrial, retail, and general leases, while focusing on the respective roles of all relevant parties to the lease.

**BR-305 Real Estate Data Analysis****Credits: 3**

Prerequisite(s): BR-301 and BR-303 or BR-310

Term Offered: All Terms

Course Type(s): None

Develop an understanding of real estate markets, proforma financial modeling and data visualization currently used by real estate professionals in evaluating acquisition feasibility and development. Excel, Argus and GIS will be used to generate Decision Making Artifacts commonly used to evaluate risk and feasibility in the real estate industry. Prerequisites: BR-301 and BR-303 or BR-310

**BR-310 Real Estate Appraisal****Credits: 3**

Prerequisite(s): BF-301 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Principles and processes of real estate valuation. The sales comparison, cost, and income approaches to value will be examined in depth.

**BR-389 Internship in Real Estate****Credits: 1-3**

Term Offered: Summer Term

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; including both academic and experiential learning. The experiential portion involves fifteen to twenty hours of work experience per week for three credit hours, and the academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. Repeatable twice for credit. Departmental approval is required to take this course, along with Junior standing, and a minimum G.P.A. of 3.0

**BR-398 Special Topics in Real Estate****Credits: 1-3**

Term Offered: Fall Term

Course Type(s): None

An intensive study of a particular subject or problem in real estate to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BR-405 Real Estate Development****Credits: 3**

Prerequisite(s): BR-301 and BR-303 or BR-310

Term Offered: All Terms

Course Type(s): None

Designed to introduce students to the world of real estate development, including the regulatory environment, which must be navigated to successfully gain municipal and other governmental approvals for a land use project. Prerequisites: BR-301 and BR-303 or BR-310

**BR-489 Internship in Real Estate****Credits: 3**

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; including both academic and experiential learning. The experiential portion involves fifteen to twenty hours of work experience per week for three credit hours, and the academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. Repeatable twice for credit. Departmental approval is required to take this course. Junior standing, a minimum G.P.A. of 2.00, and instructor consent are required to register for this course.

**BR-498 Special Topics in Real Estate****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in real estate to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BR-499 Independent Study in Real Estate****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

Notes

- 54 credits must be completed at the 200 level or higher.
- Business majors are required to complete at least 50% of their major and concentration requirements at Monmouth University.

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Notes

- 54 credits must be completed at the 200 level or higher.
- Business majors are required to complete at least 50% of their major and concentration requirements at Monmouth University.

|                                                                              |            |
|------------------------------------------------------------------------------|------------|
| Complete 33 credits as outlined on the General Education table. <sup>2</sup> | 33         |
| <b>Total Credits</b>                                                         | <b>120</b> |

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

Notes

- 54 credits must be completed at the 200 level or higher.
- Business majors are required to complete at least 50% of their major and concentration requirements at Monmouth University.

| MA-117                                                                          | Quantitative Analysis for Business I                 | 3       |
| (MA-117 or MA-118 satisfies Mathematics in General Education)                   |                                                      |         |
| IT-150                                                                          | Information Technology for Business                  | 3       |

(Satisfies Technological Literacy (TL) in General Education)

### Free Electives (21 credits) <sup>1</sup>

Complete up to 21 credits of free electives. <sup>1</sup> 21

### General Education Requirements (33 credits) <sup>2</sup>

Complete 33 credits as outlined on the General Education table. <sup>2</sup> 33

**Total Credits** 120

<sup>1</sup> The number of free electives, if any, will be determined in consultation with your advisor.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Notes

- 54 credits must be completed at the 200 level or higher.
- Business majors are required to complete at least 50% of their major and concentration requirements at Monmouth University.

<sup>1</sup> Students can not take upper level Finance courses without BF-301 Principles of Finance (3 cr.).

## Note

- Not available to students majoring in Business Administration.

# Management and Leadership

Chair: Joseph McManus, Department of Management and Leadership

Within the Leon Hess Business School (<http://www.monmouth.edu/business-school/leon-hess-business-school.aspx>), students can pursue a number of academic degree programs ([http://www.monmouth.edu/registrar/UG\\_curriculum\\_charts/default.asp#business](http://www.monmouth.edu/registrar/UG_curriculum_charts/default.asp#business)), including those available in the Department of Management and Leadership.

The program prepares students for success through an effective contemporary business education. The program provides an education that helps to qualify its graduates for positions of leadership in both the private and public sectors. Curricula are developed, taught, and regularly updated by faculty members with strong academic and business experience. The faculty members stress the development of critical thinking, sophisticated communications skills, and a flexible managerial perspective.

Monmouth's program in management offers an interdisciplinary approach that prepares graduates to excel in a variety of management positions.

## Programs Majors

- B.S. in Business Administration with a Concentration in Operations, Supply Chain, and Data Management (p. 300)
- B.S. in Business Administration with a Concentration in Small Business Management and Entrepreneurship (p. 301)
- B.S. in Business Administration with a Concentration in Leadership and Organizational Development (p. 301)

## Minors

- Minor in Business Administration (p. 302)
- Minor in Entrepreneurship (<https://catalog.monmouth.edu/undergraduate-catalog/leon-hess-business/business-administration-entrepreneurship-minor/>)
- Minor in General Management (p. 303)

## Faculty

**John S. Buzza**, Senior Specialist Professor. B.S., Monmouth University; M.A., University of Phoenix. Primary interests include teaching, entrepreneurial endeavors, and philanthropic activities.  
[jbuzza@monmouth.edu](mailto:jbuzza@monmouth.edu)

**Edward Christensen**, Associate Professor (Graduate Faculty). A.S., George Washington University; B.S., Southern Illinois University; M.B.A., Ph.D., Rutgers University. Specializes in management information systems organization and administration, including the use of information technology to support decision-making and strategy.  
[echriste@monmouth.edu](mailto:echriste@monmouth.edu)

**Scott Jeffrey**, Associate Professor (Graduate Faculty). B.S.C., M.B.A., Santa Clara University; Ph.D., University of Chicago. Performs research on the use of incentives and goal setting in organizations. Particularly focuses on non-cash tangible incentives such as travel and merchandise.  
[sjeffrey@monmouth.edu](mailto:sjeffrey@monmouth.edu)

**Katie Manley**, Assistant Professor. B.S., Cornell University; Ph.D., Rutgers University.  
[kmanley@monmouth.edu](mailto:kmanley@monmouth.edu)

**Joseph McManus**, Associate Professor and Chair (Graduate Faculty). M.B.A., Pepperdine University; J.D., Rutgers University Law School, Camden; Ph.D., Rutgers University. Research interests include organizational misconduct, business ethics, corporate social responsibility, and social entrepreneurship.  
[jmcmanus@monmouth.edu](mailto:jmcmanus@monmouth.edu)

**Joseph Mosca**, Associate Professor (Graduate Faculty). B.A., M.A., Montclair State University; Ed.D., New York University. Primary specializations are human resource management, human relations, and active teaching methods. His current research interests focus on developing hybrid courses, employee behavior, and jobs of the twenty-first century.  
[mosca@monmouth.edu](mailto:mosca@monmouth.edu)

**Joseph Palazzolo**, Lecturer.  
[jpalazzo@monmouth.edu](mailto:jpalazzo@monmouth.edu)

**Stuart Rosenberg**, Professor (Graduate Faculty). B.A., Marquette University; M.A., University of Wisconsin-Madison; Ph.D., Fordham University. Research interests include case writing, managerial economics, and the relationship between management and culture.  
[srosenbe@monmouth.edu](mailto:srosenbe@monmouth.edu)

**Mikhail M. Sher**, Associate Professor (Graduate Faculty). B.S., Carnegie Mellon University; M.S., Columbia University; Ph.D., Drexel University. Main research interests lie in the areas of inventory control and supply chain management with a focus on optimal order policies and supply chain coordination. Secondary research stream is focused on application of decision sciences tools to accounting, marketing and service operations management.  
[msher@monmouth.edu](mailto:msher@monmouth.edu)

**Michaeline Skiba**, Associate Professor (Graduate Faculty). B.S., M.S., Loyola University; M.S., Boston College; Ed.D., Columbia University. Research interests include healthcare education, management challenges within managed care settings, social and behavioral issues associated with pharmaceutical promotions and marketing strategy, and general management  
[miskiba@monmouth.edu](mailto:miskiba@monmouth.edu)

**Charles Willow**, Associate Professor (Graduate Faculty). B.S., M.S., Hanyang University; M.S., Texas Tech University; Ph.D., University of Houston. Research interest includes Digital Business, Management Information System, and E-commerce, Web-based Information Technology, Technological Innovations Management, Technological Entrepreneurship, Intelligent Information Systems, Systems Modeling and Development, Robotics, and Digilog (Digital + Analog) Technology, among others.  
[cwillow@monmouth.edu](mailto:cwillow@monmouth.edu)

## Courses

### BM-198 Special Topics in Management

Credits: 1-3

Course Type(s): None

An intensive study of a particular subject or problem in management to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BM-200 Introduction to Business****Credits: 3**

Term Offered: All Terms

Course Type(s): None

An interdisciplinary view of the theory and practices of the components in business functions as they are contingent for the owner's success to seek out opportunities and avoid pitfalls. For non-Business majors only.

**BM-201 Survey of Management and Marketing****Credits: 3**

Prerequisite(s): BM-200

Term Offered: Spring Term

Course Type(s): None

An overview of the theories and practices of Management and Marketing and how they relate to businesses, the business environment, customers, employees, the global village, and compliance with rules, regulations and the law. For non-Business majors only.

**BM-210 A Survey of Entrepreneurship****Credits: 3**

Prerequisite(s): BA-200, BE-200, BF-200 BL-200 and BM-200

Course Type(s): None

An overview of the theories and practices that focus on the tasks and activities of the small business owner, from the concept to the reality of researching venture feasibility, financing the business, launching the business, and managing growth. For non-Business majors only.

**BM-225 Business Writing and Communication****Credits: 3**

Prerequisite(s): EN-101 and EN-102, or permission of the instructor

Term Offered: All Terms

Course Type(s): RD, WT

Designed for the future business professional. It introduces students to a variety of technical and business writing theories and practices relevant to business communications in the real world. The course will cover oral and written communication and how to make communication more effective.

**BM-250 Principles of Management and Organizational Behavior****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Management functions, including planning, organizing, staffing, directing, and controlling; the theory and practice as they are contingent on the behavior of people in organizations and on the organizational environment. Students must have a Sophomore or higher standing to take this course.

**BM-311 Management Data Analytics****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or better; IT-100 or IT-150; BE-251

Term Offered: All Terms

Course Type(s): None

The course provides an overview of data analytics and its use in supporting the decision making process for managers. The course emphasizes database management, data analytics, and data visualization processes and applications.

**BM-327 Ethics, Diversity, and Social Responsibility****Credits: 3**

Prerequisite(s): BM-250, BK-250, Junior standing and EN-101 and EN-102 or permission of the instructor

Co-requisite(s): BF-301

Term Offered: All Terms

Course Type(s): SJL, WT

Explores and applies alternative ethical and justice viewpoints to economic, political, and social problems inherent in contemporary business practice. Presents a focus on management with an increasingly diverse workforce and increasingly complex criteria for measuring organizational performance.

**BM-350 Operations Management****Credits: 3**

Prerequisite(s): BM-250

Co-requisite(s): BE-251

Term Offered: All Terms

Course Type(s): None

This course is an introduction to the concepts, principles, problems, and practices of operations management. Emphasis is placed on managerial processes for effective operations in both goods-producing and service-rendering organization with a specific focus on operations management applications to other functional business areas, such as finance, accounting, marketing and real estate. Topics include operations strategy, goods and service design, process design, capacity planning, facilities location and design, forecasting, production scheduling, inventory control, resource management, supply chain management, quality assurance, and project management.

**BM-351 Renewable Energy****Credits: 3**

Prerequisite(s): BM-250 or Permission of Instructor

Term Offered: All Terms

Course Type(s): None

Students will become acquainted with the promise of renewable energy to replace a significant portion of fossil fuels. Each renewable energy source (biomass, solar, wind, hydro, geothermal, ocean currents and waves, and nuclear) will be examined for their mutual advantages and disadvantages, their future role in satisfying energy needs of a modern society and in promoting sustainability in corporations.

**BM-388 Cooperative Education: Management Concentration****Credits: 3**

Prerequisite(s): BM-250, a minimum G.P.A. of 2.00 and completion of thirty credits, fifteen of which are earned at Monmouth University

Term Offered: Spring Term

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. May be repeated for credit. Departmental approval is required to take this course.

**BM-389 Internship in Management****Credits: 1-3**

Prerequisite(s): Junior standing, BM-250, BK-250, and a minimum G.P.A. of 2.00

Term Offered: Fall Term

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. Repeatable twice for credit.

**BM-398 Special Topics in Management (300 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in management, to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BM-399 Independent Study in Management****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**BM-402 Business Modeling and Analysis****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher and BM-350  
Term Offered: All Terms

Course Type(s): None

Decision-making within a business/management science framework; modeling of business systems/problems and the application of quantitative, statistical, and computer analyses.

**BM-403 Management of Technology****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher  
Term Offered: Spring Term

Course Type(s): None

The application of management to technology, response to technological organizational structure, and management's role to assess innovations and conflicts of change that affect society and business. Analysis of technical systems and understanding uses of technology.

**BM-404 Human Resources Management****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher  
Term Offered: All Terms

Course Type(s): None

Employment planning; job analyses, job descriptions, employee evaluations, and legal compliance; staffing and selection process; performance ratings; training and development; compensation and benefits; equal rights; and labor relations and topics relative to the management of human resources.

**BM-408 Logistics and Supply Management****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher and BM-350  
Term Offered: All Terms

Course Type(s): None

Logistics is an integrative activity uniting suppliers, providers of goods and services, and customers. It is also a global activity where the suppliers, providers, and customers may be located all over the world. In order to emphasize the global aspects of logistics and the impact of geopolitics on logistical systems, the course will focus on the logistics of energy transportation: primarily oil plus liquefied petroleum gases. This course will cover the differing perspectives of users (oil companies) and providers (tanker owning companies) and financial institutions that support providers. International efforts to deal with oil pollution and other forms of pollution from ships will be investigated. The role of trucks, railroads, airlines, and pipelines in domestic logistics will be described along with the role of containerization and intermodalism in global logistics. Supply chain management as practiced by a number of different companies will be covered via lecture and student presentations.

**BM-411 Business Data Management****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher, BE-251, BM-311, and Junior standing

Term Offered: Fall Term

Course Type(s): TPS

The objective of Business Data Management (BDM) is to engage the students with a broad introduction to and a basic understanding of the data lifecycle, from its generation, transformation, use, and retirement as a vital capability for conducting any profitable business operation. Emphasis is placed on gaining the ability to organize, process, distribute, and sift through high levels of data in order to make informed, timely, and accurate decisions. Outcomes are assessed through a series of analysis, design, and implementation of digital information systems, encompassing design/modeling, storage, retrieval, and visualization at a fundamental level.

**BM-423 Human Relations in Management****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher  
Term Offered: Spring Term

Course Type(s): None

Study of human relations in organizations with particular emphasis on leadership, changing work values, cross-cultural relations, legal compliance for conflict resolution, labor legislation.

**BM-424 Conflict Resolution and Negotiations****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher, BL-201, and Junior standing

Term Offered: Spring Term

Course Type(s): None

Designed to help students learn the fundamentals of negotiation processes. The course will be taught based upon weekly experiential cases whereby students will assume a role in a negotiation and negotiate with a partner.

**BM-427 Sustainability for Business****Credits: 3**

Prerequisite(s): BM-250 or Permission of Instructor

Term Offered: All Terms

Course Type(s): None

This course looks at the important area of sustainability and why it must be driven by businesses in order to have any chance of success. Many people believe sustainability to be a synonym for 'green' and that it only focuses on the environment. This is not accurate as true business sustainability also includes societal and economic factors, or what was called the "Triple Bottom Line" by John Elkington. Colloquially known as the 3 Ps or people, planet, and profit, business sustainability includes impact on societal stakeholders (consumer and employees), as well as profit which is necessary for a business to continue.

**BM-431 Behavioral Decision Making in Business****Credits: 3**

Prerequisite(s): BE-201 or BE-202, BE-251, BF-301, BM-250, BK-250; or permission of instructor.

Term Offered: All Terms

Course Type(s): None

Students are introduced to the increasingly relevant concept of behavioral economics and behavioral decision making. The course will cover normative, descriptive, and prescriptive decision making models and their relevance to management. Also discussed will be application of topics to business disciplines such as accounting, marketing, and finance.

**BM-432 Hospitality Management and Marketing****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher and BK-250  
Course Type(s): None

The goal of this course is to provide the student with an introduction into the hospitality industry and the basics of its many components. We will examine industry trends, the corporate profiles of industry leaders, and the various and diverse schools of thought that exist in the strategic management of hospitality, and, finally, detail all the opportunities that the hospitality industry affords graduates of secondary institutions.

**BM-451 Entrepreneurship****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher and BK-250  
Term Offered: All Terms

Course Type(s): None

The course builds the practical skills and knowledge needed to create and manage an entrepreneurial venture. Specifically the course develops students' capabilities to create a novel business concept, research venture feasibility, finance entrepreneurial ventures, and provides them with practical experience regarding the process of a formal launch of a venture.

**BM-456 Franchising****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

Explores the practical skills and knowledge needed to create and/or manage a franchise business from the perspective of both a franchisor and a franchisee. Specifically the course develops student capabilities to identify franchising opportunities, to plan and marshal the resources to operate a successful franchise, and to generate value through a franchise platform.

**BM-471 Global Management****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher, BK-250, and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

Management activities, processes, and procedures in directing an enterprise on a global basis, including the interplay of diverse, cultural environments.

**BM-481 Leadership and Team Development****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Designed to help students understand the basics of team functioning, when to use group and individual decision making, and how to manage teams effectively as an influential leader.

**BM-482 Small Business Management/Marketing****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher and BK-250

Term Offered: All Terms

Course Type(s): None

Examines the various approaches to running a business that has either been started previously by the Entrepreneurship class or been submitted to us for development and council.

**BM-483 Project Management****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

Project management is introduced from an applied managerial perspective with an emphasis on the behaviors, tools, and topics that managers will encounter throughout the life cycle of a project. The overall project phases of initiating, planning and design, executing, monitoring and controlling, and closing projects will be covered.

**BM-488 Cooperative Education: Management Concentration****Credits: 3**

Prerequisite(s): BM-250, a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course.

**BM-489 Internship in Management****Credits: 3**

Prerequisite(s): Junior standing, BM-250, BK-250, and a minimum G.P.A. of 2.00

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. Repeatable twice for credit.

**BM-490 Strategic Management****Credits: 3**

Prerequisite(s): BE-202, BF-301, and BM-350.

Co-requisite(s): BM-327.

Term Offered: All Terms

Course Type(s): EX5

Integrates all disciplines of undergraduate study in business administration; emphasizes analysis of real-world organizational problems and opportunities in the total enterprise; capstone approach to executive development.

**BM-498 Special Topics in Management (400 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in management to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BM-499 Independent Study in Management****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

| <b>Free Electives (21 credits) <sup>1</sup></b>                                              |                                                      |            |
| Select 21 credits of free electives <sup>1</sup>                                             |                                                      | 21         |
| <b>General Education Requirements (33 credits) <sup>2</sup></b>                              |                                                      |            |
| Complete 33 credits as outlined on the General Education table. <sup>2</sup>                 |                                                      | 33         |
| <b>Total Credits</b>                                                                         |                                                      | <b>120</b> |

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Notes

- 54 credits must be completed at the 200 level or higher.
- Business majors are required to complete at least 50% of their major and concentration requirements at Monmouth University.

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Notes

- 54 credits must be completed at the 200 level or higher.
- Business majors are required to complete at least 50% of their major and concentration requirements at Monmouth University.

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed

Notes

- 54 credits must be completed at the 200 level or higher.
- Business majors are required to complete at least 50% of their major and concentration requirements at Monmouth University.

## Marketing and International Business

Chair: Min Hua Lu, Department of Marketing and International Business

Within the Leon Hess Business School (<http://www.monmouth.edu/business-school/about-leon-b.-hess.aspx>), students can pursue a number of academic degree programs (<http://www.monmouth.edu/university/undergraduate-programs.aspx#business>), including those available in the Department of Marketing and International Business.

The program prepares students for success through an effective contemporary business education. The program provides an education that helps to qualify its graduates for positions of leadership in both the private and public sectors. Curricula are developed, taught, and regularly updated by faculty members with strong academic and business experience. The faculty members stress the development of critical thinking, sophisticated communications skills, and a flexible managerial perspective.

Students are primed for leadership through a comprehensive curriculum that prepares them to assume responsibility in every phase of marketing.

## Programs Majors

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

Notes

- 54 credits must be completed at the 200 level or higher.
- Business majors are required to complete at least 50% of their major and concentration requirements at Monmouth University.

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Notes

- 54 credits must be completed at the 200 level or higher.
- Business majors are required to complete at least 50% of their major and concentration requirements at Monmouth University.

## Sequence Chart

|                      |            |  |
|----------------------|------------|--|
| <b>Total Credits</b> | <b>120</b> |  |
|----------------------|------------|--|

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major

or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

Notes

- 54 credits must be completed at the 200 level or higher.
- Business majors are required to complete at least 50% of their major and concentration requirements at Monmouth University.

| BK-459                                    | Managerial Marketing <sup>1</sup>     |         |
| Total Credits                             |                                       | 18      |

<sup>1</sup> Students MUST complete the prerequisite courses before, which results in additional required credits.

Note

- Not available to students majoring in Business Administration.

# SCHOOL OF EDUCATION

Dean: Amy Gratch Hoyle, Ph.D.

Interim Associate Dean: Alex Romagnoli, Ph.D.

The School of Education (SOE) was established in 1995 to broaden and increase support for Monmouth University's education programs. The goal of the School is to provide highly effective programs to prepare practitioners who can help all students learn in diverse school settings. Candidates are mentored by a diverse faculty that models best practices grounded in evidence-based research. The School seeks to foster collaboration and partnerships among University faculty, students, staff, school practitioners, and community representatives to improve student achievement. Programs are rooted in the belief that all students can learn and are guided by four key themes:

1. the importance of both pedagogical and content knowledge with a commitment to lifelong learning,
2. an emphasis on collaboration and partnerships with schools and local communities,
3. the essential role played by cultural diversity and individual differences in the teaching/learning process, and
4. the need to develop educational leadership skills consistent with professional ethics.

The School of Education's mission is to be a leader in the preparation of highly competent, reflective professional educators (e.g., teachers, administrators, school counselors, speech-language pathologists, behavior analysts, student affairs specialists, and reading specialists) who have the knowledge, 21st century skills, and dispositions required to improve the teaching and learning of students in a highly pluralistic, democratic society. Toward this end, our candidates are prepared to serve students from diverse identities in terms of abilities, age, culture, ethnicity, family, lifestyle, and socioeconomic status.

The SOE programs emphasize state and national curriculum standards with research-based best practice designed to improve student learning and prepare P-12 students to be successful in the 21st-century global economy. Programs are designed to improve a candidate's critical thinking, communication, and problem-solving skills as they apply these core competencies to P-12 student learning. The School's programs also integrate state-of-the-art instructional technologies that can be applied in K-12 classrooms, school administrative practices and educational counseling. The School has its own computer lab and offers online, hybrid, and Web-enhanced courses.

## Curriculum and Instruction

Chair: Vecihi (Serbay) Zambak, Ph.D.

Programs are designed to provide a strong liberal arts or sciences background, a subject area major, a behavioral/social science sequence, and significant professional preparation for an elementary teacher (K-6), an elementary teacher with subject matter specialization (K-8), and a subject area (K-12) teacher.

Students with aspirations to earn certification as an elementary teacher are required to simultaneously complete the requirements of both the BA program in Education and one of the BA programs in Anthropology, Art, English, English/Creative Writing, Spanish, History, History/Political Science, Interdisciplinary Studies for Elementary Educators, or Political Science; or to simultaneously complete the requirements of both the BS program in Education and the BS program in Mathematics. Students in these programs will have two academic advisors—one in each department. Students can also choose to pursue a BA in Interdisciplinary Studies for Elementary Educators. Students in this program will have one academic advisor from the School of Education.

Students with career objectives to earn certification in a subject area, K-12, are required to simultaneously complete the requirements of both the BA program in Education and one of the BA programs in Art, English, English/Creative Writing, Spanish, History, History/Political Science, Music, or Political Science; or to simultaneously complete requirements of both the BS program in Education and one of the BS programs in Biology, Chemistry, Chemistry (physical science), Health/Physical Education, or Mathematics. Students will have two academic advisors—one in each department.

Students wishing to enhance their academic program and expand their education may choose an undergraduate endorsement:

- English as a Second Language (ESL);
- Teacher of Students with Disabilities (TSD);
- Middle School (5-8) Endorsement (available to Elementary K-6 majors in English, Math, Science, or Social Studies); or
- Early Childhood - P-3 (available to Elementary K-6 only).

One or more of these endorsements may be combined with a student's academic program.

## Internal Progression Requirements

Students must meet New Jersey State mandated progression requirements beginning an education program at Monmouth University. This will require students to have a 3.0 grade point average (GPA), achieve a passing score on the Praxis Core Academic Skills for Educators (CORE) (or achieve a score as regulated by the State of New Jersey that is "approximately equal to the top third percentile score for all test takers in the year the respective test was taken") and send a completed assessment of written and oral communication skills to the School of Education. Students must also complete the professional education components at Monmouth University and meet current standards of the Monmouth University School of Education and the New Jersey Department of Education. The program includes field experiences beginning in the sophomore year, increasing in intensity during the junior and senior years, and culminating in full-time clinical practice (i.e., student teaching) in the second semester of their senior year. Students are required to maintain a 3.0 GPA. Undergraduate students in the School of Education must receive a minimum grade of

"C" in all required Education courses. If a grade below "C" is earned, that course must be retaken and will follow the rules set forth in this catalog referencing "Repeating a Course (p. 62)".

Transfer students must have a minimum GPA of 2.75 and will have one semester of provisional status pending their attainment of a 3.0 GPA. Transfer students will be permitted to take one or two education courses as appropriate in the first semester. Transfer students may transfer a maximum of six (6) professional education credits from a two-year institution. Please refer to the *Internal Progression Requirements* in the paragraph above for additional State-mandated progression requirements.

Applications for clinical practice (student teaching) must be submitted to the Office of Certification, Field Placements, and School Partnerships for fall and spring placements. At this time, students are screened to ensure that they have met the academic and professional standards required for State certification. Students must pass the appropriate Praxis II examinations prior to student teaching and receive passing scores as a requirement for State certification. Candidates seeking Spanish or Chinese certification must also earn a passing score on the appropriate official Oral Proficiency Interview (OPI) prior to clinical practice. English as a Second Language (ESL) candidates must earn a passing score on the official English OPI and English Writing Proficiency Test (WPT) for certification.

## Programs Majors

- B.A. in Anthropology and Education with Endorsement in Elementary Education (p. 320)
- B.A. in Anthropology and Education with Endorsements in P-3 and Teacher of Students with Disabilities (p. 321)
- B.A. in Art and Education with Endorsement in K-12 Education in Art (p. 322)
- B.A. in Early Childhood Education and Teacher of Students with Disabilities (p. 324)
- B.A. in Early Childhood and Elementary Education and Teacher of Students with Disabilities (p. 325)
- B.A. in English and Education with Endorsement in Elementary Education (<https://catalog.monmouth.edu/undergraduate-catalog/education/curriculum-instruction/english-education-ba-endorsement-elementary-education/>)
- B.A. in English and Education with Endorsement in Secondary Education in English (p. 327)
- B.A. in English and Education with Endorsements in P-3 and Teacher of Students with Disabilities (p. 328)
- B.A. in English/Creative Writing and Education with Endorsement in Elementary Education (p. 329)
- B.A. in English/Creative Writing and Education with Endorsement in Secondary Education in English (p. 331)
- B.A. in English/Creative Writing and Education with Endorsements in P-3 and Teacher of Students with Disabilities (p. 332)
- B.A. in History and Education with Endorsement in Elementary Education (p. 333)
- B.A. in History and Education with Endorsement in Secondary Education in Social Studies (p. 335)
- B.A. in History and Education with Endorsements in P-3 and Teacher of Students with Disabilities (p. 337)
- B.A. in History/Political Science Interdisciplinary and Education with Endorsement in Elementary Education (p. 338)
- B.A. in History/Political Science Interdisciplinary and Education with Endorsement in Secondary Education in Social Studies (p. 339)
- B.A. in Interdisciplinary Studies for Elementary Educators (<https://catalog.monmouth.edu/undergraduate-catalog/education/curriculum-instruction/interdisciplinary-education-ba-endorsement-elementary-educators/>)
- B.A. in Music and Education with Endorsement in K-12 Education in Music (p. 341)
- B.A. in Political Science and Education with Endorsement in Elementary Education (p. 342)
- B.A. in Political Science and Education with Endorsement in Secondary Education in Social Studies (p. 343)
- B.A. in Spanish and Education with Endorsement in Elementary Education (<https://catalog.monmouth.edu/undergraduate-catalog/education/curriculum-instruction/ba-spanish-education-endorsement-elementary-education-spanish/>)
- B.A. in Spanish and Education with Endorsement in K-12 Education in Spanish (p. 345)
- B.S. in Biology and Education with Endorsement in Secondary Education in Biology (p. 346)
- B.S. in Chemistry and Education with Endorsement in Secondary Education in Chemistry (p. 348)
- B.S. in Chemistry and Education with Endorsement in Secondary Education in Physical Sciences (p. 350)
- B.S. in Health and Physical Education with an Education Endorsement in K-12 (p. 351)
- B.S. in Mathematics and Education with Endorsement in Elementary Education (<https://catalog.monmouth.edu/undergraduate-catalog/education/curriculum-instruction/mathematics-education-bs-endorsement-elementary-education-mathematics/>)
- B.S. in Mathematics and Education with Endorsement in Secondary Education in Mathematics (p. 353)

## Additional Endorsements Available Add-On to Elementary

- Teacher of Students with Disabilities (TSD) (p. 355)
- English as a Second Language (ESL) (p. 354)
- Middle School Endorsement (p. 355)
- Early Childhood - P-3 (p. 354)

## Add-On to Secondary

- Teacher of Students with Disabilities (TSD) (p. 356)
- English as a Second Language (ESL) (p. 354)

## Add-On to K-12

- Teacher of Students with Disabilities (TSD) (p. 356)
- English as a Second Language (ESL) (p. 354)

## Faculty

**Jason Fitzgerald**, Associate Professor. B.A., M.S., McDaniel College; Ph.D., University of Pittsburgh. Research focuses on civic and historical thinking processes, including the ethical implications of and practical needs for implementing action civics curricula in secondary and post-secondary education. Also interested in the ways that historical

authors' linguistic choices influence students' mental representations of history.

jfitzger@monmouth.edu

**Amy Hoyle**, Professor.

Dean. B.A., University of Michigan - Ann Arbor; M.A., Eastern Michigan University; Ph.D., University of North Carolina - Chapel Hill.

**Jiwon Kim**, Associate Professor (Graduate Faculty). B.A., Dong-Guk University; M.S., Case Western Reserve University; Ph.D., Purdue University. Research interests include social studies education and foundations of education with a specific focus on the philosophy of education.

jkim@monmouth.edu

**Ruth Morris**, Lecturer. B.S., Evangel University; M.Ed., Ed.D., Walden University. Professional interests include emergent and bilingual writing development, self-efficacy in writing development, and teacher leadership in early childhood.

rrkmorris@monmouth.edu

**Kerry Rizzuto**, Associate Professor and M.Ed. P3 Program Director (Graduate Faculty). M.A., Brooklyn College; Ed.D., Rowan University. Research interests include early childhood development with an emphasis on literacy, and developing culturally responsive pedagogical practices in pre-service and in-service teachers, while working with culturally and linguistically diverse children.

krizzuto@monmouth.edu

**Alex Romagnoli**, Associate Professor, M.A.T. Program Director and Chair, Special Education (Graduate Faculty). Interim Associate Dean, School of Education. B.S., M.Ed., East Stroudsburg University; Ph.D., Indiana University of Pennsylvania. Professional interests include multimodality, multiliteracies, graphic novels in academic contexts, and popular culture.

aromagno@monmouth.edu

**Michelle Schpakow**, Lecturer. B.A. Rider University; M.S., Mississippi State University; Ed.D., Liberty University. Overall research interests center around science education as it relates to preparation for STEM professions. Specifically, Dr. Schpakow is interested in the "gender gap" in science, students' attitudes toward science, and American science education programs ultimately leading to the development of scientific professionals.

mschpakow@monmouth.edu

**Lilly Steiner**, Associate Professor and M.S.Ed. Literacy Program Director (Graduate Faculty). B.A., University of Wisconsin; M.A., University of North Dakota; Ed.D., Boston University. Research interests include family literacy and creating strong home-school partnerships.

lsteiner@monmouth.edu

**Chiu-Yin Wong**, Professor, M.Ed. ESL Program Director (Graduate Faculty). B.A., Brigham Young University; M.A., Ph.D., Texas Tech University. Professional interests include English as a Second Language (ESL), second language pedagogy, and second language teacher education.

cwong@monmouth.edu

**Vecihi S. Zambak**, Associate Professor (Graduate Faculty).

Chair. B.S., M.S., Bogazici University, Istanbul, Turkey; M.S., University of Amsterdam; Ph.D., Clemson University. Research interests center around the development of pre-service mathematics teachers'

content knowledge in technology-driven learning environments with a focus on reasoning, justification, and proof.

vzambak@monmouth.edu

## Courses

### **ED-050 English as a Second Language Instruction for Undergraduate International Students** **Credits: None**

Term Offered: Spring Term

Course Type(s): None

This is a pass/fail course.

### **ED-101 Transition to College** **Credits: 1**

Term Offered: All Terms

Course Type(s): None

The identification and management of the academic and socio-emotional issues confronting the student during the transitional stage from secondary to post-secondary education. Permission of the instructor is required to take this course.

### **ED-250 Psychological and Philosophical Foundations of Education** **Credits: 3**

Term Offered: All Terms

Course Type(s): None

Enhances a teacher candidate's background in principles and practices of elementary and secondary education, including curriculum planning, assessment, procedures, instructional technology, culturally and linguistically diverse students, diverse learning needs, classroom management, core curriculum standards, and school organization. Relevant information about national and state standards will be addressed. Social, historical, political, psychological, and philosophical foundations of education are examined. Observation and participation in actual classroom procedures are required through structural experiences. Service learning hours required. Education majors only.

### **ED-299 Independent Study in Education** **Credits: 3**

Term Offered: Summer Term

Course Type(s): None

Independent research in education in an area not substantially treated in a regular course offering under the supervision of an education faculty member; written evaluation of the research is required. For students with superior ability. Prior permission of the directing professor and department chair is required to take this course.

### **ED-300 Education and Culture** **Credits: 3**

Term Offered: Spring Term

Course Type(s): ADS, GU

Offers students the opportunity to become immersed in educational, cultural, and historical contexts while exploring contemporary issues relevant to various countries or regions. Students will be introduced to cross-cultural issues within that country. They will expand their understanding of the focus country; especially its educational practices, as they gain an immersive experience related to education, history, culture, art, and literature through travel and through participating in volunteer work in a school setting. Students in this course examine another culture in order to gain experience which may transform not only their understanding of that culture, but the way in which they understand culture in general. Not open to freshmen. This course may be repeated once for credit. A minimum G.P.A. of 3.00 is required to take this course.

**ED-304 Social Studies and Literacy Methods for K-6****Credits: 3**

Prerequisite(s): EDL-326 and EDS-330.

Term Offered: Spring Term

Course Type(s): None

This course is designed to provide an interdisciplinary perspective and skills of teaching social studies from pre-kindergarten through grade 6, with an emphasis on literacy integration. Course content will teach how to cross disciplinary boundaries to promote social understanding and civic engagement and integrate knowledge, skills, and dispositions with authentic action, by emphasizing National Council for the Social Studies and the New Jersey Student Learning Standards for Social Studies, cross-curriculum integration, social problem solving, inquiry-based instruction, with a focus on disciplinary literacy. The essential elements of planning, instruction using technology, and assessment based on research and data are explored to teach culturally and linguistically diverse learners and students with diverse learning needs in social studies education.

**ED-305 Literacy, Science, and Social Studies Methods for Undergraduate P3 Students****Credits: 3**

Prerequisite(s): EDL-280 and EDL-333.

Term Offered: Spring Term

Course Type(s): None

This course is designed to provide an integrated perspective of teaching science and social studies to students in grades pre-kindergarten through grade 3. This course provides opportunities for experiential learning of interdisciplinary teaching methods with an emphasis on literacy integration. Following national and state standards for science and social studies, this course will utilize a diversity of instructional methods and strategies to provide each student with the opportunity to learn how to teach through inquiry and problem-solving. This course has a 50-hour field experience component.

**ED-315 Digital Media and Instructional Technology Skills for Teachers****Credits: 3**

Term Offered: All Terms

Course Type(s): TL

Aims to introduce teacher-candidates to computer science concepts and recent instructional technologies to support teaching and learning processes in K-12 classrooms. The course focuses on teacher-candidates' exploration and evaluation of technology-enhanced applications. Teacher-candidates learn how to use digital media, technologies, and interactive games to support their instructional strategies and student learning, enhance classroom management, aid formative and summative assessment techniques, and communicate professionally.

**ED-319 Content Literacy and Assessment****Credits: 3**

Prerequisite(s): ED-250; EN-101 and EN-102, Clinical Experience Hours Required, and a minimum G.P.A. of 3.00.

Term Offered: All Terms

Course Type(s): EX5, WT

Designed to focus on the development of students' reading, writing, and speaking skills as they are used in specific K-12 and secondary academic content areas, this course uses a backward design model to integrate discussions of assessment with content area literacy. It emphasizes the implementation of both teaching and learning strategies to develop K-12 students' gradual disciplinary language development, fostering their abilities to be independent learners and disciplinary communicators. The course includes research-based pedagogical strategies for teaching linguistically diverse students and teaching students with diverse learning needs. Limited to Education majors.

**ED-320 Teaching Emergent Multilinguals in an Inclusive Classroom****Credits: 3**

Prerequisite(s): ED-250, EN-101 and EN-102, and a minimum G.P.A. of 3.00.

Term Offered: All Terms

Course Type(s): RD, WT

This Writing Intensive course is offered to address issues and research-based pedagogical strategies of teaching Emergent Multilingual Students in today's mainstream classrooms. Teacher candidates will explore a variety of instructional strategies and develop cultural knowledge and its application in teaching Emergent Multilingual Learners. The course also includes incorporating instructional technology into the classroom, and utilizing data to inform instruction. Clinical Experience Hours Required. Education majors only.

**ED-327 Theories and Practice of ESL Instruction Part I****Credits: 3**

Prerequisite(s): ED-320 and a minimum GPA of 3.00

Term Offered: All Terms

Course Type(s): None

With an emphasis on teaching English as a Second Language through content, part one of this two-semester course will introduce the history of ESL teaching and critically explore exemplary curriculum designs and methods of teaching ESL. A wide range of ESL instructional materials, instructional technology, services, and assessment measures will be introduced and practiced, with an emphasis on standard-based content and ESL teaching. Both instructional design and implementation will be the focus for practice, with embedded language acquisition/learning theories and research studies carefully examined. Clinical Hours required. Education majors only.

**ED-328 Theories and Practice of ESL Instruction Part II****Credits: 3**

Prerequisite(s): ED-327 or ED-374, EN-442, and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

A continuation of ED-327 examines public issues pertinent to ESL education, with an emphasis on making connections between theories or research findings and classroom practice. More approaches to ESL instruction will be introduced with an emphasis on various strategies, techniques, and instructional technology for teaching specific language skills in a standard-based content and ESL teaching program. Reflective practice is an integral part. Clinical Hours required.

**ED-331 Music for the Child****Credits: 2**

Prerequisite(s): MU-151 and MU-218

Course Type(s): None

Focus on methods and materials of teaching in the elementary school (K-8): singing, rhythmic expression, listening, use of simple instruments, and correlating music with other areas of learning. It will include pedagogical strategies related to teaching linguistically diverse students, students with diverse needs, using instructional technology and using data to inform instruction. For Music majors only. Also listed as MU-331. Clinical Hours required.

**ED-333 The Teaching of Music in the Secondary School****Credits: 2**

Prerequisite(s): MU-151 and MU-218

Term Offered: Spring Term

Course Type(s): None

Study and application of appropriate concepts, methods, skills, and materials for secondary-school music teachers. It will include pedagogical strategies for teaching linguistically diverse students, those with special needs using instructional technology and using data to inform instruction. For Music majors only. Clinical Hours required. Also listed as MU-333.

**ED-336 Applied Linguistics for the Language Educator****Credits: 3**

Term Offered: Summer Term

Course Type(s): None

Designed to introduce students to the concepts of linguistics as related to bilingual education and the teaching of English as a second language. Students will also learn structural aspects of linguistics, including morphology (words), syntax (sentence patterns), semantics (the meaning of words), phonetics and phonology (the sounds of language), pragmatics (the way language works in the world), and English grammar. Students will gain familiarity with important theories, research, and how the English language works. Education majors only. Students must have a minimum G.P.A. of 3.00 to register for this course.

**ED-351 Methods of Teaching Art I****Credits: 3**

Prerequisite(s): AR-114, AR-116, AR-192, and ED-320 and a minimum G.P.A. of 3.00.

Term Offered: All Terms

Course Type(s): None

The history and philosophy of art education; the construction of art curricula and the exploration of teaching methods; media and tools appropriate for the educational level. Methods I deals with the needs of the elementary school child. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instruction. Clinical Hours required. Also listed as AR-351.

**ED-352 Methods of Teaching Art II****Credits: 3**

Prerequisite(s): ED-351 or AR-351 and Minimum G.P.A. of 3.0.

Term Offered: Spring Term

Course Type(s): None

The history and philosophy of art education; the construction of art curricula and the exploration of teaching methods; media and tools appropriate for the educational level. Methods II deals with the needs of the adolescent. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instruction. Clinical Hours required. Also listed as AR-352.

**ED-360 Methods of Teaching Mathematics in Grades P-6****Credits: 3**

Prerequisite(s): MA-205, EDL-326, and a minimum G.P.A. of 3.00.

Term Offered: All Terms

Course Type(s): None

ED-360 is designed to provide a profound understanding of the concepts taught in early childhood and elementary school mathematics. Teacher candidates participate in activities and learn interdisciplinary techniques to foster conceptual development of mathematics in young learners with literacy skills, as well as assess and remedy students' mathematical difficulties. The essential elements of instruction, assessment, grouping strategies, and effective questioning are illustrated and honed when planning mathematics lessons to address the instructional needs of diverse learners and students with disabilities. In this course, students learn cognitively guided instruction for mathematics, the eight mathematical teaching practices by NCTM, and how to implement them in the classroom. This course contains foundational knowledge that will be used during the clinical practice performance assessment. It will include research-based pedagogical strategies for teaching linguistically diverse students and those with special needs, using instructional and assistive technology, and using data to inform instruction. Clinical practice hours required.

**ED-361 Disciplinary Literacy and Methods of Teaching Elementary Science****Credits: 3**

Prerequisite(s): ED-320, EDL-326 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): EX5

This course is designed to provide an integrated perspective of teaching science from pre-kindergarten through grade 6. This course provides opportunities for experiential learning of interdisciplinary teaching methods with an emphasis on literacy integration. Active learning of science concepts will be achieved through various inquiry activities. Following the learning theories that have produced both the Next Generation Science Standards and the New Jersey Student Learning Standards for Science, this course will utilize a diversity of instructional methods and strategies to provide each student with the opportunity to learn how to teach inquiry and problem-solving across the sciences with a focus on disciplinary literacy and argumentation in science. This course has a 50 hour field experience component.

**ED-365 Methods of Teaching Mathematics at the Secondary Level****Credits: 3**

Prerequisite(s): ED-319 or EDL-327, and ED-320 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

ED-365 focuses on the teaching of secondary mathematics. It is intended to deepen future secondary school teachers' understanding of the secondary mathematics curriculum and build their competencies at the level of instructional implementation. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instructions. Essential elements of effective instruction, including inquiry-based learning, implementing tasks that promote reasoning and problem-solving, assessment, facilitating meaningful mathematical discourse, eliciting and using evidence of student thinking, grouping strategies and effective questioning are explored as these are techniques utilized to bring conceptual understanding of mathematics to all learners. Education majors only.

**ED-367 Methods of Teaching English at the Secondary Level****Credits: 3**

Prerequisite(s): ED-319 or EDL-327 and a minimum G.P.A. of 3.00, Education Majors Only

Term Offered: All Terms

Course Type(s): None

Provides in-depth preparation to teacher candidates desiring to teach English/Language Arts at the secondary level by extending the essential knowledge, skills, and strategies grounded in research and related to effective classroom instruction. Teacher candidates will have increased opportunities to apply theory and refine practices in the use of print and non-print texts and in the integration of the English Language Arts. New Jersey Professional Standards for Teachers (NJPSTs) will be an integral part of the course. Candidates are required to complete a 100 hour practicum in a local school. Education Majors Only.

**ED-369 Methods of Teaching Science at the Secondary Level Credits: 3**

Prerequisite(s): ED-319 or EDL-327 and a minimum G.P.A. of 3.00

Term Offered: Fall Term

Course Type(s): None

Science methods at the secondary level is designed for those with a background in science. The intent of this course is to provide an integrated perspective of teaching science from grade 7-12. This course will provide active learning of science concepts through various inquiry activities. Following the learning theories that have produced both the Next Generation Science Standards and the New Jersey Student Learning Standards for science, this course will utilize projects, cases, and problems in real world settings using a diversity of instructional methods and strategies to provide each student with the opportunity to learn how to teach inquiry and problem-solving across the sciences. Education majors only.

**ED-371 Methods of Teaching Social Studies at the Secondary Level Credits: 3**

Prerequisite(s): ED-319 or EDL-327 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

The course will introduce students preparing for middle and secondary level teacher certification to social studies curriculum and methods. Course content will emphasize national and state standards for social studies education across the traditional social science discipline. The course will also explore the philosophical and theoretical foundations of social studies education. It provides the candidate with practical strategies necessary for success in teaching culturally and linguistically diverse students and students with diverse learning needs, using instructional technology, research, and assessment data to inform instruction in the context of social studies.

**ED-374 Issues and Practices in World Language Education Part II Credits: 3**

Prerequisite(s): ED-320 and a minimum G.P.A. of 3.00

Term Offered: Fall Term

Course Type(s): EX5

Issues and practices in world language curriculum and instruction. Fieldwork required. Designed to expand future world language teachers' understanding of the complexities of the content-based instruction in curriculum design and strengthen their competencies with a focus on standard-based language instruction that addresses the national and state standards. A wide range of world language instructional materials, instructional technology, services, and assessment measures will be introduced and practiced. The experiential component of the course provides the students with opportunities for hands-on experiences for deepening understanding and strengthening competencies. For Education majors only. Clinical Practice hours required.

**ED-377 Integrated K-12 Teaching Methods Credits: 3**

Prerequisite(s): ED-319, ED-320 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

Deepens future K-12 school teachers' understanding of the complexities of the curriculum and builds their competencies at the level of instructional implementation in specific subject areas. Focuses on a broad spectrum of instructional methodologies and techniques that are workable in today's classroom. A constructivist approach to planning and instruction will be emphasized. The experiential component of the course provides the students with opportunities for clinical work in the classroom, strengthening competencies and deepening understanding. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instruction. Clinical Practice hours required. Education majors only.

**ED-378 Methods of Teaching Elementary Physical Education and Health Credits: 3**

Prerequisite(s): ED-320 either as a prerequisite or corequisite, and a minimum G.P.A. of 3.00

Term Offered: Spring Term

Course Type(s): HEPE

Focus on the planning, implementing, and assessing of competency-based physical education and skill-based health in elementary settings. Preservice teachers will learn pedagogical strategies related to teaching culturally and linguistically diverse students and students with diverse (special) needs in addition to using instructional technology, research-based best practices, and assessment data to inform instruction in elementary physical education and health. The course will utilize a lecture-based format and lab-based activities to prepare preservice teachers to develop physical literacy and health literacy for PreK-5 students. During lab-based activities, preservice teachers will plan and implement physical education and health lessons to peers and PreK-5 students. Clinical practice hours are required in accordance with New Jersey state statutes. Education majors only.

**ED-379 Methods of Teaching Secondary Physical Education and Health Credits: 3**

Prerequisite(s): ED-320 as either a prerequisite or corequisite, and a minimum G.P.A. of 3.00

Term Offered: Fall Term

Course Type(s): HEPE

Focus on the planning, implementing, and assessing of competency-based physical education and skill-based health in secondary settings. Preservice teachers will learn pedagogical strategies related to teaching culturally and linguistically diverse students and students with diverse (special) needs in addition to using instructional technology, research-based best practices, and assessment data to inform instruction in secondary physical education and health. The course will utilize a lecture-based format and lab-based activities to prepare preservice teachers to develop physical literacy and health literacy for 6-12 grade students. During lab-based activities, preservice teachers will plan and implement physical education and health lessons to peers and 6th-12th grade students. Clinical practice hours are required in accordance with New Jersey state statutes. Education majors only. Prerequisite: a minimum G.P.A of 3.00. Prerequisite or corequisite: ED-320.

**ED-380 Middle Level Learning and Teaching****Credits: 3**

Prerequisite(s): ED-250, ED-320 and a minimum G.P.A. of 3.00

Term Offered: Spring Term

Course Type(s): None

The candidate will examine aspects of middle-level schooling that are responsive to the nature and needs of adolescents. The candidate will apply knowledge of adolescents' cognitive and affective development to design learning environments and to structure and implement learning experiences that effectively promote academic achievement and personal growth for all middle-grade students. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instruction. Clinical Experience hours required.

**ED-398 Special Topics in Education (300 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in education to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. A minimum G.P.A. of 3.00 is required to take this course. If a prerequisite is required it will be announced in the course schedule.

**ED-399 Independent Study in Education****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent research in education in an area not substantially treated in a regular course offering under the supervision of an education faculty member; written evaluation of the research is required. For students with superior ability. Students must have a minimum G.P.A. of 2.75 to take this course, along with prior permission of the directing professor and department chair.

**ED-401 Literacy Assessment to Inform Instruction****Credits: 3**

Prerequisite(s): EDL-327.

Term Offered: All Terms

Course Type(s): None

Review of theory and research related to formal and informal assessment in P-6 literacy and its effects on teaching and learning will be explored. Focus will be on developing an assessment plan for use in the classrooms and instructional settings in which participants complete student teaching. Prerequisite: EDL-327 Corequisite: ED-406

**ED-402 Content Area Literacy and Assessment II****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Designed for secondary and K-12 education majors, this course reviews theory and research related to formal and informal assessment in content area literacy and its effects on teaching and learning will be explored. Focus will be on developing an assessment plan for use in the content area classroom and instructional settings in which participants complete student teaching.

**ED-406 Clinical Practice NEW****Credits: 6**

Term Offered: All Terms

Course Type(s): None

Clinical practice is a collaborative learning experience facilitated by local school districts and Monmouth University that provides teacher candidates with an opportunity to practice and refine their pedagogical knowledge and skills under the supervision and guidance of exceptional master teachers (P-12 clinical educators) and highly qualified Monmouth University clinical educators. This experience requires teacher candidates to plan, instruct, and assess P-12 students and to analyze student learning and propose changes to teacher practice to address student learning needs. This full-time, full-semester clinical practice in a school setting requires clinical interns to observe, plan, instruct, and assess P-12 students under the guidance of a cooperating teacher and university clinical educator and reflect on the impact of their instruction on P-12 students' academic performance. In addition to the full-time, full-semester experience in schools, clinical practice requires clinical interns to attend and fully participate in on-campus seminar focus groups and online activities. All aspects of the requirements are linked to the New Jersey Professional Standards for Teachers (NJPST), which are aligned to the InTASC standards. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom, and utilizing data to inform instruction. Limited to Education majors. A minimum cumulative GPA of 3.00 is required to take this course. Passing the appropriate state required teacher examinations, Senior standing, and approval of the department, are also required.

**ED-416 Clinical Practice****Credits: 8**

Term Offered: All Terms

Course Type(s): EX5

This full-time, full-semester clinical practice in a school setting requires clinical interns to observe, plan, instruct, and assess P-12 students collaborating with a cooperating teacher and university faculty. Clinical interns complete an edTPA portfolio and analyze their instruction and the effect on student achievement. In addition, there are on-campus seminars, focus groups and an online component. All aspects of the requirements are linked to the New Jersey Student Learning Standards (NJSLS) the NEW Jersey Professional Standards for Teachers (NJPST), and national Specialty Professional Association (SPA) standards. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instruction. Limited to Education majors. A minimum G.P.A. of 3.00 is required to take this course. Passing the appropriate state required teacher examinations, Senior standing, and approval of the department, are also required.

**ED-416S Clinical Practice Seminar****Credits: 1**

Term Offered: All Terms

Course Type(s): None

A one-credit seminar to be taken in conjunction with Clinical Practice. Education majors only. A minimum G.P.A. of 3.00 is required to take this course.

**ED-427 The Teaching of World Languages****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

This course is designed to prepare the World Language teacher candidate's understanding of the ACTFL performance guidelines and standards together with their application and assessment in the classroom. Various modes of teaching language will be explored including meaningful integration of the ACTFL 5 C's and Integrated Performance Assessments into each lesson. Professional development is explored and students must complete a professional Development Plan that includes joining professional affiliations. Preparation for the edTPA is included in this course with one lesson in the target language to be presented and videotaped in class for self and group assessment. This course will include pedagogical strategies related to teaching linguistically diverse students, students with diverse needs, using instructional technology and using data to inform instruction. These components provide the students with valuable pre-teaching experiences that will strengthen understanding of teaching strategies and capabilities. Also listed as FO-427. Clinical Hours are required.

**ED-428 Culturally and Linguistically Responsive Teaching****Credits: 3**

Prerequisite(s): ED-250 and a minimum G.P.A. of 3.00

Course Type(s): OL

Students will focus on two aspects of culturally and linguistically responsive and relevant instruction. The first aspect is the focus on equity and diversity and the second aspect concentrates on pedagogy for infusing culturally and linguistically responsive teaching into instruction. Professionals will engage in self-reflection related to racism and other forms of discrimination in order to better understand how identities and ideologies impact everyday school practices and the educational experiences of all students, especially those from culturally and linguistically diverse backgrounds. The course also includes incorporating instructional technology into the classroom and utilizing data to inform instructions.

**ED-498 Special Topics in Education (400 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in education to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. A minimum G.P.A. of 3.00 is required to take this course. If a prerequisite is required it will be announced in the course schedule.

**ED-499 Independent Study in Education****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Independent research in education in an area not substantially treated in a regular course offering under the supervision of an Education faculty member; written evaluation of the research is required. For students with superior ability. Prior permission of the directing professor and department chair and a minimum G.P.A. of 2.75 are required to take this course. Application must be filed before registration.

**EDL-280 Introduction to Early Childhood Education****Credits: 3**

Prerequisite(s): ED-250.

Term Offered: Spring Term

Course Type(s): None

This is an introductory course, which examines the historical, philosophical, and theoretical foundations of early childhood education. The course will cover major aspects of the physical, socio-emotional, and cognitive development of young children from birth to 8 years of age. The course addresses major theories and concepts of child development, early childhood ethics and professionalism, developmentally appropriate practice, diverse early childhood curriculum and programs, inclusion and special needs children, the use of technology, the use of data(formative and summative) to inform instruction, and home-school partnerships. The course covers the tenets of culturally responsive teaching in order to meet the needs of culturally and linguistically diverse children. Education Majors Only.

**EDL-325 Language and Early Literacy Development, Birth Through Kindergarten****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

This course, which involves a field experience, focuses on language development and early literacy of regular, special education, and young learners from culturally and linguistically diverse backgrounds, birth to kindergarten. The content includes the study of theories and acquisition of language development and sound awareness, the interrelated nature language development and literacy, the appropriate development and assessment of language and early literacy, using the results of the assessment and other formative and summative data to inform instruction, methods for engaging and motivating all young learners, the appropriate use of technology with young learners, and strategies for involving families and community members. Clinical Practice required. A minimum G.P.A. of 3.00 is required to take this course.

**EDL-326 Literacy Instruction in P-6 Educational Settings I****Credits: 3**

Prerequisite(s): ED-250.

Term Offered: All Terms

Course Type(s): None

This course focuses on the literacy development of regular and special education children, including those from linguistically diverse backgrounds in grades P-6. Students will develop the pedagogical content knowledge and command of strategies to teach early literacy skills, including phonics, phonemic awareness, vocabulary, reading comprehension, fluency, and concepts of print. Ongoing assessment and instructional strategies will be explored through various multicultural and diverse literature sets.

**EDL-327 Methods of Teaching Content Literacy Including ELA and Social Studies****Credits: 3**

Prerequisite(s): EN-101 and EN-102, and EDL-326.

Term Offered: All Terms

Course Type(s): WT

This course focuses on the literacy development (reading comprehension, writing, speaking, and listening) of general and special education children in Grades P-6 across the content areas. Using evidence-based strategies, candidates will plan, implement, and research techniques for supporting students' phonics, phonemic awareness, vocabulary, reading comprehension, and fluency with a variety of print and digital texts. In addition, they will engage in action research in the literacy classroom, expanding their repertoire of intentional strategy implementation. Ongoing assessment and instructional planning of modifications, accommodations will be explored in inclusive educational settings. Special attention is noted for students with special needs, including those with high incidence learning disabilities, dyslexia, and exceptional learners.

**EDL-333 Family Partnerships in Early Childhood Settings****Credits: 3**

Prerequisite(s): EN-101 and EN-102, ED-250, and a minimum G.P.A. of 3.00.

Term Offered: Fall Term

Course Type(s): WT

The course will cover the history and significance of family and community involvement in early childhood education: An overview of perspectives regarding family diversity, parent-professional partnerships and communication, early intervention and special education services, and the legal and ethical rights of diverse contemporary families of young children to foster an understanding of the significant roles of families and communities.' Contextual factors, social, cultural, racial, exceptionality, and environment, known to impact learning, will be addressed with an approach to develop the skills and knowledge needed for teachers to create positive working relationships with families and communities. This course includes research based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating appropriate instructional technology into the classroom, and utilizing data from formative and summative assessments to inform instruction. This course incorporates developmentally appropriate instructional technology into the classroom. Limited to Education majors.

**EDL-364 Early Childhood Capstone Research Seminar****Credits: 3**

Prerequisite(s): EDL-333 and EDL-280

Term Offered: All Terms

Course Type(s): None

This course will examine basic principles and current research on early childhood curricula. The focus of the course is on designing an integrated, developmentally appropriate curriculum in order to strengthen all aspects of all children's development, including cognitive, language, social, emotional, and physical capabilities. Students are required to conduct action research focusing on their teaching philosophy, practices, and research understandings as reflective practitioners based on their field work. The course will discuss the appropriate teaching methods that meet children's individual, and developmental needs, with an emphasis on culturally responsive teaching in order to address the needs of linguistically and culturally diverse students as well as any students who have special education needs. The use of technology in order to collect formative summative data will also be addressed. Additionally, the results of the assessment data collected to inform instruction will be addressed. The course will also focus on the importance of observation and authentic assessment in curriculum planning. The course will also address the use of creative play to support children's learning and development in early childhood settings, including the use of technology to support play and learning. Foundations of speech language development, including screening and support of students with speech/ language, articulation, and communication disorders. Clinical Practice hours required. A minimum G.P.A. of 3.00 is required to take this course. Prerequisites: EDL-333 and EDL-280

<sup>1</sup> Minimum grade of "C" required for Education Courses

<sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- Early Childhood Endorsement P-3
- ESL - English as a Second Language - Elementary
- MID - Middle School Social Studies
- TSD- Teaching Students with Disabilities

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> Minimum grade of "C" required for Education Courses.

<sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> Minimum grade of "C" required for Education Courses.

<sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- ESL - English as a Second Language - K-12
- TSD - Teacher of Students with Disabilities - K-12

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

Complete 21 credits as outlined on the General Education table. 21

**Total Credits 120**

<sup>1</sup> Minimum grade of "C" or higher for all Education courses

<sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- ESL - English as a Second Language - Elementary
- TSD - Teaching Students with Disabilities

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.

## Sequence Chart

<sup>1</sup> Minimum grade of "C" or higher for all Education courses

<sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

Additional Endorsements Available

- ESL - English as a Second Language - Elementary
- TSD - Teaching Students with Disabilities

Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.

<sup>1</sup> EN/ED-Secondary majors MUST take EN-474 Approaches to Composition Theory (3 cr.) to fulfill the above credits.

<sup>2</sup> Minimum grade of "C" required for Education Courses

<sup>3</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>4</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>5</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- ESL - English as a Second Language - Secondary
- TSD - Teacher of Students with Disabilities - Secondary

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).
- The English Department awards Departmental Honors to those graduating seniors who successfully complete a thesis, two designated courses beyond the standard major requirements, a 3.50 major GPA, a 3.30 overall GPA, and fulfillment of the World Languages requirement for English majors.

| General Education Requirements (30 credits) <sup>5</sup>                                                       |                                                                                              |     |

Complete 30 credits as outlined on the General Education table.<sup>5</sup> 30

**Total Credits 120-123**

<sup>1</sup> EN/ED majors **MUST** take EN-470 Theory and Practice of Writing (3 cr.) or EN-474 Approaches to Composition Theory (3 cr.) to fulfill the above credits.

<sup>2</sup> Minimum grade of "C" required for Education Courses

<sup>3</sup> Students must complete the appropriate test requirement(s) with a passing score **PRIOR** to Clinical Practice.

<sup>4</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>5</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).
- The English Department awards Departmental Honors to those graduating seniors who successfully complete a senior thesis, two designated courses beyond the standard major requirements, a 3.50 major GPA, a 3.30 overall GPA, and fulfillment of the World Language requirement for English majors.

<sup>1</sup> EN/ED majors MUST take EN-470 Theory and Practice of Writing (3 cr.) or EN-474 Approaches to Composition Theory (3 cr.) to fulfill the above credits.

<sup>2</sup> Minimum grade of "C" required for Education Courses.

<sup>3</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>4</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>5</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- P-3 Early Childhood Endorsement
- ESL - English as a Second Language - Elementary
- MID-EN - Middle School English

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).
- The English Department awards Departmental Honors to those graduating seniors who successfully complete a thesis, 2 courses beyond the standard major requirements, a 3.50 major GPA, a 3.30 overall GPA, and fulfill the intermediate language requirements.

<sup>1</sup> EN/ED-Secondary majors MUST take EN-474 Approaches to Composition Theory (3 cr.) to fulfill the above credits.

<sup>2</sup> Minimum grade of "C" required for Education Courses.

<sup>3</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>4</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>5</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- ESL - English as a Second Language - Secondary
- TSD - Teacher of Students with Disabilities - Secondary

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).
- The English Department awards Departmental Honors to those graduating seniors who successfully complete a thesis, 2 designated courses beyond the standard major requirements, a 3.50 major GPA,

a 3.30 overall GPA, and fulfillment of the World Language requirement for English majors.

**English Interdisciplinary Requirements (6 credits)**

Select 6 credits from the same World Language, any level  
2 6

*(Satisfies World Language requirement in General Education)*

**Education Interdisciplinary Requirements (6 credits)**

MA-205 Number Systems 3

MA-206 Algebraic Thinking, Probability and Statistics 3

*(Satisfies Mathematics (MA) in General Education)*

**Free Electives (3 credits)** 3

Select 3 credits of free electives. 3

**General Education Requirements (30 credits)** 4

Complete 30 credits as outlined on the General Education table. 4 30

**Total Credits 120**

<sup>1</sup> Minimum grade of "C" required for Education Courses.

<sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

**Notes**

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to maintain a cumulative GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).
- The English Department awards Departmental Honors to those graduating seniors who successfully complete a senior thesis, two designated courses beyond the standard major requirements, a 3.50 major GPA, a 3.30 overall GPA, and fulfillment of the World Language requirement for English majors.

<sup>1</sup> At least HS 6 credits at the 300-400 level, excluding HS 461.

<sup>2</sup> Excluding HS-201 United States History I (3 cr.) and HS-202 United States History II (3 cr.)

<sup>3</sup> Minimum grade of "C" required for Education Courses. Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>4</sup> May be fulfilled within the major/interdisciplinary requirements; see your academic adviser.

<sup>5</sup> Please consult with your advisor regarding the required number of free electives.

<sup>6</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- P-3 Early Childhood Endorsement
- ESL - English as a Second Language - Elementary
- TSD- Teaching Students with Disabilities
- MID-SS - Middle School Social Studies and/or Humanities

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have maintain a cumulative GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> Minimum grade of "C" required for Education Courses.

<sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- TSD - Teacher of Students with Disabilities - Secondary
- ESL - English as a Second Language - Secondary

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> Excluding HS-201 United States History I (3 cr.) and HS-202 United States History II (3 cr.). Among these requirements, at least 6 credits must be from the 300-400 level excluding HS-461 Research Seminar in History.

<sup>2</sup> Minimum grade of "C" required for Education Courses.

<sup>3</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>4</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>5</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

| Complete 27 credits as outlined on the General Education table. <sup>4</sup> | 27         |
| <b>Total Credits</b>                                                         | <b>120</b> |

<sup>1</sup> Minimum grade of "C" required for Education Courses

<sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

**Additional Endorsements Available**

- P-3 Early Childhood Endorsement
- ESL - English as a Second Language - Elementary
- TSD - Teaching Students with Disabilities
- MID-SS - Middle School Social Studies and/or Humanities

**Notes**

- 54 credits must be completed at the 200 level or higher.
- All education majors must have and maintain a 3.00 cumulative GPA to enter and throughout the program per state guidelines.

<sup>1</sup> Minimum grade of "C" required for Education Courses

<sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- ESL - English as a Second Language - Secondary
- TSD - Teacher of Students with Disabilities - Secondary

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> MU-329 Conducting II (2 cr.) required for MU/ED majors. See Education Methods Requirements

<sup>2</sup> Combinations of instruction must be approved by an advisor

<sup>3</sup> Minimum grade of "C" required for Education Courses

<sup>4</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>5</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>6</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- ESL - English as a Second Language - Secondary
- TSD - Teacher of Students with Disabilities - Secondary

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> Minimum grade of "C" required for Education Courses

<sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- ESL - English as a Second Language - Elementary
- P-3 Early Childhood Endorsement
- TSD - Teaching Students with Disabilities
- MID-SS - Middle School Social Sciences and/or Humanities

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> Minimum grade of "C" required for Education Courses

<sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education courses must be completed.

## Additional Endorsements Available

- TSD - Teacher of Students with Disabilities - Secondary
- ESL - English as a Second Language - Secondary

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> In 300+ level courses it is presumed that the student has taken 202 (Intermediate) or been placed into the 300 level through the world languages placement exam, to ensure adequate communicative facility in the world language.

<sup>2</sup> A native speaker may be exempt from taking FS-300A Advanced Spanish Conversation and Oral Discourse (3 cr.) upon consultation with the Chair of the Department. The student may substitute any FS-300+ course to fulfill the three credits.

<sup>3</sup> Minimum grade of "C" Required for all Education courses.

<sup>4</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>5</sup> These courses are taken in addition to the General Education requirements. Courses taken in these areas that fulfill General Education requirements will not also fulfill the Interdisciplinary Requirements for the Major.

<sup>6</sup> Subject EN: some exclusions apply, contact the department for guidance.

<sup>7</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>8</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

Additional Endorsements Available

- TSD - Teacher of Students with Disabilities - K-12
- ESL - English as a Second Language - K-12

Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

|                      |                |
|----------------------|----------------|
| <b>Total Credits</b> | <b>120-121</b> |
|----------------------|----------------|

<sup>1</sup> BY-102 Applications in Biotechnology (3 cr.), BY-104 Human Biology (3 cr.), BY-105 Introductory Biology and Human Development (3 cr.), and BY-106 The Brain - Highs and Lows (3 cr.) are not available to BY majors.

<sup>2</sup> Minimum grade of "C" required for Education Courses

<sup>3</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>4</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>5</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

**Additional Endorsements Available**

- TSD - Teacher of Students with Disabilities - Secondary
- ESL - English as a Second Language - Secondary

**Notes**

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> Students desiring certification by the ACS should enroll in the BS CE ACS program

<sup>2</sup> Minimum grade of "C" required for Education Courses

<sup>3</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>4</sup> Please consult with your advisor regarding the number of free electives that must be completed.

<sup>5</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

<sup>6</sup> Students can take MA-125 in place of MA-116.

## Additional Endorsements Available

- TSD - Teacher of Students with Disabilities - Secondary
- ESL - English as a Second Language - Secondary

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> Students desiring certification by the ACS should enroll in the BS CE ACS program

<sup>2</sup> Minimum grade of "C" required for Education Courses

<sup>3</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>4</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>5</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education courses (p. 45) must be completed.

## Additional Endorsements Available

- TSD - Teacher of Students with Disabilities - Secondary
- ESL - English as a Second Language - Secondary

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> Of those 6 courses, at least 1 must be designated as "individual", at least 1 must be designated as "dual", and at least 1 must be designated as "team".

<sup>2</sup> Minimum grade of "C" required for Education courses.

<sup>3</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>4</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>5</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- ESL - English as a Second Language - K-12
- TSD - Teacher of Students with Disabilities - K-12

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> Minimum grade of "C" required for Education courses

<sup>2</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Additional Endorsements Available

- TSD - Teacher of Student with Disabilities - Secondary
- ESL - English as a Second Language - Secondary

## Notes

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

# Educational Counseling and Leadership

## Faculty

**Stephanie Bobbitt**, Assistant Professor (Graduate Faculty). B.S., S.U.N.Y. College of Environment Science and Forestry; M.S., The College of Saint Rose; Ph.D., Western Michigan University.  
sbobbitt@monmouth.edu

**Steven Carlo**, Assistant Professor. B.A., Florida International University; M.S., Nova Southeastern University; Ph.D., University of Florida.  
scarlo@monmouth.edu

**William George**, Assistant Professor and Ed.D. Program Director (Graduate Faculty). B.S., Michigan State University; M.A., Ohio State University; M.S., Monmouth University; Ed.D., Seton Hall University.  
wgeorge@monmouth.edu

**Tina Paone**, Professor (Graduate Faculty). B.A., University of Tampa; M.A., Ph.D., University of Nevada, Reno. Areas of professional interest include school counseling, group counseling, diversity, and play therapy.  
tpaone@monmouth.edu

**Alyson Pompeo-Fargnoli**, Associate Professor and Educational Counseling Program Director (Graduate Faculty). B.A., M.A., The College of New Jersey; Ph.D., Montclair State University. Areas of professional interest include college and wellness counseling, secondary to post secondary partnerships, and diversity and social justice initiatives.  
apompeof@monmouth.edu

**Nicole Pacheco Pulliam**, Associate Professor (Graduate Faculty). B.A., Ramapo College of New Jersey; M.A., Ph.D., Montclair State University. Professor interests include college student development, first generation college students, and career development.  
npulliam@monmouth.edu

**Vernon Smith**, Associate Professor, Chair, and M.S.Ed. School Counseling Program Director (Graduate Faculty). B.A., Judson College; M.S., Northern Illinois University; Ph.D., University of South Florida. Research centers around empowering young Black males. He has presented scholarly papers at international, national, state and local conferences on topics such as: parent involvement factors from the perspectives of academically successful Black male college students; exploring best practices for effectively serving and retaining African American college students impacted by trauma; student retention; family influence on student development; and the impact of cultural trauma on African Americans.  
vsmith@monmouth.edu

**Lewis Thomas III**, Assistant Professor. B.S., Lincoln University; M.A., Antioch University; Ph.D., Purdue University.

## Courses

**EDL-398 Special Topics in Educational Leadership** Credits: 3

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in education to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. A minimum G.P.A. of 3.00 is required to take this course. If a prerequisite is required it will be announced in the course schedule.

**EDL-499 Independent Study in Educational Leadership** Credits: 1-3

Course Type(s): None

Independent research in educational leadership in an area not substantially treated in a regular course offering under the supervision of an Educational Leadership faculty member; written evaluation of the research is required. For students with superior ability. Prior permission of the directing professor and department chair is required to take this course. Application must be filed before registration.

## Special Education

Interim Chair: Ai Kamei, Department of Special Education  
Graduate Program Director: Carol McArthur-Amedeo

The programs in teacher preparation, link research and practice by ensuring candidates have the opportunity to work with students, teachers, and school leaders in a wide range of local school, university, and community settings. They are designed to instill a commitment to lifelong learning. Undergraduate and graduate teacher education candidates must complete an approved content area major (e.g., Art, Biology, English, Spanish, History, Mathematics) or equivalent to be recommended for the Early Childhood, Elementary, or Content Teaching Credential in New Jersey.

## Faculty

**Danielle Frith**, Specialist Professor. B.S., Monmouth University; M.A., Rider University; ABD, Temple University.  
dfrith@monmouth.edu

**Wendy Harriott**, Associate Professor (Graduate Faculty). B.S., Bloomsburg University; M.S., Marywood College; Ph.D., Pennsylvania State University. Professional interests include special education, behavior management, and inclusive education.  
wharriot@monmouth.edu

**Mary Haspel**, Associate Professor. B.A., M.A., The Catholic University of America; Ph.D., West Virginia University. Applied Behavior Analysis, Autism, education policy.  
mhaspel@monmouth.edu

**Ai Kamei**, Associate Professor and Interim Chair (Graduate Faculty). B.A., M.S., Osaka Kyoiku University, Japan; Ph.D., The University of North Carolina at Greensboro.  
akamei@monmouth.edu

**Stacy Lauderdale-Littin**, Professor (Graduate Faculty). B.S., Clemson University; M.A., California State University, Northridge; Ph.D., BCBA-D, University of California, Riverside. Professional interests include autism spectrum disorders (ASD), teacher implementation of evidence-based practices for students with ASD, and student-teacher relationships.  
slauderd@monmouth.edu

**Kathryn Lubniewski**, Professor. B.S., M.A., Ed.D., West Virginia University. Professional interests include collaboration, differentiated instruction, and technology as it relates to special education.  
kservili@monmouth.edu

**Carol McArthur-Amedeo**, Senior Lecturer, Assistant Department Chair and M.S.Ed. Special Education Program Director. M.A., Fairleigh Dickinson University; Ed.D., Rutgers University. Professional interests include teacher retention in special education, science education, and students with emotional and behavioral disabilities.  
cmcarthu@monmouth.edu

## Courses

**EDS-330 Foundations of Special Education: Child & Adolescent Development and Transition to Adulthood** **Credits: 3**

Prerequisite(s): ED-250 and a minimum G.P.A. of 3.00.

Course Type(s): None

Philosophical, historical, and legal foundations of special education. The Council of Exceptional Children (CEC) Code of Ethics and Standards for Practice are studied. Exploration of the similarities and differences among the cognitive, physical, cultural, social, and emotional development and needs of individuals with disabilities across the lifespan, including adolescent concerns and transition to adulthood. Examination of the educational implications of characteristics of various exceptionalities such as Autism Spectrum Disorders (ASD), Specific Learning Disabilities (SLD), ADHD, intellectual & developmental disabilities, emotional disabilities, and orthopedic impairment. Educational implications for learners from diverse cultures and second language learners will also be addressed through discussions on family characteristics and family systems theory. An overview of a continuum of service delivery models will be explored with implications for various learners. Education majors only. Clinical hours required.

**EDS-332 Family/School/Community Partnerships and Resources, P-12** **Credits: 3**

Prerequisite(s): ED-250 and EDS-330;

Term Offered: All Terms

Course Type(s): None

Focus on the legal and historical perspectives of family involvement in special education. Family systems theory and parent-professional partnerships in decision making are included for all learners, P-12. Identifying appropriate community resources for persons with and without disabilities and their families and strategies for transition and career planning are addressed. Education majors only. A minimum GPA of 3.00 is required to take this course.

**EDS-336 Classroom Management** **Credits: 3**

Prerequisite(s): EDS-330 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

The study and application of various theories of behavior management for students with and without disabilities. Practical application of theories for classrooms are included. Addressing social competence skills and facilitating positive interpersonal relationships in classrooms are discussed. Clinical Experience hours required. Education majors only.

**EDS-337 Special Education Strategies in P-6 Social Studies and Content Instruction Credits: 3**

Prerequisite(s): EDS-330, EDS-336, EDS-338 and EDS-350

Term Offered: All Terms

Course Type(s): None

Course content includes the development of educational programs and applications of social studies and content area curricula, methods, and materials appropriate for the strengths and needs of all students, including those with disabilities, in inclusive settings in P-6 schools.

Course content will emphasize national and state standards for social studies education, cross-curriculum integration, particularly world languages and culture, personal and social problem solving, and situated cognition in social studies education learning. The essential elements of planning, instruction using technology, and assessment based on research and data are explored to teach students, including those with disabilities. Focus on identifying and creating adaptations to support students with difficulty learning in inclusive classrooms. Education majors only. A minimum GPA of 3.0 is required to take this course. Clinical hours required.

**EDS-338 Assessment Approaches, P-12 Credits: 3**

Prerequisite(s): EDS-330 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

An introduction to the use of assessment in making decisions about instructional grouping, exceptionality, eligibility, and educational programming. Students in this course will learn about ethical standards for professional practice and standardized and teacher-developed assessment procedures. Practice is provided in using assessment data to make decisions about placement in a curriculum, pupil progress, appropriate measurable long-term goals and short-term instructional objectives, and selection of instructional strategies. The importance of parent participation in decision-making is included. Use of formal and informal assessment strategies are included. Education majors only.

**EDS-342 Instructional Methods and Materials for Students with Disabilities Credits: 3**

Prerequisite(s): EDS-330, EDS-336, EDS-338, and a minimum G.P.A. of 3.00

Term Offered: Spring Term

Course Type(s): None

Study and application of research-based methods, curriculum, and materials for students with disabilities. Focus on identifying and creating accommodations and modifications to meet the needs of all students in special education and inclusive settings. Includes pedagogy that is applicable to teaching literacy to struggling readers and students with disabilities, including literacy in the content areas. Clinical hours required. Education majors only.

**EDS-350 Individualizing Curricula and Systematic Instruction for Special Education Credits: 3**

Prerequisite(s): EDS-330 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

The development and application of research-based, effective teaching techniques, necessary adaptations, and supports to meet the learning needs of exceptional students, prescriptive models for intervention, and ways of observing, recording, and responding to behaviors. Clinical Experience hours required. Education majors only.

**EDS-352 Curricula, Methods, and Materials for Learners with Difficulties Credits: 3**

Prerequisite(s): EDS-330, EDS-336, EDS-338 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

The development of educational programs and applications of curricula, methods, and materials appropriate for the strengths and needs of all students with disabilities and/or difficulties in special education and inclusive settings. Focus on identifying and creating adaptations to support students with difficulty learning in classrooms. Clinical Hours required. Education majors only.

**EDS-398 Special Topics in Special Education Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in education to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. A minimum G.P.A. of 3.00 is required to take this course. If a prerequisite is required it will be announced in the course schedule.

**EDS-399 Independent Study in Special Education Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study in special education in an area not substantially treated in a regular course offering under the supervision of a special education faculty member; written evaluation of the research is required. For students with superior ability. Students must have a minimum G.P.A. of 2.75 to take this course, along with prior permission of the directing professor and department chair.

**EDS-499 Independent Study in Special Education Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Independent research in education in an area not substantially treated in a regular course offering under the supervision of an Education faculty member; written evaluation of the research is required. For students with superior ability. Prior permission of the directing professor and department chair is required to take this course. Application must be filed before registration.

# Speech-Language Pathology

Chair: Patrick Walden, Department of Speech-Language Pathology

Students with a bachelor's degree in a discipline other than Speech-Language Pathology or Communication Sciences and Disorders will be required to complete eighteen credits of prerequisite course work. Comparable courses taken at another institution with a grade of B or better may be accepted.

Monmouth University's required prerequisite courses can be reviewed on the Communication Sciences and Disorders minor, which is accessible from the programs tab.

## Programs Minor

- Communication Sciences and Disorders (p. 361)

## Faculty

**BeckyAnn Harker**, Assistant Professor. B.A., Ohio University; M.A., Case Western Reserve University; Ph.D., Kent State University.  
bharker@monmouth.edu

**Ashley McCarthy**, Specialist Professor. B.S., Richard Stockton University; M.S., Seton Hall University.  
amccarth@monmouth.edu

**Susan Pattay**, Assistant Professor. B.A., James Madison University; M.A., Rutgers University, LaSalle University; Ed.D., Vanderbilt University.  
spattay@monmouth.edu

**Erik Raj**, Associate Professor (Graduate Faculty). B.S., Stockton University; M.S., Misericordia University; Ph.D., Wayne State University. Research interests include stuttering and clinical applications.  
eraj@monmouth.edu

**Patrick Walden**, Associate Professor and Chair (Graduate Faculty). B.A., Florida State University; M.A., New Mexico State University; EDS, Ph.D., Florida Atlantic University.

## Courses

### SLP-201 Introduction to Communication Sciences and Disorders

**Credits: 3**

Term Offered: All Terms

Course Type(s): HE,EL

Provides an overview to the fields of speech-language pathology, audiology, and education of the hearing impaired. Will provide information regarding the nature, etiology, symptom, and remediation of organic and neurogenic disorders of speech, language, and hearing. Additionally, this course will provide an overview of various speech, language, and hearing disorders: the factors related to the causes and severity of these disorders and roles of professionals associated with the diagnosis and severity of these disorders and roles of professionals associated with the diagnosis and treatment, specifically speech-language pathologists and audiologists.

### SLP-202 Introduction to Language Development

**Credits: 3**

Term Offered: All Terms

Course Type(s): HE,EL, OL

Provides an overview of the development of language over the course of the lifespan. An introduction to the normal acquisition of language including the components of language, as well as the physical, social, and cognitive basis for language. Theories of language development and how language evolves from infancy to adulthood will be discussed. Cultural influences on language development will also be explored.

### SLP-298 Special Topics in Speech-Language Pathology

**Credits: 3**

Course Type(s): None

An intensive study of a particular subject or problem in Speech, Language and Pathology to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. A minimum G.P.A. of 3.00 is required to take this course. If a prerequisite is required it will be announced in the course schedule.

### SLP-301 Introduction to Phonetics

**Credits: 3**

Term Offered: All Terms

Course Type(s): OL

Provides students with the skills needed to produce, transcribe and describe in articulatory terms, the individual sounds used in speech. Will provide an introduction to sound patterns, phonetic transcriptions using the International Phonetic Alphabet, acoustic aspects of phonetics and the application of these skills to clinical practice. Dialects and derivations of the English language will be explored.

### SLP-302 Anatomy and Physiology of Speech and Hearing

**Credits: 3**

Term Offered: All Terms

Course Type(s): OL

Provides an understanding of the anatomical structures, as well as the physiological and functional mechanisms essential for speech production. Specifically, the anatomy and physiology of respiration, phonation, articulation, resonance, and hearing will be covered in depth.

### SLP-303 Neurological Bases of Speech and Language

**Credits: 3**

Prerequisite(s): SLP-201

Term Offered: Spring Term

Course Type(s): OL

Students will learn the neuroanatomical and neurophysiological underpinnings of speech, language and hearing and will study how the nervous system controls communication. Additionally, the course will examine the cranial nerves and the circuits underlying sensory perception, motor action, and cognition as they relate to speech production and hearing.

### SLP-304 Observation Skills in Speech, Language, and Hearing Disorders

**Credits: 1**

Prerequisite(s): SLP-201

Term Offered: All Terms

Course Type(s): OL

Provides students the opportunity to learn clinical and professional knowledge and skills through direct, guided observation of speech-language pathology practice. Prerequisite: SLP-201

### SLP-389 Internship in Speech, Language and Pathology

**Credits: 1-3**

Term Offered: Spring Term

Course Type(s): EX1

Supervised practical experience in Speech, Language and Pathology; repeatable for credit. Departmental approval and Junior standing is required to take this course.

**SLP-401 Speech and Hearing Science****Credits: 3**

Prerequisite(s): SLP-301 and SLP-302

Term Offered: All Terms

Course Type(s): None

Studies the nature of sound, sound transmission, and units of measurement necessary to understand the physiologic, acoustic, and perceptual parameters of speech. Acoustics, speech production, and speech perception will be emphasized.

**SLP-402 Introduction to Audiology****Credits: 3**

Prerequisite(s): SLP-302

Term Offered: All Terms

Course Type(s): OL

An introduction to the field of audiology. Designed to acquaint students with topics regarding the anatomy and physiology of normal and abnormal hearing, basic concepts in pure-tone air and bone conduction audiometry, speech audiometry, interpretation of audiograms, immittance procedures, and basic management of the hearing loss of the hearing-impaired client.

**SLP-498 Special Topics in Speech-Language Pathology****Credits: 3**

Course Type(s): None

An intensive study of a particular subject or problem in educational leadership to be announced prior to registration. If a prerequisite is required it will be announced in the course schedule.

## Minor in Communication Sciences and Disorders (MIN.SLP)

# THE MARJORIE K. UNTERBERG SCHOOL OF NURSING AND HEALTH STUDIES

Acting Dean: Shannon Clifford, Ph.D.

The Marjorie K. Unterberg School of Nursing and Health Studies was established in 1998, having served as a Department of Nursing since 1981. The School of Nursing and Health Studies reflects in its philosophy the mission of Monmouth University: to provide a learning process and environment that enables students to realize their full potential and enhance the quality of life for individuals, families, groups, and the community; and to provide high-quality baccalaureate and graduate education programs to a diverse student population for development of potential leaders in nursing and health professions. Graduates are committed to lifelong service to their chosen profession and prepared to enhance the quality of life for diverse populations in a global and increasingly interdependent society.

The baccalaureate degree in nursing prepares a generalist and is the basis for graduate study and continuing education. Professional nursing education focuses on the development of an accountable practitioner and responsible citizen. Professional nurses need knowledge of the liberal arts and sciences in order to understand the interrelating factors that influence the health of individuals and society. This knowledge facilitates their special obligation to promote a healthy environment for all persons and enriches the conceptual base that supports development of critical thinking and ethical decision-making skills.

Nursing is a learned profession with a unique body of knowledge. Nursing is both a science based on scholarly inquiry and an art that reflects specific skilled and complex human interactions. The breadth of professional nursing knowledge and skills can only be attained within higher education. Professional nurses require the capacity to modify their roles and responsibilities as healthcare continues to change. Baccalaureate education provide students with knowledge of nursing science, enabling them to develop their personal philosophy and framework for practice. This framework encompasses an understanding of the past, present, and emerging roles of the professional nurse. Baccalaureate graduates obtain entry-level positions and are eligible for licensure as registered nurses.

The baccalaureate degree in health studies focuses on developing professionals who will promote health and prevent disease across diverse areas in medical, community, nonprofit, corporate, and government settings. The focus on the sciences makes this major a good fit for students pursuing careers pathways and advanced education as healthcare professionals.

The baccalaureate degree in health promotion prepares students for careers in coaching, athletic training, and fitness training, as well as graduate or professional schools for physical therapy, exercise science and other similar professions. The health and physical education baccalaureate dual major K-12 education endorsement offers core health studies and physical education for those students interested in obtaining a K-12 teaching certification. The curriculum content is aligned with

both the State of New Jersey certification requirements and the National Council for the Accreditation of Teacher Education (NCATE).

Education for nursing and the health professions is idealistic and future-oriented yet sufficiently realistic to provide students with an opportunity to develop justifiable confidence in their intellectual, clinical, and practical skills. This preparation can occur only within an environment that allows for individual differences and fosters personal integration, healthy self-esteem, vital social awareness, enjoyment of leisure, and a sense of commitment to the attitudes and values of the health professions.

Education is an active, ongoing process involving student-teacher collaboration and experiential activity. The teaching-learning process involves not only the teacher and the student, but also the social system within a framework of dynamic relationships that promotes the change and growth of individuals. It is recognized that students have the ultimate responsibility for their own learning and professional growth. Students are viewed as unique individuals with varying learning styles. Therefore, a variety of experiences and teaching strategies are to enhance the development of cognitive, affective, and psychomotor abilities within the student.

The school offers the following programs:

- a Bachelor of Science in Nursing program (BSN)
- a Bachelor of Science in Health Studies program (choose the Exercise Science or Health Science Cluster) for non-nursing majors;
- a Bachelor of Science in Health Studies/Physical Education program (choose the Fitness and Wellness or Public Health Cluster)
- a Bachelor of Science in Health Studies/Physical Education program with an Education Endorsement K-12;
- a Health Studies minor for non-nursing majors; and

The school offers an accelerated program:

- an accelerated, direct-entry Bachelor of Science in Health Studies/ Occupational Therapy Doctorate program (3+3)

**Nursing Student Honor Society:** Lambda Delta Chapter - Sigma Theta Tau, the International Nursing Honor Society

# Health and Physical Education

## Health Studies

The Health Studies (<https://www.monmouth.edu/health-and-physical-education/hpe-majors-undergraduates/>) program at Monmouth University is designed for students who wish to enhance their knowledge of health and prepare for careers in the exciting field of healthcare and health promotion. Courses engage students in analysis of current research, problem-solving, and valuable internships. The program enables students to develop the skills needed to positively impact lives through the application, evaluation, and creation of knowledge. Additionally, students develop an understanding of the link between new research in health science and the development of healthcare strategies and policies.

Graduates of the program are prepared to work with individuals, groups, and families in health organizations and services, corporate health programs, education, and at the local, state, federal, or international level. Students can further their education by pursuing graduate degrees in areas such as medicine, dentistry, physical therapy, health and physical education, healthcare administration, public health, and many others.

The mission of the Health Studies program is to increase students' knowledge in a variety of health disciplines by teaching students to: analyze the causes and means of preventing disease and illness while seeking optimal health, develop the responsibilities and competencies of effective health educators, and advocate for the health of others. The mission of the Health and Physical Education Department is to prepare students to be well-rounded, service-oriented community members and professionals in health/exercise sciences, health promotion, public health, and education.

Health Studies graduates have secured employment in various health-related organizations as well as acceptance to graduate schools in numerous health science disciplines. Health Studies students are prepared for graduate programs including: Exercise Science, Health Promotion/Public Health, Medicine, Occupational Therapy, Physical Therapy, Physician Assistant, and Speech Language Pathology. All students are encouraged to apply to sit for the Certified Health Education Specialist (<https://www.nchec.org>) (CHES) certification exam at the conclusion of their undergraduate curriculum. The School of Nursing and Health Studies Web site (<https://www.monmouth.edu/school-of-nursing-health/careers-outcomes/>) provides additional information regarding employment settings.

Student Health Honor Society: Epsilon Gamma Chapter – Eta Sigma Gamma (<https://www.monmouth.edu/health-and-physical-education/eta-sigma-gamma/>). (<https://www.monmouth.edu/academics/hepe/ESG.asp>) National Health Education Honor Society

## Physical Education

*Note: A maximum of four credits of physical education course work will be applied toward degree requirements for non-health physical education majors. Health/Physical Education and Health/Physical Education with an Endorsement in Education majors complete six (6) credits of physical education course work.*

## Programs Majors

- B.S. in Health Promotion (p. 373)
- B.S. in Health Studies (p. 375)

- B.S. in Health and Physical Education with an Education Endorsement in K-12 (p. 372)

## Minor

- Health Studies (p. 377)

## Faculty

**Staci Drewson**, Associate Professor and Chair. B.A., Gonzaga University; M.S., Ph.D., Springfield College. Interests include teaching through physical activities, sport and exercise psychology. [srandrew@monmouth.edu](mailto:srandrew@monmouth.edu)

**Kiameesha Evans**, Specialist Professor. B.A., Johns Hopkins University; M.A., University of Medicine and Dentistry, NJ; Master Certified Health Education Specialist (CHES). Research interests include health disparities, community-based research, coalition building/community development, and use of social media and emerging technologies to advance health education. [kevans@monmouth.edu](mailto:kevans@monmouth.edu)

**Andrea Hope**, Associate Professor. B.S., Montclair State University; M.S., The American University; Ed.D., C.H.E.S., Teachers College, Columbia University. Specialty areas and interests include physical activity and nutrition, childhood obesity prevention, development of worksite health promotion programming, and women's health. [ahope@monmouth.edu](mailto:ahope@monmouth.edu)

**Maria Hrycenko**, Lecturer. B.S., Rutgers University; D.C., Sherman College of Chiropractic, Spartanburg, South Carolina. Specialty area interests include health policy, alternative health, and ergonomics. [mhrycenk@monmouth.edu](mailto:mhrycenk@monmouth.edu)

**Jeremy Lackman**, Associate Professor. B.S., University of Central Missouri; M.S., Brooklyn College; (C.U.N.Y.); Ph.D., University of Georgia. Specialty areas include the media's portrayal of physical education teachers and urban physical education. [jlackman@monmouth.edu](mailto:jlackman@monmouth.edu)

**Jaime Myers**, Associate Professor. B.A., M.P.H., Emory University; Ph.D., University of South Florida. Specializes in psychosocial determinants of health using a public health perspective. Broadly interested in sexual health, women's health, applied statistics, and maternal and child health. [jmyers@monmouth.edu](mailto:jmyers@monmouth.edu)

**Jamie Pigman**, Assistant Professor. B.S., M.A., Montclair State University; Ph.D., University of Delaware. Specialty areas and interests include biomechanics, motor learning, exercise physiology and exercise prescription. [jpigman@monmouth.edu](mailto:jpigman@monmouth.edu)

**Tamara Rial-Faigenbaum**, Specialist Professor. B.S., M.S., Ph.D., University of Vigo, Spain. [trialfai@monmouth.edu](mailto:trialfai@monmouth.edu)

**Alexis Silverio**, Specialist Professor. B.S., Cabrini University; M.P.A., Thomas Jefferson University; Ph.D., Concordia University. [asilverio@monmouth.edu](mailto:asilverio@monmouth.edu)

## Courses

### HE-101 Strategies for Healthy Living

**Credits: 3**

Term Offered: All Terms

Course Type(s): None

Factors influencing personal health; function of body cells and systems; lifestyle choices such as nutrition, exercise, alcohol, drug and tobacco use, sexuality, contraception, and sexually transmitted diseases; the U.S. health care system and those of other countries.

### HE-150 Medical Terminology

**Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, NU.EL

Introduction of medical terminology to those students who have an interest in a wide variety of health care services. Presents a study of basic medical terms, including prefixes, suffixes, word roots, special endings, plural forms, abbreviations, and has a special emphasis on spelling, definition, usage, and pronunciation for each body system. A programmed learning, word building system will be used to learn word parts that are used to construct and analyze new terms. The accurate use and understanding of medical terminology used in communications between health care professionals, clients, and other providers of care will be enhanced by taking this course.

### HE-180 Introduction to Public Health

**Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

This course is designed to provide an introduction to the field of public health. The history of the field as well as key philosophical perspectives are reviewed. It will address the core values of public health practice, and the role of public health agencies at the international, national, state and local levels. Determinants of health, public health initiatives, ethical practice and selected contemporary public health issues will be explored.

### HE-198 Special Topics in Health Studies

**Credits: 1-3**

Term Offered: Spring Term

Course Type(s): HE.EL, HEPE

An intensive study of a particular subject or problem in health studies to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

### HE-199 Independent Study in Health Studies

**Credits: 3**

Course Type(s): HE.EL, HEPE

Guided research and in-depth study of an area of health studies of particular interest to the student. Prior permission of the directing professor and department chair is required to take this course.

### HE-200 Becoming a Home Health Aide

**Credits: 4**

Term Offered: Spring Term

Course Type(s): HE.EL, NU.EL

Through classroom lecture, discussions, reading and laboratory practice the student will learn the 76-hour training program designed to meet the NJ requirements for the Certified Homemaker/Home Health Aide (HHA). After completion of this course the student will have the opportunity to sit for the state examination and become certified as a HHA. Once certified, the student will be able to gain employment as a certified HHA in numerous agencies and institutions in NJ.

### HE-201 Technology and Health Informatics

**Credits: 3**

Prerequisite(s): HE-101.

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, TL

This course examines the history of healthcare informatics, current issues, basic informatics concepts and health information management systems. The use of technology to help make decisions and to improve the health status of the individual, family, and community is emphasized. Students will apply informatics concepts to a current clinical practice setting suggesting methods to use technology to improve patient safety and work effectiveness. The student will also learn to identify, gather, process, and manage information/data.

### HE-212 Lifespan Development and Health

**Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, RD

Health from conception through senescence using a developmental approach. Examines the factors that influence health at each stage of life, including the effect of environmental, biological, and genetic influences and common deviations from health. Using this approach, the student will investigate the effect of political and economic policies, education, epidemiology, health promotion, and illness prevention programs.

### HE-225 Mind-Body Connection

**Credits: 3**

Term Offered: Spring Term

Course Type(s): HE.EL

Focuses on the psychology of wellness and illness and the healing connections between the mind and body across diverse cultures. How stress is interpreted and expressed in different cultures will be explored. The healing practices and rituals of different faiths and cultural traditions will be explored.

### HE-235 Human Aging

**Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Designed to provide an understanding of the major health problems, health promotion, and wellness concepts that affect older people. Offers an introduction to the physical and functional changes associated with human aging. Common illnesses that are often identified in older people will be discussed. In addition, factors will be presented that are believed to cause or influence the aging process, changes in physical function and quality of life.

### HE-260 Substance Use and Abuse

**Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL

Physical, psychological, and sociological aspects of addictive substances; legal and ethical concerns; alternative methods of dealing with stress in young adulthood; socially responsible behavior.

### HE-275 Anthrozoology, Ethics, and Health

**Credits: 3**

Course Type(s): HE.EL

Introduces students to the varied and complex ways in which animals contribute to human well-being and illness. Students will expand their understanding of the biological, social, psychological, environmental, occupational, spiritual, and cultural implications associated with the use of, and relationships with, animals. Students will critically examine cultural beliefs and practices that impact the well-being of humans, animals, and the planet.

**HE-290 Health Research Methods****Credits: 3**

Prerequisite(s): EN-101 and EN-102

Co-requisite(s): MA-105 or MA-151

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, HY, WT

Introduces students to the basic concepts in health sciences research. Students will gain an understanding of the rationale for conducting research, study designs, qualitative and quantitative inquiry, principles of instrumentation and measurement, data management and interpretation, and research proposal writing and presentation techniques. Students should be able to apply these concepts to evaluate research done by others.

**HE-299 Independent Study in Health Studies****Credits: 3**

Course Type(s): HE.EL

Guided research and in-depth study of an area of health studies of particular interest to the student. Prior permission of the directing professor and department chair is required to take this course.

**HE-315 Critical Research Appraisal****Credits: 3**

Prerequisite(s): MA-151 and HE-290

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, HO

This course will introduce the student to key concepts of the critical appraisal of literature within health science and public health. The first section of the course reviews relevant research design and statistical issues that will be helpful in understanding an evidence-based approach to the literature. The second section of the course reviews basic principles of an evidence-based approach and introduces evidence-based issues related to diagnosis and prognosis. The third section of the course introduces evidence-based issues related to intervention. Throughout the course, material presented in lecture will be accentuated with "real-world" data from the literature and the instructor's ongoing research. In addition, the student will have the opportunity to apply an evidence-based approach to answering a scientific clinical research question.

**HE-320 Principles of Health Education****Credits: 3**

Prerequisite(s): HE-101 and HE-290 or permission of the instructor

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, RD

Examination of the principles and practices of health education for adults in the community, including program development and implementation, educational strategies, behavioral objectives, learner characteristics, and institutional assessment. Essential factors for teaching, learning, and motivating clients to make behavioral changes to promote health.

**HE-324 Human Sexuality****Credits: 3**

Term Offered: All Terms

Course Type(s): GS, HE.EL, HEPE, NU.EL

Human Sexuality is an introductory course designed to help students reflect on their own personal experience, development, background, and value stance while becoming acquainted with research findings, current concepts, and diverse viewpoints about human sexuality. This information will focus on essential components of human sexuality and their relationship to human development. Social, cultural, and developmental determinants of sexual health will be examined. Content will include: anatomy, physiology, hormones, birth control, sexually transmitted infections, pregnancy/childbirth, sexual development, gender identity, sexual orientation, love, healthy relationships, sexual assault, sexual behavior/variation, and sexuality in media. Also listed as NU-324.

**HE-330 Women's Health****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, CD, GS, HE.EL, HEPE

Health care needs and concerns of women from diverse cultures will be examined. This course explores the biological, psychosocial, and sociocultural issues that impact women throughout the lifespan. Topics include the history and status of women's health globally, gender-based violence, sexual and reproductive health, and lifestyle choices that impact health. Throughout the course we will explore the impact of culture, ethnicity, socioeconomic status, systems of oppression, and gender on a woman's ability to be physically, mentally, and emotionally healthy. Also listed as NU-330.

**HE-340 Environmental Health Issues****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, GU, HE.EL, HEPE, SUS

A comprehensive study of current environmental, occupational health issues and associated health risks. Focus on the practical applications of assessing environmental, quality and occupational safety. Major topics include: population growth, water quality, use of pesticides, air pollution, food quality, and occupational health. Legal and regulatory issues also considered.

**HE-350 Epidemiology****Credits: 3**

Prerequisite(s): HE-290 passed with a grade of C- or higher and MA-151, or permission of the instructor

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

A study of the basic principles and methods of epidemiology. These include types of epidemiologic studies, choices in study design, measures of disease frequency and association, sources of bias, screening, and applications to public health. The course covers conceptual and practical issues in epidemiologic research and the interpretation of epidemiologic data.

**HE-360 Transcultural Health****Credits: 3**

Term Offered: Spring Term

Course Type(s): BI.EL, CD, HE.EL, RE

This course focuses on beliefs and practices by individuals and groups from a variety of cultures. Emphasis is placed on cultural sensitivity, cultural diversity, and implications for health. Differences in cultural beliefs related to health, illness, and the impact on the delivery of healthcare will be examined.

**HE-365 Wisdom, Wellness and Aging****Credits: 3**

Term Offered: All Terms

Course Type(s): CD, HE.EL, HEPE

Provides an understanding of the cross-cultural variations in the status of aging and health in older adults. Examples of various cultures include examining older adults from non-English speaking countries, such as North Korea, South Korea, Iran, Mexico, China, and Brazil. Examines factors that affect the economic, social, and health care decisions made by the older adults from these diverse populations as well as other nations. Topics to be covered include examinations of health implications on aging populations in non-English speaking countries. Compare countries, such as Japan, India, and Nigeria, to explore how their specific culture influences caregiving, social support networks, and community. Specific cultural views of love, intimacy, and sexuality in older adults will be examined. Also listed as NU-365.

**HE-370 Alternative/Complementary Health Therapies****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, GU, HE.EL, HEPE

Cultural origins of Complementary Alternative Medical (CAM) therapies will be discussed. Perspectives of health and healing through co-mingling Eastern Traditional Complementary and Alternative Medicine (TCAM) therapies and Western biomedical practices into an integrative strategy will be examined. Appropriate therapies for health promotion and specific illness contexts, potential risks/benefits, ethical issues addressing treatment choices and global entities that employ CAM therapies will be discussed. There will be an emphasis on choosing CAM therapies that are supported by research as safe and effective. Knowledge of reliable sources of information on the Internet will improve decision making regarding therapies. Also listed as NU-370.

**HE-375 Health in Developing Countries: A Cross-Cultural Perspective****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, GU, HE.EL, HEPE, SUS

Designed to introduce students to the concept of health as a cross-cultural issue. Students will examine their own health beliefs and practices and expand their understanding of health and health issues of the developing world. Contemporary health issues will be analyzed. Health care delivery systems in selected countries in Asia and Africa will be examined and compared to the American health care system. Students are expected to problem solve and postulate solutions to contemporary and emerging health issues. Also listed as NU-375.

**HE-376 Guatemala Public Health****Credits: 3**

Term Offered: Spring Term

Course Type(s): CD, EX3, HE.EL, HEPE

Guatemala Public Health will introduce students to the concepts and practice of public health in a low and middle income country. Students will expand their understanding of health issues that exist in Guatemala and they will deliver a health education lesson to "Las Amigas", Guatemalans who are being trained to be community health care workers. The group will also work on a construction project during the work week. Students and faculty will fly to Guatemala City and travel to Chichicastenango and Antigua and several surrounding towns. This is a hybrid course that involves asynchronous on-line work. Permission of the instructor is required to take this course.

**HE-380 Nutrition and Health****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL

An introduction to the physiology of nutrition, basic concepts of normal nutrition and nutrition in chronic disease (such as diabetes mellitus, and cardiovascular disease and obesity) will be explored. A study of the basic nutrients and the gastrointestinal system in its role of digestion, absorption, and metabolism. Food needs of an individual throughout life (birth to old age) will be considered along with necessary dietary modifications caused by decreased activity. Food fads and fallacies will be discussed, as will factors to consider in choosing a healthy diet. Current concerns, such as how safe are the additives in our foods; the role of sugar, salt, and highly processed foods; and alternative therapies, such as herbal remedies and phytochemicals and their potential roles in modern nutrition will be studied. Weight management will be addressed as it relates to medical-nutrition therapy.

**HE-389 Internship in Health and Physical Education****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX1, HE.EL, HEPE

Supervised, pre-professional field experience in health and physical education. The student will secure an internship site related to his/her interests and career goals. Potential internship sites include health and fitness clubs, community wellness agencies, coaching opportunities, hospitals, corporations, and private services. The student will work fifty hours per credit per term at his/her internship site. Students are required to obtain a faculty sponsor, develop learning objectives at the start of their internship, keep a journal of their internship activities throughout their placement, and write a final paper reflecting upon their internship experience. Also listed as PE-389. This is a pass/fail course. Departmental approval is required to take this course. Junior standing (and others by permission of a faculty advisor), placement opportunity and approval by the Health and Physical Education Department are required to take this course. Limited to Health majors.

**HE-398 Special Topics in Health Education (300 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

This course explores the foundational principles and effective practices of instructional strategies within the context of health education. Students will examine various teaching methodologies, learning theories, and assessment techniques that are applicable in health promotion and education settings.

**HE-399 Independent Study in Health****Credits: 1-3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Guided research and in-depth study of an area of health of particular interest to the student. Prior permission of the directing professor and department chair is required to take this course.

**HE-430 Health Advocacy****Credits: 3**

Prerequisite(s): HE-101 and HE-290, and Junior standing; or permission of the instructor

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Focus is on personal and peer health advocacy. Being healthy involves making decisions that are right for each individual and being part of a community that promotes healthy behaviors. Advocating for individual health requires that the student has the confidence, basic understanding of advocacy, resources, and skills to make proper health decisions. Foster student health advocacy as skills are taught while students grapple with personal and social questions that affect their overall health and the health of others. Put student-health promotion into the hands of the students. They will be required to create a health initiative. These initiatives will foster a healthier Monmouth University community.

**HE-435 Community Health****Credits: 3**

Prerequisite(s): HE-101, HE-290, and Junior standing; or permission of the instructor

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Healthcare of groups and communities; this includes community and public health theories, epidemiology, health promotion, illness prevention, research, ethics, vulnerable populations, and common deviations from health.

**HE-440 Health Policy****Credits: 3**

Prerequisite(s): EN-101, EN-102, HE-290 and Junior standing or permission of the instructor

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, WT

Delves into the core elements that define health policy. Describes factors, such as the healthcare delivery systems (public/non-profits vs. private/for profits), access to care, healthcare financing, quality-of-care issues, and social issues, such as gender and culture, and their impact on health and healthcare. The dynamics of the policy-making process at different levels (federal, state and local) will be explored, along with policy analysis and how policy influences healthcare decisions. The complexities and challenges of healthcare reform will be identified. Also listed as NU-440.

**HE-476 Interpersonal Violence****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Examines the various types and patterns of violence related to cultural values, beliefs, biases, and societal issues, as well as the historical perspectives of violence. Course content includes: family, community, youth, and workplace violence; child, domestic, elder, and sexual abuse. Theories concerning gender violence, gangs, bias and hate crimes, and terrorism are challenged. Public health and health care issues related to violence, and primary, secondary, and tertiary-level interventions for victims and offenders of violence are discussed. Individual responsibilities associated with identification and reporting violence are identified. Health care measures to identify and prevent violence are analyzed. Methods of treatment for victims and perpetrators of violence are evaluated. Also listed as NU-476.

**HE-485 Professional Seminar in Health****Credits: 3**

Prerequisite(s): HE-101, HE-290, and Junior standing; or permission of the instructor

Term Offered: All Terms

Course Type(s): EX5, HE.EL, HEPE

Provides students with the experiential education requirement for the BS in Health Studies. Students will have a placement in a health setting where they will have the opportunity to work with a health professional and to apply what they have learned in class to the experiential setting. Weekly seminars will be designed to allow the students to share their experiences with their peers.

**HE-489 Internship in Health and Physical Education****Credits: 1-3**

Term Offered: Summer Term

Course Type(s): EX1, HE.EL, HEPE

Supervised, pre-professional field experience in health and physical education. The student will secure an internship site related to his/her interests and career goals. Potential internship sites include health and fitness clubs, community wellness agencies, coaching opportunities, hospitals, corporations, and private services. The student will work fifty hours per credit per term at his/her internship site. Students are required to obtain a faculty sponsor, develop learning objectives at the start of their internship, keep a journal of their internship activities throughout their placement, and write a final paper reflecting upon their internship experience. This is a pass/fail course. Departmental approval is required to take this course. Junior standing (and others by permission of a faculty advisor), placement opportunity and approval by the Health and Physical Education Department are required to take this course. Limited to Health majors.

**HE-498 Special Topics in Health****Credits: 3**

Course Type(s): HE.EL, HEPE

An intensive study of a particular subject or problem in health education to be announced prior to registration. If a prerequisite is required it will be announced in the course schedule.

**HE-499 Independent Study in Health Studies****Credits: 1-3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Guided research and in-depth study of an area of health studies of particular interest to the student. Prior permission of the directing professor and department chair is required to take this course.

**PE-103 Surfing****Credits: 1**

Term Offered: Summer Term

Course Type(s): OUTDR

Students will learn the basic skills, history, etiquette, and strategy of surfing. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to surfing. The analysis of skills, etiquette, safety considerations, and strategy will be covered. This course is a physical activity skills course. Skills course: Outdoor Pursuits(Individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode. Student must know how to swim and will be tested by the instruction on their swimming ability.

**PE-104 Biking****Credits: 1**

Term Offered: Fall Term

Course Type(s): OUTDR

Students will learn the basic skills, safety, maintenance, and strategy for bike riding. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to riding and maintaining a bike. The analysis of skills, rules, safety considerations, and strategy will be covered. This course is a physical activity skills course. Skills course: Outdoor Pursuits(Individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-105 Bowling****Credits: 1**

Term Offered: All Terms

Course Type(s): PERF

Students will learn the basic skills, history, rules and strategy for ten-pin bowling. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to ten-pin bowling. The analysis of skills, rules, safety considerations, and strategy of play will be covered. This course is a physical activity skills course. Skills course: Individual-Performance Activities (individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-106 Target and Reaction Games****Credits: 1**

Term Offered: Spring Term

Course Type(s): OUTDR

Students will learn the basic skills, rules and strategies for a variety of target and reaction games. The course will help students develop skills and strategies in target games such as baggo, disc golf, and foot golf. Students will also apply concepts of positioning, anticipation, and decision-making in reaction games such as Rampshot, paddle slam, and KanJam. This course is a physical activity skills course. Skills course: Outdoor Pursuits (Dual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-107 Pickleball****Credits: 1**

Term Offered: Spring Term

Course Type(s): PERF

Students will learn the basic skills, history, etiquette, and strategy of pickleball. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to pickleball. The analysis of skills, etiquette, safety considerations, and strategy will be covered. This course is a physical activity skills course. Skills course: Individual-performance (Dual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-110 Swimming****Credits: 1**

Term Offered: All Terms

Course Type(s): AQUA

Provides a comprehensive foundation for recreational swimming. Students will learn and practice skills associated with proper stroke development, water safety, and improved general fitness. This course is a physical activity skills course. Skills course: Aquatics (individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-112 Lifeguard Certification/Water Safety****Credits: 2**

Term Offered: All Terms

Course Type(s): AQUA

Lifeguard Certification and Water Safety will prepare the student to work as a pool lifeguard. Upon completing the course the student will be able to take American Red Lifesaving and Standard First Aid and CPR for the Professional Rescuer exams. If the student properly performs all required skills and passes all written examinations with a score of 80% or higher the student will earn the American Red Cross Lifeguard Certification. This course is a physical activity skills course. Skills course: Aquatics(Individual). This is a pass/fail course. Student must know how to swim and will be tested by the instruction on their swimming ability.

**PE-116 Badminton****Credits: 1**

Term Offered: All Terms

Course Type(s): PERF

Learn basic skills, history, rules and strategy for a single and double game in badminton. This course is a physical activity skills course. Skills course: Individual-Performance Activities (dual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-117 Social Dance I****Credits: 1**

Term Offered: All Terms

Course Type(s): RHYTH

Students will learn a comprehensive framework for exploring the various dimensions of dance and its significance in contemporary society. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques to increase competence in dance and rhythmic activities. The analysis of skills, basic choreography, etiquette, and safety will be covered. This course is a physical activity skills course. Skills course: Dance/Rhythmic Activities. This is a Pass/Fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode. Also listed as DA-117. This is a pass/fail course.

**PE-118 Social Dance II****Credits: 1**

Term Offered: Spring Term

Course Type(s): RHYTH

Provides a comprehensive foundation for both men and women to successfully perform on any social dance floor. Students will learn introductory steps of the Hustle, Salsa, and Tango. Intermediate/advanced skills of the Viennese Waltz, Foxtrot, and East Coast Swing will be taught. A minimum of eight step patterns per dance will be introduced. Students will practice dance etiquette and social skills, leading to increased confidence for social dancing and improved fitness. In addition, "partner" dance positions and keeping music tempos will be addressed. This course is a physical activity skills course. Skills course: Rhythmic (dual). To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode. This is a pass/fail course. Also listed as DA-118.

**PE-119 Golf I****Credits: 1**

Term Offered: All Terms

Course Type(s): PERF

Introduces the basic golf fundamentals, such as basic swings, equipment, rules, terms of the game, drills, etiquette, and playing the course. This course is a physical activity skills course. Skills course: Individual-Performance Activities (individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-122 Ultimate Frisbee****Credits: 1**

Course Type(s): GAMES

Students will learn the basic skills, history, rules and strategy for ultimate frisbee. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to game play. The analysis of skills, rules, safety considerations, and strategy of play will be covered. This course is a physical activity skills course. Skills course: Games and Sports (team). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-125 Tennis****Credits: 1**

Course Type(s): PERF

Students will learn the basic skills, history, rules and strategy for a singles and doubles game in tennis. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to game play. The analysis of skills, rules, safety consideration and strategy of play will be covered. This course is a physical activity skills course. Skills course: Individual-Performance Activities (dual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-127 Volleyball****Credits: 1**

Course Type(s): GAMES

Students will learn the basic skills, history, rules and strategy for playing the team sport of volleyball. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to game play. The analysis of skills, rules, safety consideration and strategy of play will be covered. This course is a physical activity skills course. Skills course: Games and Sports (team). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-128 Yoga****Credits: 1**

Term Offered: All Terms

Course Type(s): FIT, HY, OL

Students will learn and practice basic styles of Hatha Yoga. A combination of asanas (physical postures), breathing techniques and relaxation/meditation methods will help students improve fitness levels, reduce stress and enhance mind-body awareness. Emphasis will be placed on proper body alignment and exercise safety. This course is a physical activity skills course. Skills course: Rhythmic (individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-130 Basketball****Credits: 1**

Term Offered: All Terms

Course Type(s): GAMES

Students will learn the basic skills, history, rules and strategy for playing the team sport of basketball. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to game play. The analysis of skills, rules, safety consideration and strategy of play will be covered. This course is a physical activity skills course. Skills course: Games and Sports (team). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-131 Soccer****Credits: 1**

Term Offered: All Terms

Course Type(s): GAMES

Students are provided with learning experiences that will serve as a basic foundation for teaching the team sport of soccer. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to game play. The analysis of skills, rules, safety consideration and strategy of play will be covered. This course is a physical activity skills course. Skills course: Games and Sports (team). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-132 Softball****Credits: 1**

Term Offered: Fall Term

Course Type(s): GAMES

Students will learn the basic skills, history, rules and strategy for playing the team sport of softball. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to game play. The analysis of skills, rules, safety consideration and strategy of play will be covered. This course is a physical activity skills course. Skills course: Games and Sports (team). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-142 Pilates****Credits: 1**

Term Offered: All Terms

Course Type(s): FIT

Students will apply the principles of Pilates exercises to improve the strength, flexibility and endurance of the core muscles. Consistent Pilates exercise practice will help to improve posture, balance, and coordination; relieve pain and tension; and enhance athletic performance. Students will learn and practice the proper form and technique for a variety of Pilates exercises. Emphasis will be placed on proper body alignment, mind-body awareness and exercise safety. This course is a physical activity skills course. Skills course: Fitness (Individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-143 Endurance Running****Credits: 1**

Course Type(s): FIT, OL, HY

Working together to develop and achieve individual endurance running goals while cultivating a life-long love of running in a low-stress, social atmosphere. Pre-and post-run discussions focus on select topics about the history, science, and culture of running. This course is a physical activity skills course. Skills course: Fitness (individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-144 T'ai Chi****Credits: 1**

Term Offered: All Terms

Course Type(s): FIT, HY, OL

Students will improve health, mental focus and overall well-being through the practice of QiGong and T'ai Chi. Often called "meditation in motion," this ancient Chinese form of exercise blends graceful flowing movements with breathing and relaxation techniques. Students will learn proper form and technique for a variety of movements, eventually combining them into a simplified adaptation of the Yang Short form of T'ai Chi. Particular emphasis will be placed on the use of T'ai Chi and QiGong to reduce stress and anxiety. This course is a physical activity skills course. Skills course: Fitness Activity. (Individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-156 High Intensity Interval Training****Credits: 1**

Term Offered: Spring Term

Course Type(s): FIT

Learn about and practice low and high intensity cardiorespiratory activities. Activities will also focus on flexibility, muscular endurance and strength. This course is a physical activity skills course. Skills course: Fitness This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-161 Self Defense**

Term Offered: All Terms

Course Type(s): PERF

Designed to give the student an opportunity to experience physical activity through martial arts training at an introductory level. This course is a physical activity skills course. Skills course: Individual-Performance Activities (Individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**Credits: 1****PE-163 Weight Training**

Term Offered: All Terms

Course Type(s): FIT

Students will develop and practice an individualized, weight-training program using free weights and resistance machines. Proper training techniques, exercise safety and improvement of health and fitness will be emphasized. This course is a physical activity skills course. Skills course: Fitness (Individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**Credits: 1****PE-198 Special Topics in Physical Education**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject in physical education to be announced prior to registration. If a prerequisite is required it will be announced in the course schedule.

**Credits: 1****PE-199 Independent Study in Physical Education**

Course Type(s): None

Focus on an area in Physical Education under the direction of a Physical Education faculty member. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 1****PE-201 First Aid/CPR/AED Certification**

Term Offered: All Terms

Course Type(s): PERF

Safety problems that affect the individual, the community, and the nation: a standard course in first aid, including adult, child, and infant First Aid/CPR/AED. If the student attends all courses, properly performs all required skills and passes all written examinations, the student will earn the American Red Cross Adult/Child/Infant First Aid/CPR/AED Certification. This course is a physical activity skills course. Skills course: Individual-Performance Activities (Individual). This is a pass/fail course.

**Credits: 2****PE-203 Instructional Strategies in Physical Education and Health****Credits: 3**

Term Offered: Spring Term

Course Type(s): HEPE

This course is designed to introduce future professionals to effective teaching strategies and skills within the context of physical education and health. Grounded by national and state teaching standards, this course emphasizes academic language, curricular models, instructional styles, short- and long-term planning and implementation, instructional and managerial skills reflective practices, and professional responsibility. Lecture sessions are focused upon conceptual foundations of teaching physical education and health. Laboratory sessions devoted to "hands-on," practical applications and observational assessment of lecture concepts in a controlled environment with peers and children.

**PE-215 Fitness Concepts and Measurements****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Students will gain skills to assess key components of fitness including muscular strength and endurance, flexibility, cardiorespiratory fitness, and body composition. Students will build proficiencies in the design and implementation of exercise programs for both healthy individuals and those cleared for exercise by a medical professional. This course prepares students to take respected and accredited certifications such as the American College of Sports Medicine, the National Strength and Conditioning Association and others. Course content is delivered through lecture and hands-on laboratory experiences.

**PE-222 International Outdoor Adventure Education****Credits: 3**

Term Offered: Spring Term

Course Type(s): FLT, GU, HE.EL, HEPE, NU.EL, OUTDR

This faculty-led study abroad course is designed to introduce students to a variety of outdoor adventure activities in foreign countries while promoting cultural and global understanding. Lecture sessions at Monmouth University in the beginning of the course will highlight content knowledge related to outdoor adventure education, the theories and best practices for developing an outdoor adventure program, and students will explore their individual and collective responsibilities through analytical, practical, or creative responses to issues facing a globally interconnected society. While abroad, students will experience and reflect upon similarities and differences between a host of issues (i.e., customs, norms, historical influences, language, religion, standard of living, food, art, music, dance, etc.) within the United States and the destination country. Students will describe how they see themselves within the context of that diversity and explore opportunities to interact in a global world. Student must pay additional travel expenses. This course also counts as a Physical Activity Skills Course. Skills Course: Outdoor Pursuits (Individual).

**PE-290 Open Water Scuba Certification Course****Credits: 2**

Course Type(s): MEBP, OUTDR

The Open Water Scuba Certification course entails completion of the Professional Association of Diving Instructors (PADI) Open Water Diver course, the world's most popular scuba course. Completion of this course leads to PADI scuba certification as an open water diver. This course is a physical activity skills course. Skills course: Outdoor Pursuits(Individual). This is a pass/fail course. Limited to 8 students. Also listed as BY-290.

**PE-310 Sport and Exercise Psychology****Credits: 3**

Prerequisite(s): EN-101, EN-102, and PY-103

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, WT

Explores the psychological determinants and consequences of physical activity, with an emphasis on psychological factors relevant to enhancing sport performance. Students will also analyze key theories in exercise psychology in order to understand exercise's influence on psychological health outcomes.

**PE-320 Exercise Physiology****Credits: 3**

Prerequisite(s): BY-111 or BY-211 and BY-112 or BY-212 and 3 credits from subject MA except MA-050, MA-100 and MA-103

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

A scientific foundation for understanding the physiological response and adaptation to exercise training. A comprehensive study of basic theories and practical applications of exercise physiology principles to physical education and sports performance. Focus on metabolic, cardiovascular-respiratory, neuromuscular-skeletal and endocrine systems as they relate to acute and chronic responses to exercise. Environmental concerns, cardiovascular disease risk factors and the immune response to exercise.

**PE-330 Biomechanics and Kinesiology****Credits: 3**

Prerequisite(s): MA-105 or higher and BY-111 or BY-211 and BY-112 or BY-212

Term Offered: All Terms

Course Type(s): HE.EL

Introduction to the major principles of biomechanics, providing students with foundational knowledge that allows for the systematic analysis of human movement. Emphasis is placed on analyzing key forces and movement in the context of sport and exercise.

**PE-340 Motor Development and Learning****Credits: 3**

Prerequisite(s): BY-111, BY-112 and 3 credits in Math except MA-050, MA-100, MA-101 or MA-103

Term Offered: All Terms

Course Type(s): HE.EL

Introduces students to the fundamental concepts of motor learning and development changes in human movement that occur over the lifespan. Basic research findings and applications of general human growth principles are discussed in relation to the development and acquisition of motor skills. Emphasis will also be placed on theoretical foundations for understanding motor learning principles that can be applied to the teaching and learning of physical activities.

**PE-350 School-Based Physical Activity****Credits: 4**

Term Offered: Fall Term

Course Type(s): EX3, HE.EL, HEPE

This experiential education service learning course is designed to introduce students to best practices for promoting physical activity in school-based programs in accordance with theoretical frameworks and empirical evidence associated with movement competencies, physical activity engagement, and prosocial skills for children. Lecture sessions will highlight pedagogical content knowledge related to the facilitation of standards-based, developmentally-appropriate developmentally-appropriate physical activity opportunities for children. Service learning sessions will provide opportunities for students to apply content via planning and facilitating physical activity in a school-based program.

**PE-351 Prevention and Care of Athletic Injuries****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Students will gain foundational knowledge essential for the prevention, assessment, and management of athletic injuries. The course covers evidence-based practices in injury risk assessment, emergency action planning, rehabilitation strategies, and return-to-play protocols for diverse active and athletic populations, including those with special conditions. Students will gain proficiency in designing and implementing comprehensive injury prevention programs while understanding the physiological, biomechanical, and psychosocial factors that influence athletic injury and recovery.

**PE-360 Principles of Coaching****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, HY, OL

A comprehensive introduction to the principles, knowledge, and skills that support effective coaching decisions and actions. This course combines national standards, sport science theory and research findings, with practical knowledge and best practices of expert coaches related to the five essential categories of coaching education and professional practice. An emphasis will be placed on the principles of coaching, behavior, teaching, physical training, and management. Ten hours of volunteer/observation are required in a local youth sport environment which can be completed across weekdays and weekends.

**PE-370 Strength and Conditioning Techniques****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

This course is designed to prepare students for a career in a fitness, wellness, and exercise-science field. Lecture and laboratory sessions provide students with a hands-on approach to identifying exercises from different training modalities, developing proper exercise technique, selecting appropriate equipment/technology, and applying this information to best practices in teaching and coaching. The course contents include fundamental applications of exercise techniques which are relevant to careers in coaching, exercise science, health & fitness, rehabilitation as well as strength training and conditioning. Emphasis will be placed on weight training and Olympic lifting, body weight and implement training, balance and instability training, corrective exercise, ballistic training, speed and agility training, plyometric training, flexibility training, and facility design. This course helps prepare students for applied segments of certification exams, i.e. the Certified Strength and Conditioning Specialist exam offered by the National Strength and Conditioning Association.

**PE-389 Internship in Health and Physical Education****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX1, HE.EL, HEPE

Supervised, pre-professional field experience in health and physical education. The student will secure an internship site related to his/her interests and career goals. Potential internship sites include health and fitness clubs, community wellness agencies, coaching opportunities, hospitals, corporations, and private services. The student will work fifty hours per credit per term at his/her internship site. Students are required to obtain a faculty sponsor, develop learning objectives at the start of their internship, keep a journal of their internship activities throughout their placement, and write a final paper reflecting upon their internship experience. Also listed as HE-389. This is a pass/fail course. Junior standing (and others by permission of a faculty advisor), placement opportunity and approval by the Health and Physical Education Department are required to take this course. Limited to Physical Education majors only. Satisfies the Experiential Education General Education requirement.

**PE-398 Special Topics in Physical Education****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in physical education to be announced prior to registration. If a prerequisite is required it will be announced in the course schedule.

**PE-399 Independent Study in Physical Education****Credits: 1-3**

Term Offered: Summer Term

Course Type(s): None

Reading and research on a selected topic under the direction of a Physical Education faculty member. Prior permission of the directing professor and department chair is required to take this course.

**PE-410 Exercise Testing and Prescription****Credits: 4**

Prerequisite(s): HE-101, PE-320 and PE-330

Term Offered: All Terms

Course Type(s): HEPE

Provides the foundation of knowledge and skills necessary for assessing the health and physical fitness profile and developing effective exercise programs for healthy individuals and those with controlled chronic diseases.

**PE-411 Adapted Physical Education and Health****Credits: 3**

Term Offered: Fall Term

Course Type(s): CD, HE.EL, HEPE

This course introduces students to best practices for teaching individuals with disabilities skills related to health and physical education. Provides basic information on disabling conditions and on how to provide adapted physical education and health programs based upon an individual's assessed needs. It will also introduce students to best teaching practices for providing access to physical education and health curriculum for students with disabilities in inclusive settings. A clinical experience is an integral part of the course providing in school settings to gain practical experience in screening and assessment; identification, selection, and prescription of appropriate exercise programs and in teaching health to students with disabilities. Travel to and from the clinical site is the responsibility of the students.

**PE-489 Internship in Health and Physical Education****Credits: 1-3**

Term Offered: Summer Term

Course Type(s): EX1

Supervised, pre-professional field experience in health and physical education. The student will secure an internship site related to his/her interests and career goals. Potential internship sites include health and fitness clubs, community wellness agencies, coaching opportunities, hospitals, corporations, and private services. The student will work 50 hours per credit per term at his/her internship site. Students are required to obtain a faculty sponsor, develop learning objectives at the start of their internship, keep a journal of their internship activities throughout their placement, and write a final paper reflecting upon their internship experience. Limited to Physical Education majors only. Satisfies the Experiential Education General Education requirement. This is a pass/fail course.

**PE-499 Independent Study in Physical Education****Credits: 1-3**

Course Type(s): None

Reading and research on a selected topic under the direction of a Physical Education faculty member. Prior permission of the directing professor and department chair is required to take this course.

**General Education Requirements (24 credits)<sup>5</sup>**

Complete 24 credits as outlined on the General Education table.<sup>5</sup>

**Total Credits 120**

<sup>1</sup> Of those 6 courses, at least 1 must be designated as "individual", at least 1 must be designated as "dual", and at least 1 must be designated as "team".

<sup>2</sup> Minimum grade of "C" required for Education courses.

<sup>3</sup> Students must complete the appropriate test requirement(s) with a passing score PRIOR to Clinical Practice.

<sup>4</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>5</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

**Additional Endorsements Available**

- ESL - English as a Second Language - K-12
- TSD - Teacher of Students with Disabilities - K12

**Notes**

- 54 credits must be completed at the 200 level or higher.
- Education majors are required to have an overall GPA of 3.00 for State Certification.
- By state regulation, all Education Majors seeking content area endorsement must complete 30 content credits (12+ credits at the 300+ level).

<sup>1</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>2</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

Notes

- 54 credits must be completed at the 200 level or higher.

<sup>1</sup> BY-211 Physiology with Anatomy I (4 cr.) and BY-212 Physiology with Anatomy II (4 cr.) are required for several graduate schools. See your advisor for assistance.

<sup>2</sup> Please consult with your advisor regarding the required number of free electives that must be completed.

<sup>3</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major

or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

Notes

- 54 credits must be completed at the 200 level or higher.

## Nursing

Chair: Colleen Manzetti, Department of Nursing

### B.S.N. Program

#### Admission Requirements

- Satisfying Monmouth's admission criteria for the University and for the BSN program. Writing an essay that expresses an interest in, and commitment to, the nursing profession.
- Demonstrating a strong background in the sciences.
- Exposure to a healthcare setting or related experience is encouraged.

#### Progression Requirements

Once selected for the program, students will be required to meet certain benchmarks, including:

- Maintain a cumulative GPA of 2.75 or better.
- Achieve a minimum standard grade of C+ or better in all Nursing (NU) courses.
- Achieve a minimum standard grade of C+ or better in the following courses:

| Code   | Title                                              | Credits |
|--------|----------------------------------------------------|---------|
| BY-107 | Microbiology in Health and Disease                 | 4       |
| BY-111 | Anatomy and Physiology I                           | 4       |
| BY-112 | Anatomy and Physiology II                          | 4       |
| CE-109 | Introduction to General, Organic, and Biochemistry | 4       |
| MA-151 | Statistics with Applications                       | 3       |

- Maintaining a standard grade of "C+" or better in all nursing courses:
- A BSN student who receives a grade below C+ may repeat any of the course once. If the student receives a grade below "C+" in another course that student will not be permitted to continue in the BSN program.
- After acceptance, and before starting classes, a student must meet the health clearance requirements. Before beginning clinical experiences, students will be expected to have criminal background checks, and submit a copy of a liability and malpractice policy. Students with criminal backgrounds may not proceed in the nursing program.
- All students are expected to maintain membership in the Student Nurse Association ANA/N.J.S.N.A. The faculty of the School of Nursing and Health Studies at Monmouth University reserves the

right to dismiss a student from the program regardless of cumulative grade point average if, in the opinion of the faculty, the student fails to meet acceptable professional standards of behavior.

The baccalaureate degree in nursing, master's degree in nursing, Doctor of Nursing Practice, and post-graduate APRN certificates at Monmouth University are accredited by the Commission on Collegiate Nursing Education (CCNE) (<http://www.ccneaccreditation.org>).

## Programs Major

- B.S.N. - Bachelor of Science in Nursing - Pre-Licensure (p. 394)

## Policies

In addition to University policies, the Department of Nursing BSN Program Handbook (<https://www.monmouth.edu/school-of-nursing-health/documents/2022/11/bsn-nursing-student-handbook.pdf/>) details additional policies for nursing students.

## Faculty

**Polina Amburg**, Assistant Professor. B.A., M.A., Hunter College; Ph.D., Rutgers School of Nursing.  
pamburg@monmouth.edu

**Samantha Colangelo**, Specialist Professor. BSN, Farleigh Dickinson University; MSN, Monmouth University.  
scolange@monmouth.edu

**Beth Gough**, Specialist Professor.  
BSN Program Director. Diploma, Ann May School of Nursing; B.S.N., M.S.N., Monmouth University. R.N., CNE.  
bgough@monmouth.edu

**Rose Knapp**, Associate Professor (Graduate Faculty).  
MSN Program Director. B.A., State University of Plattsburgh; M.S., Seton Hall University; D.N.P., University of Miami, ACNP-BC. Specialty interest areas include acute care and emergency advanced practice nursing issues, pharmacology and advanced practice education.  
rknapp@monmouth.edu

**Cheryl Ann Leiningen**, Associate Professor (Graduate Faculty). B.S., The College of New Jersey; M.A., New York University; D.N.P., UMDNJ, Adult Nurse Practitioner. Specialty interest areas include community/environmental health issues, bullying in nursing and LGBT health.  
cleining@monmouth.edu

**Janet Mahoney**, Professor (Graduate Faculty). R.N., St. Mary's Hospital; B.S.N., Monmouth University (Monmouth College); M.S.N., Seton Hall University; Ph.D., APN-BC, ENA-BC New York University. Specialty areas and interests include nursing research, nursing administration, and gerontological nursing.  
jmahoney@monmouth.edu

**Colleen Manzetti**, Associate Professor (Graduate Faculty).  
Chair, Department of Nursing. B.S., Rutgers University; M.S.N., Monmouth University; D.N.P., Samford, Alabama CNE, CNLCP. Specialty interests include life care planning, rehabilitation nursing, nursing education, collaboration, and leadership.  
cmanzett@monmouth.edu

**Giuseppina Pagnotta**, Specialist Professor. BSN, M.S., New Jersey City University; MSN, DNP, Monmouth University.

gdiamant@monmouth.edu

**Cristina Palmeri**, Specialist Professor. BSN, Monmouth University; MSN, DNP, Rutgers University.  
cpalmeri@monmouth.edu

**Joan Raso**, Specialist Professor. B.S.N., Hardwick College; M.S.N., Seton Hall University; R.N., CHSE. Focus is on diabetes education and nutrition.  
jraso@monmouth.edu

**Erica Sciarra**, Assistant Professor. A.D.N., Muhlenburg School of Nursing/ Union County College; B.S., M.S., D.N.P., Ph.D., Rutgers University. R.N.  
esciarra@monmouth.edu

**Patricia Sciscione**, Associate Professor (Graduate Faculty). M.S.N., Kean University; Ph.D., Seton Hall University; R.N. Certified school nurse. Specialty areas and interests include school nursing and emergency nursing.  
psciscio@monmouth.edu

**Kathryn Viera**, Specialist Professor. B.S.N., Felician University; M.S.N., Monmouth University.  
kviera@monmouth.edu

**Erin Vitale**, Specialist Professor.  
Interim Director, Linda Grunin Simulation Lab and Learning Center.  
B.A., James Madison University; M.S.N., Ramapo College of NJ; Ph.D., Post University.  
evitale@monmouth.edu

## Courses

### NU-SANE Sexual Assault Nurse Examiner

**Credits: None**

Term Offered: All Terms

Course Type(s): NOSRCH

Provides basic theoretical and forensic principles to treat victims of sexual crimes by introducing standards of practice for the sexual assault nurse examiner (SANE) as outlined for SANE certification. Standards and principles of nursing practice will be applied to the practice of various areas of expertise held by SANE nurses. Forensic evaluation may include victims of all ages and ethnic and socioeconomic backgrounds within a framework of community and agency policies, procedures and protocols. Using the nursing process in the investigation of sexual assault and in the promotion and restoration of psychological, biological, and social health of survivors of sexual assault or abuse will be introduced. History and physical examination, crisis intervention, identifying and collecting evidence, and treating and counseling victims will be discussed. This is a pass/fail course.

### NU-100 Technology and Health Informatics

**Credits: 3**

Term Offered: All Terms

Course Type(s): TL

This course examines the history of healthcare informatics, current issues, basic informatics concepts, and health information management systems. The use of technology to help make decisions and to improve the health status of the individual, family, and community is emphasized. Students will learn to identify, gather, process, and manage information/data. Students will discuss the use of informatics concepts that can be used to improve patient safety, quality care, cost efficiency, and work effectiveness. Requires a minimum grade of C+.

### NU-104 Medical Terminology for Nursing

**Credits: 3**

Term Offered: Fall Term

Course Type(s): None

Medical terminology serves as a universal language across diverse healthcare settings. Mastering these terms is essential for anyone pursuing a career in nursing. This course is designed to help students understand and apply essential medical terms by deconstructing them into key components such as prefixes, suffixes, word roots, special endings, plural forms, and abbreviations. The curriculum places a strong emphasis on the accurate spelling, definition, usage, and pronunciation of terms related to each body system. By fostering a shared understanding of medical terminology, this course minimizes miscommunication and equips students to use these terms precisely when interacting with healthcare professionals, patients, and care providers. This competency supports effective communication and promotes optimal healthcare delivery. This course requires a passing grade of C+ or better.

### NU-205 Pathophysiology

**Credits: 3**

Prerequisite(s): BY-111 and BY-112, both passed with a grade of C+ or higher.

Co-requisite(s): CE-109 passed with a grade of C+ or higher.

Term Offered: All Terms

Course Type(s): None

Concepts for anatomy, physiology, and chemistry courses provide the foundation for exploring human dysfunction across the lifespan. Emphasis is placed on the relationship of health patterns of major body systems to changes that occur during the illness experience. Major pathophysiologic concepts are explored using a symptom-based approach that focuses on the most common diagnoses encountered in the clinical setting. Theories relation etiology, pathogenesis, and clinical manifestations are used to study common disease processes. Concepts learned in this course are fundamental to nursing practice. A minimum grade of C+ in this course is required to continue to NU-206.

### NU-207 Transcultural Health

**Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, CD, HE.EL, RE

This course focuses on beliefs and practices by individuals and groups from a variety of cultures. Emphasis is placed on cultural sensitivity, cultural diversity, and implications for health. Differences in cultural beliefs related to health, illness, and the impact on the delivery of healthcare will be examined. This course requires a minimum grade of C+. Nursing majors only.

### NU-210 Nutrition and Health

**Credits: 3**

Term Offered: All Terms

Course Type(s): None

An introduction to the physiology of nutrition, basic concepts of normal nutrition, and nutrition in chronic disease (such as diabetes mellitus, cardiovascular disease, and obesity) will be explored. A study of the basic nutrients and the gastrointestinal system in its role of digestion, absorption, and metabolism. Food needs of an individual throughout life (birth to old age) will be considered, along with necessary dietary modifications caused by decreased activity. Food fads and fallacies will be discussed, as will factors to consider in choosing a healthy diet. Current concerns, such as how safe are the additives in our foods, the role of sugar, salt and highly processed foods, alternative therapies such as herbal remedies, and phytochemicals and their potential roles in modern nutrition, will be studied. Weight management will be addressed as it relates to medical nutrition therapy. This course requires a minimum passing grade of a C+.

**NU-215 Issues and Trends in Professional Nursing****Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): WT

The course introduces the student to the art and science of nursing by exploring the historical role of the nurse as a professional practitioner and member of the interprofessional health care team. Nursing theories are introduced with emphasis on the nursing process as a framework for designing and delivering nursing care. Quality and safety education for nursing (QSEN) competencies, ethical issues, cultural influences are discussed globally. Emerging roles are evaluated in relation to changing healthcare delivery systems. Standards of practice are referenced in the analysis of professional nursing during this and all subsequent nursing courses. The roles of critical thinking and therapeutic communication in the development of safe nursing practice are explored. This course requires a minimum grade of C+.

**NU-301 Foundations of Nursing Practice I****Credits: 6**

Prerequisite(s): BY-111, BY-112, CE-109, NU-205, NU-215 or NU-311 all passed with a grade of C+ or higher.

Co-requisite(s): NU-301L, NU-301P, NU-310, and NU-312.

Term Offered: Fall Term

Course Type(s): None

This course provides an introduction to the practice of nursing. Emphasis is placed on the knowledge and skills needed to provide safe, quality care. The theoretical foundation for basic assessment and nursing skills is presented, and the student is given an opportunity to demonstrate these skills in a clinical/laboratory setting. Students are introduced to the nursing process as a framework for the development of decision-making and clinical judgement skills. For Nursing majors only.

**NU-301CL Nursing I Clinical****Credits: None**

Co-requisite(s): NU-301 and NU-301L

Term Offered: Fall Term

Course Type(s): None

Students will learn the didactic content and apply the associated nursing skills during the clinical experience in the medical setting with live patients. This is a pass/fail course. Students must pass all sections of NU-301 to progress otherwise they must repeat all sections.

**NU-301L Nursing I Lab****Credits: None**

Co-requisite(s): NU-301 and NU-301P

Term Offered: Fall Term

Course Type(s): None

Communication skills, the nursing process and medical mathematical calculations are areas of development. Methods for interpretation of medical orders, calculation of safe medications dosing and preparation, and administration of medications will be emphasized. This is a pass/fail course.

**NU-308 Maternal, Pediatric, and Newborn Nursing****Credits: 6**

Prerequisite(s): NU-301, NU-310, and NU-312 all passed with a grade of C+ or higher.

Co-requisite(s): NU-325, NU-308MCL, and NU-308PCL.

Course Type(s): None

This course provides an integrative, family-centered approach to the care of mothers, newborns, and children. Emphasis is placed on normal and high-risk pregnancies, normal growth and development, family dynamics, pediatric disorders and the promotion of healthy behaviors in patients. Clinical experiences provide the student with an opportunity to apply theoretical concepts and implement safe patient care to mothers, newborns, and children.

**NU-308MCL Maternal Nursing Clinical****Credits: None**

Term Offered: All Terms

Course Type(s): None

Students will learn the didactic content and apply the associated nursing skills during the clinical experience in the medical setting with live patients. This is a pass/fail course. Students must pass all sections of NU-308 to progress otherwise they must repeat all sections.

**NU-308PCL Pediatric and Newborn Nursing Clinical****Credits: None**

Term Offered: All Terms

Course Type(s): None

Students will learn the didactic content and apply the associated nursing skills during the clinical experience in the medical setting with live patients. This is a pass/fail course. Students must pass all sections of NU-308 to progress otherwise they must repeat all sections.

**NU-310 Introduction to Pharmacology for Nurses****Credits: 3**

Prerequisite(s): NU-205 and NU-215 Both passed with a grade of C+ or higher.

Co-requisite(s): NU-301 and NU-312

Term Offered: All Terms

Course Type(s): None

This course provides an introduction to the principles of pharmacology, including pharmacokinetics, pharmacodynamics, medication interactions and potential adverse reactions. Emphasis is placed on drug classifications and nursing care related to the safe administration of medication to patients. A minimum grade of C+ is required in this course. Prerequisites: NU-205 and NU-215 both passed with a grade of C+ or higher.

**NU-312 Individual Health Assessment****Credits: 3**

Prerequisite(s): NU-205 passed with a grade of C+ or higher

Co-requisite(s): NU-301, NU-310, and NU-312L

Term Offered: All Terms

Course Type(s): None

This course provides a framework for preparing students to perform comprehensive health assessments on patients in a variety of settings. Emphasis is placed on taking a thorough nursing history, performing physiological, psychological, sociological, cultural, and spiritual assessments, as well as identification of stressors and health risks. Laboratory/clinical experiences provide an opportunity to practice assessment skills on adult and older adult live and /or simulated patients. Prerequisite: NU-205 passed with a grade of C+ or higher.

**NU-312L Individual Health Assessment Lab****Credits: None**

Prerequisite(s): NU-205 passed with a grade of C+ or higher

Co-requisite(s): NU-301, NU-310, and NU-312

Term Offered: All Terms

Course Type(s): None

This course provides a framework for preparing students to perform comprehensive health assessments on patients in a variety of settings. Emphasis is placed on taking a thorough nursing history, performing physiological, psychological, sociological, cultural, and spiritual assessments, as well as identification of stressors and health risks. Laboratory/clinical experiences provide an opportunity to practice assessment skills on adult and older adult live and /or simulated patients.

**NU-324 Human Sexuality**

Term Offered: All Terms

Course Type(s): GS, HE.EL, HEPE, NU.EL

Human Sexuality is an introductory course designed to help students reflect on their own personal experience, development, background, and value stance while becoming acquainted with research findings, current concepts, and diverse viewpoints about human sexuality. This information will focus on essential components of human sexuality and their relationship to human development. Social, cultural, and developmental determinants of sexual health will be examined. Content will include: anatomy, physiology, hormones, birth control, sexually transmitted infections, pregnancy/childbirth, sexual development, gender identity, sexual orientation, love, healthy relationships, sexual assault, sexual behavior/variation, and sexuality in media. Also listed as HE-324.

**Credits: 3** **NU-330 Women's Health****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, CD, GS, NU.EL

Health care needs and concerns of women from diverse cultures will be examined. This course explores the biological, psychosocial, and sociocultural issues that impact women throughout the lifespan. Topics include the history and status of women's health globally, gender-based violence, sexual and reproductive health, and lifestyle choices that impact health. Throughout the course we will explore the impact of culture, ethnicity, socioeconomic status, systems of oppression, and gender on a woman's ability to be physically, mentally, and emotionally healthy. Also listed as HE-330.

**NU-325 Medical Surgical Nursing I****Credits: 6**

Prerequisite(s): NU-301, NU-310, and NU-312 all passed with a grade of C+ or higher.

Co-requisite(s): NU-325L, NU-325P;

Term Offered: Spring Term

Course Type(s): None

Professional nursing care for individuals and their significant others experiencing acute and/or chronic illness is emphasized. Students continue to develop skills in nursing diagnosis, problem solving, decision-making and critical thinking skills in caring for adult and geriatric patients. The nursing process is applied in caring for adult/geriatric patients and their significant others across health care settings such as the hospital, end of life facilities, and home care. There is a weekly lab and practicum component with this course. A minimum grade of C+ is required in this course to continue to NUOB-203 and NUPD-203.

**NU-325CL Medical Surgical Nursing I Clinical****Credits: None**

Co-requisite(s): NU-325 and NU-325L.

Term Offered: Spring Term

Course Type(s): None

Students will build upon their foundational experience with live patients in the hospital setting. Basic nursing skills will be expanded and focus is on the adult geriatric patient in a variety of students' clinical settings. Involvement with the live patients in the actual medical setting provides students with experiential knowledge and builds their confidence. This is a pass/fail course. Students must pass all sections of NU-325 to progress otherwise they must repeat all sections.

**NU-325L Medical Surgical Nursing I Lab****Credits: None**

Co-requisite(s): NU-325 and NU-325P;

Term Offered: Spring Term

Course Type(s): None

Foundational clinical experiences help students to develop plans and implement strategies for health promotion, risk reduction, health maintenance, rehabilitation, injury prevention and treatment of acute and complex health issues of adult and geriatric patients from diverse backgrounds. Critical thinking and evidence-based practice are introduced for students to formulate differential diagnoses, clinical impressions, nursing diagnoses for treatment and evaluation of care provided to adult and geriatric patients. Clinical opportunities are provided to deliver safe, legal, and ethical care for adult and geriatric patients in a variety of clinical settings. This is a pass/fail course.

**NU-355 Research Methods in Nursing****Credits: 3**

Prerequisite(s): MA-151, EN-101, and EN-102 or permission of the instructor.

Term Offered: Fall Term

Course Type(s): HY, WT

This course is designed to promote clinical decision making through the exploration and integration of current scientific evidence, the use of clinical reasoning, and scholarly review. Focus is placed on the analysis and synthesis of evidence to answer a clinical question relevant to nursing practice. This course requires a minimum grade of C+.

**NU-365 Wisdom, Wellness and Aging****Credits: 3**

Term Offered: All Terms

Course Type(s): CD, HE.EL

Provides an understanding of the cross-cultural variations in the status of aging and health in older adults. Examples of various cultures include examining older adults from non-English speaking countries such as North Korea, South Korea, Iran, Mexico, China, and Brazil. Examines older adults from these diverse populations as well as other nations. Topics to be covered include examinations of health implications on aging populations in non-English speaking countries. Compare countries, such as Japan, India, and Nigeria, to explore how their specific culture influences caregiving, social support networks, and community. Specific, cultural views of love, intimacy, and sexuality in older adults will be examined. Also listed as HE-365.

**NU-370 Alternative/Complementary Health Therapies****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, GU, NU.EL

Cultural origins of CAM therapies will be discussed. Perspectives of health and healing through co-mingling Eastern Traditional Complementary and Alternative (TCAM) therapies and Western biomedical practices into an integrative strategy will be examined. Appropriate therapies for health promotion and specific illness contexts, potential risks/benefits, ethical issues addressing treatment choices and global entities that employ CAM therapies will be discussed. There will be an emphasis on choosing CAM therapies that are supported by research as safe and effective. Knowledge of reliable sources of information on the Internet will improve decision-making regarding therapies. Also listed as HE-370.

**NU-375 Health in Developing Countries: A Cross-Cultural Perspective****Credits: 3**

Term Offered: All Terms

Course Type(s): BI,EL, GU, NU,EL, SUS

Designed to introduce students to the concept of health as a cross-cultural issue. Students will examine their own health beliefs and practices and expand their understanding of health and health issues of the developing world. Contemporary health issues will be analyzed. Healthcare delivery systems in selected countries in Asia and Africa will be examined and compared to the American healthcare system. Students are expected to problem solve and postulate solutions to contemporary and emerging health issues. Also listed as HE-375.

**NU-390 Nursing Care of the Aging Adult****Credits: 3**

Prerequisite(s): NU-205 and NU-215 both passed with a grade of C+ or higher

Course Type(s): HY

This course provides an introduction to the care of aging adults while focusing on their unique physiological and psychosocial needs. Emphasis is placed on promoting healthy aging and retaining functional ability within a home or residential environment. Common health alterations of the older adult as well as safety and end-of-life care are introduced.

**NU-398 Special Topics in Nursing (300 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in nursing to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**NU-399 Independent Study in Nursing****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

Guided research and in depth study of an area of nursing and/or healthcare of particular interest to the student. Permission of the directing professor and department chair is required to take this course.

**NU-400 Population Focused Care****Credits: 6**

Prerequisite(s): NU-492 passed with a grade of C+ or higher.

Co-requisite(s): NU-400P, NU-450, NU-490 and NU-490P.

Course Type(s): EX5, HY

This course is intended to orient students to nursing care of individuals, families, aggregates, communities, and populations. Principles and practices of community health are discussed. Emphasis is placed on assessing factors that influence the health of populations and the use of evidence-based practices in the delivery of spiritually and culturally appropriate health promotion and disease prevention interventions. The role of the nurse as an advocate for social justice is explored. Students are provided clinical experiences within the community. Nursing majors only.

**NU-400CL Population Focused Care Clinical****Credits: None**

Co-requisite(s): NU-400

Course Type(s): None

This clinical experience focuses on population health nursing. The nursing process is utilized as students apply their knowledge in providing care to clients from the formation of the family through senescence.

This clinical experience allows students to incorporate evidence-based practice strategies in the provision of care including health teaching, screening, outreach, disease and outbreak investigation, referral, and follow-up, across various aggregates, communities, and populations. Students must pass the clinical portion (NU-400CL) to pass the course NU-400. This is a pass/fail course. Students must pass all components of this course to progress.

**NU-401 Medical Surgical Nursing II****Credits: 6**

Prerequisite(s): NU-308 and NU-325 Passed with grade of C+ or higher.

Co-requisite(s): NU-401P and NU-492.

Term Offered: Fall Term

Course Type(s): None

This course focuses on the care of adult patients with complex medical/surgical health problems. Emphasis is placed on helping patients and their families cope with alterations in body functions. Concepts of pharmacology, health promotion and education, evidence-based practice, and interdisciplinary collaboration will be integrated throughout the course. Clinical experiences provide the student with an opportunity to apply theoretical concepts and implement safe care to patients and selected groups in a variety of settings.

**NU-401CL Medical Surgical Nursing II Clinical****Credits: None**

Prerequisite(s): NU-308 and NU-325, both passed with a C+ or higher.

Co-requisite(s): NU-401 and NU-492.

Term Offered: Fall Term

Course Type(s): None

This course focuses on the care of adult patients with complex medical/surgical health problems. Emphasis is placed on helping patients and their families cope with alterations in body functions. Concepts of pharmacology, health promotion and education, evidence based practice, and interdisciplinary collaboration will be integrated throughout the course. Clinical experiences provide the student with an opportunity to apply theoretical concepts and implement safe care to patients and selected groups in a variety of settings. For Nursing majors only. This is a pass/fail course. Students must pass all components of this course to progress.

**NU-440 Health Policy****Credits: 3**

Prerequisite(s): EN-101, EN-102, HE-290 and Junior standing or permission of the instructor

Term Offered: All Terms

Course Type(s): HE,EL, HEPE, WT

Delves into the core elements that define health policy. Describes factors, such as the healthcare delivery systems (public/non-profits vs. private/for profits), access to care, healthcare financing, quality-of-care issues, and social issues, such as gender and culture, and their impact on health and healthcare. The dynamics of the policy-making process at different levels (federal, state and local) will be explored, along with policy analysis and how policy influences healthcare decisions. The complexities and challenges of healthcare reform will be identified. Also listed as HE-440.

**NU-450 Leadership in Nursing and Healthcare****Credits: 3**

Prerequisite(s): NU-401 and NU-492 both passed with a grade of C+ or higher

Co-requisite(s): NU-400 and NU-490

Term Offered: Spring Term

Course Type(s): None

The acquisition of knowledge and skills necessary for personal and professional growth designed to address the elements of successful leadership in a manner that is practical and relevant for today's professional nurse.

**NU-476 Interpersonal Violence**

Term Offered: All Terms

Course Type(s): NU.EL

Examines the various types and patterns of violence related to cultural values, beliefs, biases, and societal issues, as well as the historical perspectives of violence. Course content includes: family, community, youth, and workplace violence; child, domestic, elder, and sexual abuse. Theories concerning gender violence, gangs, bias and hate crimes, and terrorism are challenged. Public health and health care issues related to violence, and primary, secondary, and tertiary-level interventions for victims and offenders of violence are discussed. Individual responsibilities associated with identification and reporting violence are identified. Health care measures to identify and prevent violence are analyzed. Methods of treatment for victims and perpetrators of violence are evaluated. Also listed as HE-476.

**Credits: 3****NU-490 Transition to Professional Practice****Credits: 6**

Prerequisite(s): NU-401 and NU-492 both passed with a grade of C+ or higher

Co-requisite(s): NU-400, NU-400P, NU-450, and NU-490P

Term Offered: Spring Term

Course Type(s): RD

This course is a comprehensive review of essential concepts and skills related to care of patients incorporating online review modules aligned with the NCLEX-RN detailed test blueprint. Students focus on those concepts necessary to prepare for the successful practice of professional nursing. Standardized testing is incorporated that includes a comprehensive examination and results-based remediation to support the successful completion of the NCLEX-RN exam and effective transition into nursing practice. Clinical experiences provide the student the opportunity to apply learned concepts while providing care to assigned patients and when functioning in a leadership role. For Nursing majors only.

**NU-490CL Transition to Professional Practice Clinical****Credits: None**

Co-requisite(s): NU-490

Term Offered: Spring Term

Course Type(s): None

This capstone clinical course serves as a transition between the role of student and professional nurse. The major purpose is to increase independence in providing nursing care to groups of individuals in an acute care setting. The focus of this course is on organization, delegation and supervision of care and evaluation of outcomes. Clinical is Pass/Fail. Student must pass NU-490CL in order to pass NU-490.

**NU-492 Mental Health Tertiary Care****Credits: 5**

Prerequisite(s): NU-308 and NU-202 both passed with a grade of C+ or higher.

Co-requisite(s): NU-401 and NU-492P.

Course Type(s): None

Part I: This course focuses on the care of patients experiencing mental and behavioral disorders. Emphasis is placed on the management of patients facing emotional and psychological stressors as well as promoting and maintaining the mental health of individuals and families. Concepts of crisis intervention, therapeutic communication, anger management, and coping skills are integrated throughout the course. Clinical experiences provide the student with an opportunity to apply theoretical concepts and implement safe patient care to patients in mental health settings. Part II: Tertiary care nursing: Care for individuals, families, and aggregates highly specialized consultative care that involves advanced and complex procedures and treatments performed by medical specialists (such as pediatric centers, Oncology centers, burn centers, palliative care, plastic surgery, psychiatric hospitals) and community. The focus of tertiary care includes, but not limited to management of complex health issues, health promotion, disease prevention, risk reduction, health maintenance, and rehabilitation, injury prevention of adult and geriatric patients from diverse backgrounds. This course allows the students to improve and advance their abilities to critically think and apply evidence-based practice to formulate differential diagnoses, clinical impressions, nursing diagnoses for treatment and evaluation of care provided to adult and geriatric patients.

**NU-492CL Mental Health Clinical****Credits: None**

Co-requisite(s): NU-492

Course Type(s): None

Students will learn the didactic content and apply the associated nursing skills during the clinical experience in the medical setting with live patients. For Nursing majors only. This is a pass/fail course. Students must pass all components of this course to progress.

**NU-498 Special Topics in Nursing (400 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): NU.EL

An intensive study of a particular subject or problem in nursing to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**NU-498P Special Topics in Nursing****Credits: None**

Term Offered: Spring Term

Course Type(s): None

Practicum for NU 490.

**NU-499 Independent Study in Nursing****Credits: 1-3**

Prerequisite(s): NU-312, NU-324, NU-355, and permission of the directing professor and department chair

Term Offered: Spring Term

Course Type(s): None

Guided research and in-depth study of an area of nursing and/or health care of particular interest to the student.

**NU-508 Factors Affecting Healthcare****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Examine models and contexts for health promotion and disease prevention; examine the influence of culture on health beliefs and practices; and ethical dilemmas. Investigate factors such as access to care, health and social policy, healthcare finance and economics, and legislative influences on health. Students must earn a minimum grade of B in the course. Students who receive less than a grade of B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-512 Nursing Research for Advanced Nursing Practice****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Critical appraisal of the role of nursing research and research methods of inquiry in the development of nursing theory and practice. Qualitative and quantitative research methods; research designs; measurement theory and strategies; methods of data analysis; read, critique and write research reports; ethics, application of research techniques for outcomes evaluation and evidence-based practice. Students must earn a minimum grade of B in the course. Students who receive less than a grade of B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-514 Data Management for Advanced Nursing Practice****Credits: 3**

Prerequisite(s): NU-512

Term Offered: All Terms

Course Type(s): None

Planning for and collection of outcome data; preparation of data for hypothesis testing; use of the SPSS statistical computer package for data management and analysis; selection and interpretation of appropriate parametric and nonparametric descriptive and inferential statistics for outcome evaluation. Quantitative and qualitative data analysis. Students must earn a minimum grade of B in the course. Students who receive less than a grade of B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-518 Education and Motivation of Nursing Clients****Credits: 3**

Term Offered: All Terms

Course Type(s): NU.EL

Role of the nurse in fostering health promotion via education of clients, families, and professional colleagues. Essential factors for successful teaching and learning. Motivating the client to make behavioral changes to promote health and development. Development, presentation, and evaluation of a formal teaching plan. Students must earn a minimum grade of B in the course. Students who receive less than a grade of B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-521 Pathophysiology and Histology****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Focuses on pathogenesis of selected diseases leading to alterations of body structure and functions across the life span. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-524 Pharmacology for Advanced Nursing Practice****Credits: 3**

Prerequisite(s): NU-521

Term Offered: All Terms

Course Type(s): None

Content includes the historical perspective, legal regulations, standards, the Controlled Substances Act; pharmacokinetics: pharmacodynamics; choice and use of pharmacotherapeutics; nursing responsibilities in drug prescription; client education concerning the drug desired effects, side effects, interactions, toxicity, dependence, and addiction through the life span. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B in any NU course will make students ineligible to continue in the program.

**NU-535 Advanced Health and Physical Assessment****Credits: 3**

Prerequisite(s): NU-521

Term Offered: All Terms

Course Type(s): None

Theory and practice of health and physical assessment skills, identification of deviations from the normal, and documentation of findings are refined. Advanced-level assessment includes the comprehensive history, physical and psychological variations of the client. The client is viewed holistically, incorporating cultural, nutritional, and developmental variations. Application of techniques is practiced and recorded. Students practice physical assessment techniques and translate assessment data, interpretation of laboratory and diagnostic data into differential diagnoses, and plans of care. The relationship of health and physical assessment to the role and responsibilities of the nurse is examined in the context of advanced nursing practice. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B in any NU course will make students ineligible to continue in the program.

**NU-536 Advanced Health Assessment for Forensic Nurses****Credits: 3**

Prerequisite(s): NU-521 and NU-524

Term Offered: Summer Term

Course Type(s): None

Theory and practice of health assessment skills, identification of deviations from the normal and documentation of findings are refined. Advanced level assessment includes the comprehensive history, physical and psychological variations of the client across the lifespan. The client is viewed holistically, incorporating cultural, nutritional, and developmental variations. Application of techniques is practiced in the college laboratory and with clients in outside agencies. Students translate assessment data into differential diagnoses and interpret laboratory and diagnostic data. Relationship of health assessment to the role and responsibilities of the nurse is examined. Students must earn a minimum grade of B in the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-541 Primary Care**

Prerequisite(s): NU-521, NU-524, and NU-535

Co-requisite(s): NU-542S and NU-542P

Term Offered: Spring Term

Course Type(s): None

Aspects of advanced health assessment, clinical reasoning, and diagnostic skills necessary to manage common stable, chronic, and episodic alterations in health. Various advanced nursing practice roles in health care, ethical and legal issues in clinical practice, application of research-based clinical outcomes, promotion and maintenance of health, disease prevention and treatment modalities for individuals are explored. Content is presented in weekly clinical case studies related to common alterations in health. Factors influencing health care systems, patterns of human responses, and cultural and epidemiological influences will be discussed in weekly clinical case studies. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**Credits: 3****NU-542P Primary Care Practicum**

Prerequisite(s): NU-521, NU-524, and NU-535

Term Offered: Spring Term

Course Type(s): None

Delivery of primary health care to the family unit with common health problems including collection of subjective and objective data using the techniques of interview and physical examination; deriving differential and final diagnoses; planning care for acute and chronic illness using community resources; use of communication for health teaching, counseling and motivating clients for positive health maintenance. Establishment of collaborative role with other health care providers. This is a pass/fail course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**Credits: 2****NU-542S Primary Care Seminar**

Prerequisite(s): NU-521, NU-524, and NU-535

Term Offered: Spring Term

Course Type(s): None

Delivery of primary health care to adults and older adults with common health problems includes collection of subjective and objective data using the techniques of interview and physical examination; deriving differential and final diagnoses; planning care for acute and chronic illness using community resources; use of communication for health teaching, counseling and motivating clients for positive health maintenance. Establishment of collaborative role with other health care providers. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**Credits: 1****NU-543 Diagnosis and Treatment of Psychopathology****Credits: 3**

Co-requisite(s): NU-544P and NU-544S

Term Offered: All Terms

Course Type(s): None

This course will provide the basic foundations of diagnosis and clinical management of common psychiatric/mental health problems in adults. Students must earn a minimum grade of B in the course. Students who receive less than a grade of B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students must pass the lecture, seminar, and practicum to advance in the specialty program. Prerequisites: NU-521, NU-524, and NU-535 Corequisite: NU-544P and NU-544S

**NU-544P Diagnosis and Treatment of Psychopathology Practicum****Credits: 2**

Prerequisite(s): NU-521, NU-524, and NU-535

Co-requisite(s): NU-543 and NU-544S

Term Offered: Fall Term

Course Type(s): None

This introductory clinical course will provide the basic foundations of clinical management of common psychiatric/mental health problems in adults. The student will deliver mental health care to adults with mental health problems including collection of subjective and objective data using the techniques of interview; establishing a psychiatric diagnosis utilizing the current Diagnostic and Statistical Manual classification system; and completing an initial psychiatric assessment and identifying psychopharmacologic interventions as appropriate. Establishment of collaborative role with other healthcare providers. Restricted to Psychiatric and Mental Health Nurse Practitioner students only. This is a pass/fail course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-544S Diagnosis and Treatment of Psychopathology Seminar****Credits: 1**

Prerequisite(s): NU-521, NU-524, and NU-535;

Co-requisite(s): NU-543 and NU-544P

Term Offered: Fall Term

Course Type(s): HY

This introductory clinical course will provide the basic foundations of clinical management of common psychiatric/mental health problems in adults. The student will deliver mental health care to adults with mental health problems including collection of subjective and objective data using the techniques of interview; establishing a psychiatric diagnosis utilizing the current Diagnostic and Statistical Manual classification system, completing an initial psychiatric assessment and identifying psychopharmacologic interventions as appropriate. Establishment of collaborative role with other healthcare providers. Students must earn a minimum grade of B in the course. Students who receive less than a grade of B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-562 Tests and Measures**

Term Offered: Spring Term

Course Type(s): None

Considers evaluation methods related to norm-referenced and criterion-referenced evaluation methods in education. Students will investigate criteria used to develop reliable and valid evaluation measures. Current issues and research related to educational testing instruments, alternatives to standardized evaluation methods, and outcome measurement in education will be discussed. Students will explore measurement theory and evaluate measures that are used to identify cognitive, affective, and psychomotor domains as they relate to education. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students who have taken NU-562 are not eligible to take NU-762.

**NU-564 Curriculum Development and Instruction in Nursing Education****Credits: 3**

Term Offered: Fall Term

Course Type(s): OL

The primary focus of this course is the process of curriculum development in nursing. Factors influencing curriculum development, the process of curriculum development and evaluation methods are emphasized. Instruction and evaluation in didactic nursing courses and clinical experiences are addressed. Individuals completing this course will be prepared for the role of nurse educator in academic settings. Students who have taken NU-564 are not eligible to take NU-764.

**NU-566P Nurse Educator Practicum I****Credits: 2**

Prerequisite(s): NU-521, NU-524, and NU-535.

Co-requisite(s): NU-566S.

Term Offered: Fall Term

Course Type(s): None

Course provides an opportunity for the student to engage in planned clinical practice experiences, incorporating the concentration (Pathophysiology, Pharmacology, and Advance Health Assessment) in a direct-care role in a clinical setting to strengthen their patient care delivery skills. The student will also function in the role of the novice academic nurse educator, applying teaching and learning principles in both the academic and clinical settings. Each practice experience is guided by a preceptor. Total practicum hours for this course is a minimum of 90 hours. This is a pass/fail course.

**NU-566S Nurse Educator Seminar I****Credits: 1**

Prerequisite(s): NU-521, NU-524, and NU-535

Co-requisite(s): NU-566P

Term Offered: All Terms

Course Type(s): None

Through discussion and sharing, students reflect on their direct-care practicum experiences and how it impact the role of academic nurse educator. In addition, students discuss the role of the academic nurse educator and how the practicum experiences relate to the eight core nursing competencies of the academic nurse educator outlined by the National League for Nursing. Students who have taken NU-766S are not eligible to take NU-566S.

**NU-567P Nurse Educator Practicum II****Credits: 2**

Co-requisite(s): NU-567S

Term Offered: Spring Term

Course Type(s): None

Provides additional opportunities for the student to function in the role of the novice academic nurse educator in diverse settings. Students continue to apply teaching and learning principles in both academic and clinical settings under the guidance of a preceptor during an additional 90 hours of practicum experiences. Through continued reflection and sharing, students refine their practice and explore the eight core competencies outlined by the National League for Nursing. This is a pass/fail course. Ninety practicum hours are required. Students who have taken NU 567P are not eligible to take NU-767P.

**NU-567S Nurse Educator Seminar II****Credits: 1**

Co-requisite(s): NU-567P

Term Offered: Spring Term

Course Type(s): None

Through further discussion, and sharing, students refine their practice and identify the tasks associated with the eight core competencies of the academic nurse educator outlined by the National League for Nursing. Also listed as NU-767S.

**NU-575 Issues in Forensic Nursing****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

Introduction to forensic nursing practice and the concepts, theories, and principles used in this advanced practice role. The use of the nursing process in forensic decision making for the management of individuals or populations are illustrated. The relationship between various socio-cultural factors, psychosocial issues, and ethical challenges are discussed in relationship to catastrophic injuries/illnesses and violent crimes. Comparison of the various roles in which forensic nursing can be applied are examined including the scopes and standards of nursing practice. Legal considerations in areas such as collection of forensic evidence and preservation, discovery, expert testimony are distinguished. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-576 Interpersonal Violence****Credits: 3**

Term Offered: All Terms

Course Type(s): NU.EL

Examines the various types and patterns of violence related to cultural values, beliefs, biases and societal issues, as well as the historical perspective of violence. Content includes: family, community, youth, and workplace violence, and child, domestic, elder and sexual abuse. Theories concerning gender violence, gangs, bias and hate crimes, and terrorism are challenged. Public health and health care issues related to violence, and primary, secondary, and tertiary level interventions for victims and offenders of violence are discussed. Individual responsibilities associated with identification and reporting violence are identified. Healthcare measures to identify and prevent violence are analyzed. Methods of treatment for victims and perpetrators of violence are evaluated. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-577 Forensic Pathology****Credits: 3**

Prerequisite(s): NU-521, NU-524, and NU-535 all passed with a grade of B or higher

Term Offered: Spring Term

Course Type(s): None

Designed to introduce students to concepts of forensic pathology with an emphasis on the recognition and interpretation of diseases and injuries in the human body that are the basis for medico-legal investigations. It presents an overview of the medico-legal investigative systems and the substance and mechanics of forensic pathology. The medical examiner, usually the pathologist, is primarily concerned with the investigation of violent, sudden, unexpected, and suspicious deaths. The medical examiner determines the cause and manner of death, identifies the deceased if unknown, determines the approximate time of injury and death, collects evidence from the body, issues a death certificate, and documents these events through an official autopsy report.

**NU-578P Forensic Nursing Practicum****Credits: 2**

Prerequisite(s): NU-521, NU-535, NU-543, NU-575, NU-576, and NU-577

Co-requisite(s): NU-578S

Term Offered: All Terms

Course Type(s): None

Students will work in an interdisciplinary team or with individuals in forensic arenas as they apply forensic theory and research in forensic nursing practice. Appropriate techniques for identifying, collecting and documenting pertinent data will be reinforced through clinical practice in a forensic arena. Under the supervision and guidance of a clinical preceptor, students will identify outcomes and plans of action for effective coordination and communication among professionals and clients as a means to learn appropriate techniques for the identification, prevention, and management of victims of crime and trauma. Students will develop expertise in the collection, preservation and documentation of evidence as identified in scopes and standards of forensic nursing practice. Individual experiences are arranged in conjunction with students' goals for practice. Students will attend a one-hour weekly seminar and a weekly eight-hour clinical practicum. This is a pass/fail course.

**NU-578S Forensic Nursing Seminar****Credits: 1**

Prerequisite(s): NU-521, NU-535, NU-543, NU-575, NU-576, and NU-577

Co-requisite(s): NU-578P

Term Offered: All Terms

Course Type(s): None

Explores forensic theory and research to forensic nursing practice. Forensic nurses practice as sexual assault examiners, educators, nurse coroners, death investigators, correctional nurses, life care planners, case managers, legal nurse consultants, Medicare set aside coordinators and clinical specialists in pediatrics and gerontology. Issues addressing systematic analysis of pertinent data, and the physical/psychological issues related to forensic nursing and applying nursing science to public and legal proceedings will be discussed in seminar. Identification of outcomes and plans of action that provide effective coordination and communication in managing clients will be addressed. A scientific and conceptual knowledge of nursing, forensic and criminal justice will assist students to recognize appropriate techniques for the identification, prevention, and management of appropriate clients utilizing the scopes and standards of forensic nursing practice. The collaborative nature of forensic nursing practice as a component of multidisciplinary teams will be stressed. Individual experiences are arranged in conjunction with students' goals for practice. Students will attend a one hour weekly seminar and a weekly eight hour clinical practicum. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-584 Curriculum and Instruction in Health Education****Credits: 4**

Term Offered: Fall Term

Course Type(s): HY

Examination of theoretical bases for health education for graduate school nursing students including program development and implementation, educational strategies, behavioral objectives, learner characteristics, instructional assessment and classroom management. Was previously offered as HE-584.

**NU-585 School Nursing I****Credits: 4**

Term Offered: Fall Term

Course Type(s): None

Examines and analyzes the role of the school nurse as a healthcare provider, health educator, health counselor, child advocate in the school community, and interdisciplinary team member. Explores financial, legal, and administrative issues as they relate to school nursing. Reviews normal growth and developmental patterns. Describes common health problems, special needs, and interventions appropriate for school nurses. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-586 School Nursing II**

Term Offered: Spring Term

Course Type(s): None

A continuation of the examination and analysis of the role of the school nurse as healthcare provider, health educator, health counselor, and interdisciplinary team member. An expansion of the role of the nurse as child advocate in the community and as public health nurse. Explores external and internal environmental influences that impact on the health of children. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**Credits: 4****NU-587P Practicum: School Nurse I**

Prerequisite(s): NU-585

Co-requisite(s): NU-587S

Term Offered: All Terms

Course Type(s): None

Introduction to the clinical experience for the school nurse. The student has his/her clinical experience in the school nurse's office where he or she takes an active part in school health services, physical assessments, organization and administration of the school health program as outlined in NJAC 6A:9 Professional Licensure and Standards of the NJ Board of Education Standards. This is a pass/fail course.

**Credits: 2****NU-587S Seminar: School Nurse I**

Prerequisite(s): NU-585

Co-requisite(s): NU-587P

Term Offered: Fall Term

Course Type(s): None

Discusses the school nurse's role as a healthcare provider, health counselor, administrator and member of the interdisciplinary school team. Students who are employed as a school nurse should take this two-credit seminar to fulfill the New Jersey Board of Education's requirement of "a minimum six semester-hour credits in school nursing, including school health services, physical assessments, organization, and administration of the school health program." Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**Credits: 2****NU-588P Practicum: School Nurse II**

Prerequisite(s): NU-586, NU-584, and NU-587S

Co-requisite(s): NU-588S

Term Offered: Spring Term

Course Type(s): None

A continuation of the clinical experience for the school nurse. The student functions in the role of the school nurse as a health educator. This is a pass/fail course.

**Credits: 2****NU-588S Seminar: School Nurse II**

Prerequisite(s): NU-586 and NU-587S

Co-requisite(s): NU-584 and NU-588P

Term Offered: Spring Term

Course Type(s): None

Discusses the school nurse's role as a health educator. Students must earn a minimum of a "B" in the course. Students who receive less than a "B" will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a "B" will make students ineligible to continue in programs requiring this course.

**Credits: 2****NU-598 Special Topics in Nursing**

Term Offered: Spring Term

Course Type(s): None

Allows students to study a specific aspect of nursing. The subject matter varies from semester to semester and depends on the professor who teaches the course. If a prerequisite is required it will be announced in the course schedule.

**Credits: 3****NU-599 Independent Study in Nursing**

Term Offered: All Terms

Course Type(s): None

Independent study (theory and/or practica) in a specialized area of interest to the student. Weekly consultations with supervising faculty member. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 1-4****NU-601F Principles of Practice Iii: Adult Occupational Therapy Fieldwork**

Prerequisite(s): OTD-511, OTD-512, and OTD-513;

Co-requisite(s): OTD-601, OTD-601L, OTD-602, and OTD-603;

Term Offered: Summer Term

Course Type(s): None

This course builds on the foundational principles to prepare students to develop and implement evidenced-based, and client-centered intervention, related to areas of occupation for a variety of clients and diagnoses, along the continuum of practice settings. Lab experiences will promote critical analysis and facilitate growth of a clinical skill set. Case-based learning will be used to promote clinical and ethical reasoning to determine the appropriate intervention approach for a particular client. Competency in entry-level intervention skills are emphasized throughout the course. Didactic coursework is coupled with Level I experiences to enhance student learning. Experiences may include simulated environments, standardized patients, faculty practice, faculty-led site visits and/or, supervision by a fieldwork educator in a practice environment.

**Credits: None****NU-631 Advanced Practice Nursing I**

Prerequisite(s): NU-521, NU-524, NU-535, NU-541, NU-542P, and NU-542S.

Co-requisite(s): NU-632P and NU-632S

Term Offered: Fall Term

Course Type(s): None

Detailed case study analysis of common health problems of the adult and older adult including pathophysiology, epidemiology, strengths and weaknesses of assessment of data collection, diagnostic process, planning, intervention, and evaluation. Interview and physical examination techniques for collecting subjective and objective data in primary care and long-term care settings; deriving nursing diagnoses; planning care for acute and chronic illness in culturally diverse populations utilizing community resources; using communication for health teaching and counseling and to motivate clients for positive health-maintenance will be explored. Expansion of traditional nursing role to the advanced practice nurse (APN) role through the incorporation of evidence-based practice, personal knowledge, and ethics will be discussed. The course is process-driven and will require extensive reading in the student's specialty area. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**Credits: 3**

**NU-632P Advanced Practice Nursing Practicum I****Credits: 2**

Prerequisite(s): NU-521, NU-524, NU-535, NU-541, NU-542P, and NU-542S.

Co-requisite(s): NU-631 and NU-632S.

Term Offered: Fall Term

Course Type(s): None

Delivery of person-centered primary health care to clients with common health problems including collection of subjective and objective data; deriving differential and final diagnoses; planning care for acute and chronic illness using community resources; using communication strategies for health teaching, counseling and motivating clients with diverse backgrounds for positive health outcomes. Course focuses on developing competency as a novice advanced practice nurse and collaborating with interprofessional healthcare providers. This is a pass/fail course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-632S Advanced Practice Nursing Seminar I****Credits: 1**

Term Offered: Fall Term

Course Type(s): HY

Delivery of primary health care to adults and older adults with common health problems includes collection of subjective and objective data using the techniques of interview and physical examination; deriving differential and final diagnoses; planning care for acute and chronic illness using community resources; use of communication for health teaching, counseling and motivating clients for positive health maintenance. Establishment of collaborative role with other health care providers. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-633 Advanced Practice Nursing II****Credits: 3**

Prerequisite(s): NU-521, NU-524, NU-535, NU-541, NU-542P, NU-542S, NU-631, NU-632P, and NU-632S.

Co-requisite(s): NU-634S and NU-634P

Term Offered: Spring Term

Course Type(s): None

This course is a continuation of NU-631. Detailed case study analysis of health problems including pathophysiology, epidemiology, strengths, and weaknesses of assessment of data collection, diagnostic process, planning, intervention, and evaluation. Interview and physical examination techniques for collecting subjective and objective data in primary, acute and chronic illness in culturally diverse populations utilizing community resources; using communication strategies for health teaching and counseling and to motivate clients with diverse backgrounds for positive health outcomes. Course focuses on expansion of traditional nursing role to the advanced practice nurse (APN) role through the incorporation of evidence-based practice scope of practice, and ethical considerations, and collaboration with interprofessional team members. The course is process-driven and will require extensive reading in the student's specialty area. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-634P Advanced Practice Nursing Practicum II****Credits: 2**

Prerequisite(s): NU-521, NU-524, NU-535, NU-541, NU-542P, NU-542S,

NU-631, NU-632S, and NU-632P.

Co-requisite(s): NU-633 and NU-634S

Term Offered: Spring Term

Course Type(s): None

Delivery of healthcare to the child, pregnant couple, and adults with complex health problems, including collection of subjective and objective data using the techniques of interview and physical examination; deriving nursing diagnoses; planning care for acute and chronic illness using community resources; use of communication for health teaching, counseling and motivating clients for positive health maintenance. Establishment of collaborative role with other health care providers. This is a pass/fail course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-634S Advanced Practice Nursing Seminar II****Credits: 1**

Prerequisite(s): NU-521, NU-524, NU-535, NU-541, NU-542P, NU-542S, NU-631, NU-632P, and NU-632S.

Co-requisite(s): NU-633 and NU-634P

Term Offered: Spring Term

Course Type(s): HY

Discussion of delivery of healthcare to the child, pregnant couple, and adults with complex health problems that include collection of subjective and objective data using the techniques of interview and physical examination; deriving nursing diagnoses; planning care for acute and chronic illness using community resources; use of communication for health teaching, counseling, and motivating clients for positive health maintenance. Establishment of collaborative role with other healthcare providers. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-635 Advanced Practice Nursing Pediatrics****Credits: 2**

Co-requisite(s): NU-635P

Term Offered: Summer Term

Course Type(s): None

Detailed case study analysis of health problems including pathophysiology, epidemiology, strengths and weaknesses of assessment of data collection, diagnostic process, planning, intervention, and evaluation. Interview and physical examination techniques for collecting subjective and objective data in pediatric care, both acute and chronic illness in culturally diverse pediatric populations utilizing community resources; using communication for health teaching and counseling and to motivate clients for positive health maintenance. Expansion of traditional nursing role to the advanced practice nurse (APN) role through the incorporation of evidence-based practice, personal knowledge, and ethics. The course is process-driven and will require extensive reading in the student's specialty area. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-635P Advanced Practice Nursing Pediatrics Practicum Credits: 1**

Prerequisite(s): NU-521, NU-524, NU-535, NU-541, NU-542P, and NU-542S

Co-requisite(s): NU-635

Term Offered: Summer Term

Course Type(s): None

Deliver primary care to pediatric clients with common health problems including collection of subjective and objective data using the techniques of interview and physical examination; diagnose and plan care for acute and chronic illness in culturally diverse pediatric populations utilizing community resources; use communication skills for health teaching and counseling and to motivate pediatric clients and their families for positive health maintenance. Expand the traditional nursing role to the advanced practice nurse (APN) role through the incorporation of evidence-based practice, personal knowledge, and ethics. Establish collaborative relationships with other health care providers for comprehensive care. This is a pass/fail course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-635S Advanced Practice Nursing Pediatric Seminar Credits: 1**

Term Offered: Summer Term

Course Type(s): OL

Through discussion, sharing, and the use of case studies allow students to facilitate the refinement of their practice with pediatric patients with common health problems. Topic discussions include the collection of subjective and objective data using the techniques of interview and physical examination; assessing for developmental benchmarks, formulating differential and final diagnoses; planning care for acute and chronic illness using community resources; use of communication for health teaching, recognizing, and motivating clients and parents for positive health maintenance. Establish collaborative roles with other healthcare providers.

**NU-661 Nursing Administration I Credits: 3**

Co-requisite(s): NU-622P and NU-622S

Course Type(s): None

Students are socialized into the middle-level management and administration roles by examination of the administrative process in a variety of healthcare organizations. Students are expected to assess, plan, develop, evaluate, and refine their effectiveness as managers and leaders of nursing and patient care services. By synthesizing information from previous course work, management theories, and relevant research, students will be able to apply themselves to the management/administration roles. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-662P Nursing Administration I Practicum Credits: 2**

Co-requisite(s): NU-661 and NU-662S

Term Offered: Fall Term

Course Type(s): None

Students observe and participate in the middle-level management/administrative process in a variety of healthcare organizations. For the required practicum, the student selects a nursing service compatible with the student's individual goals. Socialization into the middle management and administrative roles permits students to assess, plan, implement, and refine their skills as beginning practitioners as managers and leaders of nursing and patient care services. This is a pass/fail course.

**NU-662S Nursing Administration I Seminar Credits: 1**

Co-requisite(s): NU-661 and NU-662P

Course Type(s): None

Students analyze the middle-level management/administrative process in a variety of healthcare organizations. Socialization into the middle management and administrative roles permits students to assess, plan, implement, and refine their skills as beginning practitioners as managers and leaders of nursing and patient care services. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-663 Nursing Administration II Credits: 3**

Prerequisite(s): NU-661, NU-662S, and NU-662P

Co-requisite(s): NU-664P and NU-664S

Term Offered: Spring Term

Course Type(s): None

Students are prepared to practice in the role of middle-level administration and nursing case manager. Students will build on the information obtained in Nursing Administration I. In addition, nurses will learn the role of the nursing case manager. Students learn how to provide quality healthcare along a continuum, decrease fragmentation of care across multiple settings, enhance the client's quality of life, and address issues concerning cost containment. Communication and collaboration techniques are utilized to assess, plan, implement, coordinate, monitor and evaluate the options and services available to meet individual health needs. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-664P Nursing Administration II Practicum Credits: 2**

Prerequisite(s): NU-661, NU-662S, and NU-662P

Co-requisite(s): NU-663 and NU-664S

Term Offered: Spring Term

Course Type(s): None

Students observe and participate in the human resources and the nursing case management roles. Students build on the information obtained in Nursing Administration I. Students investigate the integration of the nursing administrator role and human resource elements and observe the relationship through direct observation of the HR staff and the Executive Team. This is a pass/fail course.

**NU-664S Nursing Administration II Seminar Credits: 1**

Prerequisite(s): NU-661, NU-662S, and NU-662P

Co-requisite(s): NU-663 and NU-664P

Term Offered: Spring Term

Course Type(s): None

Students analyze the human resource role and the nursing case management role and their relationship to nursing administration. Students build on the information obtained in Nursing Administration Seminar I. Students assess, plan, and implement their effectiveness as administrative-level nursing personnel and delve into the knowledge required to comprehend the role of case management and human resources and their relation to nursing administration. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-669 Psychiatric Mental Health Nursing I: Practice with Children and Adolescents Credits: 3**

Prerequisite(s): NU-521, NU-524, NU-535, NU-543, NU-544P, and NU-544S

Co-requisite(s): NU-670P and NU-670S

Course Type(s): None

Examines psychological theories, assessment techniques and psychopharmacologic interventions for working directly with children, adolescents, and their caretakers. Emphasizes evidence-based interventions that address diverse groups of children or adolescents within their social contexts (e.g., peer group, school, family, neighborhood). Special attention will be given to issues of diversity as it relates to building therapeutic relationships and intervening with children, adolescents and their families. Treatment planning and specific methodologies for working therapeutically with children and adolescents will be evaluated. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-670P Psychiatric Mental Health Nursing I: Practice with Children and Adolescents Practicum Credits: 2**

Prerequisite(s): NU-521, NU-524, NU-535, NU-543, NU-544S, and NU-544P

Co-requisite(s): NU-669 and NU-670S

Course Type(s): None

Delivery of mental healthcare to children and adolescents with mental health problems including collection of subjective and objective data using the techniques of interview; deriving psychiatric diagnoses; deriving nursing diagnoses; planning care for acute and chronic mental health issues using community resources; use of interventions including short-term problem-focused psychotherapy, group therapy and psychopharmacologic modalities. Establishment of collaborative role with other healthcare providers. This is a pass/fail course. Students must pass the lecture, seminar, and practicum to advance in the specialty program.

**NU-670S Psychiatric Mental Health Nursing I: Practice with Children and Adolescents Seminar Credits: 1**

Prerequisite(s): NU-521, NU-524, NU-535, NU-543, NU-544P, and NU-544S

Co-requisite(s): NU-669 and NU-670P

Course Type(s): None

Delivery of mental health care to children and adolescents with mental health problems including collection of subjective and objective data using the techniques of interview; deriving psychiatric diagnoses; deriving nursing diagnoses; planning care for acute and chronic mental health issues using community resources; use of interventions including short-term problem-focused psychotherapy, group therapy and psychopharmacologic modalities. Establishment of collaborative role with other healthcare providers. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-671 Advanced Practice Psychiatric/Mental Health Nursing II: Psychopharmacology and Introduction to Therapy Credits: 3**

Prerequisite(s): NU-521, NU-524, NU-535, NU-543, NU-544P, NU-544S,

NU-669, NU-670P and NU-670S

Co-requisite(s): NU-672P and NU-672S

Term Offered: All Terms

Course Type(s): None

Focuses on advanced knowledge of psychiatric/mental health nursing. Assessment, treatment planning and therapeutic interventions with individuals, families and groups will be introduced. Offers various treatment models including the classic schools and current developments in individuals, families and groups. Each therapeutic modality will be presented using key concepts, an explanation of the therapeutic process and application of techniques. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-672P Advanced Practice Psychiatric/ Mental Health Nursing Practicum II Credits: 2**

Co-requisite(s): NU-671 and NU-672S

Term Offered: All Terms

Course Type(s): None

Delivery of mental health care to adults with mental health problems, including collection of subjective and objective data using the techniques of interview; deriving psychiatric diagnoses; deriving nursing diagnoses; planning care for acute and chronic mental health issues using community resources; use of interventions including short-term problem-focused psychotherapy, group therapy and psychopharmacologic modalities. Establishment of collaborative role with other health care providers. This is a pass/fail course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-672S Advanced Practice Psychiatric/Mental Health Nursing Seminar II Credits: 1**

Co-requisite(s): NU-671 and NU-672P

Term Offered: All Terms

Course Type(s): None

Delivery of mental health care to adults with mental health problems, including collection of subjective and objective data using the techniques of interview; deriving psychiatric diagnoses; deriving nursing diagnoses; planning care for acute and chronic mental health issues using community resources; use of interventions including short-term problem-focused psychotherapy, group therapy and psychopharmacologic modalities. Establishment of collaborative role with other health care providers. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course.

**NU-673 Advanced Practice Psychiatric/ Mental Health Nursing III****Credits: 3**

Prerequisite(s): NU-521, NU-524, NU-535, NU-543, NU-544P, NU-544S, NU-669, NU-670P, NU-670S, NU-671, NU-672P, and NU-672S.

Co-requisite(s): NU-674P and NU-674S

Term Offered: All Terms

Course Type(s): None

This course will examine how client's lives are affected by larger societal structures. This course will examine modalities and ways to intervene with clients with a true sensitivity and understanding of issues of race, culture, gender, religion and sexual orientation. Each therapeutic modality will be presented using key concepts, an explanation of the therapeutic process and application of techniques. Students must earn a minimum grade of B in the course. Students who receive less than a grade of B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-674P Advanced Practice Psychiatric/Mental Health Nursing Practicum III****Credits: 2**

Prerequisite(s): NU-521, NU-524, NU-535, NU-543, NU-544P, NU-544S, NU-669, NU-670P, NU-670S, NU-671, NU-672P, and NU-672S

Co-requisite(s): NU-673 and NU-674S

Term Offered: All Terms

Course Type(s): None

A continuation of NU-672P. Delivery of mental health care to adults with mental health problems, including collection of subjective and objective data using the techniques of interview; deriving psychiatric diagnoses; deriving nursing diagnoses; planning care for acute and chronic mental health issues using community resources; use of interventions including short term, problem-focused psychotherapy, group therapy and psychopharmacologic modalities. Establishment of collaborative role with other healthcare providers. This is a pass/fail course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-674S Advanced Practice Psychiatric/Mental Health Nursing Seminar III****Credits: 1**

Prerequisite(s): NU-521, NU-524, NU-535, NU-543, NU-544P, NU-544S, NU-669, NU-670P, NU-670S, NU-671, NU-672P, and NU-672S

Co-requisite(s): NU-673 and NU-674P

Term Offered: All Terms

Course Type(s): None

A continuation of NU-672S. Delivery of mental health care to adults with mental health problems, including collection of subjective and objective data using the techniques of interview; deriving psychiatric diagnoses; deriving nursing diagnoses; planning care for acute and chronic mental health issues using community resources, use of interventions including short-term, problem-focused psychotherapy, group therapy and psychopharmacologic modalities. Establishment of collaborative role with other healthcare providers. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students must pass the lecture, seminar and practicum to advance in the specialty program.

**NU-699 Independent Study in Nursing (600 Level)****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study (theory and/or practica) in a specialized area of interest to the student. Weekly consultations with supervising faculty member. Prior permission of the directing professor and department chair is required to take this course.

**NU-701 Translating Evidence to Clinical Practice****Credits: 3**

Term Offered: All Terms

Course Type(s): OL

Components central to the concept of evidence-based practice are introduced and emphasis is placed on evaluating systematically, research and evidence from multiple sources. Critical appraisal of evidence utilizing clinical informatics, databases, multidisciplinary best practices, and systematic reviews of randomized clinical trials will be included in an approach to a clinical question or problem for a practice change. Strategies for creating a culture of evidence-based practice for individuals and clinical systems will be explored. Tools for diffusing the change or innovation are included. The concept of translational science will prepare students to begin formulation of a capstone project. Students must earn a grade of "B" or higher in this course or it will have to be repeated.

**NU-702 Health Promotion in Diverse Populations****Credits: 3**

Term Offered: All Terms

Course Type(s): OL

Examines the influence of culture on nursing care delivery. Explores the DNP's role in providing culturally appropriate care for increasingly diverse populations. The focus of the course is on global health issues, factors affecting health, disparities in healthcare and infrastructure of populations. Students will utilize evidence-based research to analyze various social, cultural, and economic factors that impact health, illness and the perceptions/behaviors of diverse ethnic and minority groups as they relate to health promotion. Content includes an examination of social, psychological, and cultural theories, a review of current research about health and illness beliefs/behaviors, and the development of health promotion strategies to improve care provided to individuals, aggregates and populations. Students must earn a grade of "B" or higher in this course or it will have to be repeated.

**NU-703 Epidemiology and Genetics/Genomics****Credits: 3**

Term Offered: All Terms

Course Type(s): OL

Explores the key features of epidemiological and genetic concepts and theories in relation to populations. Epidemiological principles will be examined in relation to public health issues to plan and evaluate strategies to prevent illness and study diseases. Exploration of the risks health care personnel deal with: environmental catastrophes, (chemical, biological, and radiation), nuclear attacks, disease outbreaks and global conflicts. Investigation into local, regional, national and international databases regarding health disparities, disease entities, genetic problems, global threats and the response preparedness and effectiveness of various agencies and governments. The student will identify risk factors for genetic disease and explore the influence of genetics and genomics on human diseases as they relate to the ethical, legal and financial responsibilities of the advanced practice nurse. Students must earn a grade of "B" or higher in this course, or it will have to be repeated.

**NU-705 Interprofessional Collaboration and Team Facilitation Credits: 3**

Term Offered: All Terms

Course Type(s): OL

Examines advanced communication skills and other behaviors that provide the knowledge and skills needed for exemplary leadership, with an emphasis on relationships and team building. Strategies for building interdisciplinary, collaborative relationships from a leader's perspective will be explored. Conflict management and resolution is analyzed, along with group process and techniques for effective meeting management. Adult learning principles, emotional intelligence, and team characteristics are discussed in order to envision a quality professional practice environment.

**NU-715 Organizational Leadership in Healthcare Credits: 3**

Term Offered: All Terms

Course Type(s): OL

Examines organizational systems and processes that emphasize the demand for clinical practice leadership, improvement of health outcomes and ensured patient safety. Students are provided the tools to develop expertise in assessing the vision, mission and organizational strategic plans. Emphasis is placed on executive decision making, leading change efforts, and instituting innovative methodologies for system improvement. Organizational behaviors directed towards quality improvement, negotiation, conflict resolution, performance evaluation and ethical conduct in a business environment. Enhances the student's ability to use power and influence to achieve goals, build teams and alliances, establish strong communication channels, and empower others. Students must earn a grade of "B" or higher in this course or it will have to be repeated.

**NU-716 Health Care Policy for Advocacy in Health Care Credits: 3**

Term Offered: All Terms

Course Type(s): OL

Examines healthcare economics, political and public health issues, and their relation to development and implementation of health policies at regional, national and international levels. Health policy influences multiple care delivery issues, including health disparities, underserved populations, cultural sensitivity, ethics, law, health care financing, and issues of equity and social justice in the delivery of healthcare. The DNP role will be discussed in the creation of such policies. Students must earn a grade of "B" or higher in this course or it will have to be repeated.

**NU-718 Health Care Economics and Financial Management Credits: 3**

Term Offered: All Terms

Course Type(s): OL

Provides an in-depth exploration of economics and finance, budget, reimbursement mechanisms and innovative business models for health care organizations and practice settings. Students will have an opportunity to develop and review business plans and to evaluate cost-benefit analyses as they relate to the DNP role. The practical application of management of financial resources, tools for decision making and communication strategies will be integrated. Students must earn a grade of "B" or higher in this course or it will have to be repeated.

**NU-720 Research Methods in Healthcare Leadership****Credits: 3**

Term Offered: All Terms

Course Type(s): OL

Focus is on the critical analysis of the research process. There is an emphasis on the data collection and data analysis steps of research. Skills are developed in the use of the SPSS statistical program and the interpretation of descriptive and inferential statistics for outcome evaluation in healthcare. Interpretation and evaluation of statistical analysis in published research are emphasized. Skills are refined in the dissemination of research to healthcare professionals. DNP students only.

**NU-730 Doctor Nursing Practice Project I****Credits: 3**

Prerequisite(s): NU-720 passed with a grade of B or higher

Term Offered: All Terms

Course Type(s): OL

The DNP project culminates in a practice immersion experience that affords the student the opportunity to integrate and synthesize information from a variety of areas and previous course work to exhibit mastery of an advanced specialty within nursing practice. Students will demonstrate synthesis of the DNP education and advanced nursing practice specialty which focuses on change that impacts healthcare outcomes either through direct or indirect care. Students will share their journey toward developing the DNP project through class discussion using a variety of communication modalities. In consultation with the DNP Project Advisor, students will select an area of specialty practice and propose a project. The end result will be a proposed project based on the principles of evidence-based practice that incorporates planning, implementation, evaluation and dissemination concepts. This will provide a foundation for continued scholarship while making significant contributions in the student's area of interest. Students must earn a grade of B or higher in this course or it will have to be repeated.

**NU-731 Leadership Immersion I****Credits: 3**

Prerequisite(s): NU-701, NU-702, NU-703, NU-705, NU-715, NU-716 all passed with a grade of B or higher.

Term Offered: All Terms

Course Type(s): OL

Immersion into the leadership role provides the student an opportunity to expand their leadership skillset and apply, integrate, and synthesize the DNP Essentials through a collaborative partnership between the university and approved practice partners. The student will develop specific learning objectives related to the DNP Essentials, application of theory, and role requirements jointly with the assigned professor to develop their nursing specialty expertise. This course is individualized to each student's specific area of practice interest. This experience should provide opportunities to work with experts including interdisciplinary to build and assimilate knowledge for advanced nursing practice at the highest level of complexity. DNP Essentials guideline state that graduates should have 1000 hours of combines clinical and experience through the MSN and DNP studies. It is expected that all students in the DNP program complete 500 hours in addition to the 500 hours previously completed in their master's level program or if additional hours are required to meet their advisor to construct a plan. This is a pass/fail course.

**NU-732 Doctor Nursing Practice Project II****Credits: 3**

Prerequisite(s): NU-730 passed with a grade of B or higher

Term Offered: All Terms

Course Type(s): OL

DNP Project II builds on the content and processes developed in the DNP Project I towards implementation. Students will share their journey of implementation and evaluation of the DNP project through class discussion using a variety of communication modalities. In consultation with the DNP Project Advisor students will implement and evaluate the project. This course is a continuation of DNP Project I. Students will continue to integrate and apply information from a variety of areas to demonstrate expertise in an advanced specialty within nursing practice. Students will continue to demonstrate synthesis of the DNP education and advanced nursing practice specialty which focuses on change that impacts healthcare outcomes either through direct or indirect care. The end result will be an executed project based on the principles of evidence-based practice that incorporates planning, implementation, evaluation and dissemination concepts. Students must earn a grade of B or higher in this course or it will have to be repeated.

**NU-733 Leadership Immersion II****Credits: 3**

Prerequisite(s): NU-731 passed with a grade of P

Term Offered: All Terms

Course Type(s): OL

Continuation of the practice immersion experience provides the student with additional opportunities to apply, integrate, and synthesize the DNP Essentials. The student will again develop specific learning objectives related to the DNP Essentials, application of theory, and role requirements jointly with the assigned professor to develop their nursing specialty expertise. This course is individualized to each student's specific area of practice interest. This experience should provide opportunities to work with experts including interdisciplinary to build and assimilate knowledge for advanced nursing practice at the highest level of complexity. DNP Essentials guideline state that graduates should have 1000 hours of combined clinical and experience through the MSN and DNP studies. It is expected that all students in the DNP program complete 500 hours in addition to the 500 hours previously completed in their master's level program or if additional hours are required to meet with their advisor to construct a plan. This is a pass/fail course.

**NU-762 Tests and Measures****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Considers evaluation methods related to norm-referenced and criterion-referenced evaluation methods in education. Students will investigate criteria used to develop reliable and valid evaluation measures. Current issues and research related to educational testing instruments, alternatives to standardized evaluation methods, and outcome measurement in education will be discussed. Students will explore measurement theory and evaluate measures that are used to identify cognitive, affective, and psychomotor domains as they relate to education. Students must earn a minimum of a B in the course. Students who receive less than a B will be required to repeat the course. Students will be allowed to repeat the course no more than once. A second grade below a B will make students ineligible to continue in programs requiring this course. Students who have taken NU-762 are not eligible to take NU-562.

**NU-764 Curriculum Development and Instruction in Nursing****Credits: 3**

Term Offered: Fall Term

Course Type(s): OL

This theory course is designed to introduce the student to the role of the nurse educator in academic educational settings. The Core Competencies of Nurse Educators provides the framework. Factors influencing curriculum development, classroom and clinical teaching strategies, and student outcomes are emphasized. Curriculum analysis and evaluation are based on evidence-based teaching and learning theory within the context of an organization's mission and philosophy. Prerequisites: NU-521, NU-524, and NU-535

**NU-766P Nurse Educator Practicum I****Credits: 2**

Co-requisite(s): NU-766S.

Term Offered: Fall Term

Course Type(s): OL

Course provides an opportunity for the student to engage in planned clinical practice experiences, incorporating the concentration (Pathophysiology, Pharmacology, and Advance Health Assessment) in a direct-care role in a clinical setting to strengthen their patient care delivery skills. The student will also function in the role of the novice academic nurse educator, applying teaching and learning principles in both the academic and clinical settings. Each practice experience is guided by a preceptor. Total practicum hours for this course is a minimum of 90 hours. This is a pass/fail course. Students who have taken NU-766P are not eligible to take NU-566P.

**NU-766S Nurse Educator Seminar I****Credits: 1**

Co-requisite(s): NU-766P

Term Offered: Fall Term

Course Type(s): None

Through discussion and sharing, students reflect on their direct-care practicum experiences and how it impacts the role of academic nurse educator. In addition, students discuss the role of the academic nurse educator and how the practicum experiences relate to the eight core nursing competencies of the academic nurse educator outlined by the National League for Nursing. Students who have taken NU-566S are not eligible to take NU-766S.

**NU-767P Nurse Educator Practicum II****Credits: 2**

Co-requisite(s): NU-567S or NU-767S.

Term Offered: Spring Term

Course Type(s): None

Provides additional opportunities for the student to function in the role of the novice academic nurse educator in diverse settings. Students continue to apply teaching and learning principles in both academic and clinical settings under the guidance of a preceptor during an additional 90 hours of practicum experiences. Through continued reflection and sharing, students refine their practice and explore the eight core competencies outlined by the National League for Nursing. This is a pass/fail course. Ninety practicum hours are required.

**NU-767S Nurse Educator Seminar II****Credits: 1**

Co-requisite(s): NU-567P

Term Offered: Spring Term

Course Type(s): None

Through further discussion, and sharing, students refine their practice and identify the tasks associated with the eight core competencies of the academic nurse educator outlined by the National League for Nursing. Also listed as NU-567S.

**NU-799 Independent Study in Nursing (doctorate Level) Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Independent study (theory and/or practica) in a specialized area of interest to the student. Weekly consultations with supervising faculty member. Course can be graded (theory) or pass/fail (practica). Prior permission of the directing professor and department chair is required to take this course.

<sup>1</sup> Minimum Grade of C+ required to meet the BSN program requirement.<sup>2</sup> Please consult with your advisor regarding the required number of free electives.<sup>3</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Notes

- 54 credits must be completed at the 200 level or higher.
- Students in this program are required to have an overall GPA of 2.75.

## The School of Social Work

Interim Dean: Golam Mathbor, Ph.D.

Chair: Joelle Zabotka, Ph.D.

Social workers are concerned with improving the health and quality of life of persons who are disconnected or excluded from larger society. Social workers engage in practice at all levels, from working with children to working with communities and governments. The profession and the program at Monmouth are particularly concerned with human rights and social and economic justice, the representation and support of vulnerable or oppressed segments of the population, and direct-action strategies to bring about positive change for the disenfranchised.

The central mission of the School of Social Work at Monmouth University is to prepare its graduates for professional social work practice that strives to secure social and economic justice, advance human rights, and improve the quality of life of vulnerable families, individuals, organizations, communities, and nations on the local, national, and global levels.

The B.S.W. Program prepares students for generalist professional social work practice. Secondly, the B.S.W. Program prepares social work students for graduate social work education. The B.S.W. Program also introduces individuals within the University community to relevant social work and social welfare issues.

On the foundation of a liberal arts tradition, students are engaged to broaden and challenge their understanding, analysis, and evaluation of human experiences and societies in the past and in the contemporary world, and of families and individuals of varied cultural and social contexts.

The curriculum supports this mission through three perspectives:

- social and economic justice through the advancement of human rights,
- strengths-based empowerment, and
- practice with families within a global context.

Families within a global context define the initial focal social unit for all social work practice at Monmouth University.

Our three perspectives inform both our B.S.W. and M.S.W. programs as they contribute to the development of students' knowledge, values, and skills:

1. To conceptualize and contribute to social work theory, knowledge, values, and skills on a generalist level for B.S.W. students, and on an advanced, concentration-specific level for M.S.W. students through three interrelated perspectives: social and economic justice through the advancement of human rights, strengths-based empowerment, and practice with families within a global context;
2. To develop the skills to understand, analyze, and evaluate the quality of life and well-being of vulnerable families, individuals, organizations, communities, and nations that is grounded in a strengths-based empowerment approach for social and economic justice and human rights;
3. To prepare social work practitioners to develop and systematically apply knowledge, values, skills, and ethics in their work with families, individuals, organizations, communities, and nations of diverse cultural contexts in working collaboratively toward the prevention and solution of social problems;
4. To think critically, analyze, produce, and disseminate research that informs theory, policy, practice, and evaluation in social work;
5. To collaborate with and support vulnerable populations through advocacy, social action, volunteerism, service, education, and consultation, working from a strengths-based empowerment approach for social and economic justice and human rights.

**School of Social Work Honor Society: Phi Alpha: Graduate and Undergraduate**

## Programs Majors

- B.S.W. - Bachelor of Social Work (p. 400)
- B.S.W. in Social Work with Criminal Justice (p. 401)

## Certificate

- Certificate in Gerontology (<https://catalog.monmouth.edu/undergraduate-catalog/social-work/undergraduate-certificate-gerontology/>)

## Minor

- Social Service (p. 401)

## Faculty

**Colleen Beach**, Specialist Professor. B.A., University of Scranton; M.S.W., Monmouth University. Practice and teaching experience is in elder justice, hospice and palliative care, long term services and supports for older adults, practice with communities, and trauma informed care. She is a member of several organizations focused on elder justice, such as the National Adult Protective Services Association (NAPSA) and the American Society on Aging. She currently serves on the NAPSA Education Committee and on the New Jersey Division of Mental Health and Addiction Services Trauma Informed Care Workgroup.  
cbeach@monmouth.edu

**Michael Cronin**, Associate Professor (Graduate Faculty). M.S.W., Columbia University; Ph.D., Yeshiva University. Research interests in areas of international social work, healthcare and social policy, disaster management, social gerontology, and cultural competence.  
mcronin@monmouth.edu

**Ralph Cuseglio**, Associate Professor (Graduate Faculty). M.S.W., D.S.W., Rutgers University. Areas of interest include school social work, clinical social work, and psychotherapy.  
rcusegli@monmouth.edu

**Anne Deepak**, Associate Professor (Graduate Faculty). B.A., Boston University; M.S., Ph.D., Columbia University. Areas of research interest are in the delivery of diversity and social justice content in social work education, the application of postcolonial feminist social work perspective to global social problems, and the dynamics of Global North-South partnerships.  
adeepak@monmouth.edu

**Christa Hogan**, Senior Lecturer and B.S.W. Program Director. B.S.W., Monmouth University; M.S.W., Fordham University. Extensive practice in geriatric social work as well as in specialized school settings working with special needs children. Her private practice focuses on individual counseling to children, adolescents, and adults. She also provides hospice services to the terminally ill.  
chogan@monmouth.edu

**Jeanne Koller**, Associate Professor (Graduate Faculty). B.B.A., University of Massachusetts; M.S.W., Hunter College of Social Work; Ph.D., Rutgers University.  
jkoller@monmouth.edu

**Golam M. Mathbor**, Professor (Graduate Faculty). Interim Dean. B.S.S., M.S.S., Bachelor of Law (LLB), University of Dhaka, Bangladesh; M.S.W., McGill University; Ph.D., University of Calgary. Areas of interest include development and analysis of social policies and services, community organizing and social action, social planning, community development and community participation, and international social work. Current research interests include sustainable development of coastal communities, international development, and multicultural social work.  
gmathbor@monmouth.edu

**Jamie Nappi**, Specialist Professor. B.S.W., College of Misericordia; M.S.W., Fordham University.  
jnappi@monmouth.edu

**Erin Nau**, Lecturer. B.A., University of Northern Colorado; M.A., Springfield College.

enau@monmouth.edu

**Sanjana Ragudaran**, Associate Professor. BS.c., M.S.W., Flinders University, Australia; Ph.D., City University of New York. Areas of research interest include research advisory with community organizing groups, focusing on undocumented immigrants. sragudar@monmouth.edu

**Michelle Scott**, Professor. B.A., Clark University; M.S.W., Ph.D., University of California, Berkeley. Areas of interest include adolescent depression, adolescent suicide prevention, school-based screening, mental health services and financing, college mental health, and initiation of alcohol use by adolescents. Current research includes evaluation of the preparation of high school students with mental health problems and the transition to college. mscott@monmouth.edu

**Paul Urbanski**, Associate Professor (Graduate Faculty). B.F.A., University of Michigan; M.S.W., Columbia University; Ph.D., University of Albany, New York. Research interests include the impact of institutional settings on older adults and specifically on resident autonomy in long-term care facilities. Currently, he is interested in understanding the experiences of older adult Korean emigrants who have come to the U.S. as family caregivers. purbansk@monmouth.edu

**Joelle Zabotka**, Associate Professor (Graduate Faculty). Chair. B.A., Drew University; M.S.W., Columbia University; Ph.D., Rutgers University. Social work clinician who continues to practice, with research interests in child mental health and development, parenting, substance abuse, and Fetal Alcohol Spectrum Disorders. jzapotka@monmouth.edu

## Courses

### SW-105 Introduction to Social Work

**Credits: 3**

Term Offered: All Terms

Course Type(s): None

Social work and its professional practices, its goals, guiding philosophy, and basic assumptions; the uses of the professional relationship; roles of the professional social worker and collaborative activity in the helping process. Not open to students who have completed SO-105. Previously listed as SW-101.

### SW-198 Special Topics in Social Work (100 Level)

**Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in social work to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

### SW-199 Independent Study in Social Work

**Credits: 3**

Term Offered: All Terms

Course Type(s): None

Directed individual study of social work in areas of special interest. Prior permission of the directing professor and department chair is required to take this course.

### SW-205 Global Human Rights and Social Justice

**Credits: 3**

Term Offered: All Terms

Course Type(s): BI,EL, GU, SJS, SUS

Examines social issues and injustices from a global perspective. A central focus will be the struggles of individuals, families, and communities from around the world. Introduces the student to the concepts of social justice, human rights, social welfare and oppression, and discusses ways to promote social welfare from a human rights and social justice perspective.

### SW-223 Human Behavior and Social Environment

**Credits: 3**

Prerequisite(s): SW-105 or SW-205

Co-requisite(s): BY-104 or BY-105

Term Offered: All Terms

Course Type(s): GS

A study of significant life tasks in the physical, social, and emotional development of the individual.

### SW-260 Alcohol and Drugs

**Credits: 3**

Prerequisite(s): SW-105 or PY-103 or SW-205

Course Type(s): None

Addresses the special population in social work, specifically the substance abusing population. Through lecture, small group exercises, and films, the course will educate the students as to what are substance abuse and addiction, what treatment options are available, how to determine the appropriate treatment, as well as different forms of therapy and relapse-prevention work.

### SW-261 Diagnosing Mental Health Issues

**Credits: 3**

Prerequisite(s): SW-105 or PY-103 or SW-205

Term Offered: Fall Term

Course Type(s): None

A detailed explanation of the DSM IV and its practical use in the social work profession. Cultural applications, as well as international implications and the accurate assessment terminology, will be discussed.

### SW-263 Family Counseling

**Credits: 3**

Prerequisite(s): SW-105 or PY-103 or SW-205

Course Type(s): None

Introduces students to the assessment and treatment of various family systems. A continuation of the ecological perspective of systems theory and social work practice illustrated in Human Behavior and the Social Environment and Social Work Practice Techniques I. Ethnic, culture, and gender issues are included as they apply to families. Family violence, substance abuse, adolescence conflict, and marital discord are among the topics discussed.

### SW-264 Addictions

**Credits: 3**

Prerequisite(s): SW-105 or PY-103

Course Type(s): None

Addresses the addictions component of social work. Working with the clients and families to address the unbalance and dysfunction in their lives through assessment, treatment planning, and individual, group, and family therapy. Covering eating disorders, gambling, nicotine, sexual addiction, and workaholicism.

### SW-265 Creative Therapies

**Credits: 3**

Prerequisite(s): SW-105 or PY-103 or SW-205

Course Type(s): None

With creative and interactive approaches, the students will recognize and appreciate their personal experiences to better assess the needs of their clients, as well as enhance conventional therapeutic methods. Also introduces alternate approaches to talk therapy to work with specialized client groups, such as young, traumatized, or non-verbal clients.

**SW-266 Spirituality and Social Work****Credits: 3**

Prerequisite(s): SW-105 or PY-103 or SW-205

Course Type(s): None

Explores spirituality as it broadly relates to the profession of social work. Holistic concepts under the definition of spirituality will be explored. The many ways spirituality can be used in social work practice settings will be discussed. Methods of spiritual practice and approaches to healing will be covered. Spirituality will be differentiated from formal religion.

**SW-276 Administration of Gerontological Services****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

The examination of the theory and practice of the administration of programs designed to meet the needs of older adults, with an emphasis on structure of organizations, impact of public policies and funding patterns on agencies, styles of administration, development and presentation of a budget, management of public information, and relationships with other gerontological agencies.

**SW-278 Family Violence****Credits: 3**

Term Offered: Spring Term

Course Type(s): GS

The characteristics and dynamics of violent families. Emphasis on the issue of domestic violence as it relates to cultural values and beliefs. Myths, motivations, and linkages to substance abuse will be addressed, as well as appropriate interventions and treatment methods.

**SW-298 Special Topics in Social Work (200 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in social work to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**SW-299 Independent Study in Social Work****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Directed individual study of social work in areas of special interest. Prior permission of the directing professor and department chair is required to take this course.

**SW-317 Racism, Sexism, and Social Welfare****Credits: 3**

Term Offered: Spring Term

Course Type(s): CD, GS

Analysis of institutional racism and sexism in relation to social welfare; the nature of social work intervention with racial and ethnic minorities and women.

**SW-324 Environmental Justice and Sustainable Development in Social Work****Credits: 3**

Term Offered: Fall Term

Course Type(s): GU, HY

This course will address environmental justice and sustainable development in social work using a social justice and human rights framework embodied in Green Social Work and the UN Sustainable Development Goals. The course will highlight social work skills, knowledge and values necessary for working with communities, groups and organizations on issues of environmental justice and sustainable development. Social work pathways to facilitating environmental justice will be explored and developed, grounded in local and global policy and program solutions that "promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all".

**SW-326 Social Welfare Policy and Services****Credits: 3**

Prerequisite(s): SW-223 and either EN-101 or EN-102

Term Offered: Spring Term

Course Type(s): WT

Dimensions of choice in social welfare policy design; eligibility for service; structures, staffing, and funding for services; theoretical material related to current developments and services in the field.

**SW-332 Gender and Sexual Identities****Credits: 3**

Prerequisite(s): SO-101

Term Offered: Spring Term

Course Type(s): CD, GS, SI, SJS

Draws on sociological and feminist theories of identity to question the definitions, constructions, deconstructions, ambivalences, and socially constructed nature of gender and sexual identities. In questioning such identities, this course aims at helping students understand the connections between gender and sexuality, and how those two social forces shape people's individual identities and the identities of others. The course examines how structure of race, class, gender, and sexuality, and social institutions such as family and work shape gender and sexual identities. It pays particular attention to how one's social location within power structures shapes personal identities. Also listed as SO-332.

**SW-341 Social Work Practice with Groups****Credits: 3**

Prerequisite(s): SW-223 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Methods and skills utilized in generalist social work practice; major methods of social work intervention with individuals, groups, and communities using case analysis and theoretical concepts.

**SW-342 Social Work Practice with Individuals and Families****Credits: 3**

Prerequisite(s): SW-105 and SW-223 both passed with a grade of C or higher

Co-requisite(s): SW-342L

Term Offered: Spring Term

Course Type(s): EX5

Methods and skills utilized in generalist social work practice; major methods of social work intervention with individuals, groups, and communities using case analysis and theoretical concepts. Students complete 100-hour internship.

**SW-342L Social Work Practice with Individuals and Families Lab****Credits: 1**

Prerequisite(s): SW-223

Co-requisite(s): SW-342

Term Offered: Spring Term

Course Type(s): None

Designed to provide students with a hands-on experience with the assessment skills and tools taught in Social Work Practice with Individuals and Families class (SW-342). Students will become familiar with videotaping equipment and will develop strong assessment skills to be used with clients in the field. For Social Work majors only.

**SW-344 Social Work Practice with Communities****Credits: 3**

Prerequisite(s): SW-223

Term Offered: Spring Term

Course Type(s): None

Examines conceptual models of community social work; development of skills to help promote social change.

**SW-371 International Service Seminar****Credits: 3**

Prerequisite(s): PS-102

Term Offered: Spring Term

Course Type(s): PSIP

Students will learn to unite theory and practice by studying theories and policies based on human security, and learning about their applications through service-learning projects. Students will enhance their understanding of human security by volunteering in international community organizations and reflecting on the social, political, and economic factors and policies that affect them. Also listed as PS-371, AN-371 and SO-371.

**SW-383 Migration and Intercultural Cooperation****Credits: 3**

Course Type(s): GU, RE

Students will become familiar with issues and strategies to deal with immigrant populations effectively. Discussions will be directed towards increasing intercultural cooperation, respect for the principle of peaceful co-existence, and diversity as a strength for economic growth and societal progress. Emphasis will also be given to the theories related to ethnicity, race, culture, and geographic location of the origin of immigrant populations. Special attention will be given to the diverse issues that arise from the varied cultural backgrounds of immigrants and refugees. Students will learn skills related to culturally appropriate and tailored interventions. Experiential learning will be utilized. Prepares students using a strength-based empowerment approach to effectively utilize required resources serving the needs of diverse, immigrant populations.

**SW-398 Special Topics in Social Work (300 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in social work to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**SW-399 Independent Study in Social Work****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Directed individual study of social work in areas of special interest. Prior permission of the directing professor and department chair is required to take this course.

**SW-409 Social Work Research Methods****Credits: 3**

Prerequisite(s): EN-101 and EN-102

Co-requisite(s): SW-421

Term Offered: Fall Term

Course Type(s): WT

Basic skills necessary for Social Work research: problem formulation, theoretical framework development, research design, methods of data collection, evaluation techniques, and data analysis.

**SW-411 Data Analysis for Social Work****Credits: 3**

Prerequisite(s): MA-105; this course is for Social Work majors only

Course Type(s): None

Introduction to the basic knowledge and skills necessary for the analysis of data collected or reported in social work research. Preparation for the social work practitioner to assess the adequacy of statistical procedures and to appropriately choose statistical procedures to make order out of data collected within their own research. Not open to students who have successfully completed MA-151. Limited to Social Work majors.

**SW-412 Practice Evaluation in Social Work****Credits: 3**

Prerequisite(s): SW-409, SW-411 or MA-151, Senior standing, and EN-101 and EN-102

Co-requisite(s): SW-422

Term Offered: Spring Term

Course Type(s): None

Applications of research methods to social work practice. Using skills in practice evaluation, advanced research in single-system design will be conducted.

**SW-421 Senior Practicum I****Credits: 6**

Prerequisite(s): SW-342 and SW-344 both passed with a grade of C or higher.

Co-requisite(s): SW-409 or CJ-315 (for CJ/SW majors).

Term Offered: Fall Term

Course Type(s): EX5

Supervised experience in a social agency; direct work with individuals, groups, or communities; preparation for professional responsibility upon graduation. Sixteen hours per week in placement and a weekly seminar at the University.

**SW-422 Advanced Senior Practicum II****Credits: 6**

Prerequisite(s): SW-421 passed with a grade of B- or higher.

Co-requisite(s): SW-412 or CJ-490 (for CJ/SW majors).

Term Offered: Spring Term

Course Type(s): EX5

Advanced Senior Practicum; direct services to individual clients, families, groups, and communities, with the possibility of administrative experiences. Sixteen hours per week in placement and a weekly seminar at the University.

**SW-424 New Perspectives on Human Sexuality****Credits: 3**

Prerequisite(s): 9 credits from either Social Work, Sociology, Psychology or Anthropology

Course Type(s): None

Recent research and developments in the field of human sexuality focusing on individual and social problems.

**SW-426 Seminar in Social Work****Credits: 3**

Prerequisite(s): EN-101, EN-102, SW-421 and Senior standing

Term Offered: Spring Term

Course Type(s): WT

Seminar focusing on topics of particular interest to Social Work students planning to enter practice or graduate school.

**SW-461 Culturally Diverse Child Welfare Practices****Credits: 3**

Term Offered: All Terms

Course Type(s): CD, RE

Provides an understanding of the context from which the practice of child welfare originates, examining the impact of policy upon the direct care of children at risk. Contemporary issues that face children at risk such as sexual abuse, neglect, physical abuse, poverty, and maternal substance abuse are covered, as well as recommended services and treatment that address these concerns. Public child welfare in New Jersey will be of central focus, including the impact and changes of the system's reform plan. In addition, issues of cultural diversity and cultural difference in child welfare practices and child rearing behaviors will be reviewed, with a focus on how the child welfare system could better infuse diversity of experience in policy and practice.

**SW-498 Special Topics in Social Work (400 Level)**  
Prerequisite(s): SW-421  
Term Offered: Spring Term  
Course Type(s): None  
An intensive study of a particular subject or problem in social work to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If there is a prerequisite for this course it will be announced in the course schedule.

**Credits: 1-3**

**SW-499 Independent Study in Social Work**  
Term Offered: All Terms  
Course Type(s): None  
Directed individual study of social work in areas of special interest. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 1-3**

<sup>1</sup> With instructor's permission SW-105 Introduction to Social Work (3 cr.) and SW-223 Human Behavior and Social Environment (3 cr.) may be taken concurrently

<sup>2</sup> SO-272 may be re-used to fulfill AN/SO/SW 200+ elective

<sup>3</sup> Please consult with your advisor regarding the required number of free electives that must be completed. If you complete MA-105 and SW-411 then there are 11 available free credits. Taking MA-151 will allow 14 available free credits.

<sup>4</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

<sup>1</sup> With instructor's permission SW-105 Introduction to Social Work (3 cr.) and SW-223 Human Behavior and Social Environment (3 cr.) may be taken concurrently.

<sup>2</sup> SO-272 may be re-used to fulfill AN/SO/SW 200+ elective.

<sup>3</sup> The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (p. 45) courses must be completed.

## Notes

- 54 credits must be completed at the 200 level or higher.

## Note

- Not Available to Social Work Majors

## Student Life

The Division of Student Life at Monmouth University offers many important services for resident and commuter students, undergraduates, and graduate students as well. Staff members promote personal and intellectual growth through a variety of programs and services while aiding students in resolving problems and helping them transition to the college experience. The Student Handbook is available on-line and provides students with the policies and practices relevant to student life. Students should become familiar with the handbook at the start of every academic year.

## Orientation

A student's introduction to student life at Monmouth begins even before classes start. All new students participate in orientation programs designed specifically for their needs.

## First-year Students

All new first-year students, commuters and residents, are expected to attend a Hawk Welcome & Advising Day, taking place in late June/early July, as well as New Student Orientation, taking place in late August/early September. During Hawk Welcome & Advising Days, students will come to campus to meet with an academic advisor and register for fall classes. Students attend workshops aimed at preparing them for both their academic and social transition to Monmouth. During New Student Orientation, students will participate in a variety of interactive programs designed for them to meet fellow first year students and assist with their transition to Monmouth.

Throughout the academic year, many programs are offered to continue the transition process.

Families of first-year students have the opportunity to learn about the student experience both inside and outside the classroom at Family Orientation, which runs concurrent to Hawk Welcome & Advising Day. In the fall semester, families are invited to participate in a variety of workshops, programs, and activities during Family Weekend.

## Transfer Students

In January, First Year transfer students (under 18 credits) will participate in activities to help them transition academically, socially, and personally. Students will have the opportunity to get acquainted with other new students, to learn more about Monmouth from student leaders and administrators, and to get connected to the campus resources that will help make the college experience successful and satisfying.

The Center for Student Success (CSS) coordinates the connections between transfer students (with eighteen or more credits) and their academic departments to ensure a smooth transition to Monmouth University. In addition to their assigned faculty advisors, the CSS serves as another level of support for their transition to Monmouth

University. We encourage all incoming transfer students to attend transfer orientation, which is coordinated by the CSS prior to each semester. Orientation programs afford new transfer students the ability to connect with their peers and to learn about resources to guide their progress toward graduation and life after Monmouth.

## Housing Options

### Residents

The University offers a variety of housing options in fifteen locations: Beechwood, Cedar, Mullaney, Spruce, Willow, Laurel, Elmwood, Pinewood, Oakwood, Redwood, and Hesse Halls; as well as Maplewood Hall, the Garden, Great Lawn, and University Bluffs apartment complexes. Living styles include traditional room arrangements designated for first-year students; suite style, usually for second-year and upper-class students; and apartments for juniors and seniors. Residence halls are typically co-ed by floor/wing/room based on the building's configuration, and the majority of students share double rooms. In an effort to make a comfortable match, new students are asked to complete a questionnaire before room assignments are made. First-year and sophomore housing is guaranteed for students who submit the required enrollment along with their housing deposits and housing contract by the required deadline; as well as out-of-state undergraduate students. For first-year students, the deadline is May 1. All first- and second-year undergraduate students of the University who do not live with a parent/guardian must live in a residence hall and participate in one of the University's board plans. The University acknowledges the diverse needs of students and therefore reserves the right to grant permission for a first- or second-year student to live off campus on a limited case-by-case basis. Graduate students are typically assigned to double occupancy assignments at our off-campus apartments, University Bluffs based on space availability.

Each residential area is staffed by full-time professional Area Coordinators who reside on campus. Each hall is staffed by Resident Assistants, or Community Assistants, all of whom are intensively trained in providing assistance, information, activities, and programs for resident students. The Vice President for Student Life, Director of Housing Operations, and Associate Director of Residential Life reside near campus and provide additional, professional support for the Residence Life program.

All on-campus halls provide laundry facilities that utilize a smartphone app. All resident students not living in University-owned or -sponsored apartments are required to be on a meal plan. These meal plans are not transferable, and all meals are allocated to a single student. Students may choose one of three "block" meal plans, which provides students with a set number of meals for the semester. First-year students may not select a "block" lower than 195 until their sophomore year. All block meal plans grant students access to dine at the Residential Dining Hall and the Student Center.

Depending on individual needs, cars may not be a necessary part of campus living, as everything is generally within walking distance of campus. Many students use bicycles to get around campus and the surrounding community. Parking is extremely limited and a parking decal purchased through MUPD is required. Students are discouraged from having cars on campus so they may fully experience university life and all that it has to offer.

# Student Services

## Commuters

At Monmouth University, we know that commuter students have unique needs, and we are here to support you every semester. Whether you're a traditional, non-traditional, full-time, part-time, graduate, or undergraduate student, we have resources and guidance just for you through the Division of Student Life.

If you're an incoming first-year commuter, you can join our Commuter Mentor program. This program offers support from a student commuter mentor helping you to settle in and succeed.

Want to get involved? Reach out to the Office of Student Engagement at 732-571-3586, or check out any of the 100+ clubs listed in the Monmouth University Student Handbook. There are plenty of extra-curricular events and leadership opportunities throughout the semester, and we plan activities during the day so you can easily join in.

Feeling hungry? We've got you covered with various commuter meal plans by Gourmet Dining. You can enjoy breakfast, lunch, dinner, and late night snacks at several spots on campus, like the Rebecca Stafford Food Court, Dunkin' Donuts, Jersey Mike's, Magill Commons Dining Hall, Plangere Center, and the Convenience Store in Hesse Hall. You can pay with a meal plan, declining balance, cash or credit. We suggest getting a meal plan for convenience - just contact the Office of Residential Life at 732-571-3465 for details.

Need parking? Parking on campus is hassle-free for commuters. You can find spots any time, day or night, and there's no fee for a commuter parking decal. For more information, call 732-571-3465 or visit our website: Commuter Resources (<https://www.monmouth.edu/off-campus-and-commuter-services/>). We are here to make your time at Monmouth University enjoyable and engaging!

**Health Services** is open to all students whether they live on or off campus. All students, aged thirty (30) years or younger, must show proof of two measles, two mumps, and one rubella immunization and if taking nine (9) or more credits, must show proof of having completed the Hepatitis B series. All new Monmouth University students  $\leq 18$  years of age, both residential and commuter and any student regardless of age living in campus sponsored housing, must show proof of a dose of the meningitis vaccine (MenACWY) on or after their 16th birthday. Students are recommended, not required, to be COVID vaccinated and stay up-to-date with COVID vaccinations including additional doses when eligible. Documentation of all required immunizations needs to be uploaded to the private and confidential student account in the Student Health Portal. In order to provide personalized and comprehensive care, students are encouraged to complete the online Health History form and upload a copy of their current health insurance card into the Student Health Portal. Students are seen at the on-campus Health Center on a walk-in basis and by appointment for specialty services. Students are responsible for any costs incurred for outside referrals, prescriptions, off-campus providers, laboratory and diagnostic procedures.

The Health Center hours during the academic semester are: Monday through Friday, 8:45 a.m. to 5:00 p.m. Health Services is staffed with two nurse practitioners, one nurse practitioner/director and a part-time general physician. Additional information can be obtained by calling 732-571-3464 or going to: <https://www.monmouth.edu/health-services>.

There are several hospitals within two to six miles of campus that offer complete medical and psychiatric services should the student

require a higher level of care. For on-campus medical emergencies call 732-571-4444.

**Counseling and Prevention Services (CPS)** assists students in their personal growth and development through clinical counseling and psycho-educational programming. CPS offers free episodic counseling to reduce symptoms and support students in addressing mild to moderate general mental health, performance issues, and substance use concerns. Services are provided by licensed counseling professionals or graduate-level trainees, supervised by licensed professionals. Through collaborations with Monmouth Medical Center, Uwill, and other local agencies, 24-hour services are available for mental health crises. CPS is one component of the integrative team of health professionals at the University providing holistic care for students' well-being.

Students may schedule a meeting by calling **732-571-7517**.

For additional information, students may e-mail CPS ([mu counseling@monmouth.edu](mailto:mu counseling@monmouth.edu)) directly. Information can also be found on the CPS Web site (<http://www.monmouth.edu/counseling/>). The office is located on the third floor of the Rebecca Stafford Student Center.

**The Global Education Office** provides assistance to students and faculty from other countries with their adjustment to life in the United States and Monmouth University. The Assistant Director for International Students and Faculty Services and the International Student Advisor are available to provide immigration counseling, academic and career planning support, and access to extra-curricular activities such as the International Club.

**The Office of Student Support and Veteran Services** serves two primary functions. One is to work with students that are experiencing some difficulty or challenge outside of the classroom that may prevent them from being a successful student. The second is to serve as a primary point of contact for student veterans, active duty personnel and dependents of military personnel at the University and to coordinate a comprehensive program of support and advocacy services. This position also serves as the University's School Certifying Official for verification and eligibility of veteran benefits. Office hours are Monday through Friday from 8:45am to 5:00pm. You may reach the office at 732-263-5258 or via email at [veteraninfo@monmouth.edu](mailto:veteraninfo@monmouth.edu).

## Co-Curricular Programs

### Athletics

Athletics constitute an integral part of a Monmouth University education. The NCAA Division I athletic program offers excellent opportunities for qualified athletes who wish to participate, and a special level of enthusiasm and excitement for the entire University community.

The athletics program fields men's varsity teams in baseball, basketball, cross-country, football, golf, indoor track and field, lacrosse, soccer, swimming, tennis, and outdoor track and field. Women's varsity teams participate in basketball, bowling, cross-country, field hockey, golf, indoor track and field, lacrosse, soccer, softball, swimming, tennis, and outdoor track and field.

## Student Engagement

The Office of Student Engagement offers extra-curricular programs and opportunities that are intended to assist in the social, cultural, emotional, and intellectual development of our students. The office advises the Student Activities Board in presenting a variety of entertainment and educational activities for the campus community. It provides guidance,

support and oversight of the University's 17 nationally recognized fraternities and sororities. It encourages student participation in clubs and organizations, is involved in the coordination of campus and multicultural activities, provides leadership experience for students and their organizations, and supports regular weekend programming efforts. The office also sponsors a fall and spring Involvement Fair and provides student group and leader recognition opportunities throughout the academic year.

## Student Organizations

There are more than 125 different clubs and organizations on campus. Active involvement in such groups helps a student develop new leadership skills, support their career development goals, and meet new friends. Students can select from clubs related to their majors or take the opportunity to join something related to a special interest or hobby. All groups are student-developed and student-run. Each year the Office of Student Engagement hosts an Involvement Fair at the beginning of the fall and spring semesters to assist students in getting connected to one of the many clubs or organizations. Students should check the Experience Monmouth app, the bulletin boards, social media sites, e-mail, electronic boards, and the student newspaper (*The Outlook*) to learn more about club activities throughout the year.

## Student Center

An integral part of Monmouth's overall campus life program, the Student Center serves as a gathering area for all segments of the University community. Offering both comfortable and inviting outdoor and indoor space, the Student Center is where students meet informally and formally to share common interests and develop friendships. The Student Center includes dining facilities, lounges, meeting rooms, computer labs, an ATM, and a large multi-purpose room that is the location for many campus and community events. Nagy Common, an outdoor patio area with seating areas and a fire pit, is the site of outdoor events such as s'more nights, student performances, poster sale, and vending events.

The Student Center hosts many student services offices including, but not limited to, the Division of Student Life, the Center for Student Success, Career Development, First Year Advising, Student Engagement, Judicial Affairs, Office for Disability Services, Student Support and Veteran Services, and the Office of Counseling and Prevention Services. The facility also houses the Student Government Association, the Student Activities Board, and many student organization offices.

## Student Activities Board

The Student Activities Board (SAB) is a student organization advised by the Office of Student Engagement. Concerts, speakers, comedians, local bus trips, novelty programs and festivals are among the many events sponsored. The SAB presents numerous opportunities for students to become involved both as spectators and as active board members. Students can join any of the nine committees, which include: Novelty, Awareness, Diversity Programs, General, Publicity, Special Events, Comedy, Concerts, Festivals, Travel and Tour, and Major Concerts. Involvement in SAB may relate to a student's major or may just be for fun.

## Cultural Activities

The Department of Music and Theatre Arts, housed in the Lauren K. Woods Theatre, offers a wide ranging schedule of concerts, recitals, and theatrical productions during the academic year, and a professional theatre, the Shadow Lawn Stage, in the summer. The department offers performance opportunities in concert chorus, chamber choir, glee clubs,

chamber orchestra, jazz band, and pep band, rock ensembles and the Blue Hawk House Band. Applied music study is offered to all students in voice, piano, woodwinds, brass, guitar, strings, and percussion.

The award winning Center of the Arts presents a rich array of performances by nationally and internationally recognized artists in dance, theatre, contemporary, classical, and folk music; as well as children's theatre, film screenings, visiting writers, gallery exhibitions, live screenings of the Met Opera, the National Theatre of London, the Bolshoi Ballet, and much more! Students receive a FREE ticket for two performing arts series events each semester; tickets to all other ticketed events are only \$5, with the exception of free events. For more information and a full schedule of events, please visit Monmouth Arts (<http://www.monmouth.edu/arts/>).

While Monmouth has no religious affiliation, it does recognize the important place that religion has in the lives of many of its students. The Catholic Center, the Muslim Student Association, and Chabad are all active on campus. In addition, churches and synagogues representing the major religious faiths are within convenient reach of the campus and are available for services and personal counseling. A listing of area places of worship is available at the Office of Student and Community Services.

## Recreation

The William T. Boylan Gymnasium provides facilities to support intramurals and recreation, including a swimming pool, two full basketball courts, and a bowling center. Outdoor facilities available to students for their recreational use include: an eight-lane track, Field Turf football/lacrosse, and soccer fields.

There is a year-round Intramural Sports Program, which includes games and sports such as basketball, dodgeball, flag football, softball, volleyball, three-point contest, knockout, Baggo, and soccer. The Wellness Program includes personal training and group fitness classes like Zumba, Yoga, Bootcamps, Abs Legs and Butt, and Kickboxing. There are many club sports on campus that include dance, men's and women's soccer, men's and women's lacrosse, field hockey, wrestling, women's volleyball, track and field, e-sports, sailing, softball, baseball, and men's and women's basketball.

## Societies

### Greek Letter Organizations

Currently there are 14 fraternities and sororities at Monmouth University.

The student organizations contained within this list are the only fraternities and sororities with official recognition by the University. Any other fraternity or sorority not having University recognition is not one that is supported by the University.

The fraternities include:

- Alpha Phi Alpha Fraternity, Inc.
- Kappa Sigma
- Lambda Theta Phi Latin Fraternity, Inc.
- Omega Psi Phi Fraternity, Inc.
- Phi Kappa Psi
- Sigma Pi

- Sigma Tau Gamma
- Tau Delta Phi

The sororities include:

- Alpha Kappa Alpha Sorority, Inc.
- Alpha Omicron Pi
- Alpha Sigma Tau
- Alpha Xi Delta
- Chi Upsilon Sigma National Latin Sorority, Inc.
- Delta Phi Epsilon
- Lambda Theta Alpha Latin Sorority, Inc.
- Phi Sigma Sigma
- Zeta Tau Alpha

## Honor Societies

Academic departments sponsor honor societies to give recognition to outstanding scholarship in a particular area. Student Life does not oversee academic honor societies.

Omicron Delta Kappa, a national leadership society, recognizes upper-class students who have demonstrated leadership on campus. Phi Eta Sigma is a freshman leadership honor society acknowledging academic excellence and involvement in student activities.

The Gamma Sigma Alpha, National Greek Academic Honor Society and Order of Omega recognize fraternity and sorority members who have achieved high levels of academic success and leadership within their organizations.

## Student Code of Conduct

Monmouth University offers its students the opportunity for maximum intellectual and personal growth by providing a variety of experiences, activities, and services that are designed to complement classroom work and provide opportunities for individual maturation.

The University recognizes and respects the students' personal freedom and assures maximum individual liberty within the limits necessary for the orderly operation of the University. In response, students must observe rules and regulations necessary for the proper functioning of the institution.

Each individual has the right and responsibility to bring to the attention of an administrative or Student Government official any violations of personal freedom or the regulations of the University.

Additional information regarding the Student Code of Conduct is contained in the Student Handbook. The Student Handbook (<http://www.monmouth.edu/studenthandbook/>) is available online.

## Awards

Students are eligible for nonacademic awards that are given annually at the May Commencement.

## Outstanding Student Award

The Student Government Association sponsors this award which is given to the graduating senior who, through his, her, or their creative leadership and ability, has made a contribution of lasting value to the future of Monmouth University. Students who are nominated must be in good

standing with the University (i.e., academic, judicial, financial) in order to be considered for this recognition. The announcement of the winner takes place at the May Commencement.

## Directories

### Officers

Chair: Christopher D. Maher

Vice Chair: Tasha A. Youngblood Brown '97 '03M

Vice Chair: Leslie N. Hitchner

Treasurer: Stephen E. Gerard '89M

Secretary: Dean Q. Lin

Assistant Secretary: Charlene K. Diana, Esq.

Head Men's Basketball Coach  
B.A., University of North Carolina

**Richard Robinson (2019)**

Club Baseball Coach  
B.S., Kean College

**Bri Rubino (2015)**

Associate Director of Strength and Conditioning  
B.S., Drexel University

**Morgan Royer (2024)**

Head Softball Coach  
B.A., Saint Joseph's University;  
M.A., Marist College

**Michael Thiers (2019)**

Strength and Conditioning Intern  
B.S., Lynchburg College

**Jordan Trautman (2017)**

Head Women's Lacrosse Coach  
B.A., Georgetown University

**Kelly Valentine (2015)**

Associate Athletic Director for Marketing

B.S., Rutgers University

**Lewis Walker**

Director of Field Operations and Practice

**Caitlin Wetmore**

Head Coach of Women's Basketball

**David Williamson (2018)**

1st Assistant Field Hockey Coach

B.A., Princeton University;

M.A., University of Ulster

## Emeritus Faculty

**Julius Adekunle**

Professor Emeritus of History & Anthropology

B.A., University of Ife, Nigeria; M.A., University of Ibadan, Nigeria;

Ph.D., Dalhousie University, Canada

**Mary Kate Azcuy**

Associate Professor Emerita of English

B.S., Monmouth University; M.A., New York University;

Ph.D., Drew University

**Derek A. Barnes**

Professor Emeritus of Physics

B.A., M.A., Ph.D., Christ Church

Oxford University, England

**Judith Bazler**

Professor Emerita of Curriculum and Instruction

B.S., Northern Illinois University; M.Ed., Ed.D., University of Montana

**Barbara Lynn Bodner**

Professor Emerita of Mathematics

B.S., Fairleigh Dickinson University; M.S., Pennsylvania State University

Ed.D., Rutgers University

**Donald Bretzger**

Professor Emeritus of Chemistry

B.S., Ursinus College; M.S., Ph.D., University of Delaware

**Richard E. Brewer**

Associate Professor Emeritus of English

B.A., Drew University; B.D.; M.A., Rutgers University

**Karen Bright**

Professor Emerita of Art

B.F.A., University of the Arts; M.F.A., Cranbrook Academy of Art

**Robert Brooks**

Associate Librarian Emeritus

B.A., B.S.L.S., University of North Carolina;

M.S.Ed., Monmouth University (Monmouth College)

**John E. Carson**

Associate Professor Emeritus of Mathematics

B.A., Drew University; M.S., New York University

**Alan Cavaiola**

Professor Emeritus of Professional Counseling

B.A., Monmouth University (Monmouth College); M.A., Fairleigh Dickinson

University; Ph.D., Hofstra University

**Andreas Christofi**

Professor Emeritus of Economics

B.A., Graduate Industrial School of Thessaloniki, Greece;

M.B.A., University of New Orleans;

Ph.D., Finance, Pennsylvania State University

**Gregory Coram**

Associate Professor Emeritus of Criminal Justice

M.S., Psy.D., Indiana State University

**Patricia Cresson**

Professor Emerita of Art and Design

B.S., University of Wisconsin; M.F.A., Pratt Institute

**Floyd R. Deardorff**

Assistant Professor Emeritus of Mathematics

B.A., Temple University; M.A., Catholic University

**Chad Dell**

Associate Professor Emeritus of Communication

B.A., M.A., Ph.D., University of Wisconsin-Madison

**Jack W. Demarest**

Professor Emeritus of Psychology

B.A., State University of New York (Brockport); M.A., Connecticut;

Ph.D., State University of New York at Stony Brook

**Vincent DiMattio**

Professor Emeritus of Art and Design

B.F.A., Massachusetts College of Art; M.F.A., Southern Illinois University

**Francis Patrick Dooley**

Professor Emeritus of History

A.B., Villanova University;

M.A., Ph.D., University of Maryland

**Donald Dorfman**

Professor Emeritus of Biology

B.S., Monmouth University (Monmouth College);

M.S., University of Connecticut;

Ph.D., Rutgers University

**Harris Drucker**

Professor Emeritus of Software Engineering

B.S.E.E., Pennsylvania State University;

M.S.E., Ph.D., University of Pennsylvania

**Stanley Dubroff**

Associate Professor Emeritus of Business Law

B.S., Drexel University;

J.D., Temple University

**Heide Estes**

Professor Emerita of English

B.A., University of Pennsylvania; Ph.D., New York University

**Cira Fraser**

Professor Emerita of Nursing

B.S.N., The College of Staten Island; M.S., Rutgers University, Newark;

Ph.D., Adelphi University, R.N.

**Priscilla Gac-Artigas**

Professor Emerita of World Languages

B.A., University of Puerto Rico; Ph.D., University of Franche-Comte, France

**Rachel Gardner**

Associate Librarian Emerita

B.S., Vassar College; M.A., Middlebury College;  
M.L.S., Rutgers University

**Ivan Gepner**

Associate Professor Emeritus of Biology  
B.A., Rutgers University; M.A., Ph.D., Princeton University

**Carol A. Giroud**

Professor Emerita of Physical Education  
B.S., University of North Carolina at Greensboro; M.Ed., University of North Carolina;  
Ph.D., Union Graduate School

**Bonnie Gold**

Professor Emerita of Mathematics  
A.B., University of Rochester; M.A., Princeton University  
Ph.D., Cornell University

**Stanton Green**

Professor Emeritus of Anthropology  
B.A., New York University; M.A., Ph.D., University of Massachusetts, Amherst

**Brian Greenberg**

Professor Emeritus of History  
B.A., New York University;  
M.A., Ph.D., Princeton University

**Richard Guilfoyle**

Professor Emeritus of Mathematics  
B.S., C.W. Post College;  
M.S., Ph.D., Stevens Institute of Technology

**Amy Handlin**

Associate Professor Emerita of Marketing and International Business  
B.A., Harvard University, Radcliffe College;  
M.B.A., Columbia University

**John Henning**

Professor Emeritus of Curriculum and Instruction  
B.S., Pennsylvania State University; M.Ed., Kent State University; A.D., Stark State College;  
Ph.D., Kent State University

**Doris K. Hiatt**

Associate Professor Emerita of Psychology  
A.B., Cornell University; Ph.D., City University of New York

**Waltraud Hieslmair**

Associate Professor Emerita of Physics  
B.S., M.S., University of Vienna, Austria

**Barbara Harris Jaye**

Professor Emerita of English  
B.A., City College of New York; M.A., Ph.D., Rutgers University

**Margaret G. Juckett**

Associate Professor Emerita of Management  
B.S., West Virginia Wesleyan College;  
M.A., University of Kentucky; M.B.A., Monmouth University (Monmouth College)

**Quentin Keith**

Associate Professor Emeritus of English

B.A., Lehigh University; B.A., (Hons.);  
M.A., Kings College, Cambridge University, England

**Glenn King**

Professor Emeritus of History and Anthropology  
B.A., Cornell University; M.A., University of California at Los Angeles;  
Ph.D., University of California at Berkeley

**Carl M. Koreen**

Associate Professor Emeritus of Mathematics  
B.S., M.S., Louisiana State University

**Michiko Kosaka**

Associate Professor Emerita of Computer Science  
B.A., Manhattanville College;  
M.A., Ph.D., New York University

**Richard A. Kuntz**

Professor Emeritus of Mathematics  
B.S., Monmouth University (Monmouth College);  
M.A., Ph.D., University of Maryland

**Susan Kuykendall**

Associate Librarian Emerita  
B.S., Trinity University; M.L.S., Rutgers University

**Marilyn M. Lauria**

Associate Professor Emerita of Nursing  
B.S.N., Hunter College;  
M.Ed., Ed.D., Teachers College, Columbia University

**R. Kaiser-Lenoir**

Professor Emeritus of Foreign Languages  
Licence es Lettres, Sorbonne;  
Diplome d'Etudes Litteraires Superieures, C.A.P.E.T., Strasbourg

**Betty Liu**

Professor Emerita of Mathematics  
B.S., M.S., Nanjing University, China; PhD, University of Maryland

**Alison Maginn**

Professor Emerita of World Languages & Cultures  
B.A., University of Ulster, Northern Ireland; M.A.,  
Ph.D., University of Wisconsin-Madison

**Helen T. MacAllister**

Associate Professor Emerita of Biology  
B.S., Douglass College; M.S., Rutgers University

**Robin Mama**

Professor Emerita of Social Work  
B.S.W., College of Misericordia; M.S.S., Ph.D., Bryn Mawr College

**Srikantaiah Mallikarjun**

Professor Emeritus of Physics  
BS.c., MS.c., University of Musore, India;  
A.M., Ph.D., University of London, England

**James McDonald**

Associate Professor Emeritus of Software Engineering  
B.S.E.E., New Jersey Institute of Technology;  
M.S.E.E., Massachusetts Institute of Technology;  
Ph.D., New York University School of Engineering

**Nancy Mezey**

Professor Emerita of Political Science

B.A., Vassar College; M.A., Ph.D., Michigan State University

**Rose Mary Miller**

Associate Professor Emerita of Mathematics  
BS, Middlebury College; EdM, University of Vermont;  
Post-Master's Certificate, University of Maine

**William P. Mitchell**

Professor Emeritus of Anthropology  
Freed Foundation Endowed Chair in Social Science  
A.B., Brooklyn College; Ph.D., University of Pittsburgh

**Laura Moriarty**

Professor Emerita of Criminal Justice  
B.A., M.A., Louisiana State University; Ph.D., Sam Houston State University

**Enoch L. Nappen**

Associate Professor Emeritus of Political Science  
B.A., M.A., Rutgers University; Ph.D., New York University

**Roy Nersesian**

Professor Emeritus of Management & Leadership  
B.S., Rensselaer Polytechnic Institute; M.B.A., Harvard Business School

**Howard Nitzberg**

Professor Emeritus of Foreign Languages  
A.B., M.A., Brooklyn College; Ph.D., New York University

**Eleanor Novek**

Professor Emerita of Communication  
B.A., Georgia State University; M.A., Ph.D., Annenberg School of Communication, University of Pennsylvania

**Judith Nye**

Professor Emerita of Psychology  
B.S., M.S., Ph.D., Virginia Commonwealth University

**Guy Oakes**

Professor Emeritus of Philosophy and Corporate Values  
A.B., University of Chicago; Ph.D., Cornell University

**Richard Paris**

Associate Professor Emeritus of English  
B.A., University of California at Berkeley; M.A., San Francisco State University;  
Ph.D., University of California at Berkeley

**Marilyn A. Parker**

Professor Emerita of Chemistry  
B.S., University of Wisconsin;  
Ph.D., University of Washington

**David Paul, III**

Professor Emeritus of Marketing and International Business  
B.S., Hampden-Sydney College; D.D.S., Medical College of Virginia  
M.B.A., Ph.D., Old Dominion University

**David Payne**

Associate Professor Emeritus of Psychology  
B.A., University of Mississippi;  
M.A., M.Phil., Ph.D., Columbia University

**Thomas Pearson**

Professor Emeritus of History and Anthropology

B.A., Santa Clara University; M.A., Ph.D., University of North Carolina

**Richard Pirchner**

Associate Professor Emeritus of Computer Science  
B.S., University of Dayton; M.S., St. John's University

**Alicia E. Portuondo**

Professor Emerita of Foreign Languages  
Licenciado en Filosofía y Letras;  
Licenciado en Derecho, Oriente University, Cuba;  
M.A., Rutgers University; Ph.D., New York University

**Steven Pressman**

Professor Emeritus of Economics  
B.A., Alfred University; M.S., Syracuse University  
Ph.D., New School for Social Research

**Walter Reichert**

Associate Professor Emeritus of Computer Science  
B.S.M.E., Drexel Institute of Technology;  
Ph.D., University of Pittsburgh

**Thomas Reiter**

Professor Emeritus of English  
B.A., Loras College (IA); M.A., University of Virginia;  
Ph.D., University of Massachusetts

**Dennis Rhoads**

Professor Emeritus of Biology  
B.A., University of Delaware; Ph.D., University of Cincinnati

**Everett Rich**

Associate Professor Emeritus of Communication  
B.S., M.S., Emerson College

**Benjamin Rigberg**

Professor Emeritus of History  
B.S., Temple University; M.A., University of Illinois;  
Ph.D., University of Pennsylvania

**Lynn Andrews Romeo**

Associate Professor Emerita of Education  
B.A., Glassboro State College; M.A., Kean College;  
Ed.D., Rutgers University

**Daniela Rosca**

Associate Professor Emerita of Computer Science & Software Engineering  
M.S., Polytechnic University of Bucharest; Ph.D., Old Dominion University

**Paul Savoth**

Associate Professor Emeritus of Business Law  
B.A., Middlebury College; J.D., Seton Hall University; C.P.A., New Jersey;  
L.L.M., Villanova University

**Aaron H. Schechtman**

Professor Emeritus of Education  
B.S., M.Ed., Ed.D., Rutgers University

**Karen Schmelzkopf**

Associate Professor Emerita  
B.A., M.A., Florida Atlantic University; Ph.D., Pennsylvania State University

**Solomon Schuck**

Professor Emeritus of Professional Counseling  
B.S., City College of New York;

Ph.D., New York University

**Morris R. Short**

Professor Emeritus of Philosophy  
B.A., M.A., George Washington University;  
Ph.D., Columbia University

**Caryl Sills**

Associate Professor Emerita of English  
B.A., Northwestern University;  
M.A.T., Monmouth University (Monmouth College);  
Ed.D., Rutgers University

**Donald Smith**

Associate Professor Emeritus of Management and Leadership  
B.S., M.S., Ph.D., State University of New York at Albany

**Viola T. Snow**

Associate Professor Emerita of Education  
B.S., M.S.Ed., Monmouth University (Monmouth College);  
Ed.D., Rutgers University

**Janice Stapley**

Associate Professor Emerita of Psychology  
B.A., Russell Sage College; M.S., Ph.D., Rutgers University

**Sharon W. Stark**

Professor Emerita of Nursing  
B.B., Thomas Edison State College; M.S.N., Rutgers University  
Ph.D., Widener University

**Don Swanson**

Professor Emeritus of Communication  
B.A., Augustana College; M.A., University of Montana  
Ed.D., University of Northern Colorado

**G. Boyd Swartz**

Professor Emeritus of Mathematics  
B.S.E.E., M.S.E.E., Lehigh University;  
MS, PhD, New York University

**Mary E. Swigonski**

Associate Professor Emerita of Social Work  
B.A., Allentown College of St. Francis de Sales; M.S.W., Marywood College;  
Ph.D., Rutgers University

**D. Robert Teeters**

Professor Emeritus of Physics  
B.A., Oregon State College;  
M.A., Ph.D., University of California at Berkeley

**Jack M. Van Arsdale**

Associate Professor Emeritus of Software Engineering  
B.S., Monmouth University (Monmouth College)  
M.S.E.E., Polytechnic Institute of Brooklyn

**Hildegard Webb**

Associate Librarian Emerita  
B.A., Wake Forest University; M.L.S., Rutgers University

**Richard E. Weber**

Professor Emeritus of Economics  
B.A., M.A., Ph.D., Rutgers University

**Ruth C. West**

Associate Professor Emerita of Education  
B.A., Barnard College;  
M.A., Ed.D., Teachers College, Columbia University

**William F. Wetzel**

Assistant Professor Emeritus of Music  
B.A., M.A., Montclair State College

**Richard Wilson**

Associate Professor Emeritus of Business Administration  
A.B., Columbia College; J.D., St. John's University;  
L.L.M., New York University; Member of New York Bar

**William A. Yaremchuk**

Professor Emeritus of Communication  
A.B., Fairmont (W. Va.) State College; M.A., West Virginia University;  
Ph.D., New York University

**Theresa Julia Zielinski**

Professor Emerita of Chemistry  
B.S., M.S., Ph.D., Fordham University

## Faculty

### A

**Jason E. Adolf (2017)**

Professor, Biology.  
B.S., Roger Williams University; M.S., University of Hawai'i; Ph.D., University of Maryland.

**Gilda M. Agacer (1998)**

Associate Professor, Accounting (Graduate Faculty).  
B.A., University of East Philippines; M.I.B.S., Ph.D., University of South Carolina.

**Phyllis Alongi (2025)**

Specialist Professor, Professional Counseling.  
B.A., Saint Francis College; M.A., Monmouth University; Ph.D., California Institute of Integral Studies.

**Melissa Alvare (2019)**

Lecturer, Political Science and Sociology.  
B.A., Temple University; M.A., Ph.D., University of Delaware.

**Polina Amburg (2016)**

Assistant Professor, Nursing.  
B.A., M.A., Hunter College; Ph.D., Rutgers School of Nursing.

**Aina Ananda (2022)**

Lecturer, Biology.  
M.Eng., Institut Supérieur de Madagascar; M.Sc., NY Medical College;  
Ph.D., Rutgers University.

**Sheri R. Anderson (2005)**

Senior Specialist Professor, Music and Theatre Arts.  
B.A., William Jewell College; M.F.A., University of California, San Diego;  
M.A., Monmouth University.

### B

**Thomas Baker (2004)**

Associate Professor, Art and Design.  
B.F.A., Eastern Carolina University; M.F.A., University of Wisconsin-Madison.

**Mirta Barrea-Marlys (2003)**

Associate Professor, World Languages and Cultures.  
B.A., Rutgers University; M.A., Villanova University; Ph.D., Romance Languages/Literature, University of Pennsylvania.

**Colleen Beach (2015)**

Specialist Professor, Social Work.  
B.A., University of Scranton; M.S.W., Monmouth University.

**Noel C. Belinski (2008)**

Lecturer, English.  
B.A., Barnard College of Columbia University; M.A.T., Monmouth University.

**Brittany Biesiada (2025)**

Lecturer, English.  
B.A., Seton Hall University; M.A., Columbia University; Ph.D., Purdue University.

**Stanley S. Blair (1996)**

Associate Professor, English.  
B.A., Gardner-Webb College; M.A., Marquette; Ph.D., Duke University.

**Kristin Bluemel (1994)**

Professor and Wayne D. McMurray-Helen Bennett Endowed Chair in the Humanities, English (Graduate Faculty).  
Interim Associate Dean, School of Humanities and Social Sciences.  
B.A., Wesleyan University; M.A., Ph.D., Rutgers University.

**Stephanie Bobbitt (2018)**

Assistant Professor, Educational Counseling and Leadership (Graduate Faculty).  
B.S., S.U.N.Y. College of Environment Science and Forestry; M.S., The College of Saint Rose; Ph.D., Western Michigan University.

**Tjeerd Boonman (2019)**

Specialist Professor, Economics, Finance and Real Estate.  
B.A., M.S., University of Amsterdam; Ph.D., University of Groningen.

**Ashley Bosonac (2023)**

Lecturer, Marketing and International Business.  
B.S., Virginia Polytechnic Institute and State University; MBA, Duquesne University; Ph.D., Old Dominion University.

**Warren Brown (2022)**

Lecturer, Chemistry and Physics.  
B.S., M.S., Ph.D., Georgia State University.

**Melissa Brzycki (2019)**

Associate Professor, History (Graduate Faculty).  
B.A., University of North Carolina; M.A., Ph.D., University of California.

**John Burke (2011)**

Senior Specialist Professor, Economics, Finance and Real Estate.  
B.A., S.U.N.Y.; M.B.A., Indiana University.

**Nikita Burrows (2017)**

Associate Professor, Chemistry and Physics.  
B.S., The College/University of the Bahamas; M.S., Ph.D., Georgia State University.

**John S. Buzza (2005)**

Senior Specialist Professor, Management and Leadership.  
B.S., Monmouth University; M.A., University of Phoenix.

**William Byrne (2022)**

Specialist Professor, Computer Science and Software Engineering.  
B.S., M.S., New York University; MSEE, Stevens Institute of Technology; M.S., Columbia University.

**C****Brian Callahan (2025)**

Specialist Professor, Computer Science and Software Engineering.  
B.A., Carnegie Mellon University; M.A., Monmouth University; M.S., Ph.D., Rensselaer Polytechnic Institute.

**Kimberly Callas (2016)**

Associate Professor, Art and Design.  
B.F.A., University of Michigan; M.F.A., New York Academy of Art.

**Kenneth Campbell (1986)**

Professor, History (Graduate Faculty).  
B.A., Virginia Commonwealth University; M.A., Ph.D., University of Delaware.

**Thomas Carey (2020)**

Specialist Professor, Criminal Justice.  
B.S., M.A., Long Island University; Ph.D., Saint John Fisher College.

**Steven Carlo (2025)**

Assistant Professor, Educational Counseling and Leadership.  
B.A., Florida International University; M.S., Nova Southeastern University; Ph.D., University of Florida.

**Stephen J. Chapman (2014)**

Associate Professor, Political Science and Sociology.  
B.A., M.A., East Stroudsburg, University; M.A., Ph.D., S.U.N.Y. Binghamton.

**Michael Chattalas (2016)**

Assistant Professor, Marketing and International Business (Graduate Faculty).  
B.S., University of Maryland; M.S., Troy State University; M.Phil., Ph.D., Baruch College, City University of New York.

**Manuel Chavez (2013)**

Assistant Professor, History.  
B.A., Truman State University; M.A., Ph.D., Binghamton University – S.U.N.Y.

**Edward Christensen (1996)**

Associate Professor, Management and Leadership (Graduate Faculty).  
A.S., George Washington University; B.S., Southern Illinois University; M.B.A., Ph.D., Rutgers University.

**Natalie Ciarocco (2007)**

Professor, Psychology.  
B.A., M.A., Ph.D., Case Western Reserve University.

**Frank Domenico Cipriani (2014)**

Specialist Professor, World Languages and Cultures.  
M.A., Applied Linguistics, S.U.N.Y. Stony Brook.

**Carson Clements (2023)**

Lecturer, Accounting.  
B.S., M.A., SUNY Brockport; PH.D, Miami University.

**Shannon Clifford (2022)**

Associate Professor, Occupational Therapy.  
Acting Dean, School of Nursing and Health Studies.  
B.S., MPT, Ph.D., University of Pittsburgh.

**Samantha Colangelo (2025)**

Specialist Professor, Nursing.  
BSN, Farleigh Dickinson University; MSN, Monmouth University.

**John Comiskey (2011)**

Associate Professor, Criminal Justice (Graduate Faculty).  
M.S., Naval Post Graduate School, Ed.D., St. John Fisher College.

**Jeffrey Cook (2018)**

Lecturer, Music and Theatre Arts.  
Pep Band Director.  
B.A., M.A., University of Miami; A.B.D., University of Kentucky.

**Richard Cox (2016)**

Associate Professor, Communication (Graduate Faculty).  
B.S., M.F.A., Virginia Commonwealth University.

**Joseph Coyle (2002)**

Professor, Mathematics.  
Dean, School of Science.  
B.S., Miami University; M.S., Ph.D., University of Delaware.

**Michael Cronin (2010)**

Associate Professor, Social Work (Graduate Faculty).  
M.S.W., Columbia University; Ph.D., Yeshiva University.

**Denise Crowley (2021)**

Specialist Professor, Occupational Therapy.  
OTD, Thomas Jefferson University.

**Ralph Cuseglio (2016)**

Associate Professor, Social Work (Graduate Faculty).  
M.S.W., D.S.W., Rutgers University.

## D

**Jonathan Daigle (2017)**

Associate Professor, Economics, Finance and Real Estate (Graduate Faculty).  
Director, M.B.A. Program.  
B.S., M.B.A., The University of South Alabama; Ph.D., The University of Mississippi.

**Pedram Daneshgar (2010)**

Professor, Biology.  
B.A., University of Delaware; M.S., Saint Joseph's University; Ph.D., University of Florida.

**Rekha Datta (1995)**

Professor and Freed Endowed Chair in the Humanities, Political Science and Sociology.  
B.A., M.A., Presidency College, University of Calcutta, India; Ph.D., University of Connecticut.

**Veronica Davidov (2013)**

Professor and Anthropology Graduate Program Director, Anthropology (Graduate Faculty).  
Ph.D., New York University.

**Anne Deepak (2014)**

Associate Professor, Social Work (Graduate Faculty).  
B.A., Boston University; M.S., Ph.D., Columbia University.

**Megan Delaney (2016)**

Associate Professor, Psychology (Graduate Faculty).

Ph.D., Montclair State University.

**Hillary DelPrete (2015)**

Associate Professor and Undergraduate Program Director, Anthropology (Graduate Faculty).  
B.S., Tulane University; M.A., Ph.D., Rutgers University.

**Christopher DeRosa (2004)**

Associate Professor, History (Graduate Faculty).  
B.A., Columbia University; Ph.D., Temple University.

**Raj Devasagayam (2021)**

Professor, Marketing and International Business (Graduate Faculty).  
Dean, Leon Hess Business School.  
B.A., Vikram University, India; M.A., Mumbai University, India; Ph.D., Florida Atlantic University; graduate, Harvard Graduate School of Education.

**Lisa Dinella (2006)**

Professor, Psychology.  
B.A., The College of New Jersey; M.S., Ph.D., Arizona State University.

**Kevin Dooley (2005)**

Professor, Political Science and Sociology.  
B.A., Monmouth University; M.A., Ph.D., Rutgers University.

**Maureen Dorment (2006)**

Senior Lecturer, History.  
B.S., Georgetown University; M.S., Monmouth University; Ph.D. candidate, Drew University.

**Ellen Doss-Pepe (2006)**

Senior Lecturer, Biology.  
B.S., University of Scranton; Ph.D., Rensselaer Polytechnic Institute.

**Staci Drewson (2014)**

Associate Professor and Chair, Health Studies and Physical Education.  
B.A., Gonzaga University; M.S., Ph.D., Springfield College.

**Catherine N. Duckett (2009)**

Biology.  
Associate Dean, School of Science.  
B.A., Brown University; M.A., University of Texas at Austin; Ph.D., Cornell University.

**Bernadette Dunphy (2011)**

Senior Specialist Professor, Biology.  
Co-Director of the Pre-Professional Health Advising Committee.  
P.T., D.P.T., University Medicine and Dentistry, NJ.

**Keith Dunton (2015)**

Associate Professor, Biology.  
B.S., M.S., Ph.D., Stony Brook University.

**Corey Dzenko (2014)**

Associate Professor, Art and Design.  
B.F.A., Central Michigan University; M.A., University of Alabama; Ph.D., University of New Mexico.

## E

**Azzam Elayan (2006)**

Senior Lecturer, Chemistry and Physics.  
Ph.D., Wesleyan University.

**Kiameesha Evans (2016)**

Specialist Professor, Health Studies and Physical Education.  
B.A., Johns Hopkins University; M.A., University of Medicine and Dentistry, NJ; Master Certified Health Education Specialist (CHES).

## F

### Giuseppe Fazari (2023)

Assistant Professor, Criminal Justice.  
B.A., M.P.A., Ph.D., Seton Hall University.

### Jason Fitzgerald (2019)

Associate Professor, Curriculum and Instruction.  
B.A., M.S., McDaniel College; Ph.D., University of Pittsburgh.

### Christine Forbes (2019)

Specialist Librarian, Library.  
B.S. State University of New York at Stony Brook; M.L.I.S., Rutgers University.

### David Ford (2018)

Associate Professor and Chair, Professional Counseling (Graduate Faculty).  
B.A., M.A., Wake Forest University; Ph.D., Old Dominion University.

### Megan Forney (2020)

Associate Professor, Criminal Justice (Graduate Faculty).  
B.S. Psychology, Temple University; M.A., Stockton University; Ph.D., Temple University.

### Johanna Foster (2013)

Professor, Sociology Program Director, and Helen McMurray Bennett Endowed Chair in Social Ethics, Political Science and Sociology.  
B.A., Interdisciplinary/Women's Studies, M.A., Applied Sociology/Social Policy, American University; Ph.D., Rutgers University.

### James Fries (2023)

Specialist Professor and Academic Coordinator, Physician Assistant Program (Graduate Faculty).  
B.S., DeSales University; PA-C, M.S., Philadelphia College of Osteopathic Medicine.

### Danielle Frith (2020)

Specialist Professor, Special Education.  
B.S., Monmouth University; M.A., Rider University; ABD, Temple University.

### Aaron Furgason (2004)

Associate Professor, Communication.  
B.A., Monmouth University; M.A., Emerson College; Ph.D., Rutgers University.

### Frank Fury (2007)

Senior Lecturer, English.  
Director of Writing Services.  
B.A., Boston College; Ph.D., Drew University.

## G

### Torrey Gallagher (2019)

Associate Professor, Mathematics.  
B.S., Temple University; M.A., Ph.D., University of Pittsburgh.

### Dennis Gallagher (2020)

Specialist Professor, Marketing and International Business.  
B.S., M.S., Rutgers University; M.A., Columbia Business School; PhD., University of Washington.

### Andrea Garcia (2020)

Specialist Professor, Occupational Therapy.  
Doctoral Capstone Coordinator.  
B.S., Elizabethtown College; M.S.W., Rutgers State University; OTD., University of Kansas.

### William George (2020)

Assistant Professor and Ed.D. Program Director, Educational Counseling and Leadership (Graduate Faculty).  
B.S., Michigan State University; M.A., Ohio State University; M.S., Monmouth University; Ed.D., Seton Hall University.

### George Germek (2006)

Professor Librarian, Library.  
B.A., B.S., Kean College; M.A., M.L.S., Rutgers University.

### Laura Giacobbe (2022)

Library.  
Specialist Librarian.  
B.S., The College of New Jersey; M.S., Drexel University.

### Elizabeth Gilmartin-Keating (2004)

Senior Lecturer and Career Advising Mentor, English.  
B.A., Georgian Court College; M.A., Seton Hall University; Ph.D., New York University.

### David Golland (2022)

(Graduate Faculty).  
Dean, School of Humanities and Social Sciences.  
B.A., M.Phil., Ph.D., City University of NY; MA, University of Virginia.

### Alysson Goodwin (2022)

Specialist Professor, Occupational Therapy.  
B.S., University of Louisiana at Monroe; M.B.A., American Intercontinental University; Ph.D., University of the Cumberland.

### Jamie Goodwin-Uhler (2015)

Specialist Professor, Psychology.  
B.A., Susquehanna University; M.S., Loyola University; Ph.D., Ball State University.

### William Gorman (2017)

Lecturer, History.  
B.A., Villanova University; M.A., Monmouth University.

### Beth Gough (2018)

Specialist Professor, Nursing.  
BSN Program Director.  
Diploma, Ann May School of Nursing; B.S.N., M.S.N., Monmouth University. R.N., CNE.

### Susan M. Goulding (1996)

Associate Professor, English (Graduate Faculty).  
B.A., M.A., Adelphi University; Ph.D., New York University.

### Alena Graedon (2016)

Associate Professor, English (Graduate Faculty).  
M.F.A., Columbia School of the Arts.

### Susan Forquer Gupta (2006)

Associate Professor, Marketing and International Business (Graduate Faculty).  
Associate Provost.

B.S., M.S., University of Missouri-Columbia; Ph.D., University of Tennessee-Knoxville.

## H

### **Gabrielle Hackenberg (2020)**

Specialist Professor, Occupational Therapy.  
Academic Fieldwork Coordinator.

B.S.; M.S., Elizabethtown College; OTD, Thomas Jefferson University.

### **Gayle Hallett (2024)**

Lecturer, Chemistry and Physics.

B.A., Drew University; M.S., Rutgers University; Ph.D., University of Bristol.

### **Nicole Halliwell (2021)**

Assistant Professor, Occupational Therapy (Graduate Faculty).

B.A., M.S., Seton Hall University; Ph.D., University of Oklahoma.

### **John P. Hanly (2014)**

Associate Professor and Chair, English (Graduate Faculty).

B.A., Georgetown College; M.A., University of Chicago; Ph.D., University of Louisville.

### **BeckyAnn Harker (2024)**

Assistant Professor, Speech-Language Pathology.

B.A., Ohio University; M.A., Case Western Reserve University; Ph.D., Kent State University.

### **Matthew Harmon (2011)**

Senior Specialist Professor, Communication.

B.A., M.A., Monmouth University.

### **Jennifer Harpootlian (1998)**

Lecturer, English.

B.A., Georgian Court University; M.A., Seton Hall University.

### **Wendy Harriott (2000)**

Associate Professor, Special Education (Graduate Faculty).

B.S., Bloomsburg University; M.S., Marywood College; Ph.D., Pennsylvania State University.

### **Mary Harris (2011)**

Senior Specialist Professor, Communication.

B.A., Rowan University; M.A., Monmouth University.

### **Mary Haspel (2013)**

Associate Professor, Special Education.

B.A., M.A., The Catholic University of America; Ph.D., West Virginia University.

### **Christine J. Hatchard (2013)**

Associate Professor and Chair, Psychology.

B.A., Monmouth University; M.S., Psy.D., Chestnut Hill College.

### **Adam Heinrich (2018)**

Associate Professor, Anthropology (Graduate Faculty).

B.S., M.A., Ph.D., Rutgers University.

### **Scott Hofer (2024)**

Assistant Professor, Political Science and Sociology.

B.A., Augustana University; M.A., Ph.D., University of Houston.

### **Christa Hogan (2011)**

Senior Lecturer and B.S.W. Program Director, Social Work.

B.S.W., Monmouth University; M.S.W., Fordham University.

### **Shannon Hokanson (2005)**

Senior Lecturer, Communication.

B.A., M.A., Monmouth University.

### **Robyn Holmes (1993)**

Professor, Psychology.

B.A., M.A., Ph.D., Rutgers University.

### **Andrea Hope (2007)**

Associate Professor, Health Studies and Physical Education.

B.S., Montclair State University; M.S., The American University; Ed.D., C.H.E.S., Teachers College, Columbia University.

### **Amy Hoyle (2025)**

Professor, Curriculum and Instruction.

Dean.

B.A., University of Michigan - Ann Arbor; M.A, Eastern Michigan University; Ph.D., University of North Carolina - Chapel Hill.

### **Maria Hrycenko (2013)**

Lecturer, Health Studies and Physical Education.

B.S., Rutgers University; D.C., Sherman College of Chiropractic, Spartanburg, South Carolina.

## I

### **Lisa Iannucci (2024)**

.

B.A., Smith College; M.F.A., New School Univ.; M.L.I.S., Long Island University.

### **Uzma Imtiaz (2015)**

Lecturer, Chemistry and Physics.

B.S., St. Mary's College; Ph.D., Wayne State University.

## J

### **Jeffrey Jackson (2012)**

Associate Professor, English (Graduate Faculty).

B.A., Linfield College; M.A., Portland State University. Ph.D., Rice University.

### **Peter Jaques (2023)**

Professor/Rechnitz Endowed Chair in Marine Environmental Law and Policy, Political Science and Sociology.

B.A., Montana State University; M.P.A., Ph.D., Northern Arizona University.

### **Scott Jeffrey (2009)**

Associate Professor, Management and Leadership (Graduate Faculty).

B.S.C., M.B.A., Santa Clara University; Ph.D., University of Chicago.

### **Joanne Jodry (2003)**

Associate Professor and Mental Health Counseling Program Director, Professional Counseling (Graduate Faculty).

M.A., Monmouth University; Ed.D., Argosy University; D.M.H., Drew University.

### **Davis Jose (2017)**

Associate Professor, Chemistry and Physics.

B.S., M.S., Mahatma Gandhi University, India; Ph.D., Max-Planck Institute for Biophysical Chemistry, Germany.

### **Ilyong Jung (2019)**

Assistant Professor, Chemistry and Physics.

B.S., M.S., Kyngpook National University; Ph.D., Brown University.

## K

### **Ai Kamei (2018)**

Associate Professor and Interim Chair, Special Education (Graduate Faculty).

B.A., M.S., Osaka Kyoiku University, Japan; Ph.D., The University of North Carolina at Greensboro.

### **Rolf Kamp (2022)**

Specialist Professor, Computer Science and Software Engineering (Graduate Faculty).

B.S., B.A., Stockton University; M.B.A., Monmouth University; M.S., New Jersey Institute of Technology.

### **Jiwon Kim (2012)**

Associate Professor, Curriculum and Instruction (Graduate Faculty).

B.A., Dong-Guk University; M.S., Case Western Reserve University; Ph.D., Purdue University.

### **James Kinard (2025)**

Specialist Professor, Criminal Justice.

B.A., M.A., Farleigh Dickinson University.

### **Rose Knapp (2010)**

Associate Professor, Nursing (Graduate Faculty).

MSN Program Director.

B.A., State University of Plattsburgh; M.S., Seton Hall University; D.N.P., University of Miami, ACNP-BC.

### **Jeanne Koller (2019)**

Associate Professor, Social Work (Graduate Faculty).

B.B.A., University of Massachusetts; M.S.W., Hunter College of Social Work; Ph.D., Rutgers University.

### **Wobbe Koning (2014)**

Associate Professor, Art and Design.

B.F.A., The Netherlands Film and Television Academy; M.F.A., Ohio State University.

### **Lynn Kraemer-Siracusa (1996)**

Lecturer, English.

B.A., M.A., Seton Hall University; Ed.D., Rowan University.

## L

### **Jeremy Lackman (2017)**

Associate Professor, Health Studies and Physical Education.

B.S., University of Central Missouri; M.S., Brooklyn College; (C.U.N.Y.); Ph.D., University of Georgia.

### **Aned Ladino (2025)**

Lecturer, World Languages and Cultures.

B.A., M.A., University of Central Florida; M.S., Georgetown University.

### **Raman Lakshmanan (2022)**

Specialist Professor, Computer Science and Software Engineering (Graduate Faculty).

B.S., University of Madras; Ph.D., Oakland University.

### **Massimiliano Lamberto (2006)**

Professor, Chemistry and Physics.

B.S., M.S., University of Messina, Italy; Ph.D., University of Southampton (UK).

### **Stacy Lauderdale-Littin (2011)**

Professor, Special Education (Graduate Faculty).

B.S., Clemson University; M.A., California State University, Northridge;

Ph.D., BCBA-D, University of California, Riverside.

### **Jangwook Lee (2019)**

Assistant Professor, Accounting (Graduate Faculty).

B.B.A., Korea University; Ph.D., Temple University; M.S., Baruch College, M.A., Columbia University.

### **Cheryl Ann Leiningen (2013)**

Associate Professor, Nursing (Graduate Faculty).

B.S., The College of New Jersey; M.A., New York University; D.N.P., UMDNJ, Adult Nurse Practitioner.

### **Gary Lewandowski (2002)**

Professor, Psychology.

B.A., Millersville; M.A., Ph.D., State University of New York at Stony Brook.

### **Xudong Daniel Li (2014)**

Associate Professor, Accounting (Graduate Faculty).

B.E., B.S., University of Science and Technology of China, M.B.A.,

University of California, Ph.D., University of North Texas.

### **Yulin Li (2020)**

Assistant Professor, Economics, Finance and Real Estate (Graduate Faculty).

B.S., Economics, M.S., Management, Southwestern University of Finance and Economics, China; M.S., Financial Engineering and Risk Analytics; M.S., Applied Mathematics, Rensselaer Polytechnic Institute, Ph.D., University of Texas at San Antonio.

### **Bochen Li (2023)**

Lecturer, Economics, Finance and Real Estate.

B.S., Shantou University; M.S., Polytechnic University; M.S., University of North Carolina, Charlotte; Ph.D., University of Cincinnati.

### **Kathryn Ann Lionetti (1990)**

Associate Professor, Biology.

B.S., Ph.D., State University of New York at Stony Brook.

### **Peter Liu (1994)**

Professor, Criminal Justice (Graduate Faculty).

B.A., M.A., Jilin University, China; Ph.D., Indiana University of Pennsylvania.

### **Dorothy Lobo (2002)**

Professor and Chair, Biology.

Co-Director of the Pre-Professional Health Advising Committee.

B.A., Immaculate College; Ph.D., The Catholic University of America.

### **Brian Lockwood (2010)**

Professor and Graduate Program Director, Criminal Justice (Graduate Faculty).

B.A., The College of New Jersey; M.A., Ph.D., Temple University.

### **Patrick Love (2019)**

Associate Professor and Associate Director First Year Composition, English (Graduate Faculty).

B.A., Western Michigan University; M.A., Ph.D., Purdue University.

### **Min-Hua Lu (1991)**

Associate Professor and Chair, Marketing and International Business (Graduate Faculty).

B.A., M.A., Beijing Institute of Foreign Trade; D.B.A., George Washington University.

**Kathryn Lubniewski (2015)**

Professor, Special Education.  
B.S., M.A., Ed.D., West Virginia University.

**Mark M. Ludak (2013)**

Specialist Professor, Art and Design.  
Compliance Officer/Technical Specialist.  
B.A., Monmouth University; M.F.A., Hunter College.

**Yun Luo (2020)**

Assistant Professor, Economics, Finance and Real Estate (Graduate Faculty).  
B.S., Xiamen University; M.A., Georgetown University; Ph.D., University of California.

**Stephanie Lynch (2014)**

Specialist Professor and Clinical Coordinator, Physician Assistant Program (Graduate Faculty).  
B.S., Arizona University; PA-C, M.S., George Washington University.

## M

**Débora Machado Nunez (2024)**

Assistant Professor, Economics, Finance and Real Estate.  
B.A., M.A., Federal University of Rio Grande do Sul (Brazil); Ph.D., Colorado State University.

**James P. Mack (1974)**

Professor, Biology.  
B.S., Monmouth University (Monmouth College); M.S., William Paterson College; Ed.D., Teachers College, Columbia University.

**Janet Mahoney (1995)**

Professor, Nursing (Graduate Faculty).  
R.N., St. Mary's Hospital; B.S.N., Monmouth University (Monmouth College); M.S.N., Seton Hall University; Ph.D., APN-BC, ENA-BC New York University.

**Katie Manley (2024)**

Assistant Professor, Management and Leadership.  
B.S., Cornell University; Ph.D., Rutgers University.

**Colleen Manzetti (2012)**

Associate Professor, Nursing (Graduate Faculty).  
Chair, Department of Nursing.  
B.S., Rutgers University; M.S.N., Monmouth University; D.N.P., Samford, Alabama CNE, CNLCP.

**David Marshall (2004)**

Associate Professor, Mathematics.  
B.A., California State University at Fullerton; Ph.D., University of Arizona.

**Susan Marshall (2004)**

Associate Professor and Chair, Mathematics.  
B.S. Wake Forest University; Ph.D., University of Arizona.

**Golam M. Mathbor (1999)**

Professor, Social Work (Graduate Faculty).  
Interim Dean.  
B.S.S., M.S.S., Bachelor of Law (LLB), University of Dhaka, Bangladesh;  
M.S.W., McGill University; Ph.D., University of Calgary.

**Carol McArthur-Amedeo (2011)**

Senior Lecturer, Assistant Department Chair and M.S.Ed. Special Education Program Director, Special Education.  
M.A., Fairleigh Dickinson University; Ed.D., Rutgers University.

**Ashley McCarthy (2024)**

Specialist Professor, Speech-Language Pathology.  
B.S., Richard Stockton University; M.S., Seton Hall University.

**Jonathan McElroy (2024)**

Assistant Professor, Music and Theatre Arts.  
B.A., M.A., William Paterson University; Ph.D., New York University.

**Jennifer McGovern (2013)**

Associate Professor, Political Science and Sociology.  
B.S., Sacred Heart University; M.S., Central Connecticut State University; M.S., Ph.D., Temple University.

**Frederick McKittrick (1994)**

Associate Professor, Art and Design; History (Graduate Faculty).  
Chair, Art and Design.  
B.A., M.A., Ph.D., Columbia University.

**Joseph McManus (2012)**

Associate Professor and Chair, Management and Leadership (Graduate Faculty).  
M.B.A., Pepperdine University; J.D., Rutgers University Law School, Camden; Ph.D., Rutgers University.

**Lindsay Mehrkam (2016)**

Associate Professor, Psychology.  
B.A., Franklin and Marshall College; M.S., Ph.D., University of Florida.

**Nicholas Messina (2015)**

Specialist Professor, Communication.  
B.A., Ramapo College of New Jersey.

**Susan Meyer (2021)**

Specialist Professor, Art and Design.  
B.A., Skidmore College; M.A., Tufts University.

**Kenneth Mitchell (2006)**

Professor and Chair, Political Science and Sociology.  
B.A., University of California; M.S., London School of Economics; D.Phil., Oxford University, United Kingdom.

**Gregory Moehring (2011)**

Associate Professor, Chemistry and Physics.  
B.A., Western Washington University; Ph.D., Purdue University.

**Donald Moliver (1982)**

Professor, Acting Director of Kislak Real Estate Institute; Steven J. and Elaine Pozyski Endowed Professorship in Real Estate, Economics, Finance and Real Estate (Graduate Faculty).  
B.A., Fairleigh Dickinson University, M.A., Ph.D., Virginia Polytechnic Institute.

**John Morano (1988)**

Professor, Communication.  
B.A., Clark University; M.A., Pennsylvania State University.

**Ruth Morris (2016)**

Lecturer, Curriculum and Instruction.  
B.S., Evangel University; M.Ed., Ed.D., Walden University.

**Joseph Mosca (1987)**

Associate Professor, Management and Leadership (Graduate Faculty).  
B.A., M.A., Montclair State University; Ed.D., New York University.

**Mihaela Moscaliuc (2012)**

Professor and Graduate Program Director, English (Graduate Faculty).  
B.A., M.A., Al.I. Cuza University; M.A., Salisbury University; M.F.A., New England College; Ph.D., University of Maryland.

**Jaime Myers (2014)**

Associate Professor, Health Studies and Physical Education.  
B.A., M.P.H., Emory University; Ph.D., University of South Florida.

## N

**Datta V. Naik (1977)**

Professor, Chemistry and Physics.  
BS.c., St. Xavier's College, University of Bombay, Goa, India; Ph.D., University of Notre Dame.

**Brooke A. Nappi (2008)**

Lecturer, Anthropology.  
B.A., Monmouth University; M.A., Montclair State University.

**Jamie Nappi (2020)**

Specialist Professor, Social Work.  
B.S.W., College of Misericordia; M.S.W., Fordham University.

**Erin Nau (2021)**

Lecturer, Social Work.  
B.A., University of Northern Colorado; M.A., Springfield College.

**Alexis M. Nulle (2016)**

Specialist Professor, Communication.  
B.A., Rutgers University; M.A., Monmouth University.

## O

**Patrick L. O'Halloran (2003)**

Associate Professor, Economics, Finance and Real Estate (Graduate Faculty).  
B.A., M.A., Ph.D., University of Wisconsin-Milwaukee.

**Jonathan Ouellet (2013)**

Associate Professor, Chemistry and Physics.  
B.S., M.S., Ph.D., University of Sherbrooke.

## P

**Giuseppina Pagnotta (2024)**

Specialist Professor, Nursing.  
BSN, M.S., New Jersey City University; MSN, DNP, Monmouth University.

**Joseph Palazzolo**

Lecturer, Management and Leadership.

**Cristina Palmeri (2025)**

Specialist Professor, Nursing.  
BSN, Monmouth University; MSN, DNP, Rutgers University.

**Emanuel Palsu-Andriescu (2010)**

Senior Lecturer, Mathematics.  
B.S., M.S., Al.I., Cuza University, Romania; Ph.D., University of Rochester.

**Wai Kong Pang (2008)**

Associate Professor, Mathematics.  
B.S., Brigham Young University; M.S., Ph.D., Texas Tech University.

**Tina Paone (2006)**

Professor, Educational Counseling and Leadership (Graduate Faculty).  
B.A., University of Tampa; M.A., Ph.D., University of Nevada, Reno.

**Pauline Papapietro (2021)**

Specialist Professor, Physician Assistant Program (Graduate Faculty).  
Program Director and Chair.  
B.S., CUNY College of Staten; PA Certificate, Sisters of Charity PA Training Program; M.S., Pace University.

**Katherine Parkin (2003)**

Professor and Jules Plangere Jr. Endowed Chair in American Social History, History (Graduate Faculty).  
B.A., Lake Forest College; Ph.D., Temple University.

**John Patro (2020)**

Associate Professor and Chair, Occupational Therapy (Graduate Faculty).  
B.S.; M.S., University of Scranton; OTD, Chatham University.

**Susan Pattay (2024)**

Assistant Professor, Speech-Language Pathology.  
B.A., James Madison University; M.A., Rutgers University, LaSalle University; Ed.D., Vanderbilt University.

**Joseph Patten (2002)**

Professor, Political Science and Sociology.  
B.A., Kean University; M.A., Ph.D., West Virginia University.

**Karen Pesce (2008)**

Senior Lecturer, Biology.  
B.A., B.S., M.S., Seton Hall University; Ph.D., Rutgers University.

**Nguyen Pham (2019)**

Associate Professor, Marketing and International Business (Graduate Faculty).  
B.S., Vietnam University; M.B.A., Rutgers University; Ph.D., Arizona State University.

**Michael Phillips-Anderson (2007)**

Associate Professor, Communication (Graduate Faculty).  
B.A., George Mason University; M.A., St. John's College; Ph.D., University of Maryland.

**Jamie Pigman (2019)**

Assistant Professor, Health Studies and Physical Education.  
B.S., M.A., Montclair State University; Ph.D., University of Delaware.

**Alyson Pompeo-Fagnoli (2016)**

Associate Professor and Educational Counseling Program Director, Educational Counseling and Leadership (Graduate Faculty).  
B.A., M.A., The College of New Jersey; Ph.D., Montclair State University.

**Nicole Pacheco Pulliam (2014)**

Associate Professor, Educational Counseling and Leadership (Graduate Faculty).  
B.A., Ramapo College of New Jersey; M.A., Ph.D., Montclair State University.

## Q

**Weihao Qu (2023)**

Assistant Professor, Computer Science and Software Engineering.  
B.S., Tianjin University; M.S., University at Buffalo; Ph.D., Boston University.

## R

### **Sanjana Ragudaran (2014)**

Associate Professor, Social Work.  
BS.c., M.S.W., Flinders University, Australia; Ph.D., City University of New York.

### **Erik Raj (2015)**

Associate Professor, Speech-Language Pathology (Graduate Faculty).  
B.S., Stockton University; M.S., Misericordia University; Ph.D., Wayne State University.

### **Joseph Rapolla (2013)**

Specialist Professor and Chair, Music and Theatre Arts.  
M.B.A., Monmouth University.

### **Joan Raso (2015)**

Specialist Professor, Nursing.  
B.S.N., Hardwick College; M.S.N., Seton Hall University; R.N., CHSE.

### **Debmalya Ray (2025)**

Assistant Professor, Chemistry and Physics.  
B.S., University of Calcutta; M.S., Indian Institute of Technology; Ph.D., University of Minnesota.

### **Benedicte Reyes (2002)**

Associate Professor and Chair, Economics, Finance and Real Estate (Graduate Faculty).  
B.A., Ecole Supérieure de Commerce de Reims, France; M.B.A., Temple University; Ph.D., Columbia University.

### **Maryanne Rhett (2008)**

Professor and Chair, History (Graduate Faculty).  
B.A., University of South Carolina; M.A., University of Arizona; Ph.D., Washington State University.

### **Tamara Rial-Faigenbaum (2023)**

Specialist Professor, Health Studies and Physical Education.  
B.S., M.S., Ph.D., University of Vigo, Spain.

### **Mike Richison (2007)**

Associate Professor, Art and Design.  
B.F.A., Calvin College; M.F.A., Cranbrook Academy of Art.

### **Julia Riordan-Goncalves (2007)**

Associate Professor and Chair, World Languages and Cultures.  
B.A., Dickinson College; M.A., Ph.D., University of North Carolina at Chapel Hill.

### **Kerry Rizzuto (2013)**

Associate Professor and M.Ed. P3 Program Director, Curriculum and Instruction (Graduate Faculty).  
M.A., Brooklyn College; Ed.D., Rowan University.

### **Richard Roberts (2019)**

Specialist Professor, Economics, Finance and Real Estate.  
B.S. Pennsylvania State University; M.B.A., Columbia University.

### **Joseph F. Rocereto (2006)**

Professor, Marketing and International Business (Graduate Faculty).  
B.A., Dickinson College; M.B.A., Ph.D., Drexel University.

### **Alex Romagnoli (2014)**

Associate Professor, M.A.T. Program Director and Chair, Special Education, Curriculum and Instruction (Graduate Faculty).

Interim Associate Dean, School of Education.

B.S., M.Ed., East Stroudsburg University; Ph.D., Indiana University of Pennsylvania.

### **Stuart Rosenberg (2010)**

Professor, Management and Leadership (Graduate Faculty).  
B.A., Marquette University; M.A., University of Wisconsin-Madison; Ph.D., Fordham University.

## S

### **Linda Sacks (1994)**

Lecturer, English.  
M.A.T., Monmouth University.

### **Anna Sadovnikova (2020)**

Assistant Professor, Marketing and International Business (Graduate Faculty).  
M.S., Moscow Technical University of Communication and Informatics, Russia; M.B.A., University of Baltimore, Ph.D., McMaster University, Canada.

### **Rebecca Sanford (2004)**

Associate Professor, Communication.  
B.A., University of Pittsburgh; M.A., Monmouth University; Ph.D., Temple University.

### **Saliba Sarsar (1985)**

Professor, Political Science and Sociology.  
B.A., Monmouth University (Monmouth College); Ph.D., Rutgers University.

### **Richard Scherl (2002)**

Associate Professor, Computer Science and Software Engineering.  
B.A., Columbia University; M.A., University of Chicago; Ph.D., University of Illinois.

### **Michelle Schpakow (2019)**

Lecturer, Curriculum and Instruction.  
B.A. Rider University; M.S., Mississippi State University; Ed.D., Liberty University.

### **William Schreiber (2006)**

Lecturer and Coordinator, Clinical Laboratory Sciences and Medical Laboratory Science Programs, Chemistry and Physics.  
B.S., Massachusetts Institute of Technology; Ph.D., University of Rochester.

### **Erica Sciarra (2019)**

Assistant Professor, Nursing.  
A.D.N., Muhlenburg School of Nursing/Union County College; B.S., M.S., D.N.P., Ph.D., Rutgers University. R.N.

### **Patricia Sciscione (2010)**

Associate Professor, Nursing (Graduate Faculty).  
M.S.N., Kean University; Ph.D., Seton Hall University; R.N.

### **Michelle Scott (2008)**

Professor, Social Work.  
B.A., Clark University; M.S.W., Ph.D., University of California, Berkeley.

### **Robert E. Scott (2004)**

Senior Specialist Professor, Arthur and Dorothy Greenbaum/Robert Ferguson/NJAR Endowed Chair in Real Estate Policy, Communication.

B.A., Monmouth University; M.F.A., University of Miami.

**Robert H. Scott, III (2005)**

Professor, Arthur and Dorothy Greenbaum/Robert Ferguson/NJAR  
Endowed Chair in Real Estate Policy, Economics, Finance and Real Estate  
(Graduate Faculty).

B.A., Western State College of Colorado; M.A., Ph.D., University of  
Missouri at Kansas City.

**Saheli Sengupta (2025)**

Assistant Professor, Biology.

B.S., M.S., University of Calcutta; Ph.D., Iowa State University.

**Nicholas Sewitch (2014)**

Specialist Professor and Chair, Criminal Justice.

B.A., Franklin and Marshall College; J.D., Seton Hall University.

**Jennifer Shamrock (2004)**

Senior Lecturer, Communication.

B.A., LaSalle University; M.A., University of Maine; Ph.D., Hugh Downs  
School of Communication, Arizona State University.

**Amelia Shannon (2023)**

Specialist Professor, Professional Counseling (Graduate Faculty).

B.S., M.S., Virginia State University; Ph.D., Hampton University.

**Mikhail M. Sher (2018)**

Associate Professor, Management and Leadership (Graduate Faculty).

B.S., Carnegie Mellon University; M.S., Columbia University; Ph.D., Drexel  
University.

**Deanna Shoemaker (2005)**

Professor, Communication (Graduate Faculty).

Chair, Communication.

B.F.A., Webster University; M.A., Ph.D., University of Texas at Austin.

**Alexis Silverio (2023)**

Specialist Professor, Health Studies and Physical Education.

B.S., Cabrini University; M.P.A., Thomas Jefferson University; Ph.D.,  
Concordia University.

**Kristine M. Simoes (2001)**

Senior Specialist Professor, Communication.

B.A., M.A., Rowan University.

**Michaeline Skiba (2003)**

Associate Professor, Management and Leadership (Graduate Faculty).

B.S., M.S., Loyola University; M.S., Boston College; Ed.D., Columbia  
University.

**Vernon Smith (2017)**

Associate Professor, Chair, and M.S.Ed. School Counseling Program  
Director, Educational Counseling and Leadership (Graduate Faculty).

B.A., Judson College; M.S., Northern Illinois University; Ph.D., University of  
South Florida.

**Abha Sood (2005)**

Senior Lecturer, English.

B.A., M.A., University of Delhi; Ph.D., Indian Institute of Technology.

**Sue Starke (2000)**

Associate Professor and Undergraduate Program Coordinator, English  
(Graduate Faculty).

B.A., Wellesley College; Ph.D., Rutgers University.

**Lilly Steiner (2010)**

Associate Professor and M.S.Ed. Literacy Program Director, Curriculum  
and Instruction (Graduate Faculty).

B.A., University of Wisconsin; M.A., University of North Dakota; Ed.D.,  
Boston University.

**Sean Sterrett (2018)**

Associate Professor, Biology.

B.Sc., Butler University; M.S., Ph.D., Warnell School of Forestry and  
Natural Resources, University of Georgia.

**Douglas Stives (2006)**

Senior Specialist Professor, Accounting.

M.B.A., Lehigh University; C.P.A., New Jersey.

**Amanda Stojanov (2019)**

Associate Professor, Communication (Graduate Faculty).

B.F.A., Monmouth University; M.F.A., University of California, Los Angeles.

**Beth S. Swanson (2015)**

Lecturer, English.

B.A., Monmouth University; M.A., M.A.T., Monmouth University.

**Danuta Szwajkajzer (2004)**

Senior Lecturer, Chemistry and Physics.

M.S., Technical University of Warsaw; M.S., University of Rochester; Ph.D.,  
Rutgers University.

## T

**Kara Teehan (2023)**

Specialist Professor, Mathematics.

B.A., Stockton University; M.A., Rutgers University, American College of  
Education; Ph.D., Rutgers University.

**Sumedha Therthani (2023)**

Assistant Professor, Professional Counseling (Graduate Faculty).

B.A., University of Delhi; M.A., University of Allahabad; M.Phil., IHBAS New  
Delhi; Ph.D., AllMS New Delhi, Ph.D., University of Mississippi.

**Lewis Thomas III (2025)**

Assistant Professor, Educational Counseling and Leadership.

B.S., Lincoln University; M.A., Antioch University; Ph.D., Purdue University.

**Tsanangurayi Tongesayi (2006)**

Professor and Chair, Chemistry and Physics.

B.S., M.S., University of Zimbabwe; Ph.D., West Virginia University.

**Joseph Torchia (2014)**

Lecturer, English.

B.A., M.A., Rutgers University.

**Matthew Tozzi (2022)**

Assistant Professor, Professional Counseling (Graduate Faculty).

B.A., Rowan University; M.A., The College of New Jersey; Ph.D., University  
of Florida.

**Pham Trang (2025)**

Lecturer, Economics, Finance and Real Estate.

BSBA, Banking Academy of Vietnam; MBA, University of Akron; PhD,  
University of Texas - El Paso.

**David Tripold (2002)**

Professor, Music and Theatre Arts.

B.M., M.M., Westminster Choir College of Rider University; Ph.D., Drew  
University.

**Laura Turner (2016)**

Associate Professor, Mathematics.

B.S., Acadia University; M.S., Simon Fraser University; Ph.D., Aarhus University.

## U

**Nancy Uddin (1999)**

Professor and Chair, Accounting (Graduate Faculty).

B.A., William Patterson University; Ph.D., Rutgers University.

**Jennifer Urban (2026)**

Assistant Professor, Biology.

B.S., William Patterson University; Ph.D., Brown University.

**Paul Urbanski (2013)**

Associate Professor, Social Work (Graduate Faculty).

B.F.A., University of Michigan; M.S.W., Columbian University; Ph.D., University of Albany, New York.

## V

**Francis Valliquette (2018)**

Associate Professor, Mathematics.

B.S., M.S., Université de Montréal; M.S., Ph.D., University of Minnesota.

**Michele Van Volkom (2003)**

Senior Lecturer, Psychology.

B.A., Seton Hall University; M.A., Ph.D., State University of New York at Albany.

**Richard F. Veit (2000)**

Professor, History; Anthropology (Graduate Faculty).

Provost and Senior V.P. for Academic Affairs.

B.A., Drew University; M.A., College of William and Mary; Ph.D., University of Pennsylvania.

**John Vercher (2025)**

Assistant Professor, English.

B.A., M.A., University of Pittsburgh.

**Lisa Vetere (2005)**

Associate Professor and Department Advising Coordinator, English.

B.A., Siena College; M.A., St. Bonaventure University; Ph.D., Lehigh University.

**Kathryn Viera (2024)**

Specialist Professor, Nursing.

B.S.N., Felician University; M.S.N., Monmouth University.

**Erin Vitale (2022)**

Specialist Professor, Nursing.

Interim Director, Linda Grunin Simulation Lab and Learning Center.

B.A., James Madison University; M.S.N., Ramapo College of NJ; Ph.D., Post University.

**Marina Vujnovic (2008)**

Professor, Communication (Graduate Faculty).

B.A., University of Zagreb; M.A., University of Northern Iowa; Ph.D., University of Iowa.

## W

**Kurt W. Wagner (2016)**

Professor, Library.

University Librarian.

B.A., Fort Lewis College; M.A., William Patterson University; M.A., Library Science, University of Arkansas.

**Patrick Walden (2022)**

Associate Professor and Chair, Speech-Language Pathology (Graduate Faculty).

B.A., Florida State University; M.A., New Mexico State University; EDS, Ph.D., Florida Atlantic University.

**Jiacun Wang (2004)**

Professor and Graduate Program Director, Computer Science and Software Engineering (Graduate Faculty).

B.S., Jiangsu University of Science and Technology; Ph.D., Nanjing University of Science and Technology, China.

**Dane Ward (2024)**

Assistant Professor, History.

B.S., Ph.D., Drexel University.

**Jeffrey Weisburg (2014)**

Senior Specialist Professor, Biology.

B.A., Ph.D., Cornell-Weill Graduate School of Biomedical Sciences.

**Sherry Wien (2001)**

Associate Professor, Communication.

B.A., Lynchburg College; M.A., Penn State University; Ph.D., Rutgers University.

**Hettie Williams (2007)**

Associate Professor, History (Graduate Faculty).

B.A., Rowan University; M.A., Monmouth University; Ph.D., Drew University.

**Charles Willow (2004)**

Associate Professor, Management and Leadership (Graduate Faculty).

B.S., M.S., Hanyang University; M.S., Texas Tech University; Ph.D., University of Houston.

**Kenneth Womack (2015)**

Professor, Music and Theatre Arts; English (Graduate Faculty).

B.A., Texas AM University; M.A., Texas AM University/Moscow Institute of Communication, U.S.S.R.; Ph.D., Northern Illinois University.

**Chiu-Yin Wong (2011)**

Professor, M.Ed. ESL Program Director, Curriculum and Instruction (Graduate Faculty).

B.A., Brigham Young University; M.A., Ph.D., Texas Tech University.

**Courtney Wright-Werner (2015)**

Associate Professor and Associate Director of First Year Composition, English (Graduate Faculty).

B.A., Moravian College and Theological Seminary; M.A., Texas State University; Ph.D., Kent State University.

**George Wurzbach (2009)**

Specialist Professor, Music and Theatre Arts.

B.A., Brooklyn College, C.U.N.Y.; M.A., Hunter College C.U.N.Y.

## Y

**Guoyang Yang (2025)**

Assistant Professor, Economics, Finance and Real Estate.

B.Eng., Hunan University; M.S., University of Washington; M.S., Ph.D., University of Cincinnati.

**Cui Yu (2002)**

Associate Professor, Computer Science and Software Engineering (Graduate Faculty).

B.S., Nanjing University of Aeronautics and Astronautics; Ph.D., University of Singapore, Singapore.

**Minna Yu (2010)**

Professor, Accounting (Graduate Faculty).

B.A., M.S., Dongbei University, China; Ph.D., Kent State University.

**Jake Yuzna (2025)**

Assistant Professor, Communication.

B.A., Minneapolis College of Art and Design; M.A., American Film Institute.

**Z****Joelle Zabotka (2014)**

Associate Professor, Social Work (Graduate Faculty).

Chair.

B.A., Drew University; M.S.W., Columbia University; Ph.D., Rutgers University.

**Sandra Zak (2014)**

Lecturer, Mathematics.

B.A., M.A., San Diego State University; Ph.D., University of New Hampshire.

**Vecihi S. Zambak (2018)**

Associate Professor, Curriculum and Instruction (Graduate Faculty).

Chair.

B.S., M.S., Bogazici University, Istanbul, Turkey; M.S., University of Amsterdam; Ph.D., Clemson University.

**Ling Zheng (2018)**

Associate Professor and Chair, Computer Science and Software Engineering (Graduate Faculty).

B.S., Southern Medical University, Guangzhou, China; M.S., Zhejiang University, Hangzhou, China; Ph.D., New Jersey Institute of Technology.

**Jing Zhou (2004)**

Professor, Art and Design.

B.A., Sichuan Fine Arts Institute; M.F.A., Georgia Southern University.

**Melissa Suzanne Ziobro (2014)**

Specialist Professor, History.

Curator for the Bruce Springsteen Archives and Center for American Music.

B.A., M.A., Monmouth University.

## Undergraduate Course Descriptions

### African Diaspora Studies (ADS)

**ADS-225 African World Literature****Credits: 3**

Term Offered: All Terms

Course Type(s): ADS, GU, RE

Major works from African, West Indian, and African-American traditions.

**ADS-246 Introduction to African-American Studies****Credits: 3**

Term Offered: Fall Term

Course Type(s): ADS, RE

Introduction to a broad range of themes in their historical context, from the African origin to the formation of African-American societies and cultures in the African Diaspora. Other themes include the rise and fall of slavocracy, the era of Civil Rights struggles, and the establishment of space for African-Americans to tell their stories as well as study their experiences and cultures.

**ADS-298 Special Topics in Africana Studies****Credits: 3**

Term Offered: All Terms

Course Type(s): RE

An intensive study of a particular subject or problem in Africana Studies to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**ADS-302 African-American Seminar****Credits: 3**

Term Offered: All Terms

Course Type(s): ADS, RE

The culture, history, experiences, and artistic and literary expression of African-Americans illuminated by an examination of several academic disciplines that are reviewed for biases and new paradigms suggested.

**ADS-498 Special Topics in Africana Studies****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in Africana Studies to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**ADS-499 Independent Study in African-American Studies****Credits: 3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in Africana Studies to be announced prior to registration. Prior permission of the directing professor and department chair is required to take this course.

## American Sign Language (ASL)

**ASL-101 American Sign Language I****Credits: 3**

Term Offered: All Terms

Course Type(s): None

This Learner-centered course is designed for students with little or no previous knowledge of American Sign Language (ASL). Students acquire basic grammar and lexical skills that will enable them to communicate in routine social or professional situations within an authentic cultural context.

**ASL-102 American Sign Language II****Credits: 3**

Prerequisite(s): ASL-101

Term Offered: All Terms

Course Type(s): None

Designed to continue development of American Sign Language (ASL) skills with primary focus on refining the use of basic ASL sentence types. Students will continue to be exposed foundational aspect of ASL classifiers, hand configuration, palm orientation, and signing space as well as transitioning body language. Students will engage in an expanded learning of Deaf culture and history.

## Anthropology (AN)

### AN-103 Cultural Anthropology

Credits: 3

Term Offered: All Terms

Course Type(s): SS.SV

Introduction to comparative study of human beliefs and behavior. Emphasis on the concepts used in studying human culture; analysis of non-Western societies with respect to ecology, economy, social and political organization, religion, and art; implications for American society.

### AN-104 Introduction to Biological Anthropology

Credits: 3

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, SS.SV

Introduction to physical anthropology; racial variation and the evolutionary origins of the human species; concepts and principles used in the study of living and fossil evidence for human evolution and genetic diversity; unique influence of culture on human biology; human evolution in the present and future.

### AN-107 Introduction to Archaeology

Credits: 3

Term Offered: All Terms

Course Type(s): SS.SV

Introduction to archaeological techniques, concepts, and principles; recovery and interpretation of evidence; examples from the prehistoric cultures of the Americas, Europe, Africa, and Asia.

### AN-113 Cultures of the World

Credits: 3

Term Offered: All Terms

Course Type(s): BI.EL, GU, SS.SV

Common and distinctive features of culture in each of several broad zones around the world, including native North America, native South America, northern Asia, southern Asia, and sub-Saharan Africa; descriptive overview with emphasis on the variety of human experience and achievement.

### AN-117 Great Excavations: Survey of World Archaeology

Credits: 3

Course Type(s): SS.SV

This course is a social science seminar that examines how archaeologists study and interpret the ancient world. Ancient societies from North America, South America, Africa, Asia, and Europe are examined. Students are introduced to the ethical challenges that face archaeologists and to how archaeologists separate fact from fiction.

### AN-198 Special Topics in Anthropology (100 Level)

Credits: 1-3

Course Type(s): None

An intensive study of a particular subject or problem in anthropology to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

### AN-220 History of Advertising

Credits: 3

Term Offered: Spring Term

Course Type(s): GS, HSUS

Designed to develop a critical understanding of the historical evolution of advertising in the United States, with critical attention to race, class, gender, and sexuality. We will explore the economic, political, and cultural factors that have contributed to the development of advertising, and which have been affected by advertising. Some of the topics to be discussed include: the rise of national advertising; the relation of advertising to consumption; advertising to children; political advertising, the relationship between advertisers and the medium in which they appear (magazines, television, radio, etc.) and broadcast and internet advertising. Also listed as HS-220 and GS-220.

### AN-252 Human Variation

Credits: 3

Term Offered: Spring Term

Course Type(s): TL

This course is designed to introduce students to the study of human variation. Each one of us is different from everyone else; even monozygotic twins, that share the same DNA, differ. These differences can occur from the genetic level to the epigenetic level. Some of this variation we can see, such as variation in height, eye color, etc. Other variation is less obvious such as variation in disease susceptibility and food sensitivities. Students will collect and examine data to assess this variability in humans while looking through the lens of evolutionary theory and natural selection.

### AN-262 Primate Behavior, Evolution and Ecology

Credits: 3

Term Offered: Spring Term

Course Type(s): None

The study of primatology, which examines the lifeways, biology, and behavior of our closest living relatives. Various topics will be explored including taxonomy and classification, diet, behavior, grouping patterns, locomotion, and land usage patterns of monkeys, apes and prosimians. These topics will be explored within the frameworks of natural selection, sexual selection, and evolution. Also listed as BY-262.

### AN-263 Peoples and Cultures of South America

Credits: 3

Prerequisite(s): AN-103 or AN-113

Term Offered: Spring Term

Course Type(s): RE

A social and cultural survey of representative peoples in South America and the Caribbean, emphasizing the comparative study of economic, political, social, and religious organization.

### AN-264 North American Indians

Credits: 3

Term Offered: All Terms

Course Type(s): GU, RE

A survey of the cultural, social and linguistic diversity of Pre-Columbian North American societies; problems of contemporary Indian groups. Also listed as HS-264.

### AN-266 Historical Archaeology

Credits: 3

Prerequisite(s): AN-103 or HS-201 and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

An introduction to historical archaeology, the archaeology of the modern world (c. 1492+). It focuses on archaeological sites in the United States. Students are introduced to the various written and material sources that historical archaeologists use to interpret the recent past, including artifacts, vernacular architecture, grave markers, documents, photographs, and other visual sources. Archaeological field methods are also introduced with a minimum of one class period spent excavating an archaeological site. Also listed as HS-266.

### AN-267 Tourism Around the World

Credits: 3

Term Offered: All Terms

Course Type(s): BI.EL, GU, SUS

Introductory examination of the various factors that impact tourism in different parts of the world. Students will consider political, social, economic, cultural, and environmental factors that affect tourists, local populations, and the physical destinations. Also listed as GO-267.

**AN-268 Urbanization**

Term Offered: All Terms

Course Type(s): CD, RE, SUS

An introduction to urbanization on a global scale. Historical and contemporary development of the world's cities using geographical approaches to urban analysis. Includes examination of urban forms and the local global, social, cultural, economic, political, and physical processes that shape and are shaped by cities, and the large and rapidly growing cities of the developing world that dominate and control the global economy. Also listed as GO-268.

**Credits: 3****AN-272 Magic, Witchcraft, and Religion****Credits: 3**

Prerequisite(s): EN-101 and EN-102; or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

Explores motivation of human behavior within the realm of religion and the supernatural with an emphasis on the role of gods and goddesses. A cross-cultural approach will be used while exploring cultures both past and present across the globe. Also listed as RS-272.

**AN-274 Anthropology of Sex and Gender****Credits: 3**

Term Offered: Spring Term

Course Type(s): GS, RE

Anthropological perspectives on sexuality and gender; emergence of human sexuality and gender differentiation in the context of species evolution; cross-cultural survey of social and ideological aspects of sexuality and gender.

**AN-275 Global Environmental Problems****Credits: 3**

Term Offered: All Terms

Course Type(s): GU, HE,EL, SUS

Focus on the complex relationship between human beings and their environments in an effort to build an ecological perspective in a global framework. Discussion of basic issues of ecological science in terms of impact on both the Western and non-Western worlds. Also listed as GO-275.

**AN-278 Maritime History/Underwater Archaeology****Credits: 3**

Term Offered: Summer Term

Course Type(s): MEBP

A mid-level seminar that examines maritime archaeology, with a focus on North America and particularly New Jersey. As part of this course, students will explore the world of maritime archaeology through readings, fieldwork, lectures, and hands-on exercises. It will include fieldwork on Monmouth's research vessel, work with a submersible, and lab work with shipwreck artifacts.

**AN-279 Culture, Health and Illness****Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): CD, HE,EL, HEPE, WT

A cross-cultural examination of health and healing from the view of applied medical anthropology. Explores biological, sociocultural, political economic, and structural factors that affect health, illness, and disease both now and in the past. Cultural areas of study include: populations in the United States, Africa, Latin America, the Caribbean, and Southeast Asia.

**AN-280 Anthropology and Education****Credits: 3**

Prerequisite(s): EN-101 and EN-102; or permission of the instructor

Term Offered: Spring Term

Course Type(s): WT

The Anthropology of Education has a long and rich history of exploring intersections of learning and culture. This course is an introduction to the issues and approaches central to the study of education within the discipline of anthropology. Over the course of the semester, students will engage with classic and contemporary methods and readings in the field, including cross-cultural approaches to schooling and key issues in educational policy. This course is founded in anthropological approaches to education and how anthropologists address topics related to learning.

**AN-289 Anthropological Field Study****Credits: 1-3**

Prerequisite(s): 6 credits in Anthropology

Term Offered: All Terms

Course Type(s): EX1

Supervised field experience in various branches of anthropology, e.g., archaeological excavation, museum work, ethnography, and primate behavior. Departmental approval is required to take this course.

**AN-290 Popular Culture and the Middle East****Credits: 3**

Course Type(s): GU, HSNW

Examines recent events, traditional cultural practices, and the perceptions of the Middle East through the lens of popular media (film, graphic novels, journalism, etc.). Topics to be covered may include but are not limited to: religion, the Arab Spring (2011), the Iranian Revolution, the Arab-Israeli Conflict, women's rights/roles, Orientalism and racism, and common governing structures. Also listed as HS-290.

**AN-296 Cultures and Societies of Africa****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): CD, WT, HSAF, HSNW, RE

Examines the history, cultures, and societies of Africa from the precolonial to the contemporary period. Discusses the cultural, political, and economic changes that have taken place in Africa as a result of Western influence. Also listed as HS-296.

**AN-298 Special Topics in Anthropology (200 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in Anthropology to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**AN-299 Independent Study in Anthropology****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided readings on a topic not otherwise covered in the curriculum.

Students must be an Anthropology major and have at least a 2.50 G.P.A. to register for this course. Prior permission of the directing professor and department is required to take this course.

**AN-303 Archaeology of the Southeastern United States****Credits: 3**

Course Type(s): GU

This course offers an overview of the archaeology of the American Southeast. The course will focus on the region's prehistoric and contact periods, which is one of the richest in the US. Students will develop an understanding of the area's primary archaeological cultures and their geographic and temporal extents.

**AN-304 Monuments and Commemoration: Loss and Remembrance****Credits: 3**

Course Type(s): HSUS

Examines the evolution of American attitudes towards commemoration and remembrance from the colonial period to the present. Focuses on the analysis of landscapes and artifacts, e.g. monuments, grave markers, cemeteries, and historic sites. Topics discussed include: the evolution of American burial grounds from colonial burial grounds to the rural cemeteries of the Victorians and modern memorial parks. Changing grave marker designs and iconography are examined. Distinct ethnic, regional, and national memorial practices are also studied. Public memorials in the form of statuary, commemorative institutions, and historic sites will also be discussed. There will be field trips to select sites. Also listed as HS-304.

**AN-305 Caribbean Archaeology****Credits: 3**

Course Type(s): GU, RE

Students are introduced to the archaeology and ethnohistory of the Caribbean Islands; the region where the Old World violently encountered the New World in AD 1492. The general approach is historical and chronological. This course is divided into two broad sections covering the prehistoric and historic periods of the region. The encounter between Europe and the region's native inhabitants proved catastrophic for the later. The region then became central to the world economy through slave labor and the production of luxury for world markets.

**AN-306 Food and Culture****Credits: 3**

Prerequisite(s): EN-101 and EN-102; or permission of the instructor

Term Offered: Fall Term

Course Type(s): GU, WT

Augments the anthropology program's offerings in both archaeology and socio-cultural anthropology, and demonstrates the synergy of these approaches in the topical study of food. Through a combination of lecture, discussion, hands-on learning, and readings, students are introduced to the basic modes of human subsistence identified by the anthropological tradition. They also will explore the material and social challenges connected with these different subsistence strategies, and finish up by looking at current food-based problems facing the world today.

**AN-307 Forensic Anthropology****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

Introduces students to the basic principles of forensic anthropology. Forensic anthropology is an application of biological anthropology (Skeletal understanding) to help solve criminal cases. Topics that will be covered in this course schedule include: methods of determining sex, nutrition, stature and ancestry from skeletal remains. We will also explore the cause of death, time since death and other relevant information. In addition we will examine the changing role of forensic anthropology in a larger global context.

**AN-311 Anthropology Internship Seminar****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Application of theory learned in the classroom in practice through actual work experience. Includes both academic and experiential learning. Eight to twelve hours per week in a public history or field work setting. Open only to anthropology majors. This course is repeatable for credit.

**AN-315 Field Research in Archaeology****Credits: 3**

Prerequisite(s): AN-103 or AN-107 or permission of the instructor

Term Offered: All Terms

Course Type(s): EX5, HSUS

Archaeological field methods, analysis of data, and anthropological interpretation; students will do supervised work on local sites. May be repeated for a maximum of six credits. Also listed as HS-315.

**AN-321 Qualitative Research Methods****Credits: 4**

Prerequisite(s): PY-103

Term Offered: Spring Term

Course Type(s): WT

An interdisciplinary overview of qualitative research methods employed in the social sciences and education. Qualitative methods are offered as an alternative way of knowing about individuals and groups. Topics covered include: theory, fieldwork, interviewing, observational studies, time sampling, writing field notes, questionnaires (survey research), archival research, and conducting qualitative research in various settings. Emphasis also placed upon the factors that affect the fieldwork process (e.g., gender, emotions, etc.) Also listed as PY-321.

**AN-322 Ethnographic Methods****Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: Spring Term

Course Type(s): WT

An overview of ethnographic research design and methods employed in anthropology. Students will practice research design and methods, data analysis and write-up techniques. Students will engage questions of ethics through research practice and theoretical discussion.

**AN-330 Zooarchaeology: The Archaeology of Animals****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Covers methods of faunal analysis and the application of the study of animal remains to broad topics of cultural study including subsistence, status, and ideology.

**AN-342 Children's Play and Culture****Credits: 3**

Prerequisite(s): PY-203

Term Offered: Spring Term

Course Type(s): None

An intensive examination of children's play. Theoretical and empirical contributions from psychology and anthropology as a developmental and cross-cultural foundation for the following topics: the historical development of the concept of childhood; theories of play; conceptions of play and work; the functions of play; play and child development; gender differences; cross-cultural forms of play; and children's peer cultures. Also listed as PY-342. Psychology majors should register for PY-342.

**AN-343 Anthropology and Children****Credits: 3**

Prerequisite(s): AN-103

Term Offered: Spring Term

Course Type(s): GU

An overview of the anthropological study of children. Addresses anthropology's inquiry into children's behavior, activities, artifacts, and their relationships with adults both past and present. Topics covered include: archaeology and children, childbirth, attachment, parenting, play, education, socialization, and child labor and welfare. Geographical areas include: the Middle East, Asia, and Central and South America. Europe and the United States are mentioned marginally.

**AN-355 Ancient Technology****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Provides an introduction to ancient technology/experimental archaeology. It examines the major theories and practices employed by experimental archaeologists. Students will develop skills in traditional technologies, e.g. flintknapping, pot firing, blacksmithing, and timber frame house construction.

**AN-363 The Amazon****Credits: 3**

Term Offered: Spring Term

Course Type(s): GU, RE

An anthropological seminar focused on the Amazon region, with emphasis on how expert and lay knowledge about the Amazon has been produced and circulated.

**AN-371 International Service Seminar****Credits: 3**

Prerequisite(s): PS-102

Term Offered: Spring Term

Course Type(s): PSIP

Students will learn to unite theory and practice by studying theories and policies based on human security, and learning about their applications through service-learning projects. Students will enhance their understanding of human security by volunteering in international community organizations and reflecting on the social, political, and economic factors and policies that affect them. Also listed as SW-371, PS-371, and SO-371.

**AN-377 Archaeology of African American Life****Credits: 3**

Course Type(s): CD, RE

Explores the rapidly growing subfield of historical archaeology which deals with the life and history of African Americans. The history and modern challenges facing this group is conditioned by the historical experience of individuals and communities of African descent with the United States. Unlike many European groups, the historical evidence documenting the experience of African Americans through time is sparse and incomplete. Archaeological investigations offer a primary method for recovering the everyday life experiences of this group. In addition, African American archaeology provides an important intersection for engaging the deep connection between the past and the present in socially meaningful ways. This course will review important case studies, key figure, major issues, and the overall development of African American archaeology.

**AN-378 Gender, Sex and Medicine****Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: Spring Term

Course Type(s): CD, GS, HE,EL, WT

Explores intersections of biological sex with cultural constructs of gender and medicine. Using cross-cultural examples, the course will employ an anthropological approach to explore how health, well-being and even medical belief systems operate in relation to different genders. Together as a class, we will examine how cultural constructs of gender frame ideals and norms regarding health, explore ways that biological sex is used to support gendered constructs, and demonstrate how these constructs eventually frame how healing takes place.

**AN-379 Globalization, Health and Healing****Credits: 3**

Term Offered: Spring Term

Course Type(s): GU, HE,EL, HEPE

Explores globalization through the lens of health and transnational movements. Through lectures, interactive seminar discussions, films, reflective analysis and research projects, students will examine globalization processes through the movement of disease and treatments, patients and healthcare workers.

**AN-380 American Cultural Diversity****Credits: 3**

Term Offered: All Terms

Course Type(s): RE

Explores the historical, social, and cultural backgrounds of immigrant groups found within the United States. Through lectures, readings, case studies, and discussions incorporated with service learning as fieldwork, students will be introduced to the complexity and diversity of American society.

**AN-382 Applied Anthropology****Credits: 3**

Term Offered: All Terms

Course Type(s): EX5

This course is anthropology put to use - meaning using anthropological research and methods to solve practical problems. This is an upper-level survey course that pays attention to cultural viewpoints, methods and results. While exploring different areas of applied anthropology through the history of the discipline and contemporary research projects, we will study methods unique to this subfield. Practical information, advice and resources on career preparation and development will be offered. By the end of the course, students should be able to answer the question "How can I use anthropology in my future career?"

**AN-383 Old World Prehistory****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

An intensive survey of the prehistoric cultures of Europe, Africa, and Asia, focusing on the period between the origins of modern humans to the rise of the first civilizations. Particular attention is paid to the development of art, religious belief systems, agriculture, urbanism, metallurgy, and writing. Early civilizations in Egypt, sub-Saharan Africa, Mesopotamia, Western Europe, and China are examined.

**AN-387 Visual Anthropology****Credits: 3**

Term Offered: Spring Term

Course Type(s): CD, COSS

Deals with aspects of visibility in culture and anthropology. A significant part of the course will be devoted to visual anthropology. We will learn about the development of visual anthropology as a discipline, the particular problems and challenges involved in practicing this type of ethnography, the evolution of ideas about accountability, representation, reflexivity and positioning in visual ethnographic methods. We will start with exploring the role of image in anthropology by considering the relationship between photography and ethnography, and continue to study ethnographic filmmaking, from Robert Flaherty's "Nanook of the North," (considered to be the first ethnographic documentary), to the development of Cinema Verite, to the emergence of indigenous media. Students will gain a nuanced understanding of the subject through weekly writing exercises, presentations, and in-class discussion. For a final project, students will write a long-form paper that will combine original research and visual analysis.

**AN-389 Anthropological Field Study****Credits: 3**

Prerequisite(s): 6 credits in Anthropology

Term Offered: All Terms

Course Type(s): EX1

Supervised field experience in various branches of anthropology, e.g., archaeological excavation, museum work, ethnography, and primate behavior. Departmental approval is required to take this course.

**AN-390 Archaeology Field Study****Credits: 3**

Course Type(s): None

An introduction to the practice of archaeology with a focus on fieldwork and limited laboratory analysis. This is a residential field school, meaning that students will live at or near the site for the majority of the semester. This might include living nearby during the week or for several weeks at a time, as in the case of an international archaeological field project. Students will learn traditional and advanced surveying methods, how to conduct pedestrian surveys, standard archaeological excavation techniques, and how to identify, catalogue, and analyze artifacts. There will be weekly lectures on the archaeology, history, and culture of the chosen archaeological site by project staff and visiting experts.

**AN-398 Special Topics in Anthropology (300 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in anthropology to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**AN-399 Independent Study in Anthropology****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Guided readings on a topic not otherwise covered in the curriculum. Students must be an Anthropology major and have at least a 2.50 G.P.A. to register for this course. Prior permission of the directing professor and department is required to take this course.

**AN-401 Anthropological Theory****Credits: 3**

Prerequisite(s): AN-103 or permission of the instructor

Term Offered: All Terms

Course Type(s): None

A survey of the major theories in anthropology from the nineteenth century to the present, focusing on contributions to our understanding of human society by some of the major figures of anthropology.

**AN-408 Cultural Psychology****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

An interdisciplinary course that utilizes theoretical, empirical, and methodological contributions from psychology and anthropology to discuss the position of culture in understanding human behavior and thought. Culture is viewed as a cognitive construct that is learned, lived, shared, and performed. A sample of topics include: the history of cultural and cross-cultural psychology, methodological approaches, aggression, education, development, play, language, social relationships, intelligence, emotion, motivation, and mental health issues. Also listed as PY-408.

**AN-425 Latin American Seminar****Credits: 3**

Prerequisite(s): AN-103 or permission of the instructor and EN-101 and EN-102

Course Type(s): RE, WT

An in-depth analysis of select groups in Native Latin America, through lectures, readings, case studies, film, and interactive panel discussions.

**AN-426 Research Seminar in Anthropology****Credits: 3**

Prerequisite(s): 90 credits completed or Senior standing

Term Offered: All Terms

Course Type(s): RD

The development, research, and writing of a BA paper on any aspect of anthropology, with special emphasis on scrupulous documentation, use of appropriate sources, clear expository writing, and oral presentation of research results. The course will be taught as a mixture of seminar and one-on-one meetings with the instructor. (It will also include a meeting with a librarian or bibliographer from the Monmouth University Library.)

**AN-489 Anthropological Field Study****Credits: 1-3**

Prerequisite(s): 6 credits in Anthropology and permission of the instructor

Course Type(s): EX1

Supervised field experience in various branches of anthropology, e.g., archaeological excavation, museum work, ethnography, and primate behavior. This course may be repeated once for credit.

**AN-498 Special Topics in Anthropology (400 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in anthropology to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**AN-499 Independent Study in Anthropology****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Guided readings on a topic not otherwise covered in the curriculum.

## Art (AR)

**AR-REV Art and Design Student Portfolio Review****Credits: None**

Term Offered: All Terms

Course Type(s): None

Required student portfolio review usually completed during the fourth semester. Transfer students need to schedule with an advisor. This is a pass/fail course.

**AR-SHO Senior Show****Credits: None**

Term Offered: All Terms

Course Type(s): None

This is a pass/fail course.

**AR-101 Art Appreciation****Credits: 3**

Term Offered: All Terms

Course Type(s): AT

A global survey of the cross-cultural evolution of art from the prehistoric period through the twentieth century. Emphasis will be placed on understanding the basic elements of art, the creative process, and the significance of art within the context of social, political, religious, and economic climate of its time. This course is not available to Art majors.

**AR-113 Basic Design and Composition****Credits: 3**

Term Offered: Fall Term

Course Type(s): AT

An introduction to concepts fundamental to the two-dimensional plane, this course develops visual fluency through projects promoting artistic growth and critical thinking. Students learn to utilize compositional elements, including color, and research themes in contemporary art and art history. Issues of process are explored through experimentation with analog and digital methods, and with a range of media.

**AR-114 Basic Design and Color****Credits: 3**

Prerequisite(s): AR-113

Term Offered: Spring Term

Course Type(s): None

A continuation of material covered in Basic Design and Composition (AR-113), this course explores color as a compositional element and a means of expression. Students become visually aware as they critically observe color, problem-solve within design projects, use analog and digital methods, and explore a variety of media.

**AR-116 Three-Dimensional Design****Credits: 3**

Term Offered: Spring Term

Course Type(s): AT

An introduction to concepts fundamental to working in three dimensions, this course develops sensitivity to 3D media, processes, and concepts. Students learn to utilize 3D compositional elements, including mass, volume, and texture, and research themes in contemporary art and art history. Issues of process are explored through experimentation with analog and digital methods, and with a range of media.

**AR-172 Introduction to Digital Design****Credits: 3**

Prerequisite(s): AR-113

Term Offered: All Terms

Course Type(s): TL

An introduction to basic graphic design and visual communication concepts. Builds on the skills learned in foundation courses in basic design and complements the introduction to the field in Graphic Design Studio I, AR-269. Students will become proficient in design concepts and computer skills later used in the Graphic Design field, including page layout, illustration, photography, and Web design. They will continue to develop creative problem-solving skills and the foundation theory of Graphic Design.

**AR-177 Introduction to Digital Design for Non-Art majors****Credits: 3**

Term Offered: All Terms

Course Type(s): TL

Designed for students with little or no experience in computer graphics. Combines basic visual problem solving with hands-on, computer-based digital training. Projects are designed with the non-art/design major in mind and would be appropriate for students majoring in journalism, communications, marketing and music industry.

**AR-178 Web Studio****Credits: 3**

Term Offered: Spring Term

Course Type(s): AT, IM, TL

An introduction to visual aesthetics, fundamental principles of user interface (UI) and user experience (UX), and technical skills required to create web graphics and media, digital presentations, and websites. Covers the use of current graphics software in addition to theoretical framework and training in content creation and management needed for the Web. Students will become proficient in visual design, concept development, information literacy, and digital programs.

**AR-181 Digital Photography I****Credits: 3**

Term Offered: All Terms

Course Type(s): AT, IM

This foundational digital photography course introduces students to aesthetic, historic, and technical aspects of photographic image-making. Through a combination of lecture and hands-on projects, students will be introduced to principles of black-and-white and color photography as a means of expression and communication. Using digital cameras with manual controls and RAW image capture, students will explore a range of assignments designed to promote photographic seeing, critical thinking, aesthetic appreciation, and historical contexts.

**AR-183 Black and White Photography I****Credits: 3**

Term Offered: All Terms

Course Type(s): AT

Technical proficiency in basic black and white photography, including exposure, developing, printing, and presentation. Photography is presented as a tool to understand the world and as a means of expression and communication. Students will learn how to interpret and discuss the visual language of photography.

**AR-191 Drawing I: Observation****Credits: 3**

Term Offered: All Terms

Course Type(s): AT

An introduction to the fundamentals of observational drawing, this course develops the ability to translate 3-dimensional objects and space to the 2-dimensional plane. Students develop an understanding of basic drawing elements such as line, value, mass, proportion, and space, and are introduced to a variety of drawing techniques and materials. Subject matter will include both figurative and non-figurative forms; multiple sessions with the model may be included.

**AR-192 Drawing II****Credits: 3**

Prerequisite(s): AR-191

Term Offered: Spring Term

Course Type(s): None

A studio course that continues to develop the skills covered in Drawing I, AR-191. Students will be introduced to both traditional and nontraditional concepts and techniques of interpretive and subjective drawing and rendering. Drawing techniques and materials pertaining to the expression of both figurative and nonfigurative subject matter will be explored. The human figure will serve as the primary subject of study with an emphasis placed on the rendering skills. The complex nature of the figure provides students with problems that require serious attention to observational skills in order to correctly render the form. Drawing II utilizes the live, nude model. Six hours per week.

**AR-198 Special Topics in Art (100 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in art to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If there is a prerequisite it will be announced in the course schedule.

**AR-199 Independent Study in Art****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided research - A studio project or art history topic. Weekly consultation. May be elected for a total of 6 credits. Prior permission of the directing professor and department chair is required to take this course.

**AR-216 Sculpture I and 3D Printing****Credits: 3**

Course Type(s): AT

Sculpture has an incredibly varied history of content, form, material, scale and intent. In this course you will become introduced to basic methods of 3D construction and fabrication, including hand modeling, digital modeling, mold-making, casting, carving and 3D printing. We will work from observation as well as conceptual models. We will explore current sculptural trends, funding and visibility/marketing models. We will also practice creating artist statements to support our work. Confidence in materials and form will lead to an ever-increasing level of craftsmanship and ability to communicate your ideas in 3D form.

**AR-217 Sculpture I**

Prerequisite(s): AR-116, AR-191, and AR-192 for art majors

Term Offered: Fall Term

Course Type(s): None

Sculpture for beginners as well as intermediate students, including modeling from life, plaster, simple casting procedures, found object, installation, digital modeling and 3D printing. Students will be introduced to professional practices in sculpture. Six hours per week. Department chair approval is required for non-art majors.

**Credits: 3****AR-221 Painting I**

Prerequisite(s): AR-113, AR-114, AR-191, and AR-192 for art majors

Term Offered: Fall Term

Course Type(s): None

Techniques and craftsmanship to facilitate expression in acrylic or oil painting; still-life and landscape subjects. Art and Art Education students must have prerequisite. Six hours of studio work per week. Department chair approval is required for non-art majors.

**Credits: 3****AR-222 Painting II**

Prerequisite(s): AR-221

Term Offered: Spring Term

Course Type(s): None

A continuation of AR-221, Painting I, with emphasis on the further development of painterly ideas and creative thinking. Art and Art Education majors must have prerequisites. Six hours of studio work per week.

**Credits: 3****AR-231 Eco Art**

Term Offered: Spring Term

Course Type(s): AT

With the idea of the artist and non-artist in mind, this course focuses on building creativity, vision, and the ability to synthesize new ideas from across disciplines to form original ideas and solutions around the human/nature relationship. Through individual and collaborative problem-led investigations, students will utilize research, writing, and discussion to create 2D, 3D, and time-based art that engages a specific ecological topic. Particular focus will be placed on eco-artists' ways of working, eco-art materials, and transdisciplinary research.

**Credits: 3****AR-241 History of Western Art I**

Term Offered: Fall Term

Course Type(s): ARHIS, AT

Survey of the significant styles and periods in Western art and architecture from Prehistoric to Gothic periods. Weekly lectures and discussions assist students with developing their visual literacy and a critical understanding of the past.

**Credits: 3****AR-242 History of Western Art II**

Term Offered: All Terms

Course Type(s): ARHIS, AT

Survey of the significant styles and periods in Western art and architecture from the Renaissance to the present. Weekly lecture and discussions assist students with developing their visual literacy and a critical understanding of the past.

**Credits: 3****AR-253 Digital Photography II**

Prerequisite(s): AR-181

Term Offered: Fall Term

Course Type(s): None

Students develop knowledge of image development, construction, retouching, and collage techniques using traditional film, digital images, and drawing as source material. Students will learn a variety of camera skills, including shooting in RAW format. A critical examination of intent is stressed along with output options and color management. Introduces programs such as Aperture and/or Lightroom to further expand digital workflow skills.

**Credits: 3****AR-265 Hand Built Ceramics**

Term Offered: All Terms

Course Type(s): AT

An introduction to clay as a creative material for making both functional and sculptural 3-D forms using various hand-building techniques, including coils, slabs, carving, incising, and their combination. Basic glazing and firing methods will be covered. Slide presentations, group and individual critiques will be part of the curriculum.

**Credits: 3****AR-266 Wheel Thrown Ceramics**

Term Offered: All Terms

Course Type(s): AT

An introduction to the potter's wheel as a tool for creating both functional and sculptural clay forms. In addition to throwing forms on the wheel, students will gain knowledge about glazing and firing techniques. Slide presentations, group, and individual critiques will be part of the curriculum.

**Credits: 3****AR-269 Graphic Design Studio I**

Prerequisite(s): AR-113 for Art majors only

Co-requisite(s): AR-114

Term Offered: All Terms

Course Type(s): None

An introduction to graphic design, including conceptual thinking, the making of signs, icons, and symbols, logo and brand identity, letterform design, layout, and design techniques. Students will also be introduced to design history and current issues regarding the profession. For students minoring in Graphic and Interactive Design, there are no prerequisites, however, approval of the department chair is required.

**Credits: 3****AR-270 Graphic Design Studio II**

Prerequisite(s): AR-172 or AR-177, and AR-269

Co-requisite(s): AR-273

Term Offered: Spring Term

Course Type(s): None

Introduces more advanced visual communications and typographic problem solving. Projects strategically test the students' understanding of design theory, research, writing, and thinking. Individual projects mimic those in a professional design environment and are developed following the traditional creative process. Projects include branding, corporate identity, information design, digital illustration, app design, and packaging.

**Credits: 3****AR-273 Digital Illustration**

Prerequisite(s): AR-172 or AR-177

Term Offered: All Terms

Course Type(s): None

A continuation of Introduction to Digital Design with primary emphasis on more advanced illustration software. Assignments build on previously learned software and concepts. Projects may include illustrative posters, booklets, interiors, and currency design.

**Credits: 3**

**AR-282 Web Design/Interactive I for Non-BFA Candidates Credits: 3**

Prerequisite(s): AR-172 or AR-177 or AR-178

Term Offered: Spring Term

Course Type(s): IM

An introduction to web design and development. Covers an overview of the creation of websites and the use of web graphics, web programming, and multimedia through web-based software programs. Other software tools including Photoshop and Illustrator are used to develop design concepts and web content. Fundamentals of graphic production, layout design, and web typography are discussed. Not available to BFA Candidates.

**AR-283 Black and White Photography II Credits: 3**

Prerequisite(s): AR-183

Term Offered: All Terms

Course Type(s): None

Focuses on advanced technical skills as a means of gaining greater personal and aesthetic understanding. Advanced 35mm camera and printing techniques, basic studio lighting, and exploring different photographic formats including medium, large, and toy cameras, as well as experimental techniques of image making and printing.

**AR-284 Web Design/Interactive II for Non-BFA Candidates Credits: 3**

Prerequisite(s): AR-178 or AR-282

Term Offered: Spring Term

Course Type(s): IM

Integrates previously learned web design and development concepts. Students will create dynamic web content such as animation, audio/video using web-based software and programming languages. Other software tools including Photoshop, Illustrator, and sound editing programs are used to develop design concepts and web content. Not available to BFA candidates.

**AR-286 Principles of Animation for Non-BFA Candidates Credits: 3**

Course Type(s): AT, IM

Students will learn the basic theories and principles of animation. An overview of the early history of animation will be given to put current practice into perspective. Students will be introduced to different animation techniques, such as 2D, Stop Motion, and 3D computer animation. They will apply these techniques to complete several short exercises and pick one to complete a final project. Not available to Fine Art majors. This is a hands on studio course: students will be drawing, and creating animations on the computer.

**AR-287 Typography Credits: 3**

Prerequisite(s): AR-172 or AR-177, and AR-269

Term Offered: All Terms

Course Type(s): None

An introduction to the theory, function, history, and impact of typography in graphic design. This course is an analysis of the shape and form of letters. Investigation and comparison of existing typefaces, type specification and layout in relation to graphic design and the printed piece.

**AR-288 Cooperative Education: Art or Graphic Design Credits: 3**

Term Offered: Spring Term

Course Type(s): EX2

An on-site graphic design cooperative work placement. This course may be repeated for credit.

**AR-290 Motion Graphics for Non BFA Majors Credits: 3**

Prerequisite(s): AR-172 or AR-177 or CO-145

Term Offered: All Terms

Course Type(s): IM

An introduction to the art of time-based, graphic storytelling for non-art/design majors. Emphasis will be placed on the creation of engaging digital environments through the thoughtful integration, manipulation, and orchestration of audio, video elements, typography, and animated logos. Meets six hours a week. Not available to BFA candidates.

**AR-298 Special Topics in Art (200 Level) Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in art to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**AR-299 Independent Study in Art Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided research - A studio project or art history topic. Weekly consultation. May be elected for a total of 6 credits. Prior permission of the directing professor and department chair is required to take this course.

**AR-306 Creative Book Arts Credits: 3**

Prerequisite(s): AR-114 and AR-192

Term Offered: Spring Term

Course Type(s): None

An introduction to bookbinding and papermaking. Traditional western-style papermaking and several non-adhesive binding structures will be covered. The students will produce a final bound book of sequential images (pages) in any media relevant to her/his discipline. The print lab will be available but not required. Department Chair for non-Art majors is required.

**AR-311 Drawing III Credits: 3**

Prerequisite(s): AR-113, AR-114, AR-191 and AR-192

Term Offered: Fall Term

Course Type(s): None

Seeing the figure, objects, and the environment; exploring all possible avenues of expression resulting from the experience of seeing; drawing experiences in various media. Six hours per week.

**AR-313 Lighting Techniques Credits: 3**

Prerequisite(s): AR-181

Term Offered: Spring Term

Course Type(s): None

A studio course that explores the photograph in contemporary art. Photography's integral tie to light serves as the backbone of this course as it investigates the alternative and contemporary spaces used by photographic artists. Digital and analog tools and skills blur as students are encouraged to experiment and challenge their ideas of what defines a photograph. Teaches studio lighting as it applies to fine art and commercial photography. Includes technical instruction in the lighting studio as well as on location with both portable lights and natural light. Defined by critiques and continues technical and conceptual advancement.

**AR-316 Sculpture II**

Prerequisite(s): AR-217

Term Offered: Spring Term

Course Type(s): EX3

A direct continuation of AR-217, Sculpture I, processes along with multi-media contemporary practice of interdisciplinary collaboration, artist teams and social practice art. Students will develop professional practices in sculpture. Six hours per week.

**Credits: 3****AR-317 Sculpture III**

Prerequisite(s): AR-217 and AR-316

Course Type(s): None

A direct continuation of AR-218 students will develop a body of three-dimensional work exploring further skills learned in Sculpture II, expanding on content, form, material, scale and intent. Final artist talk required along with professional presentation of digital and actual art objects. Six hours per week.

**Credits: 3****AR-321 Painting III**

Prerequisite(s): AR-221 and AR-222

Term Offered: Spring Term

Course Type(s): None

The development of the student as a painter, with emphasis on the philosophy of painting. Six hours of studio per week.

**Credits: 3****AR-323 Documentary Photography**

Prerequisite(s): AR-181

Term Offered: Fall Term

Course Type(s): None

By investigating documentary-style photography, this course concentrates on using still images to tell stories. Working both independently and in small groups to produce documentary photographs, students explore the role of documentary photography in society. Prerequisite: AR-181

**Credits: 3****AR-325 Writing Supplement for Art and Design**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

The writing component for co-registered studio classes which integrates a fifteen-page research paper. Emphasis is placed on the quality of writing and research.

**Credits: 1****AR-326 Writing Supplement for Art and Design**

Prerequisite(s): EN-101 or EN-102 or permission of the instructor; A 200, 300, or 400 level studio course is required as a corequisite

Term Offered: All Terms

Course Type(s): WT

The writing component for co-registered studio classes which integrates a fifteen-page research paper. Emphasis is placed on the quality of writing and research.

**Credits: 1****AR-335 BFA Internship/Seminar**

Prerequisite(s): AR-371 or AR-392 and Junior status

Term Offered: All Terms

Course Type(s): EX1

Internship experience with the development of occupational or professional competence in the career setting. Combines both internship work experience at an approved work location with a structured seminar class. The seminar component of this course will also guide students through the process of resume writing, interviewing techniques, and best business practice. On-site design or animation work internship (fifteen to twenty hours per week for a total of 150 hours) plus four three-hour long seminar sessions with faculty. This course may be repeated once for credit.

**Credits: 3****AR-341 Art Theory and Writing**

Prerequisite(s): AR-242, EN-101, and EN-102; or permission of the instructor

Term Offered: Fall Term

Course Type(s): ARHIS, WT

Designed to develop a critical understanding of theories of contemporary art and various types of art writing, including, but not limited to, art criticism, art historical writing, and artist statements.

**Credits: 3****AR-342 History of New and Expanded Media in Art**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): ARHIS, IM, WT

A survey of computer-based new media and ephemeral expanded media in art with emphasis on the later twentieth century to the present. Topics could include the use of computing, robotics, biotech research, virtual reality, performance, and social practice in art while critically reflecting on the aesthetic, cultural, social, and political contexts within which these media emerged.

**Credits: 3****AR-343 Renaissance, Mannerist, and Baroque Art**

Prerequisite(s): AR-242

Course Type(s): ARHIS

Painting, sculpture, and architecture in Europe from 1400s-1800s.

Museum visits required.

**Credits: 3****AR-345 Early to Late Modern Art**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): ARHIS, WT

A critical analysis of various meanings of "Modernism" in art. This course studies academic art to art of the present through U.S., European, and global case studies. Museum visits required.

**Credits: 3****AR-346 History of Graphic Design**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): ARHIS, WT

A survey of graphic design with an emphasis on the twentieth century to the present. The course instructs students in researching areas of interest to broaden their knowledge of issues in the discipline while critically reflecting on the aesthetic, cultural, social, and political contexts within which graphic design emerged.

**Credits: 3****AR-347 History of Photography**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): ARHIS, CD, WT

A topically arranged survey of world photography, this course takes as its central concern the multiple purposes to which photography has been adapted since its "discovery" in the early nineteenth century. Although the relationship between photography and fine art is considered, the many non-art uses of the medium are also discussed in an attempt to better understand the cultural contexts in which photography has been employed.

**Credits: 3**

**AR-348 Art of India****Credits: 3**

Term Offered: All Terms

Course Type(s): ARHIS, AT, BI.EL, GU, RE

The visual art of India: how to look at it and how it might be best understood. The larger cultural context in which this art was produced, drawing upon history, religion, mythology, and literature will be discussed. Essentially, pre-modern Indian art is religious art. After studying the major monuments associated with Buddhism and Hindu art, the themes common to both traditions will be considered. The temple as an artistic expression and as a religious center will be explored. Because of the vastness of India art, this course will not include Mughal and later monuments.

**AR-349 Asian Art Survey****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): ARHIS, GU, WT

Important Artistic Monuments from India, China and Japan. Since Buddhism is a connecting link for Asian cultures, emphasis is placed on Buddhist art.

**AR-350 World Art Nineteenth-Twentieth Century****Credits: 3**

Term Offered: All Terms

Course Type(s): ARHIS, RE

A global investigation of the cross-cultural evolution of art in the nineteenth to mid-twentieth century. Non-Western art will be studied from the point of discovery through its influence on modern, Western, visual expression. Emphasis will be placed on the significance of the art work within the context of the social, political, religious, and economic climate of its time.

**AR-351 Methods of Teaching Art I****Credits: 3**

Prerequisite(s): AR-114, AR-116, AR-192, and ED-320 and a minimum G.P.A. of 3.00.

Term Offered: All Terms

Course Type(s): None

The history and philosophy of art education; the construction of art curricula and the exploration of teaching methods; media and tools appropriate for the educational level. Methods I deals with the needs of the elementary school child. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instruction. Clinical Hours required. Also listed as ED-351.

**AR-352 Methods of Teaching Art II****Credits: 3**

Prerequisite(s): ED-351 or AR-351 and Minimum G.P.A. of 3.0.

Term Offered: Spring Term

Course Type(s): None

The history and philosophy of art education; the construction of art curricula and the exploration of teaching methods; media and tools appropriate for the educational level. Methods II deals with the needs of the adolescent. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instruction. Clinical Hours required. Also listed as ED-352.

**AR-353 Digital Photography III****Credits: 3**

Prerequisite(s): AR-253

Term Offered: All Terms

Course Type(s): None

A strong foundation in the technical and aesthetic aspects of color photography through projects utilizing digital RAW files and analog negatives with instruction in color printing and studio lighting as it pertains to the nuances of color. Discussions and critical writings focus on the history and theory of color photography. Combines analog and digital techniques and focuses on more advanced file managing and color control both on the monitor and in the print.

**AR-366 Contemporary Art and Worldbuilding****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or instructor permission

Term Offered: All Terms

Course Type(s): CD, WT, ARHIS

Examines the history of contemporary art of various forms of worldbuilding. Topics may include, but are not limited to: the built environment and its impacts on communities, public monuments, immersive and virtual art/video games, artist utopias, design for good, art and education, art and mass incarceration, artist collectives, art and climate crisis, and community building through art. Class assignments will focus on research and writing within the arts.

**AR-367 African American Art****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor.

Term Offered: All Terms

Course Type(s): ADS, ARHIS, CD, RE, WT

Examines the history of "African American Art" from the 18th century to the present by analyzing a range of visual art media and the institutions of art that contribute to uneven power dynamics based on race. Class assignments will focus on research and writing within the arts.

**AR-368 Gender, Art, and Society****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Course Type(s): ARHIS, GS

A critical survey about the role of gender in the arts through a study of representational subjects, artists, and patronage. This course considers art's role in the construction of gender as a social structure by drawing from fields that include art history, gender studies, critical race studies, and queer theory.

**AR-370 Advanced Typography****Credits: 3**

Prerequisite(s): AR-287

Term Offered: Spring Term

Course Type(s): None

An advanced level course in the study of typography. This course will expand upon topics covered in AR-287 Typography by considering the emotional, expressive, and effective use of typographic elements pertaining to graphic design and visual messaging. Projects will be produced for a variety of applications including: broadsides (print media), original typeface design with Font Lab Studio (digital), and conceptual typography (experimental).

**AR-371 Graphic Design Studio III****Credits: 3**

Prerequisite(s): AR-270

Term Offered: All Terms

Course Type(s): None

Marks the transition from graphic design fundamentals to more complex visual problem solving. Projects focus on original exploration and design in corporate identity and branding. Course topics include: trademark and copyright, marketing research, brand strategy, and design briefs. Students implement concepts through creation of collateral, packaging, and interactive promotion. Professional preparation of work for commercial use is an integral part of this course.

**AR-374 Digital Imaging**

Prerequisite(s): AR-273

Term Offered: All Terms

Course Type(s): None

Advanced concepts and creative techniques in digital imaging using Adobe Photoshop. Projects build on all previously learned software, specifically the Adobe Creative Suite. Assignments include varied aspects of graphic design including file preparation and creation for digital compositing and large format printing. This course also prepares students for work within the professional printing industry.

**Credits: 3 AR-385 2D Animation**

Prerequisite(s): AR-172

Term Offered: Spring Term

Course Type(s): None

Students will be exposed to the fundamental terminology, concepts, and techniques of creating 2D animations to broaden their skills as animators and enhance their overall creative ability. Using pencil and paper in conjunction with computer based techniques, students will gain experience in basic principles of animation including timing, expression of emotion, straight ahead action and pose to pose, key frames and in-betweens. In the assigned projects for this course, students are responsible for controlling and manipulating a subject's perceived volume, weight, proportion, and movement, thus gaining a more thorough understanding of the animation process.

**Credits: 3****AR-375 Illustration for Gaming**

Prerequisite(s): AR-114, AR-172, and AR-192

Course Type(s): None

Introduction and application of illustration as a means toward effective visual communication in the gaming and animation industry. Emphasis on the development of the creative visual concept and its relationship to style, media, technique, and methods of reproduction. Introduction to a variety of traditional and non-traditional techniques.

**Credits: 3****AR-381 Print: Intaglio/Relief**

Prerequisite(s): AR-191 and AR-192

Term Offered: All Terms

Course Type(s): None

Introduction to the printmaking techniques of relief printing; linocut, woodcut, and etching; hard and soft ground, and aquatint. Six hours per week. Department chair approval is required for non-art majors.

**Credits: 3****AR-382 Print: Lithography and Silkscreening**

Prerequisite(s): AR-191 and AR-192

Term Offered: All Terms

Course Type(s): None

Introduction to the printmaking techniques of aluminum plate lithography and Photo Silkscreen, with an emphasis on multiple color and combination Litho/Silkscreen hybrid prints. Six hours per week. Department Chair approval for non-art majors is required.

**Credits: 3****AR-383 Web Design/Interactive I**

Prerequisite(s): AR-253 or AR-374

Term Offered: All Terms

Course Type(s): None

An introduction to web design and production. Covers an overview of the creation of websites and the use of web graphics, web programming, and multimedia through web-based software programs. Fundamentals of graphic production, layout design, web typography, and the principles of Interaction Design and UX Design are discussed.

**Credits: 3****AR-384 Web Design/Interactive II**

Prerequisite(s): AR-383

Term Offered: Spring Term

Course Type(s): None

An advanced class in web design and development. It extends the design principles and techniques introduced in Web Design/Interactive I. Students will create dynamic web content such as animation, audio/video using web-based software and programming languages. Emerging web technology will be discussed.

**Credits: 3****AR-386 Principles of Animation**

Prerequisite(s): AR-114

Term Offered: Fall Term

Course Type(s): None

Students will learn the basic theories and principles of animation. An overview of the early history of animation will be given to put current practice into perspective. Students will be introduced to different animation techniques, such as 2D, Stop Motion, and 3D computer animation. They will apply these techniques to complete several short exercises and pick one to complete a final project.

**Credits: 3****AR-387 3D Modeling, Lighting and Rendering**

Prerequisite(s): AR-172

Term Offered: Spring Term

Course Type(s): None

Students will learn how to create virtual objects, both hard surface and organic models, apply materials and lighting, set up a camera, and render professional quality images. Special attention will be given to modeling for animation and real time rendering. The focus will be on the concepts, aesthetics, and practice of generating 3D computer imagery as a means of artistic expression.

**Credits: 3****AR-389 Art and Photography Internship**

Term Offered: All Terms

Course Type(s): EX1

An internship in any art and design disciplines with the development of professional competence in the career setting. The placement must enhance a student's knowledge of his or her chosen field of study. Students are required to complete 50 hours per credit. Sophomore status and permission of the instructor is required to register for this course.

**Credits: 1-3****AR-390 Animation/Motion Graphics I**

Prerequisite(s): AR-172 or AR-181

Term Offered: All Terms

Course Type(s): IM, RD

An introduction to the art of time-based, graphic storytelling. Emphasis will be placed on the creation of engaging digital environments through the thoughtful integration, manipulation, and orchestration of audio, video elements, typography, and animated logos.

**Credits: 3****AR-391 Animation/Motion Graphics II**

Prerequisite(s): AR-290 or AR-390

Course Type(s): IM

Explores the commercial and experiential nature of motion graphics. Projects for this advanced course expand upon established time-based narrative structures for film, video and television. Emphasis will be placed on the synergy of video, writing, storyboarding, editing, and three-dimensional graphic elements.

**Credits: 3**

**AR-392 3-D Animation**

Prerequisite(s): AR-116 or AR-387

Co-requisite(s): AR-386

Course Type(s): None

Building upon the Principles of Animation, students learn to create three dimensional animations, both virtual (3D Computer Animation) and physical (Stop Motion). Character Animation, Procedural animation and Simulation, and animation for Real Time applications will be introduced. Students will complete assignments for each of these different types of animation, and complete a final project with their choice of one of these techniques.

**Credits: 3****AR-393 3-D Animation Production**

Prerequisite(s): AR-387

Term Offered: Fall Term

Course Type(s): None

Concepts, tools and techniques employed in animated storytelling. Students will pre-visualize their projects through storyboarding, planning, and assembling shots in sequence. Students will learn how to combine sound with advanced 3D computer animation. Audio/visual synchronization as well as character lip syncing with phonemes will be explored. Students will construct complex 3D animated stories in Maya and complete a fully animated piece.

**Credits: 3****AR-394 3-D Environments and Effects**

Prerequisite(s): AR-393, or AR-387 and AR-392

Term Offered: Spring Term

Course Type(s): None

Concepts, tools, and techniques for creating realistic natural environments and phenomena (such as moving clouds, fire, and flowing water). Students will sculpt complex polygonal geometry into various terrains including landscapes and foliage. Students will learn to create realistic backgrounds incorporating natural light. Creating realistic shadows will be explored as well. Students will learn how to use particle emitters in order to simulate phenomena such as flowing water, flames, and snow.

**Credits: 3****AR-395 Animation Production**

Prerequisite(s): AR-386 and AR-390

Course Type(s): None

Students learn how to organize and plan an animation project, add sound and finish their final product. All the steps from concept to final product are covered: Storyboarding, Animatic, Sound, Post-production. While students will make use of computer technology for the practical side of this course, the main focus is on the professional animation process: workflow, planning, and best practices.

**Credits: 3****AR-398 Special Topics in Art (300 Level)**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in art to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**Credits: 1-3****AR-399 Independent Study in Art**

Term Offered: All Terms

Course Type(s): None

Guided research - a studio project or art history topic. Weekly consultation. May be elected for a total of six credits. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 1-3****AR-401 Senior Portfolio**

Term Offered: Spring Term

Course Type(s): None

A seminar class that chronologically analyzes and refines graphic design and computer projects, which have been done throughout the student's coursework. Meetings with instructor to discuss and critique reworked and new projects that have been specifically assigned.

**Credits: 3****AR-402 Photography Portfolio**

Prerequisite(s): AR-353

Term Offered: Spring Term

Course Type(s): None

Equal parts seminar and studio in its approach, this senior-level course incorporates discussions and readings focused on contemporary photo-based artworks and the theoretical and critical developments in recent photographic art practices. In addition, this course helps prepare students to enter the professional art world and/or graduate school. Students develop a cohesive portfolio of photographic imagery and create a strategy for the presentation of their work.

**Credits: 3****AR-403 Advanced Digital Imaging and Illustration**

Prerequisite(s): AR-253 or AR-374

Term Offered: All Terms

Course Type(s): None

For student designers and fine artists with intermediate computer skills who are interested in more advanced concepts and creative techniques in digital illustration, photography, digital collage, printmaking and handmade techniques, digital book publishing, and large format printing. Programs to be explored are Adobe Photoshop and Wacom digital tablets.

**Credits: 3****AR-404 Responsive Media**

Prerequisite(s): CO-145 or AR-181

Term Offered: Spring Term

Course Type(s): COMCS, CORTP, IM

Students learn how to make interfaces for smart phones and tablets to create interactive audio and video. In addition, students will produce creative projects using data mapping, generative art and work collaboratively on a site-specific media project. Also listed as CO-404.

**Credits: 3****AR-408 Senior Year Experience: Client/Thesis**

Co-requisite(s): AR-383

Term Offered: Fall Term

Course Type(s): None

The first part of a two course, senior year capstone experience designed to provide students the opportunity to propose and research a thesis project, create entry-level, professional design work, and to work with clients all while under the direction of a faculty member. For BFA majors Graphic Design majors only.

**Credits: 3****AR-409 Senior Year Experience: Thesis/Portfolio**

Prerequisite(s): AR-408

Co-requisite(s): AR-384

Term Offered: Spring Term

Course Type(s): None

The second part of a two course, senior year capstone experience designed to provide students the opportunity to complete a thesis project, work with clients under the direction of a faculty member, successfully mount their senior exhibition for AR-SHO credit, and to create an entry-level, professional design portfolio. For BFA Graphic Design Majors only.

**Credits: 3**

**AR-410 Advanced Project I****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Research, art making, and writing for Honors Project may be conducted for photography, painting, sculpture, printmaking, graphic design, Web design, or motion graphics and is determined by a student's particular discipline and medium of choice. The art to be made is informed by the student's research and is articulated in full through a final eighteen-twenty page research paper. The topic of research may include but is not limited to identity, gender roles in culture, feminism, religion, the occult, consumerism, politics, cultural diversity, war, personal experience, Renaissance vs. contemporary art, Greek vs. contemporary sculpture, etc. Alternatively, the student may also conduct a thorough exploration of the characteristics of a particular medium. Art and Design faculty must approve the topic. This is the first part of a two-semester class. To register for this course, students must have Junior standing or higher, permission of the department chair, a minimum G.P.A. of 3.00, a major G.P.A. of 3.50, and the student must be an art or fine arts major.

**AR-411 Advanced Project II****Credits: 1-3**

Prerequisite(s): AR-410, a minimum G.P.A. of 3.00, a major G.P.A. of 3.50, Junior status, EN-101 and EN-102 or permission of the instructor, and the student must be an Art or Fine Arts major and have permission of the department chair

Term Offered: Spring Term

Course Type(s): WT

Research, art making, and writing for Honors Project may be conducted for photography, painting, sculpture, printmaking, graphic design, Web design or motion graphics and is determined by a student's particular discipline and medium of choice. The art to be made is informed by the student's research and is articulated in full through a final eighteen to twenty-page research paper. The topic of research may include but is not limited to identity, gender roles in culture, feminism, religion, the occult, consumerism, politics, cultural diversity, war, personal experience, Renaissance vs. contemporary art, Greek vs. contemporary sculpture, etc. Alternatively, the student may also conduct a thorough exploration of the characteristics of a particular medium. Art and Design faculty must approve the topic. This is the second part of a two-semester class.

**AR-414 Group Project in 3D Animation****Credits: 3**

Prerequisite(s): AR-394 or AR-395

Term Offered: Fall Term

Course Type(s): None

Students will learn how to work on a production team for a 3D project. Students will work in a team environment to brainstorm, communicate effectively, develop project goals, and delegate responsibilities. Students will learn how to meet deadlines both individually and collectively. Student groups are expected to produce a 3D animated piece with an estimated three-minute duration.

**AR-415 Senior Animation Reel****Credits: 3**

Prerequisite(s): AR-414

Term Offered: Spring Term

Course Type(s): None

Students will create a reel between two to three minutes in duration of their animation work from previous animation projects and new animation projects. Includes lecture, discussion, demonstration, critiques and individual meetings with students to support the development of students' work. Students will research self-promotional opportunities such as competitions and festivals. Students will revise their resume to respond to their career interests. Emphasis will be placed on the development of a personal point of view.

**AR-488 Cooperative Education: Art or Graphic Design****Credits: 3**

Prerequisite(s): AR-335 or AR-337 and departmental approval

Term Offered: Spring Term

Course Type(s): EX2

An on-site graphic design cooperative work placement. This course may be repeated for credit.

**AR-489 Internship in Art and Design****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX1

An internship in either graphic design or fine arts at an off-campus work site. The placement must enhance a student's working knowledge of his or her chosen field of study. Students are required to complete a minimum of ten hours per week for a total minimum of 150 hours.

**AR-498 Special Topics in Art (400 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in art to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If there is a prerequisite it will be announced in the course schedule.

**AR-499 Independent Study in Art****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided research - a studio project or art history topic. Weekly consultation. May be elected for a total of six credits. Students must have Senior standing and prior permission of the directing professor and department chair to take this course.

## Biology (BY)

**BY-101 Issues and Methods of Biology****Credits: 3**

Prerequisite(s): SC-100

Term Offered: Spring Term

Course Type(s): None

Major concepts in biological science and their importance in current society. Methods and approaches to questions in biology. Cannot be used in satisfaction of a major requirement in the Biology program.

**BY-102 Applications in Biotechnology****Credits: 3**

Term Offered: Spring Term

Course Type(s): NS

Introduction for non-science majors. The focus is on basic principles of biotechnology along with an exploration of associated bioethical issues. The laboratory component serves to familiarize students with scientific practice.

**BY-103 Environmental Science****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

Examines society's effects on the natural environment and current efforts to address environmental issues in a sustainable manner. Stresses the interdisciplinary nature of environmental issues, and that resolution of environmental problems sustainably involves the application of sound scientific information, but at the same time involves social, political, cultural, and economic values as well.

**BY-104 Human Biology****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

Introductory course for non-science majors. Focus is on basic structure and function of human body systems and diseases of these systems. The laboratory component serves to familiarize students with scientific practice.

**BY-105 Introductory Biology and Human Development****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

An introductory-level survey of biology with an emphasis on human biology that includes human development, aging, genetics and other topics selected to support the social work program. An introduction to neurobiology will be provided with applications in mental health. Not for credit toward a major in biology. For Social Work majors only.

**BY-106 The Brain - Highs and Lows****Credits: 3**

Term Offered: Spring Term

Course Type(s): NS

An introductory neurobiology course designed for non-science majors. The focus is the study of the human brain from the highs of intelligence and creativity to the lows of depression. The brain will also be examined for its roles in drug use, from the highs of euphoria to the lows of dependence. Topics will include the interplay between genetic and environmental influences that shape the brain and its responses. Not for credit towards a major in Biology.

**BY-107 Microbiology in Health and Disease****Credits: 4**

Term Offered: All Terms

Course Type(s): None

Microorganisms pathogenic for man; emphasizing etiology, modes of transmission and control. Laboratory includes proper collection of specimens, aseptic technique, cultivation, identification, and disposal of microbes. Three hours of class, two hours of laboratory per week.

**BY-108 Evolution and the History of Life on Earth****Credits: 3**

Term Offered: Spring Term

Course Type(s): NS

Examines evolution both as a process and as a phenomenon. Students will examine how evolutionary processes occur in time, both very short and geological time scales, and how both are studied. Students will review the history of life on earth with emphasis on major lineages such as vertebrates, mollusks, insects and plants, as well as basic geological processes and continental drift during these time periods. Bacterial evolution will be examined in the context of the importance of understanding natural selection and evolution and their impacts on society and medicine. Emphasis will be placed on understanding evolution of groups and processes often cited in creationist arguments, to help students be prepared to enter civil discourse as informed citizens. Evidence of evolutionary change from the fossil record and DNA sequences of organisms will be compared and reviewed.

**BY-109 Introduction to Ecology and Evolution****Credits: 4**

Term Offered: All Terms

Course Type(s): NS

Introductory course for biology majors. Focus is on evolution, origin and diversity of life, Ecology and climate change. Three hours of lecture and 2 hours of laboratory per week. This course satisfies the Natural Science component of General Education.

**BY-110 Introduction to Cell and Molecular Biology****Credits: 4**

Term Offered: All Terms

Course Type(s): NS

For biology majors and other students needing an introduction to the cellular and molecular levels of biology. Includes an introduction to cell structure and function, biochemistry and metabolism, bioenergetics, genetics and cell division, and molecular biology. Three hours of lecture and three hours of laboratory per week. Limited to majors in Biology, Chemistry, Clinical Science, Medical Laboratory Science, Mathematics, Computer Science, Software Engineering, Criminal Justice, Health Studies, and Health and Physical Education.

**BY-111 Anatomy and Physiology I****Credits: 4**

Term Offered: All Terms

Course Type(s): NS

Study of human systems: structure, function and integration, including chemical and cellular base, integumentary, skeletal, muscular and nervous systems. Laboratory covers human anatomy, microscopy of tissues and organs, and physiological study of living organisms. Three hours of lecture, two hours of laboratory per week. Open to Health Studies, Health Promotion, Health and Physical Education and Education, and Nursing majors only. This course is a non-major level Biology course and cannot be used to fulfill the Biology minor. Students pursuing professional graduate health programs should register for BY-211. Students who take BY-111 are not eligible to take BY-211.

**BY-112 Anatomy and Physiology II****Credits: 4**

Prerequisite(s): BY-111 passed with a grade of C- or higher

Course Type(s): NS

Study of human systems: structure, function and integration, including special senses, digestive, endocrine, cardiovascular, lymphatic and immunity, respiratory, urinary and reproductive. Laboratory covers human anatomy, microscopy of tissues and organs, and physiological study of living organisms. Three hours of lecture, two hours of laboratory per week. Open to Health Studies, Health Promotion, Health and Physical Education and Education, and Nursing majors only. This course is a non-major level Biology course and cannot be used to fulfill the Biology minor. Students pursuing professional graduate health program should register for BY-212. Students who have taken BY-112 are not eligible to take BY-212.

**BY-113 Introduction to Structure and Function of Living Systems****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

Examines the characteristics of living organisms. Intended primarily for future elementary teachers to provide them with a better understanding of the life sciences they will teach. Content will focus on the structure and function of cells, tissues and organs and life processes. There is an emphasis on understanding heredity, including patterns of inheritance of traits and the molecular basis of heredity, and growth and development. This is an activity-centered/lab course to demonstrate scientific inquiry (questioning, developing hypotheses, gathering data, and drawing reasonable conclusions) and how to use resources and research material in science. BY-113 does not count towards the Biology major or minor requirements.

**BY-114 Unity and Diversity of Life****Credits: 3**

Term Offered: Fall Term

Course Type(s): NS

Intended primarily for future elementary school teachers to provide them with a better understanding of the life sciences they will teach. Examining the interdependence and individuality of organisms in ecosystems, populations and communities and how these organisms change over time due to life cycles, mutations, adaptations and natural selection. Classification of organism will also be covered. This is an activity-centered/lab course to demonstrate scientific inquiry (questioning, developing hypotheses, gathering data, and drawing reasonable conclusions) and how to use resources and research material in science. BY-114 does not count towards the Biology major or minor requirements.

**BY-116 The Biology of Nutrition, Aging, and Anti-Aging Nutrition****Credits: 3**

Course Type(s): None

Discussions of the theories of aging and the role of nutrition in delaying aging and preventing degenerative disease. Analysis of the scientifically sound, medically reliable evaluation of widely promoted nutritional supplements, including the anti-aging nutrients: vitamins, minerals, amino acids, nucleic acid derivatives, lipids and derivatives, pharmaceuticals and chemicals (BHA, BHT, DMSO, etc.) and other supplements (L-Carnitine, ginseng, etc.)

**BY-118 The Mighty Microbes****Credits: 3**

Term Offered: Spring Term

Course Type(s): NS

An introductory microbiology course designed for non-science majors. Students will investigate microbiology in everyday living. Topics will include the role microbes have in health, disease, the environment, and food and beverage production. Attention will be devoted to microbiology related current issues. Students will learn the impact microbes have in society so that they develop awareness, knowledge of and appreciation of microbiology.

**BY-119 Introductory Biology Major Seminar****Credits: 1**

Term Offered: All Terms

Course Type(s): None

Designed for first-year students in any of the majors offered by the Biology Department, this course will introduce students to the academic requirements required for the major, and the related skills to be successful in college and beyond, including University resources, curricular and co-curricular requirements, and opportunities related to the Biology major. Preparation for research and advanced coursework will be emphasized, and students will be introduced to career resources. Transition to studying and integrating into the Monmouth University Department of Biology will be complemented by the assistance of a peer learning assistant for the course. Attendance at a limited number of campus events will be required. This course will be offered as "pass/fail". Limited to students with 30 or fewer credits.

**BY-201 Introduction to Biotechnology****Credits: 3**

Prerequisite(s): BY-110 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): MC

Introduction to recent advances in biotechnology: the use of living organisms to create products, applications or processes that improve the quality of life for humans and other species. Presents historical and modern applications of biotechnology that impact our everyday lives. An overview of current developments and applications of microbial, agricultural, animal, marine and forensic biotechnology, bioremediation, and medical biotechnology will be presented. Regulatory agencies and policies that govern the biotechnology industry will be discussed, and students will also learn to formulate opinions about ethical, legal and social issues associated with biotechnology.

**BY-205 Zoology****Credits: 3**

Prerequisite(s): BY-109 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

This course provides an introductory survey of vertebrate and invertebrate zoology. Topics covered include taxonomy and classification, anatomy and physiology, behavior and ecology, and evolutionary relationships of the major phyla of the animal kingdom with a specific focus on local marine species. The laboratory component of the course focuses on the diversity of the animal kingdom from a structural, functional and ecological perspective. Labs will include exercises that will include examination of live organisms, dissections and examinations of preserved specimens, and field trips.

**BY-206 Introduction to Oceanography****Credits: 3**

Term Offered: All Terms

Course Type(s): MEBP

Our lives are linked to the oceans, and through this class you will gain a better understanding of our natural world by learning the key aspects and natural processes of our planet's oceans. Topics covered include ocean origins, chemistry, physics, atmospheric interactions, biological oceanography and environmental issues including climate change impacts. Course will include field trips.

**BY-209 Environment and Human Health****Credits: 3**

Prerequisite(s): BY-109 and BY-110, both passed with a grade of C- or higher

Term Offered: Fall Term

Course Type(s): MC, MEBP

Human activities are adversely affecting ecosystems throughout the world. Some of these changes may be deleterious to human health. The purpose of this course is to provide students with an understanding of the relationship between the environment and human health. Specific topics that will be covered are the importance of biodiversity to human health, the relationships between global warming and vector-borne diseases, microbial evolution and resistance of pathogenic organisms, persistent pollutants and toxicity, and the effect of environmental disasters on human health. A focus of this course will be to integrate several areas of biology including microbiology, toxicology, and environmental science.

**BY-210 Forensic Genetics and DNA Analysis****Credits: 3**

Prerequisite(s): BY-110 and CJ-211

Term Offered: Spring Term

Course Type(s): None

Focus on fundamental principles of DNA and genetic analysis and their applications in forensics. Designed for criminal justice majors who have had an introduction to Mendelian and molecular genetics and to DNA structure, but who need more background in the underlying biology of forensic DNA analysis and interpretation. Sources of DNA will be presented along with methods for DNA extraction, amplification of DNA by polymerase chain reaction, analysis of restriction fragment length polymorphisms and short tandem repeats. Open only to Criminal Justice majors.

**BY-211 Physiology with Anatomy I****Credits: 4**

Prerequisite(s): BY-110, CE-111, and CE-112 all passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): MC

Lecture and laboratory course Study of Human Systems: Their structure, function and integration. Laboratory covers gross human anatomy and physiology. Three hours of lecture and two hours of laboratory per week. Open only to Biology, Chemistry, Medical Lab Science, Clinical Lab Science, Health, and Psychology majors. Students who have taken BY-211 are not eligible to take BY-111.

**BY-212 Physiology with Anatomy II****Credits: 4**

Prerequisite(s): BY-110, BY-211, CE-111, and CE-112 all passed with a grade of C- or higher

Course Type(s): MC

Lecture and laboratory course Study of Human Systems: Their structure, function and integration. Laboratory covers gross human anatomy and physiology. Three hours of lecture and two hours of laboratory per week. Open only to Biology, Chemistry, Medical Lab Science, Clinical Lab Science, Health, and Psychology majors. Students who have taken BY-212 are not eligible to take BY-112.

**BY-214 Botany****Credits: 3**

Prerequisite(s): BY-109 passed with a grade of C- or higher

Course Type(s): None

Characteristics of the major plant groups, principles of plant taxonomy, considerations of evolutionary and ecological relationships. Two hours of class, two hours of laboratory per week.

**BY-216 Introduction to Genetics****Credits: 4**

Prerequisite(s): BY-110 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): TL

Focuses on one of the core concepts of biology; the flow, exchange, and storage of hereditary information. Topics will include principles of classical and molecular genetics, including transmission, arrangement, and alteration of genetic information; structure, function, and regulation of the genetic material; biological variation resulting from recombination, mutation, and population genetics; applications to human heredity. Two 80-minute lectures and one 3-hour lab per week.

**BY-220 Environmental Biology and Policy****Credits: 3**

Prerequisite(s): BY-109

Term Offered: Fall Term

Course Type(s): ME, SUS

Focuses on human use of natural resources and the environment and the problems and impacts that result from those uses. By taking an interdisciplinary perspective, students will gain an understanding of the scientific, political and socioeconomic factors that underlie resolution of these problems.

**BY-221 Introduction to Global Sustainability****Credits: 3**

Term Offered: Fall Term

Course Type(s): MEBP, SUS

Introduces students to the global, environmental, economic and social foundations of sustainability and the policy and scientific challenges involved with accommodating population growth, development, and resources used while assuring that future generations will have the natural and economic resources to support an enhanced quality of life. An emphasis will be placed on understanding of sustainability principles from multiple perspectives and cross-disciplinary application of sustainable practices. Also listed as PS-223.

**BY-223 General Microbiology****Credits: 4**

Prerequisite(s): BY-110 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): MC, MEBP

Morphology, taxonomy, physiology, genetics, and control of microorganisms; history of microbiology. Three hours of class, three hours of laboratory per week.

**BY-250 Research in Molecular Cell Physiology****Credits: 1-3**

Prerequisite(s): BY-110 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): EX5, MC

Faculty-student collaborative research lab course designed to introduce students to the research process. Students will work in small groups under faculty supervision to conduct research on a project in molecular cell physiology determined by the directing faculty member. Students will be involved in the research process by developing hypotheses, planning and carrying out experiments using modern lab techniques, analyzing data, and evaluating resource information. Research may be extended in detail in BY-450. Limited to sophomore Biology majors.

**BY-262 Primate Behavior, Evolution, and Ecology****Credits: 3**

Term Offered: Spring Term

Course Type(s): NS

The study of primatology, which examines the lifeways, biology, and behavior of our closest living relatives. Various topics will be explored including taxonomy and classification, diet, behavior, grouping patterns, locomotion, and land usage patterns of monkeys, apes and prosimians. These topics will be explored within the frameworks of natural selection, sexual selection, and evolution. Also listed as AN-262.

**BY-264 Environmental Field Methods****Credits: 3**

Prerequisite(s): BY-109 passed with a grade of C- or higher.

Term Offered: Fall Term

Course Type(s): MEBP

Environmental Field Methods provides students with hands on experience in environmental and marine research by learning a suite of techniques and working under real field conditions. Students become familiar with the use and application of standard environmental and marine science instruments and sampling techniques and devices, as well as data handling, management and analysis techniques. One course meeting per week for three hours. This course will be taught as a fully integrated team-taught course, with two faculty who have environmental and marine research expertise.

**BY-290 Open Water Scuba Certification Course****Credits: 2**

Term Offered: All Terms

Course Type(s): MEBP, OUTDR

The Open Water Scuba Certification course entails completion of the Professional Association of Diving Instructors (PADI) Open Water Diver course, the world's most popular scuba course. Completion of this course leads to PADI scuba certification as an open water diver. Limited to 8 students. Skills course: Outdoor Pursuits (Individual). This is a pass/fail course. Also listed as PE-290.

**BY-298 Special Topics in Biology (200 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in biology to be announced prior to registration. May be conducted in a lecture, seminar, or laboratory format. Please note: when Scuba is offered as BY-298 it does not carry a course type of MC. If a prerequisite is required it will be announced in the course schedule.

**BY-299 Independent Study in Biology****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Principles of independent study and research; critical review of published work on a designated topic in the biological sciences or original research; preparation of a research paper or review article in publishable format or oral presentation of research results. Laboratory or field work arranged as needed. Requires submission and approval of an "Application for Independent Study" (an e-form is available on WEBadvisor) with a faculty mentor. To take this course, students need prior permission of the directing professor and department chair and Sophomore or higher standing in Biology (Total of all independent study credits to be counted towards the degree may not exceed six, unless approved by the Dean).

**BY-301 Vertebrate Histology****Credits: 3**

Prerequisite(s): BY-205 passed with a grade of C- or higher

Course Type(s): MC

Microscopic structure of vertebrate cells, tissues, and organs, emphasizing microscopic anatomy of the human body. Laboratory identification of vertebrate tissues. Two hours of class, three hours of laboratory per week.

**BY-308 Unifying Concepts in Biology****Credits: 3**

Prerequisite(s): BY-113 and BY-114 or permission of the instructor

Course Type(s): None

Unifying Concepts in Biology is a capstone course for elementary education majors in the Interdisciplinary Studies for Elementary Educators (ISEE) program. This course integrates scientific methodology, life science, earth science, and environmental science concepts and is designed to prepare future educators for the K-8 science classroom. A strong emphasis is placed on exploring relationships between living organisms and the environment through the use of hands on lab activities, problem-based approaches, and inquiry learning. BY-308 does not count toward the biology major or minor requirements.

**BY-310 Biochemistry and Lab****Credits: 4**

Prerequisite(s): BY-216 and CE-242 passed with a grade of C- or higher; and EN-101 and EN-102 or permission of the instructor

Course Type(s): MEBP, WT

A survey of the major principles of biochemistry with attention to the structures and functions of proteins, carbohydrates and fats; the major pathways for metabolism of proteins, carbohydrates and fats; and the biochemical basis of DNA replication and gene expression. Laboratory provides hands-on experience in selected biochemical techniques with an emphasis on protein characterization. Designed to provide practice and critique in effective writing and appropriate writing style and format.

**BY-311 Herpetology****Credits: 4**

Prerequisite(s): BY-109 and BY-205

Term Offered: All Terms

Course Type(s): MEBP

This course is designed for undergraduate students in marine and environmental biology and policy as well as students in a biology program. This course will provide an overview of the structure, behavior, evolution and taxonomy of reptiles and amphibians. Additionally, this course will discuss critical concepts in management and conservation. The laboratory emphasis will be on identification, anatomy and ecology of New Jersey reptile and amphibian species, as well as methods and techniques for surveying, estimating population sizes and home ranges. Prerequisites: BY-109 and BY-205

**BY-314 Topics in Horticulture****Credits: 3**

Term Offered: Spring Term

Course Type(s): MC, ME, MEBP

Principles and practices of plant culture; practical experience through greenhouse projects; the horticulture industry and career possibilities; field trips to places of horticultural interest. Two hours of class, three hours of laboratory per week. Field trips arranged.

**BY-317 Tropical Island Ecology****Credits: 3**

Prerequisite(s): BY-109 passed with a grade of C- or higher.

Term Offered: Spring Term

Course Type(s): EX5, FLT, ME, MEBP, NS

A field course focusing on investigations of plants, animals, and natural ecosystems of the Bahamas with emphasis on marine ecosystems, island ecology, resource management, and sustainable development.

**BY-321 Systemic Inequalities and Racism in Biology and Medicine****Credits: 3**

Prerequisite(s): BY-216.

Term Offered: All Terms

Course Type(s): HE, EL, MC, SIAR

Society has been shaped by many impactful events in medicine and healthcare which have been influenced by systemic inequality and racism. This course will allow students to study the biology behind these events, as well as the impact on society, and will encourage students to explore means of being agents of change in the workforce. The course will examine several biological hot topics in depth (such as global pandemics, vaccines, and medical research), highlighting the effects of systemic inequalities, oppression, and racism. Both the biological mechanisms of the topic/event, and the impact on society will be discussed. Films, documentaries, and critical readings will be used to gain further understanding of societal beliefs.

**BY-322 Ichthyology****Credits: 4**

Prerequisite(s): BY-109 and BY-205, passed with a C- or better

Term Offered: Fall Term

Course Type(s): MEBP

A survey of all-extant groups of fishes (e.g., bony fishes, cartilaginous fishes, and jawless fishes), including sections on evolution, taxonomy, form and function, biogeography, behavior, and ecology. Laboratory component will include required dissections. There will be several scheduled off campus field trips. Three hours of lecture and three hours of laboratory per week.

**BY-324 Applied Microbiology****Credits: 4**

Prerequisite(s): BY-223 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): MC, ME, MEBP

Microorganisms of food, water, soil, dairy products, industrial processes, disease, and genetic engineering. Three hours of class, three hours of laboratory per week.

**BY-326 International Medical Shadowing and Cultural Competence Abroad****Credits: 4**

Term Offered: Spring Term

Course Type(s): EX5, HE.EL, MC

This course offers students an intensive 3-week medical shadowing experience, providing direct observational opportunities in international healthcare settings. Students will shadow healthcare professionals for 25-30 hours per week across diverse medical specialties while critically analyzing healthcare systems, cultural determinants of health, and professional practices. Through reflective assignments, research, and guided discussions, students develop intercultural competence, critical thinking, and transferable professional skills. This program enhances clinical exposure and prepares students for careers in healthcare. Added HE.EL Course Type as per USC February meeting. Prerequisites: BY-211 and BY-212 and Permission of the Instructor

**BY-327 Design and Analysis of Biological Experiments****Credits: 3**

Prerequisite(s): MA-151 or MA-220 or BE-251 passed with a grade of C or higher or permission of the instructors.

Term Offered: Spring Term

Course Type(s): MEBP

The purpose of this course is to learn about the statistical design & analysis of biological experiments. After learning mathematical techniques of designing experiments, and statistical analyses customized to them, students will be presented with a broad research question by the instructors. Literature surveys will be a critical part of the course to allow students to find pertinent, relevant, potentially publishable biological questions that address a specific aspect of the larger question posed by the instructors. Students will design their own experiment addressing their question, generate their own data collection plan, collect their data, and then analyze their data using statistical techniques taught in class. This course will involve field/lab work for data collection and computer work in the statistical analysis of the final data. Students will defend their question, design and analysis from both a statistical and biological perspective. At the end of the semester students will complete a formal manuscript in journal format. This course can be used to fulfill the Mathematics or Statistics minor and the Bio/MEBP elective. This course is a research based course and students must have demonstrated a strong interest in and potential for research. Also listed as MA-327.

**BY-341 Marine Biology****Credits: 4**

Prerequisite(s): BY-205 and BY-214, both passed with a grade of C- or higher

Term Offered: Fall Term

Course Type(s): None

Biota of the oceans and inshore waters with an emphasis on ecology, functional morphology, and marine and estuarine habitats. Basic oceanography is also included. Marine biology is a laboratory course supported by lectures and field projects. Field trips outside of class time may be required.

**BY-342 Coastal Zone Management****Credits: 3**

Prerequisite(s): BY-220 passed with a grade of C- or higher, and EN-101 and EN-102

Term Offered: Spring Term

Course Type(s): ME, WT

Focus on the impact of increased demand on the coastal environment based on the theme that management of an environment for multiple purposes requires an understanding of the effects of use and exploitation throughout that environmental system and how decisions can be made in an effective, equitable manner.

**BY-360 The Business of Biotechnology: From the Bench to the Market****Credits: 3**

Prerequisite(s): Limited to junior or senior biology majors or other students with approval by the course faculty. BY-110 or BY-201 completed with a grade of C- or higher. For Business majors: BY-102, BY-110, or BY-201, completed with a grade of C- or higher

Term Offered: Fall Term

Course Type(s): MC

Tomorrow's biotechnology leaders require a breadth of cross-functional knowledge to face the scientific, regulatory, and financial challenges for developing biotech companies in the 21st century. This course will provide students with a strategic overview of the business of biotechnology, exploring the integration of science, technology, the regulatory framework, financial requirements, and market forces that drive the industry. The course will introduce students to basic aspects of molecular biology related to product development in the biopharmaceutical industry, and the regulatory and financial requirements for drug development, placing emphasis on real-world application and the challenges of bringing new biotechnology drugs to market for the treatment of human disease. Limited to junior or senior biology majors or other students with approval by the course faculty. BY-110 or BY-201 completed with a minimum grade of C- or higher is required. For Business majors BY-102, BY-110, or BY-201, completed with a minimum grade of C- or higher are required.

**BY-370 Cell Biology****Credits: 3**

Prerequisite(s): BY-310

Course Type(s): None

In-depth study of biology at the cellular and subcellular levels. Integrates principles of biochemistry into an understanding of cell structure and physiology. Prerequisite: BY-310

**BY-375L Laboratory in Molecular and Cellular Biology****Credits: 3**

Prerequisite(s): BY-310, and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): MEBP, RD, WT

Designed to introduce biology majors to basic laboratory techniques used in molecular and cellular biology. Students will develop proficiency in modern techniques in molecular and cellular biology including micro pipetting, bacterial culturing and sterile technique, solution preparation, DNA extraction, restriction digestion of DNA, DNA sub cloning, gel electrophoresis of nucleic acids and proteins, nucleic acid blotting and analysis with molecular probes, DNA sequencing, polymerase chain reaction (PCR), immunological techniques for analysis of proteins, mammalian cell culture and transfection, and DNA sequence analysis on the Internet. The use of traditional and Internet information resources for molecular and cellular biology will also be emphasized. The presentation of data in both oral and written form will be emphasized. Partially fulfills the reasoned oral discourse requirement for biology and biology/molecular cell physiology.

**BY-388 Cooperative Education: Biological Sciences****Credits: 1-4**

Prerequisite(s): 6 credits in Biology, overall G.P.A. of 2.00 and Junior standing or higher

Term Offered: All Terms

Course Type(s): EX2

Provides an opportunity for students to fulfill the Experiential Education requirement by pursuing a short-term cooperative work experience in biology or for students who, are currently employed in a biological or medical field, to integrate the work with a related academic component. May be repeated for credit. This is a pass/fail course. Departmental approval is required to take this course.

**BY-389 Internship in Biological Science****Credits: 1-3**

Prerequisite(s): Overall GPA of 2.00; Junior status, at least six credits of biology courses and departmental approval

Term Offered: All Terms

Course Type(s): EX1

Complements the practical experience gained by students at internship sites, such as hospitals, clinics, private practices, research laboratories, environmental agencies, museums, botanical gardens, and zoos with a significant set of academic goals. May be repeated once for credit. This is a pass/fail course.

**BY-395 Seminar in Marine and Environmental Biology****Credits: 3**

Term Offered: Spring Term

Course Type(s): RD

A seminar-style course for juniors in the Marine and Environmental Biology and Policy (MEBP) major.

**BY-398 Special Topics in Biology (300 Level)****Credits: 1-4**

Prerequisite(s): BY-110

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in biology to be announced prior to registration. May be conducted in a lecture, seminar, or laboratory format. If a prerequisite is required it will be announced in the course schedule.

**BY-399 Independent Study in Biology****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Principles of independent study and research; critical review of published work on a designated topic in the biological sciences or original research; preparation of a research paper or review article in publishable format or oral presentation of research results. Laboratory or field work arranged as needed. Requires submission and approval of an "Application for Independent Study" an e-form is available on WEBAdvisor) with a faculty member. Students must have prior permission of the directing professor and department chair; and Junior standing in Biology to take this class. (Total of all independent study credits to be counted towards the degree may not exceed six, unless approved by the Dean.)

**BY-404 Animal Behavior****Credits: 3**

Prerequisite(s): PY-103 or BY-103 or above, passed with a grade of C- or higher

Course Type(s): None

Why and how animals (vertebrates and invertebrates) do the things they do. Emphasizes rules governing the evolution of behavior rather than mere description of how animals behave. Focus includes behavioral ecology, habitat selection, feeding strategies, predator-prey tactics, mating systems and strategies, social behavior (conflict and cooperation) and population dynamics. The course begins with an historical overview and ends with the evolution of human behavior. Also listed as PY-404.

**BY-404L Animal Behavior Laboratory****Credits: 1**

Prerequisite(s): PY-311 and PY-320 passed with a grade of C or higher

Co-requisite(s): BY-404 or PY-404

Term Offered: Spring Term

Course Type(s): None

Methods in the study of animal behavior. Projects on instinctive behavior, early experience, learning, dominance relationships, territoriality, behavioral ecology, and sociobiology. One all-day field trip and an independent project will be required.

**BY-406 Introduction to Neurosciences****Credits: 3**

Prerequisite(s): BY-216 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): MC, ME

The organization of the nervous system in terms of its anatomy, physiology, neurochemical correlates, and evolution; behavioral processes such as attention, sleep, motivation, instinct, learning, and languages.

**BY-406L Neurosciences Laboratory****Credits: 1**

Co-requisite(s): BY-406

Course Type(s): MC

Human and animal neuroanatomy; surgical techniques, including lesion, stimulation, and perfusion; histology; drug and hormone administration; physiological recording techniques. Three hours per week.

**BY-410 Molecular Biology****Credits: 3**

Prerequisite(s): BY-216 or BY-310 or CE-331 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Provides a detailed examination of the central dogma of molecular biology - DNA replication, transcription, reverse transcription, and translation - in viruses, prokaryotes, and eukaryotes. Standard techniques of biotechnology used to study molecular biology will be emphasized. Additional topics, including eukaryotic chromosome structure and regulation of gene expression, will also be discussed.

**BY-412 Vertebrate Physiology and Laboratory****Credits: 3**

Term Offered: Spring Term

Course Type(s): MC

Comparative vertebrate physiology, with emphasis on osmotic regulation, nutrition, circulation, respiration, and muscle physiology. One hour of class, four hours of laboratory per week.

**BY-420 Applied Field Biology****Credits: 1-3**

Prerequisite(s): MA-151, BY-205, BY-214, and BY-220 or permission of the instructor.

Term Offered: Spring Term

Course Type(s): EX1, MEBP

Applied Field Biology is a research-based applied ecology course that combines lectures, hands-on field and laboratory activities, and focused data collection and analysis to allow participating students to understand techniques used by scientists and environmental managers in order to provide information necessary to perform key functions associated with natural resource and ecosystem conservation and management. The course is designed to allow students in the Marine and Environmental Biology and Policy Program (MEBP) to fulfill their Experiential Education requirement. This course is repeatable twice for credit.

**BY-424 Evolution****Credits: 3**

Prerequisite(s): BY-109 and BY-216, both passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): MC, ME, MEBP

Synthetic theory of evolution, including sources of genetic variability, Hardy-Weinberg, natural selection, genetic drift, balanced polymorphism, molecular evolution, speciation and the origin of life. Three hours of class per week.

**BY-425 Principles of Developmental Biology****Credits: 4**

Prerequisite(s): BY-216 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): MC

The study of major morphological changes during development and the analysis of causative factors. Model organisms used in the study of development include: sea urchin, nematode worm, *Drosophila*, frog, and mouse. Topics include: fertilization, growth, differentiation, morphogenesis, regeneration, and tissue interactions. The genetic control of development will be emphasized.

**BY-427 Cancer Biology****Credits: 3**

Co-requisite(s): BY-370 or BY-410

Term Offered: Spring Term

Course Type(s): MC

Course will provide students with a foundation in the molecular biology of cancer. Topics include the genetic and molecular changes that lead to transformation, oncogenes, tumor suppressors, viruses, angiogenesis, metastasis, tumor immunology, and clinical trials and treatments.

Primary literature and review articles, as well as field work, will be used to understand advances in cancer biology and treatment.

**BY-430 Neuroscience Beyond Neurons****Credits: 3**

Prerequisite(s): BY-216

Term Offered: Spring Term

Course Type(s): MC

A seminar-style class with focus on the different cell types that make up the brain and how they interact and signal with one another. Topics include how glial-neuronal interactions impact brain development, brain metabolism, and numerous pathological conditions. Objectives will be met through lectures and class discussions, readings from primary literature, journals clubs and class debate.

**BY-431 Immunology****Credits: 3**

Prerequisite(s): BY-110 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): MC

Components of the immune system; biological individuality and the recognition of "foreignness"; structure of antibodies; cellular immunity and graft rejection; blood group antigens; the immune system and cancer development; immunogenetics; clinical and experimental applications. Two hours of class, two hours of laboratory per week.

**BY-440 Ecology****Credits: 4**

Prerequisite(s): BY-205 or BY-214, and MA-151 all passed with a grade of C- or higher, and EN-101 and EN-102 and Senior standing.

Term Offered: Fall Term

Course Type(s): WT

Lecture and laboratory course examining the concepts of ecology and evolutionary biology, the interaction of organisms and their environment, population ecology, community ecology, and ecosystems dynamics. 3 hours of lecture and 3 hours of lab/field work per week. Prerequisites: BY-205 or BY-214, and BY-220 all passed with a grade of C- or higher, and EN-101 and EN-102 and Senior standing

**BY-442 Natural Resource Conservation and Management****Credits: 3**

Prerequisite(s): BY-220 passed with a grade of C- or higher, and EN-101 and EN-102

Term Offered: Spring Term

Course Type(s): SUS, WT

The principles of ecology and resource management are used to analyze contemporary environmental problems and highlight legislative, technological, and methodological solutions to environmental problems that move us toward a sustainable society.

**BY-450 Research in Molecular Cell Physiology****Credits: 1-3**

Prerequisite(s): BY-310 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): EX5, MC

A faculty-student collaborative research lab course. Students will work in small groups under faculty supervision to conduct comprehensive research on a project in molecular cell physiology determined by the directing faculty member. Students will experience all aspects of the research process, from developing hypotheses, planning and carrying out experiments using modern lab techniques, and analyzing data, to preparing research results for publication. May be taken to extend research initiated in BY-250. May be repeated for a maximum of six credits. Limited to Junior or Senior biology majors.

**BY-475 Endocrinology****Credits: 3**

Prerequisite(s): BY-310 or twelve credits in Biology

Term Offered: Spring Term

Course Type(s): MC, ME

Introduction to biochemical, molecular, and physiological aspects of the vertebrate endocrine system and mechanisms by which hormones maintain homeostasis in animals, including humans. Topics to be studied include: molecular structures: biochemical properties and interactions of different categories of hormones and their receptors; major endocrine systems that regulate reproduction, growth, development, and metabolism; neuroendocrinology; and pathophysiology of the endocrine system. Hormones and organs that influence processes such as calcium homeostasis, digestion, salt balance, carbohydrate metabolism, and sex differentiation and development will be examined. Endocrine regulation of male and female reproductive organs and reproduction will also be discussed, including the hormonal control of fertilization, implantation, placental function, pregnancy, parturition, lactation, and contraception.

**BY-489 Internship in Biological Science****Credits: 3**

Prerequisite(s): 6 credits in Biology, Junior standing and a minimum G.P.A. of 2.00

Term Offered: All Terms

Course Type(s): EX1

Complements the practical experience gained by students at internship sites, such as hospitals, clinics, private practices, research laboratories, environmental agencies, museums, botanical gardens, and zoos with a significant set of academic goals. May be repeated once for credit. Departmental approval is required to take this course. This is a pass/fail course.

**BY-495 Senior Seminar****Credits: 1**

Prerequisite(s): completion of 90 credits; for Biology majors only

Term Offered: All Terms

Course Type(s): RD

A seminar course with presentations by guest scientists as well as students. Gauges students' abilities to draw upon a broad background of coursework and experience to organize, present, discuss, and evaluate topics of current interest in biology.

**BY-499 Independent Study in Biology****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Principles of independent study and research; critical review of published work on a designated topic in the biological sciences or original research; preparation of a research paper or review article in publishable format or oral presentation of research results. Laboratory or field work arranged as needed. Requires submission and approval of an "Application for Independent Study" (an e-form is available on WEBadvisor) with a faculty member. Students are required to have prior permission of the directing professor and department chair and Senior standing in Biology to take this course. (Total of all independent study credits to be counted towards the degree may not exceed six, unless approved by the Dean.)

**BY-499E Independent Study in Biology****Credits: 1-3**

Prerequisite(s): BY-216 and 2 credits of prior research experience (BY-299, BY-399, or BY-499).

Term Offered: All Terms

Course Type(s): EX5, MC, MEBP

Principles of independent study and research; critical review of published work on a designated topic in the biological sciences or original research; preparation of a research paper or review article in publishable format or oral presentation of research results. Laboratory or field work arranged as needed. Requires submission and approval of an "Application for Independent Study" (an e-form is available on WEBadvisor) with a faculty member. Students are required to have prior permission of the directing professor and department chair and Senior standing in Biology to take this course. (Total of all independent study credits to be counted towards the degree may not exceed six, unless approved by the Dean.)

**BY-499T Independent Study in Biology with Thesis****Credits: 1**

Term Offered: All Terms

Course Type(s): None

Preparation and submission of a thesis in science journal format. The thesis will contain results from the completion of independent study and research and will include appropriate description of the background and methods for the project and discussion of the results and its significance. It is designed specifically for students desiring Biology departmental honors. Students are required to have permission of the course advisor and Senior standing in Biology, Biology with a concentration in Cell and Molecular Physiology, or Marine and Environmental Biology and Policy in order to take this course.

## Business Accounting (BA)

**BA-200 Survey of Accounting****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

An introductory class in accounting designed for non-business students, which focuses on accounting as a tool for communicating financial information about business organizations to people outside the business and to internal users to help them plan, control, or make decisions about operations. Not open to Business majors and only can be used toward the Business minors.

**BA-251 Accounting I****Credits: 3**

Term Offered: All Terms

Course Type(s): None

This course is designed to provide students with both financial (external) accounting and managerial (internal) accounting theories and practices. The financial accounting topics include the principles and applications of current accounting theory and the accumulation and presentation of financial information through the four basic financial statements. Key coverage will be given to accounting issues related to particular accounts and to analytical procedures. The managerial accounting topics include the managerial accounting profession, building blocks of managerial accounting, job costing and activity-based costing as well as cost behavior analysis.

**BA-252 Accounting II****Credits: 3**

Prerequisite(s): BA-251

Term Offered: All Terms

Course Type(s): None

This course is designed to further examine financial accounting and managerial accounting theories and practices. The financial accounting topics include accrual accounting, journal entries related to merchandising firms, receivables, liabilities, and equity. The managerial accounting topics include cost-volume-profit analysis, making short-term business decisions, budgeting, and performance evaluation.

**BA-261 Data Analytics for Accounting****Credits: 3**

Prerequisite(s): IT-150 or CS-104, MA-117, and BA-251

Co-requisite(s): BE-251

Term Offered: Spring Term

Course Type(s): None

Computerization and the availability of data is changing the role of the accountant as information provider. We talk about how the accounting profession will change to complement the power of computerization and the plethora of data available. We use the AMPS (Ask, Master, Perform, Share) model to understand the data analytics process and how it is used to analyze all of the available information to address accounting questions. We emphasize the four types of analysis (descriptive, diagnostic, predictive and prescriptive) and how they are used to address accounting questions.

**BA-311 Intermediate Accounting I****Credits: 3**

Prerequisite(s): BA-251, BA-252, and BA-261 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Financial accounting measurement, including asset valuation and determination of periodic income.

**BA-312 Intermediate Accounting II****Credits: 3**

Prerequisite(s): BA-311 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Liability recognition and corporation equity measurement.

**BA-316 Individual Income Tax****Credits: 3**

Prerequisite(s): BA-251 and BA-261 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

This is the first of two semesters of a study of Federal Income Taxation. It covers taxation of individuals and small businesses. Emphasis will be on tax research and planning for individuals. The purpose is to introduce undergraduate accounting students to a broad range on income tax topics. Because of the complexity and breadth of coverage, many topics will not be covered in great depth.

**BA-320 Managerial Cost Analysis****Credits: 3**

Prerequisite(s): BA-252 and BA-261 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Offers the student a fairly detailed knowledge of cost accounting principles and practices. A working knowledge of cost accounting is an essential element of the accounting student's education due to the importance of cost accounting in every organizational setting. Also, the information presented in the course is essential for successful completion of professional examinations such as the CPA and the CMA.

**BA-345 Forensic and Investigative Accounting****Credits: 3**

Prerequisite(s): BA-251 and BA-252, both passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Identifying, recording, settling, extracting, sorting, reporting and verifying past financial data or other accounting activities for settling current or prospective legal disputes or using such past financial data for projecting future financial data to settle legal disputes.

**BA-370 Accounting Information Systems****Credits: 3**

Prerequisite(s): BA-311 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Accounting systems analysis and design. Emphasis on database information structures, integrating accounting, and controls.

**BA-388 Cooperative Education: Accounting Concentration****Credits: 3**

Prerequisite(s): BA-252, BM-250, a minimum G.P.A. of 2.00, sixty or more earned credits, eighteen or more credits of Business Administration courses, and twelve or more credits of Accounting courses taken at Monmouth University

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. Departmental approval is required to take this course. This course may be repeated for credit.

**BA-401 Advanced Accounting****Credits: 3**

Prerequisite(s): BA-312 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Advanced issues in financial accounting, including business combinations, consolidated financial reports, governmental and not-for-profit accounting, and other relevant areas.

**BA-413 Auditing Theory****Credits: 3**

Prerequisite(s): BA-312 passed with a grade of C or higher and BA-370

Term Offered: All Terms

Course Type(s): None

Auditing standards and procedures associated with the examination of financial statements; the role and methods of the independent auditor; legal and ethical responsibilities.

**BA-417 Business Income Taxation****Credits: 3**

Prerequisite(s): BA-261 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

The second of two income tax courses, which covers the taxation of corporations, partnerships, estates and trusts. Tax and estate planning are emphasized with the study of various techniques, case studies and research projects. Retirement plans and international taxes are also included.

**BA-425 International Accounting****Credits: 3**

Prerequisite(s): BA-311 passed with a grade of C or higher; and EN-101 and EN-102

Term Offered: All Terms

Course Type(s): WT

Basic concepts of accounting principles, auditing environments, managerial objectives, and financial reporting requirements, applicable to multi-national corporations. Emphasis on corporations with headquarters domiciled in the United States, with limited attention to specialized offshore locations.

**BA-488 Cooperative Education: Accounting Concentration****Credits: 3**

Prerequisite(s): BA-252, BM-250 and a minimum G.P.A. of 2.00, sixty or more earned credits, eighteen or more credits in Business Administration courses; twelve or more credits in Accounting courses taken at Monmouth University

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course.

**BA-489 Internship in Accounting****Credits: 3**

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. This course is repeatable twice for credit. Departmental approval is required to take this course. Students must have Junior standing and a minimum G.P.A. of 2.00 in order to register for this course.

**BA-498 Special Topics in Accounting****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in accounting to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BA-499 Independent Study in Accounting****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

## Business Economics (BE)

### BE-200 Economics for Social Science

Credits: 3

Prerequisite(s): 3 credits from Math except MA-050 or MA-100

Term Offered: All Terms

Course Type(s): None

Students are introduced to core economic concepts in four areas: (i) Introductory concepts include: decision-making under scarcity, the operation of markets and the price mechanism, and government's role in the economy. (ii) Microeconomics covers the economic analysis of consumption, production in the context of competitive and monopolistic markets, operation of labor markets, and poverty and income distribution. (iii) Macroeconomics introduces students to national product and income accounts; business cycles, inflation and unemployment; and monetary and fiscal policies. (iv) Global topics include: comparative advantage, trade and finance. Real-world applications are emphasized in all areas. For Non-Business majors.

### BE-201 Microeconomics

Credits: 3

Prerequisite(s): MA-100 or higher level mathematics course

Term Offered: All Terms

Course Type(s): SS.SV

Introduction to the operation of the price mechanism; examination of the individual economic units, laws of supply and demand, market structure, and cost analysis; contemporary problems examined.

### BE-202 Macroeconomics

Credits: 3

Prerequisite(s): MA-100 or higher level mathematics course

Term Offered: All Terms

Course Type(s): SS.SV

Determination of the components and level of national income; applications to the problems of inflation, unemployment, and economic stabilization; financial institutions in relation to their role in public policies.

### BE-251 Business Statistics

Credits: 3

Prerequisite(s): IT-100 or IT-150 and MA-117

Term Offered: All Terms

Course Type(s): None

Descriptive statistics, tables and charts, probability distributions, confidence intervals and hypothesis tests, linear and multiple regression, and analysis of variance.

### BE-289 Internship in Economics

Credits: 3

Course Type(s): EX1

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. This course is repeatable twice for credit. The student must have a minimum G.P.A. of 2.00 and have at least Junior standing to take this course. Departmental approval is required to take this course.

### BE-301 Labor Economics

Credits: 3

Prerequisite(s): BE-201 and BE-202

Term Offered: Spring Term

Course Type(s): GS

Economic and social effects of the modern industrial structure: labor groups, attitudes, problems, tactics, labor legislation, the development of industrial society of American Unionism, and the labor movement throughout the world.

### BE-304 Money, Credit, and Financial Institutions

Credits: 3

Prerequisite(s): BE-202

Term Offered: All Terms

Course Type(s): None

Monetary economics and its institutions; the nature and function of money; commercial and central banking; the money markets; financial intermediaries; and international monetary institutions. Also listed as BF-304.

### BE-305 Intermediate Macroeconomics

Credits: 3

Prerequisite(s): BE-202

Term Offered: Spring Term

Course Type(s): None

A study of the measurement of aggregate output and the determination of the level of aggregate income; price level movements and factors underlying rates of economic growth; influence of applicable public policies.

### BE-307 Managerial Economics

Credits: 3

Prerequisite(s): MA-118 or MA-125 and BE-201

Term Offered: All Terms

Course Type(s): None

Application of contemporary economic theory to managerial decisions and to public policy affecting such decisions.

### BE-356 Mergers and Acquisitions

Credits: 3

Prerequisite(s): BF-301 Passed with a minimum grade of C

Term Offered: All Terms

Course Type(s): None

Mergers and acquisitions represent a major force in today's economy. M&A transactions take place in all industries and at all levels of the business life cycle-from acquisitions of startups to the merger of mature firms. This course provides students with a general understanding of the main M&A issues, including strategy, valuation methods, synergies, liquidity and control, and the steps in the M&A project -from the acquisition search until the post-merger integration. The course also includes special topics that vary per semester, such as hostile take-overs, LBOs (Leveraged Buyouts) and SPACs (Special Purpose Acquisition Companies). Also listed as BF-356.

### BE-388 Cooperative Education: Economics Concentration

Credits: 3

Prerequisite(s): BF-301 or Junior standing, a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University

Term Offered: Spring Term

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course.

### BE-398 Special Topics in Economics (300 Level)

Credits: 1-3

Term Offered: All Terms

Course Type(s): None

An intensive study or a particular subject or problem in economics, to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BE-401 Development of Economic Thought****Credits: 3**

Prerequisite(s): BE-201 and BE-202

Course Type(s): None

Economic ideas from the beginning of Western civilization to the present, including mercantilist writers Adam Smith, Malthus, Ricardo, Marx, and Keynes.

**BE-403 Economic Growth and Development****Credits: 3**

Prerequisite(s): BE-201, BE-202, EN-101 and EN-102, or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

The principal theories, factors, and problems of economic development. Empirical case studies emphasize the growth patterns in several countries, the impediments to economic growth in the underdeveloped countries, and the need to sustain growth rates in highly developed countries.

**BE-440 Bond Markets****Credits: 3**

Prerequisite(s): BE-251 and BF-301

Term Offered: Spring Term

Course Type(s): None

A comprehensive review and analysis of the U.S. Bond Markets with emphasis on traditional fixed income securities and their derivative products and applications. The course will explore these studies from both a theoretical as well as practical perspective. Also listed as BF-440.

**BE-451 Public Finance****Credits: 3**

Prerequisite(s): BE-202 and BA-252

Term Offered: Spring Term

Course Type(s): None

An analysis of the revenue, expenditure, and debt activities of government and their effects on resource allocation, income distribution, price stabilization, and economic growth. Also listed as BF-451.

**BE-455 Financial Econometrics****Credits: 3**

Prerequisite(s): BE-201, BE-202, BE-251, and BF-301; MA-118 or MA-125 with a minimum grade of C.

Term Offered: All Terms

Course Type(s): None

Provides an advanced undergraduate level introduction to the methodology and tools of econometrics required by economics and finance professionals. Topics include: linear regression, time series modeling, capital asset pricing models, and volatility and correlation modeling. R and R Studio/Posit are used extensively in class. Instructor assumes students have no previous knowledge of R. Also listed as BF-455.

**BE-480 Business Research: Economics****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Active participation in a research project chosen by and currently being pursued by the faculty sponsor. Student activities may include but are not limited to: literature search, data collection, data analysis, preparation of a manuscript, and delivery of a manuscript.

**BE-488 Cooperative Education: Economics Concentration****Credits: 3**

Prerequisite(s): BF-301 or junior standing, a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University

Course Type(s): None

An opportunity to apply classroom theory in practice through actual experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course. Junior standing or BF-301; a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University are required to take this course.

**BE-489 Internship in Economics****Credits: 3**

Term Offered: Spring Term

Course Type(s): EX1

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. Departmental approval is required to take this course. This course is repeatable twice for credit. Junior standing and a minimum G.P.A. of 2.00 is required to take this course.

**BE-498 Special Topics in Economics (400 Level)****Credits: 1-3**

Prerequisite(s): BE-251 and BF-301 both passed with a grade of B or higher

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in economics to be announced prior to registration, conducted on either a lecture-discussion or a seminar basis.

**BE-499 Independent Study in Economics****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

## Business Finance (BF)

**BF-200 Survey of Finance****Credits: 3**

Prerequisite(s): Any math course with a level higher than 100

Course Type(s): None

Introduction to business and personal finance, including forms of businesses, financial statements and cash flows, time value of money, elements of risk and return and valuation of stocks and bonds. This course is for non-business majors.

**BF-289 Internship in Finance****Credits: 3**

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. This course is repeatable twice for credit. The student must have a minimum G.P.A. of 2.00 and have at least Junior standing to take this course. Departmental approval is required to take this course.

**BF-298 Special Topics in Finance (200 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in finance to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BF-301 Principles of Finance****Credits: 3**

Prerequisite(s): BA-251, BE-201, and MA-117 or MA-126

Term Offered: All Terms

Course Type(s): None

Introduction to financial management and operations of business corporations, including: concepts of time-value of money, valuation and rate of return, risk management, financial statement analysis, asset valuation models, capital budgeting, and international financial management.

**BF-303 Real Estate Investment and Taxation****Credits: 3**

Prerequisite(s): BF-310 or BR-310

Term Offered: Spring Term

Course Type(s): None

Designed to introduce students to the world of real estate finance, including debt and equity issues, securitization and taxation. Also listed as BR-303.

**BF-304 Money, Credit, and Financial Institutions****Credits: 3**

Prerequisite(s): BE-202

Term Offered: All Terms

Course Type(s): None

Monetary economics and its institutions; the nature of and function of money; commercial and central banking; the money markets; financial intermediaries; and international monetary institutions. Also listed as BE-304.

**BF-310 Real Estate Appraisal****Credits: 3**

Prerequisite(s): BF-301 passed with a grade of C- or higher

Co-requisite(s): MA-118

Course Type(s): None

Principles and processes of real estate valuation. The sales comparison, cost, and income approaches to value will be examined in depth.

**BF-323 Analysis of Financial Statements****Credits: 3**

Prerequisite(s): BF-301 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

Reading, analysis, and interpretation of financial statements of industrial and commercial business enterprises and of utilities and transportation.

**BF-324 Principles of Working Capital Management****Credits: 3**

Prerequisite(s): BF-301 passed with grade of C or higher

Course Type(s): None

Exposure to major corporate decisions in restructuring and managing working capital and assessing the risks and returns of corporate decisions.

**BF-341 Insurance and Risk Management****Credits: 3**

Prerequisite(s): BF-301 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Principles and practices of insurance; the basic legal obligations and rights of the insurer and the insured in various types of contracts; types of carriers; internal and field organizations; government regulations and related subjects.

**BF-356 Mergers and Acquisitions****Credits: 3**

Prerequisite(s): BF-301 Passed with a minimum grade of C

Term Offered: All Terms

Course Type(s): None

Mergers and acquisitions represent a major force in today's economy. M&A transactions take place in all industries and at all levels of the business life cycle-from acquisitions of startups to the merger of mature firms. This course provides students with a general understanding of the main M&A issues, including strategy, valuation methods, synergies, liquidity and control, and the steps in the M&A project -from the acquisition search until the post-merger integration. The course also includes special topics that vary per semester, such as hostile take-overs, LBOs (Leveraged Buyouts) and SPACs (Special Purpose Acquisition Companies). Also listed as BE-356.

**BF-388 Cooperative Education: Finance Concentration****Credits: 3**

Prerequisite(s): BF-301 a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University

Term Offered: Spring Term

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course.

**BF-389 Internship in Finance****Credits: 3**

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. This course is repeatable twice for credit. Departmental approval is required to take this course. Junior standing and a minimum G.P.A. of 2.00 is required to take this course.

**BF-398 Special Topics in Finance (300 Level)****Credits: 1-3**

Prerequisite(s): BF-301, Minimum grade C

Term Offered: Fall Term

Course Type(s): None

An intensive study of a particular subject or problem in finance to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis.

**BF-399 Independent Study in Finance****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**BF-421 International Finance****Credits: 3**

Prerequisite(s): BE-202 and BF-301 both passed with a grade of C or higher; and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

A study of the organization and operations of international monetary relations. Analyzes the alternative methods of short- and long-run payment adjustments; foreign exchange markets and international flow of funds; and theories of international liquidity.

**BF-422 Investments**

Prerequisite(s): BF-301 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Basic investment principles: Investment objectives, determinants of value of investment media, range of investments available, relative values of securities, and personal investment administration. Students who have already taken BF-322 cannot register for this course. Students must take the Bloomberg Certification along with this course.

**Credits: 3****BF-431 Managerial Finance**

Prerequisite(s): BF-301 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Financial analysis, techniques, and principles as applied to short- and long-range planning and control; capital budgeting for long-term projects; valuation; determination of the firm's cost of capital; and the trade-off between risk and profitability.

**Credits: 3****BF-435 Derivatives****Credits: 3**

Prerequisite(s): MA-118 or MA-125 and BF-301, each passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Introduction to the complex subject of financial derivatives. Emphasis on the Black-Scholes and the Binomial Option pricing models, option strategies, and the use of options and futures to hedge risk.

**BF-440 Bond Markets****Credits: 3**

Prerequisite(s): BE-251 and BF-301

Term Offered: Spring Term

Course Type(s): None

A comprehensive review and analysis of the U.S. Bond Markets with emphasis on traditional fixed income securities and their derivative products and applications. The course explores these studies from both a theoretical as well as practical perspective. Also listed as BE-440.

**BF-451 Public Finance****Credits: 3**

Prerequisite(s): BE-202 and BA-252

Term Offered: Spring Term

Course Type(s): None

An analysis of the revenue, expenditure, and debt activities of government and their effects on resource allocation, income distribution, price stabilization, and economic growth. Also listed as BE-451.

**BF-452 Portfolio Management - Hawk Capital Student Fund****Credits: 3**

Prerequisite(s): BA-251, BE-251, and BF-301 all passed with a grade of B or higher, and a G.P.A. above 3.30

Term Offered: All Terms

Course Type(s): None

Provides a real-world security analysis and portfolio management experience. Students learn and apply state of the art investment techniques, methods and tools in an actual hands-on environment managing a real portfolio in an environment replicating that of a professional investment firm.

**BF-455 Financial Econometrics****Credits: 3**

Prerequisite(s): BE-201, BE-202, BE-251, and BF-301; MA-118 or MA-125 with a minimum grade of C.

Term Offered: All Terms

Course Type(s): None

Provides an advanced undergraduate level introduction to the methodology and tools of econometrics required by economics and finance professionals. Topics include: linear regression, time series modeling, capital asset pricing models, and volatility and correlation modeling. R and R Studio/Posit are used extensively in class. Instructor assumes students have no previous knowledge of R. Also listed as BE-455.

**BF-480 Business Research: Finance****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Active participation in a research project chosen by and currently being pursued by the faculty sponsor. Student activities may include but are not limited to: literature search, data collection, data analysis, preparation of a manuscript, and delivery of a manuscript. Students must have Junior status or higher, approval of the instructor, department chair, and the Associate Dean or the Dean in order to register for this course.

**BF-488 Cooperative Education: Finance Concentration****Credits: 3**

Prerequisite(s): BF-301 or Junior standing; minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University

Term Offered: Spring Term

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course. Junior standing or BF-301; a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University.

**BF-489 Internship in Finance****Credits: 3**

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. This course is repeatable twice for credit. Departmental approval is required to take this course. Junior standing and a minimum G.P.A. of 2.00 is required to take this course.

**BF-498 Special Topics in Finance (400 Level)****Credits: 1-3**

Prerequisite(s): BE-251 and BF-301 both passed with a grade of B or higher and a minimum G.P.A. of 3.30

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in finance to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis.

**BF-499 Independent Study in Finance****Credits: 3** **BI-388 Cooperative Education: International Business Concentration**  
**Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

## Business Healthcare (BH)

**BH-385 American Health Care Delivery System****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Examines the fundamental concepts of health care organization, finance, agencies, organizations, and various professional and paraprofessional employees in their roles as health care providers, and determine ways that these relationships can be improved. Sophomore standing or higher is required to take this course.

**BH-386 Health Care Economics****Credits: 3**

Prerequisite(s): BA-200, BE-200, and BH-385, or with instructor and department chair permission in Nursing Studies

Term Offered: Spring Term

Course Type(s): None

Health policy is examined from an economic perspective. Basic economic theories and their relationships to the structure and function of the US health care system are explored. Alternative health care systems and health care reforms are also evaluated. The application of economics to the establishment of public policy is emphasized.

**BH-480 Business Research: Business Health****Credits: 3**

Course Type(s): None

Active participation in a research project chosen by and currently being pursued by the faculty sponsor. Student activities may include but are not limited to: literature search, data collection, data analysis, preparation of a manuscript, and delivery of a manuscript. This course may be used as an elective course in the Management and Marketing concentration. Junior standing, approval of the instructor, department chair, and the Associate Dean or the Dean is required to take this course.

## Business International (BI)

**BI-201 Globalization, Multinational Enterprises and Emerging Markets****Credits: 3**

Term Offered: All Terms

The study of global market development from an evolutionary perspective to current status as global marketplaces for multinational enterprises (MNEs) and emerging markets. The course focuses on major issues regarding the growth of global industries and businesses, emerging markets, and their impacts on the development of market globalization today.

**BI-298 Special Topics in International Marketing****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in international marketing, to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course, along with successful completion of thirty credits and a minimum G.P.A. of 2.00.

**BI-389 Internship in International Business****Credits: 3**

Prerequisite(s): BM-250, BK-250, BM-471, BK-453, Junior standing, and a minimum G.P.A. of 2.10

Course Type(s): EX1

An opportunity to apply classroom theory in both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine internship free elective credits. This course may be repeated for credit. Departmental approval is required to take this course.

**BI-399 Independent Study in International Business****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Independent Study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**BI-419 Export/Import Marketing and Logistics****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

Export/Import Marketing deals with ways to do business with the global market whether that is through importing or exporting a product or service. This course will cover how and why we import/export, government regulations, marketing strategies, documentation, procedures, tariff & non-tariff barriers, financing, method of payments, transportation, logistics, laws, Free Trade Agreements and related topics. Also listed as BK-419.

**BI-488 Cooperative Education: International Business Concentration****Credits: 3**

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course, along with successful completion of thirty credits and a minimum G.P.A. of 2.00.

**BI-489 Internship in International Business****Credits: 3**

Prerequisite(s): BM-250, BK-250, BM-471, BK-453, Junior standing and a minimum G.P.A. of 2.10

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine internship free elective credits. This course may be repeated for credit. Departmental approval is required to take this course.

**BL-498 Special Topics in International Business (400 Level) Credits: 1-3**

Prerequisite(s): BK-250 or as announced in the course schedule

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in International Business to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BL-499 Independent Study in International Business Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

## Business Law (BL)

**BL-201 Legal Environment of Business I Credits: 3**

Term Offered: All Terms

Course Type(s): WT

Sources of law, Courts, Fundamentals of Civil Procedure, ADR, Business Ethics, Torts, Intellectual Property, Contracts, Business Organizations, Agency, Employment, Anti-trust, Property, and International law.

**BL-202 Legal Environment of Business II Credits: 3**

Prerequisite(s): BL-201

Term Offered: All Terms

Course Type(s): None

Sales contracts, advanced topics in business organizations, bankruptcy, commercial paper, leases, estates and trusts, and miscellaneous.

**BL-480 Business Research: Business Law Credits: 3**

Course Type(s): None

Active participation in a research project chosen by and currently being pursued by the faculty sponsor. Student activities may include but are not limited to: literature search, data collection, data analysis, preparation of a manuscript, and delivery of a manuscript. May be used as an elective course in the Accounting concentration.

**BL-498 Special Topics in Business Law (400 Level) Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in business law to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

## Business Management (BM)

**BM-198 Special Topics in Management Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in management to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BM-200 Introduction to Business Credits: 3**

Term Offered: All Terms

Course Type(s): None

An interdisciplinary view of the theory and practices of the components in business functions as they are contingent for the owner's success to seek out opportunities and avoid pitfalls. For non-Business majors only.

**BM-201 Survey of Management and Marketing Credits: 3**

Prerequisite(s): BM-200

Term Offered: Spring Term

Course Type(s): None

An overview of the theories and practices of Management and Marketing and how they relate to businesses, the business environment, customers, employees, the global village, and compliance with rules, regulations and the law. For non-Business majors only.

**BM-210 A Survey of Entrepreneurship Credits: 3**

Prerequisite(s): BA-200, BE-200, BF-200 BL-200 and BM-200

Course Type(s): None

An overview of the theories and practices that focus on the tasks and activities of the small business owner, from the concept to the reality of researching venture feasibility, financing the business, launching the business, and managing growth. For non-Business majors only.

**BM-225 Business Writing and Communication Credits: 3**

Prerequisite(s): EN-101 and EN-102, or permission of the instructor

Term Offered: All Terms

Course Type(s): RD, WT

Designed for the future business professional. It introduces students to a variety of technical and business writing theories and practices relevant to business communications in the real world. The course will cover oral and written communication and how to make communication more effective.

**BM-250 Principles of Management and Organizational Behavior Credits: 3**

Term Offered: All Terms

Course Type(s): None

Management functions, including planning, organizing, staffing, directing, and controlling; the theory and practice as they are contingent on the behavior of people in organizations and on the organizational environment. Students must have a Sophomore or higher standing to take this course.

**BM-311 Management Data Analytics Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or better; IT-100 or IT-150; BE-251

Term Offered: All Terms

Course Type(s): None

The course provides an overview of data analytics and its use in supporting the decision making process for managers. The course emphasizes database management, data analytics, and data visualization processes and applications.

**BM-327 Ethics, Diversity, and Social Responsibility Credits: 3**

Prerequisite(s): BM-250, BK-250, Junior standing and EN-101 and EN-102 or permission of the instructor

Co-requisite(s): BF-301

Term Offered: All Terms

Course Type(s): SJL, WT

Explores and applies alternative ethical and justice viewpoints to economic, political, and social problems inherent in contemporary business practice. Presents a focus on management with an increasingly diverse workforce and increasingly complex criteria for measuring organizational performance.

**BM-350 Operations Management****Credits: 3**

Prerequisite(s): BM-250

Co-requisite(s): BE-251

Term Offered: All Terms

Course Type(s): None

This course is an introduction to the concepts, principles, problems, and practices of operations management. Emphasis is placed on managerial processes for effective operations in both goods-producing and service-rendering organization with a specific focus on operations management applications to other functional business areas, such as finance, accounting, marketing and real estate. Topics include operations strategy, goods and service design, process design, capacity planning, facilities location and design, forecasting, production scheduling, inventory control, resource management, supply chain management, quality assurance, and project management.

**BM-351 Renewable Energy****Credits: 3**

Prerequisite(s): BM-250 or Permission of Instructor

Term Offered: All Terms

Course Type(s): None

Students will become acquainted with the promise of renewable energy to replace a significant portion of fossil fuels. Each renewable energy source (biomass, solar, wind, hydro, geothermal, ocean currents and waves, and nuclear) will be examined for their mutual advantages and disadvantages, their future role in satisfying energy needs of a modern society and in promoting sustainability in corporations.

**BM-388 Cooperative Education: Management Concentration** **Credits: 3**

Prerequisite(s): BM-250, a minimum G.P.A. of 2.00 and completion of thirty credits, fifteen of which are earned at Monmouth University

Term Offered: Spring Term

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. May be repeated for credit. Departmental approval is required to take this course.

**BM-389 Internship in Management****Credits: 1-3**

Prerequisite(s): Junior standing, BM-250, BK-250, and a minimum G.P.A. of 2.00

Term Offered: Fall Term

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. Repeatable twice for credit.

**BM-398 Special Topics in Management (300 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in management, to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BM-399 Independent Study in Management****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**BM-402 Business Modeling and Analysis****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher and BM-350

Term Offered: All Terms

Course Type(s): None

Decision-making within a business/management science framework; modeling of business systems/problems and the application of quantitative, statistical, and computer analyses.

**BM-403 Management of Technology****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

The application of management to technology, response to technological organizational structure, and management's role to assess innovations and conflicts of change that affect society and business. Analysis of technical systems and understanding uses of technology.

**BM-404 Human Resources Management****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Employment planning; job analyses, job descriptions, employee evaluations, and legal compliance; staffing and selection process; performance ratings; training and development; compensation and benefits; equal rights; and labor relations and topics relative to the management of human resources.

**BM-408 Logistics and Supply Management****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher and BM-350

Term Offered: All Terms

Course Type(s): None

Logistics is an integrative activity uniting suppliers, providers of goods and services, and customers. It is also a global activity where the suppliers, providers, and customers may be located all over the world. In order to emphasize the global aspects of logistics and the impact of geopolitics on logistical systems, the course will focus on the logistics of energy transportation: primarily oil plus liquefied petroleum gases. This course will cover the differing perspectives of users (oil companies) and providers (tanker owning companies) and financial institutions that support providers. International efforts to deal with oil pollution and other forms of pollution from ships will be investigated. The role of trucks, railroads, airlines, and pipelines in domestic logistics will be described along with the role of containerization and intermodalism in global logistics. Supply chain management as practiced by a number of different companies will be covered via lecture and student presentations.

**BM-411 Business Data Management****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher, BE-251,

BM-311, and Junior standing

Term Offered: Fall Term

Course Type(s): TPS

The objective of Business Data Management (BDM) is to engage the students with a broad introduction to and a basic understanding of the data lifecycle, from its generation, transformation, use, and retirement as a vital capability for conducting any profitable business operation. Emphasis is placed on gaining the ability to organize, process, distribute, and sift through high levels of data in order to make informed, timely, and accurate decisions. Outcomes are assessed through a series of analysis, design, and implementation of digital information systems, encompassing design/modeling, storage, retrieval, and visualization at a fundamental level.

**BM-423 Human Relations in Management****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

Study of human relations in organizations with particular emphasis on leadership, changing work values, cross-cultural relations, legal compliance for conflict resolution, labor legislation.

**BM-424 Conflict Resolution and Negotiations****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher, BL-201, and Junior standing

Term Offered: Spring Term

Course Type(s): None

Designed to help students learn the fundamentals of negotiation processes. The course will be taught based upon weekly experiential cases whereby students will assume a role in a negotiation and negotiate with a partner.

**BM-427 Sustainability for Business****Credits: 3**

Prerequisite(s): BM-250 or Permission of Instructor

Term Offered: All Terms

Course Type(s): None

This course looks at the important area of sustainability and why it must be driven by businesses in order to have any chance of success. Many people believe sustainability to be a synonym for 'green' and that it only focuses on the environment. This is not accurate as true business sustainability also includes societal and economic factors, or what was called the "Triple Bottom Line" by John Elkington. Colloquially known as the 3 Ps or people, planet, and profit, business sustainability includes impact on societal stakeholders (consumer and employees), as well as profit which is necessary for a business to continue.

**BM-431 Behavioral Decision Making in Business****Credits: 3**

Prerequisite(s): BE-201 or BE-202, BE-251, BF-301, BM-250, BK-250; or permission of instructor.

Term Offered: All Terms

Course Type(s): None

Students are introduced to the increasingly relevant concept of behavioral economics and behavioral decision making. The course will cover normative, descriptive, and prescriptive decision making models and their relevance to management. Also discussed will be application of topics to business disciplines such as accounting, marketing, and finance.

**BM-432 Hospitality Management and Marketing****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher and BK-250

Course Type(s): None

The goal of this course is to provide the student with an introduction into the hospitality industry and the basics of its many components. We will examine industry trends, the corporate profiles of industry leaders, and the various and diverse schools of thought that exist in the strategic management of hospitality, and, finally, detail all the opportunities that the hospitality industry affords graduates of secondary institutions.

**BM-451 Entrepreneurship****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher and BK-250

Term Offered: All Terms

Course Type(s): None

The course builds the practical skills and knowledge needed to create and manage an entrepreneurial venture. Specifically the course develops students' capabilities to create a novel business concept, research venture feasibility, finance entrepreneurial ventures, and provides them with practical experience regarding the process of a formal launch of a venture.

**BM-456 Franchising****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

Explores the practical skills and knowledge needed to create and/or manage a franchise business from the perspective of both a franchisor and a franchisee. Specifically the course develops student capabilities to identify franchising opportunities, to plan and marshal the resources to operate a successful franchise, and to generate value through a franchise platform.

**BM-471 Global Management****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher, BK-250, and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

Management activities, processes, and procedures in directing an enterprise on a global basis, including the interplay of diverse, cultural environments.

**BM-481 Leadership and Team Development****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Designed to help students understand the basics of team functioning, when to use group and individual decision making, and how to manage teams effectively as an influential leader.

**BM-482 Small Business Management/Marketing****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher and BK-250

Term Offered: All Terms

Course Type(s): None

Examines the various approaches to running a business that has either been started previously by the Entrepreneurship class or been submitted to us for development and council.

**BM-483 Project Management****Credits: 3**

Prerequisite(s): BM-250 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

Project management is introduced from an applied managerial perspective with an emphasis on the behaviors, tools, and topics that managers will encounter throughout the life cycle of a project. The overall project phases of initiating, planning and design, executing, monitoring and controlling, and closing projects will be covered.

**BM-488 Cooperative Education: Management Concentration****Credits: 3**

Prerequisite(s): BM-250, a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which are earned at Monmouth University

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course.

**BM-489 Internship in Management****Credits: 3**

Prerequisite(s): Junior standing, BM-250, BK-250, and a minimum G.P.A. of 2.00

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. Repeatable twice for credit.

**BM-490 Strategic Management****Credits: 3**

Prerequisite(s): BE-202, BF-301, and BM-350.

Co-requisite(s): BM-327.

Term Offered: All Terms

Course Type(s): EX5

Integrates all disciplines of undergraduate study in business administration; emphasizes analysis of real-world organizational problems and opportunities in the total enterprise; capstone approach to executive development.

**BM-498 Special Topics in Management (400 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in management to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BM-499 Independent Study in Management****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

## Business Marketing (BK)

**BK-250 Principles of Marketing****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Fundamental concepts involved in satisfying consumer objectives through goods and services; consumer characteristics; marketing system environments; middlemen; analysis of consumer and industrial goods; and physical distribution.

**BK-298 Special Topics in Marketing (200 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in marketing, to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BK-301 Marketing Research****Credits: 3**

Prerequisite(s): BE-251 and BK-250 both passed with a grade of C or higher

Course Type(s): None

Methods, tools, and reasons for marketing research in support of distribution planning and policy formulation by top management; basic planning, questionnaire design, preliminary testing, field interviewing, sampling, data processing and analysis. A grade of "C" or better in BK-301 is required in order to take BK-453 International Marketing and BK-459 Managerial Marketing.

**BK-304 Consumer Behavior****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher

Course Type(s): None

A marketing strategy approach evaluating consumer attitudes and buying patterns; motivational and cognitive aspects of buying behavior; target market identification; and social class relationships. A grade of "C" or better in BK-304 is required in order to take BK-459 Managerial Marketing.

**BK-311 Principles of Advertising****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher

Course Type(s): None

Current practices in advertising, including its purpose and place, preparation and appeal, techniques, layout, and copywriting through visualized layouts and current media.

**BK-388 Cooperative Education: Marketing Concentration****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher, a minimum G.P.A. of 2.00, and completion of thirty credits, fifteen of which have been completed at Monmouth University

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course.

**BK-389 Internship in Marketing****Credits: 1-3**

Prerequisite(s): BM-250, BK-250, Junior standing and a minimum G.P.A. of 2.00

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine internship free elective credits. Departmental approval is required to take this course.

**BK-398 Special Topics in Marketing (300 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in marketing, to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BK-399 Independent Study in Marketing****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**BK-401 Marketing Research****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Methods, tools, and reasons for marketing research in support of distribution planning and policy formulation by top management; basic planning, questionnaire design, preliminary testing, field interviewing, sampling, data processing and analysis.

**BK-402 Retail Marketing Management****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

Examines marketing within the consumer retail environment. Focuses on fundamental aspects of retailing including retail customer strategy, merchandising trends, display layouts, pricing, vendor relations, and location.

**BK-404 Consumer Behavior****Credits: 3**

Term Offered: All Terms

Course Type(s): None

A marketing strategy approach evaluating consumer attitudes and buying patterns; motivational and cognitive aspects of buying behavior; target market identification; and social class relationships.

**BK-406 Marketing Analytics****Credits: 3**

Prerequisite(s): BK-250 and BK-301 both passed with a Minimum grade of C or higher.

Term Offered: All Terms

Course Type(s): None

This course introduces students to methods for analyzing data residing in firms' customer databases. We will review all necessary statistical concepts and learn how to use SPSS to conduct a variety of marketing analyses using customer databases. In addition, we will discuss Google Analytics, social listening tools, and data visualization.

**BK-407 Digital Marketing****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Digital marketing combines established marketing concepts with the creative use of new digital models and digital tools, such as social media marketing, search engine optimization, mobile and email marketing. Successful students will complete the course with a comprehensive knowledge of how to develop an integrated digital marketing strategy from formulation to implementation.

**BK-411 Principles of Advertising****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Current practices in advertising, including its purpose and place, preparation and appeal, techniques, layout, and copywriting through visualized layouts and current media.

**BK-419 Export/Import Marketing and Logistics****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

Export/Import Marketing deals with ways to do business with the global market whether that is through importing or exporting a product or service. This course will cover how and why we import/export, government regulations, marketing strategies, documentation, procedures, tariff & non-tariff barriers, financing, method of payments, transportation, logistics, laws, Free Trade Agreements and related topics. Also listed as BI-419.

**BK-420 Health Care Management and Marketing****Credits: 3**

Prerequisite(s): BM-250, and BK-250 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

An introductory overview of the U.S. healthcare system and its overall management and marketing issues, including coverage of its past and present political, organizational, socioeconomic, behavioral, human resource, educational, and utilization dimensions.

**BK-421 Marketing of Services****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher

Course Type(s): None

Examines the applications of the conceptual framework of marketing within the service business context. Focuses on the characteristics of the service environment, as well as important considerations in the services marketing-mix strategies.

**BK-422 Principles of Personal Selling****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher

Course Type(s): None

Theory and practice of personal selling; qualifications and preparation of the salesperson, the psychology of selling, and the various steps that enter into the sale itself.

**BK-431 Sports Marketing****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Classroom lectures and readings will illuminate the theoretical underpinnings and practical applications of marketing strategies to the collegiate and professional sport, special events, international sport, broadcasting, facility management, and sporting goods industries.

**BK-452 Business Marketing****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Aspects of marketing raw and semi-manufactured materials; industrial equipment of all kinds and other production goods; focus on product, market, and channel analyses.

**BK-453 International Marketing****Credits: 3**

Prerequisite(s): BK-301 passed with a grade of C or higher, EN-101, and EN-102

Term Offered: All Terms

Course Type(s): WT

Analysis of the policy, managerial, and implementation considerations involved in seeking multinational business opportunities with emphasis on the role of environmental and cultural differences in developing strategies for foreign market penetration.

**BK-457 Social Media Marketing****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher, and IT-150 or IT-100

Term Offered: All Terms

Course Type(s): None

Explores marketing strategies and tactics to gain website traffic, brand exposure, consumer insight, customer engagement, and sales through social media platforms. Social media marketing is a dynamic component of integrated marketing communications, and as such it must be carefully coordinated within the branding and promotional mix as well as across paid, owned and earned media through a comprehensive social media marketing plan.

**BK-459 Managerial Marketing****Credits: 3**

Prerequisite(s): BK-301 and BK-304 both passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Application of management principles to the integrated marketing function, both internally within the various units of the marketing division and externally in coordination with the other major divisions of the company.

**BK-480 Business Research: Marketing****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Active participation in a research project chosen by and currently being pursued by the faculty sponsor. Student activities may include but are not limited to: literature search, data collection, data analysis, preparation of a manuscript, and delivery of a manuscript.

**BK-488 Cooperative Education: Marketing Concentration****Credits: 3**

Prerequisite(s): BK-250 passed with a grade of C or higher, a minimum G.P.A. of 2.00 and completion of thirty credits, fifteen of which have been earned at Monmouth University

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential education. Experiential education involves fifteen to twenty hours of work per week for three credit hours. Academic aspects include reading assignments and a term paper. This course may be repeated for credit. Departmental approval is required to take this course.

**BK-489 Internship in Marketing****Credits: 3**

Prerequisite(s): BM-250, BK-250 passed with a grade of C or higher, Junior standing and a minimum G.P.A. of 2.00

Term Offered: All Terms

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; includes both academic and experiential learning. Experiential part involves fifteen to twenty hours of work experience per week for three credit hours; academic aspect includes reading assignments and a term paper. Students are limited to nine internship free elective credits.

**BK-498 Special Topics in Marketing (400 Level)****Credits: 1-3**

Prerequisite(s): BK-250 passed with a minimum grade of C or higher, or as announced in the course schedule

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in marketing to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis.

**BK-499 Independent Study in Marketing****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

## Business Real Estate (BR)

**BR-298 Special Topics in Real Estate****Credits: 1-3**

Term Offered: Fall Term

Course Type(s): None

An intensive study of a particular subject or problem in real estate to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BR-301 Real Estate Law****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Legal issues as they apply to the acquisition, financing, and sale of real estate.

**BR-303 Real Estate Finance Investment and Taxation****Credits: 3**

Prerequisite(s): BF-301 passed with a minimum grade of C.

Term Offered: Spring Term

Course Type(s): None

Designed to introduce students to the world of real estate finance, including debt and equity issues, securitization and taxation.

**BR-304 Real Estate Lease Analysis****Credits: 3**

Prerequisite(s): BR-301

Term Offered: All Terms

Course Type(s): None

Examines concerned leasehold transactions, including office, industrial, retail, and general leases, while focusing on the respective roles of all relevant parties to the lease.

**BR-305 Real Estate Data Analysis****Credits: 3**

Prerequisite(s): BR-301 and BR-303 or BR-310

Term Offered: All Terms

Course Type(s): None

Develop an understanding of real estate markets, proforma financial modeling and data visualization currently used by real estate professionals in evaluating acquisition feasibility and development. Excel, Argus and GIS will be used to generate Decision Making Artifacts commonly used to evaluate risk and feasibility in the real estate industry. Prerequisites: BR-301 and BR-303 or BR-310

**BR-310 Real Estate Appraisal****Credits: 3**

Prerequisite(s): BF-301 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Principles and processes of real estate valuation. The sales comparison, cost, and income approaches to value will be examined in depth.

**BR-389 Internship in Real Estate****Credits: 1-3**

Term Offered: Summer Term

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; including both academic and experiential learning. The experiential portion involves fifteen to twenty hours of work experience per week for three credit hours, and the academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. Repeatable twice for credit. Departmental approval is required to take this course, along with Junior standing, and a minimum G.P.A. of 3.0

**BR-398 Special Topics in Real Estate****Credits: 1-3**

Term Offered: Fall Term

Course Type(s): None

An intensive study of a particular subject or problem in real estate to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BR-405 Real Estate Development****Credits: 3**

Prerequisite(s): BR-301 and BR-303 or BR-310

Term Offered: All Terms

Course Type(s): None

Designed to introduce students to the world of real estate development, including the regulatory environment, which must be navigated to successfully gain municipal and other governmental approvals for a land use project. Prerequisites: BR-301 and BR-303 or BR-310

**BR-489 Internship in Real Estate****Credits: 3**

Course Type(s): None

An opportunity to apply classroom theory in practice through actual work experience; including both academic and experiential learning. The experiential portion involves fifteen to twenty hours of work experience per week for three credit hours, and the academic aspect includes reading assignments and a term paper. Students are limited to nine credits of internship electives. Repeatable twice for credit. Departmental approval is required to take this course. Junior standing, a minimum G.P.A. of 2.00, and instructor consent are required to register for this course.

**BR-498 Special Topics in Real Estate****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in real estate to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**BR-499 Independent Study in Real Estate****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Business Administration topic not substantially treated in a regular course; work will include scheduled conferences with sponsoring professor and written reports. Prior permission of the directing professor and department chair is required to take this course.

## Chemistry (CE)

**CE-101 Chemistry in Our Lives****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

Major concepts and methodologies in chemistry and their relation to specific, important issues in today's society.

**CE-109 Introduction to General, Organic, and Biochemistry****Credits: 4**

Prerequisite(s): Score of 3 or higher on the Mathematics Placement Exam, or MA-101, or MA-105 passed with a grade of C- or higher.

Course Type(s): None

Structure of matter, the mole concept, chemical bonds and reactions, acids and bases, structure and reactions of organic compounds, chemistry and metabolism of amino acids, carbohydrates, lipids, proteins, and nucleic acids. Three hours of class, three hours of lab per week. Students must have had High School Chemistry to take this course.

**CE-111 General Chemistry I****Credits: 3**

Prerequisite(s): Score of 2 or higher on the Mathematics Placement Exam or MA-050 passed with a grade of C- or higher

Co-requisite(s): CE-111L

Term Offered: All Terms

Course Type(s): NS

The first of two lecture courses which, taken together, provide a preparation for subsequent courses in chemistry. Principles and theories of chemical problem solving, stoichiometry and chemical reactions, states of matter, periodic properties of the elements, atomic and molecular structure, introductory quantum mechanics, thermochemistry, and the properties of gases are covered.

**CE-111L General Chemistry I Laboratory****Credits: 1**

Co-requisite(s): CE-111

Term Offered: All Terms

Course Type(s): None

Laboratory work to complement the class work of CE-111 and CE-112; review of mathematical fundamentals; experiments involving observation and interpretation of chemical and physical changes; experimental studies of gas laws, thermodynamics, kinetics, equilibrium, acids and bases, qualitative analysis, and molecular mass determination. Three hours per week.

**CE-111R General Chemistry I Recitation****Credits: 1**

Co-requisite(s): CE-111 and CE-111L

Term Offered: All Terms

Course Type(s): None

Gen Chem 1 Recitation supports General Chemistry 1 students with active learning activities such as group problem solving and peer-led team learning that focus on the key or most challenging aspects of the General Chemistry 1 course. Assessment activities, including quizzes, are included in Gen Chem 1 Recitation. Gen Chem 1 is a Pass/Fail corequisite for CE 111 - General Chemistry 1. Corequisite: CE-111 and CE-111L

**CE-112 General Chemistry II****Credits: 3**

Prerequisite(s): CE-111 passed with a grade of C- or higher, CE-111L passed with a grade of C- or higher, and either MA-101 passed with a grade of C- or higher or a score of 3 or higher on the Mathematics Placement Exam.

Co-requisite(s): CE-112L

Term Offered: All Terms

Course Type(s): NS

The second of two lecture courses which, taken together, provide preparation for subsequent courses in chemistry. Properties of liquids and solutions, chemical kinetics and equilibrium, thermodynamics, electrochemistry and nuclear chemistry.

**CE-112L General Chemistry II Laboratory****Credits: 1**

Co-requisite(s): CE-112

Course Type(s): None

Laboratory work to complement the class work of CE-111 and CE-112; review of mathematical fundamentals; experiments involving observation and interpretation of chemical and physical changes; experimental studies of gas laws, thermodynamics, kinetics, equilibrium, acids and bases, qualitative analysis, and molecular mass determination. Three hours per week.

**CE-112R General Chemistry II Recitation****Credits: 1**

Prerequisite(s): CE-111 and CE-111L both passed with a grade of C- or higher; CE-111R.

Co-requisite(s): CE-112 and CE-112L

Term Offered: All Terms

Course Type(s): None

Chem 2 Recitation supports General Chemistry 2 students with active learning activities such as group problem solving and peer-led team learning that focus on the key or most challenging aspects of the General Chemistry 1 course. Assessment activities, including quizzes, are included in Gen Chem 2 Recitation. Gen Chem 2 Recitation is a Pass/Fail corequisite for CE-112.

**CE-198 Special Topics in Chemistry (100 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in chemistry to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**CE-220 Environmental Chemistry****Credits: 3**

Prerequisite(s): CE-112 and CE-112L, both passed with a grade of C- or higher

Co-requisite(s): CE-220L

Course Type(s): MEBP

Soil, aquatic, and atmospheric chemistry; environmental analytical chemistry; connections to environmental biology. Sources, reactions, mobility, effects, and fates of chemical species in the soil, water and air environments and the effect of human activity on these. Gives the theoretical principles and techniques of both classical and instrumental methods of chemical analysis.

**CE-220L Environmental Chemistry Laboratory****Credits: 1**

Co-requisite(s): CE-220

Course Type(s): MEBP

Soil, aquatic and atmospheric chemistry; environmental analytical chemistry; connections to environmental biology. Sources, reactions, mobility, effects and fates of chemical species in the soil, water and air environments and the effect of human activity on these. Laboratory experiments and field trips will be used to address the needs for this course. Students will gain hands-on experience in both classical and instrumental methods of chemical analysis.

**CE-221 Analytical Chemistry I Quantitative Analysis****Credits: 3**

Prerequisite(s): CE-112 and CE-112L both passed with a grade of C- or higher

Co-requisite(s): CE-221L

Term Offered: Spring Term

Course Type(s): None

Theoretical principles and techniques of volumetric, gravimetric, and potentiometric methods of analysis; treatment of analytical data, equilibria involving acid-base, redox, complexometric, and precipitation reactions.

**CE-221L Analytical Chemistry I Laboratory Quantitative Analysis****Credits: 1**

Co-requisite(s): CE-221

Term Offered: Spring Term

Course Type(s): None

Laboratory techniques, procedures, and practice in quantitative analysis of selected substances by volumetric, gravimetric, and potentiometric methods.

**CE-241 Organic Chemistry I****Credits: 3**

Prerequisite(s): CE-112 and CE-112L both passed with a grade of C- or higher

Co-requisite(s): CE-241L

Term Offered: All Terms

Course Type(s): None

Preparations and reactions of major classes of organic compounds with extensive discussion of reaction mechanisms and stereo-chemistry; interpretation of mass, infrared, and nuclear magnetic resonance spectra.

**CE-241L Organic Chemistry I Laboratory****Credits: 1**

Prerequisite(s): CE-112 and CE-112L.

Co-requisite(s): CE-241

Term Offered: All Terms

Course Type(s): None

Laboratory work demonstrating the basic techniques of organic chemistry; qualitative organic analysis; and use of the gas chromatograph and infrared and nuclear magnetic resonance spectrometers to solve problems. Three hours per week.

**CE-242 Organic Chemistry II****Credits: 3**

Prerequisite(s): CE-241 and CE-241L, both passed with a grade of C- or higher.

Co-requisite(s): CE-242L.

Term Offered: All Terms

Course Type(s): MEBP

Preparations and reactions of major classes of organic compounds with extensive discussion of reaction mechanisms and stereo-chemistry; interpretation of mass, infrared, and nuclear magnetic resonance spectra.

**CE-242L Organic Chemistry II Laboratory****Credits: 1**

Prerequisite(s): CE-241 and CE-241L, both passed with a grade of C- or higher.

Co-requisite(s): CE-242.

Course Type(s): None

Laboratory work demonstrating the basic techniques of organic chemistry; qualitative organic analysis; and use of the gas chromatograph and infrared and nuclear magnetic resonance spectrometers to solve problems. Three hours per week.

**CE-298 Special Topics in Chemistry (200 Level)****Credits: 1-3**

Prerequisite(s): CE-111, CE-111L, CE-112, CE-112L and others as announced in the course schedule

Course Type(s): None

An intensive study of a particular subject or problem in chemistry to be announced prior to registration. May be conducted in a lecture, seminar or laboratory format.

**CE-299 Independent Study in Chemistry****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

Original research work planned and carried out with the assistance of a faculty research advisor. The number of course credits will be arranged with the advisor. Three hours per credit. Prior permission of the directing professor and department chair is required to take this course.

**CE-314 Chemical Literature and Seminar****Credits: 3**

Prerequisite(s): CE-241

Term Offered: All Terms

Course Type(s): RD

The course focuses on the professional development of chemistry majors including: the chemical literature and how to use it, presentation skills for chemists, laboratory safety, professional ethics, and intellectual property.

Prerequisite: CE-241

**CE-322 Analytical Chemistry II****Credits: 3**

Prerequisite(s): CE-221, CE-221L, MA-116, PH-212, and PH-212L, all passed with a grade of C- or higher, or permission of the instructor.

Term Offered: Fall Term

Course Type(s): None

Basic components of instruments and their arrangements; fundamental principles, applications, and limitations of instrumental methods of chemical analysis; spectroscopic methods (UV-Visible, Fourier transform infrared, Raman, Fluorescence, Phosphorescence, Atomic absorption, Atomic emission, and Mass spectrometry); electrochemical methods (Potentiometry and Voltammetry); separation methods (High Performance liquid chromatography, Gas chromatography, and Capillary Electrophoresis).

**CE-322L Analytical Chemistry II Laboratory****Credits: 2**

Co-requisite(s): CE-322

Term Offered: Fall Term

Course Type(s): WT

Basic components of instruments and their arrangements; fundamental principles, applications and limitations of instrumental methods of chemical analysis; spectroscopic methods (UV-Visible, Fourier transform infrared, Fluorescence, Atomic absorption and Atomic emission); electrochemical methods (Potentiometry and Voltammetry); separation methods (High Performance liquid chromatography, Gas chromatography - Mass spectrometry). Laboratory experiments and an independent research project will be used to address the needs of this course. Students will gain hands-on experience in instrumental methods of chemical analysis for both qualitative and quantitative work.

**CE-325 NMR Spectroscopy****Credits: 3**

Prerequisite(s): CE-242L

Term Offered: Fall Term

Course Type(s): None

A treatment of the theories and applications of modern Fourier transform nuclear magnetic resonance (FT-NMR) spectroscopy. Applications of FT-NMR spectroscopy to the investigation and solution of chemical problems will be emphasized.

**CE-333 Biochemistry****Credits: 3**

Prerequisite(s): CE-242

Co-requisite(s): CE-333L

Term Offered: Fall Term

Course Type(s): None

Biochemistry is a field about chemistry in living organisms. Biochemistry CE-333 is a 1-semester complete biochemistry course. This water-based chemistry will initially explore monomers (amino acids, monosaccharides and nucleotides) followed by their polymers (protein, polysaccharides and nucleic acids) with a focus on the relationship between their structure and function. Moreover, structures and properties of fatty acids to phospholipids and membranes will be studied. The properties of these molecules and how they all interact together will be further studies through the concepts of enzymology and metabolism. Being multidisciplinary, this course should be taken by chemistry majors, as well as students aiming at graduate school or medical professional fields. Prerequisite: CE-242 Corequisite: CE-333L

**CE-333L Biochemistry Laboratory****Credits: 1**

Term Offered: Fall Term

Course Type(s): WT

CE-333L will provide training in modern biochemical techniques, using proteins, nucleic acids, carbohydrates and lipids. This laboratory will provide students with hands-on experience in basic and modern techniques commonly used in biochemistry, that will be required in the pursuit of their academic and career objectives. Prerequisites: EN-101 and EN-102 Corequisite: CE-333

**CE-350 Research in Chemistry****Credits: 1-4**

Term Offered: All Terms

Course Type(s): EX5

Original research work, carried out under the mentorship of a faculty research advisor. Research conducted by the students may be submitted for presentation, publication, or review, as appropriate. The number of course credits will be determined by arrangement with the advisor. Three hours/week per credit, 1-3 credits. Prerequisites: Determined by faculty mentor.

**CE-360 Biophysical Chemistry****Credits: 3**

Prerequisite(s): CE-242

Term Offered: All Terms

Course Type(s): None

Principles and applications of physical chemistry including thermodynamics, kinetics and spectroscopy to study the structure and function of biological macromolecules. Prerequisite: CE-242

**CE-360L Biophysical Chemistry Laboratory****Credits: 1**

Prerequisite(s): CE-242

Term Offered: All Terms

Course Type(s): None

The Lab course is designed to give hands-on experience with contemporary experimental instrumentation and techniques that are widely used in the biophysical characterization of biological macromolecules. Students will also work on individual projects designed to provide a real-life academic/industrial research experience and will submit a clear and concise report and presentation based on the experimental results. Prerequisite: CE-242 Corequisite: CE-360

**CE-374 Industrial Chemistry****Credits: 3**

Prerequisite(s): CE-242

Term Offered: Fall Term

Course Type(s): None

A treatment of some reaction chemistry, chemical processes, thermodynamics, chemical equilibria, and kinetics that are important to the chemical industry. Fundamental principles and problems of the chemical industry will also be discussed.

**CE-381 Physical Chemistry I****Credits: 3**

Prerequisite(s): MA-116, PH-212, both passed with a grade of C- or higher.

Co-requisite(s): CE-381L.

Term Offered: Fall Term

Course Type(s): None

Basic principles of quantum mechanics essential for understanding of atomic and molecular spectroscopy are covered. The specific topics included: Quantum Mechanics: postulates and formulation of Schrodinger equation, uncertainty principle, particle in a box, simple harmonic oscillator, rigid rotor, Hydrogen atom, hydrogenic wave functions, Pauli principle, Helium atom, Hydrogen molecule, Molecular Orbital Theory; Introduction and applications of Computational Chemistry; Spectroscopy; Light-matter interaction, term symbols, spectroscopic selection rules, electronic spectra of atoms and molecules, rotational and vibrational spectra, IR and Raman spectroscopy, Lasers.

**CE-381L Physical Chemistry I Laboratory****Credits: 1**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor.

Co-requisite(s): CE-381.

Term Offered: Fall Term

Course Type(s): WT

This course is designed to be taken concurrently with CE-381, Physical Chemistry I. The experiments performed complement material studied in CE-381. Topics covered include: UV-Vis, FT-IR, Raman, Laser Induced Fluorescence, and Flash Photolysis spectroscopies. This laboratory also requires the use of modern computer platforms and quantum chemistry software for molecular simulations and data analysis.

**CE-382 Physical Chemistry II****Credits: 3**

Prerequisite(s): MA-116, PH-212 and CE-381, all passed with a grade of C- or higher

Co-requisite(s): CE-382L

Term Offered: All Terms

Course Type(s): None

Amplification of concepts in thermodynamics, chemical kinetics and dynamics and application of these to gases, liquids, and solutions to provide a solid background for understanding the physical principles that govern behavior of chemical and biological systems. The specific topics included: Thermodynamics: standard functions (enthalpy, entropy, etc.), ensembles, partition function. Gibbs chemical potential, phase equilibria, electrochemical cells; Kinetic Theory of Gases: Maxwell-Boltzmann distribution, collision frequency; effusion rate, heat capacity, transport processes (diffusion, viscosity, etc.); Chemical Kinetics: differential and integral expressions for rate laws, reaction mechanisms, Chemical Dynamics: collision theory, absolute rate theory, transition state theory. Corequisite: CE-382L

**CE-382L Physical Chemistry II Laboratory****Credits: 1**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor.

Co-requisite(s): CE-382.

Term Offered: Spring Term

Course Type(s): WT

This course is designed to be taken concurrently with CE-382, Physical Chemistry I. The experiments performed complement material studied in CE-382. Topics covered include experimental investigation of gas laws, phase transitions, transport properties of gases (diffusion), electrochemistry (electrolysis, electroplating, and voltammetry) and chemical kinetics (fluorescence quenching). This laboratory also requires the use of modern computer platforms and quantum chemistry software for simulations of chemical kinetics, dynamics and data analysis.

**CE-388 Cooperative Education: Chemistry****Credits: 1-3**

Prerequisite(s): CE-221, CE-221L, CE-242, and CE-242L; an overall G.P.A. of 2.00; fifteen credits completed at Monmouth University, and approval of the Department of Chemistry

Term Offered: Spring Term

Course Type(s): EX2

Application of chemical concepts and skills learned in lecture and laboratory to work-related experiences. Students and faculty sponsors maintain journals of their cooperative education opportunities with the assistance of the Director of Cooperative Education. Students will work forty hours per credit per semester at their jobs. Students will maintain journals of their cooperative education experiences and write reports demonstrating how their experiences helped them achieve their learning goals. This is a pass/fail course. Departmental approval is required to take this course.

**CE-389 Internship in Chemistry****Credits: 1-3**

Prerequisite(s): CE-221, CE-221L, CE-242, CE-242L, an overall GPA of 2.00, fifteen credits completed at Monmouth University, and approval by the Department of Chemistry

Term Offered: All Terms

Course Type(s): EX1

Provides an opportunity to apply chemical concepts and skills learned in lecture and laboratory to work-related experiences. Students and faculty sponsors will identify internship opportunities. Students will work forty hours per credit per semester in their internship positions. Students will maintain journals of their internship experiences and write reports demonstrating how their internship experiences helped them achieve the learning objectives identified at the start of the internships. This is a pass/fail course.

**CE-398 Special Topics in Chemistry (300 Level)****Credits: 1-3**

Prerequisite(s): CE-241, CE-241L, CE-242, CE-242L, or as announced in the course schedule

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in chemistry to be announced prior to registration. May be conducted in a lecture, seminar, or laboratory format.

**CE-398L Special Topics in Chemistry****Credits: 3**

Course Type(s): None

An intensive study of a particular subject or problem in chemistry to be announced prior to registration. Conducted in a laboratory format.

**CE-399 Independent Study in Chemistry (300 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Original research work planned and carried out with the assistance of a faculty research advisor. The number of credits will be arranged with the advisor. Prior permission of the directing professor and department chair is required to take this course.

**CE-401 Advanced Inorganic Chemistry****Credits: 3**

Prerequisite(s): CE-242 and CE-242L both passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Modern theories of inorganic chemistry, including advanced considerations of atomic and molecular structure, chemical bonding, complex ions, solid state chemistry, magnetic properties of ions, periodicity, and contemporary problems.

**CE-401L Advanced Inorganic Chemistry Laboratory****Credits: 1**

Co-requisite(s): CE-401

Term Offered: All Terms

Course Type(s): None

Inorganic synthetic techniques, including inert atmosphere, high temperature, and non-aqueous solvents; methods of characterization of inorganic compounds, including use of spectroscopic and other instrumental methods. Three hours per week.

**CE-405 Methods of Inorganic Chemistry****Credits: 3**

Prerequisite(s): CE-401

Term Offered: Spring Term

Course Type(s): None

Coverage of important experimental methods in inorganic structural determinations. Topics include symmetry and group theory, computational methods, mass spectrometry, diffraction analysis and nuclear magnetic resonance, electron paramagnetic resonance, rotational, Mossbauer, vibrational, electronic absorption, photoelectron spectroscopies. The application of these techniques to the characterization and determination of inorganic substances is the emphasis of the course.

**CE-432 Advanced Analytical Chemistry****Credits: 3**

Prerequisite(s): CE-322 passed with a grade of C- or higher.

Term Offered: All Terms

Course Type(s): None

This course examines modern analytical techniques with special emphasis on gas chromatography (GC), liquid chromatography (LC) and capillary electrophoresis (CE) in terms of basic principles, instrumentation, method development and practical applications. Mass spectrometry (MS) and ion mobility spectrometry (IMS) are also extensively explored as detection techniques for GC (GC-MS and GC-IMS), LC (LC-MS), and CE (CE-MS). Multidimensional separations (LC x LC & GC x GC) and their practical applications are also examined. A combination of traditional lecture notes, textbook readings and published peer-reviewed scientific literature will be used to explore and discuss topics. The course also involves case studies on analytical method development, data interpretation and applications of analytical techniques covered as well as visits to or tours of facilities with sophisticated analytical instrumentation relevant to the course.

**CE-452 Advanced Organic Chemistry****Credits: 3**

Prerequisite(s): CE-242 and CE-242L both passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Selected topics of modern, theoretical, organic chemistry.

**CE-454 Advanced Biochemistry****Credits: 3**

Prerequisite(s): CE-333

Term Offered: Spring Term

Course Type(s): None

Advanced Biochemistry provides a deeper focus on the biochemistry of several diseases as well as medical biochemistry while building upon the concepts learned in the prerequisite biochemistry course (CE-333). Using current publications to support content, topics such as gene therapy, various blood test works will be discussed. Topics of the biochemistry of Cancer, AIDS and Aging will also be covered.

**CE-460 Electrochemical Methods****Credits: 3**

Co-requisite(s): CE-341

Term Offered: Spring Term

Course Type(s): None

Theory and applications of electrochemical analysis: electrode processes, thermodynamics and kinetics of electrode reactions, controlled potential and controlled current microelectrode techniques, and bulk electrolysis.

**CE-475 Computational Chemistry and Molecular Modeling****Credits: 3**

Prerequisite(s): CE-341 and CE-341L both passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Principal methods and techniques used to study organic molecules and biomolecules by computational methods. Interpretation of chemical data with the aid of a computer. Atomic and molecular orbitals, force fields, molecular dynamics, and molecular modeling and drug design.

**CE-484 Methods Development and Statistical Process Control****Credits: 4**

Prerequisite(s): CE-432 and MA-151 both passed with a grade of C- or higher.

Term Offered: All Terms

Course Type(s): None

Concentrates on methods development in the analytical laboratory with applications in pharmaceutical, food product, cosmetics, and environmental testing. This course focuses on methods development and optimization to satisfy regulatory and customer requirements, validating analytical methods, application of newer analytical methods, and those involved in quality control, quality assurance, and quality assessment. Discusses regulatory framework and requirements including FDA, WHO, and ICH examples. Focus includes development and use of statistical process control as tools to improve quality and productivity.

**CE-486 Medicinal Chemistry****Credits: 3**

Prerequisite(s): CE-241 and CE-242

Term Offered: Spring Term

Course Type(s): None

A Medicinal Chemistry course in which you will learn about the application of chemistry to the discovery, design and synthesis of new drugs. Medicinal chemistry is an interdisciplinary science. Its successful application to new drug discovery and development involves knowledge of organic chemistry, biology, physiology, microbiology, biochemistry, pharmacology and medicine among others. Topics that will be covered in this course include: structure and function of biological targets (proteins, enzymes, receptors and DNA/RNA); sources of new drugs from nature or synthesis; methods used to identify relevant structural features for biological activity; fate of a drug in the body and interaction with its biological target (pharmacokinetics and pharmacodynamics); strategies for drug design and case studies.

**CE-489 Internship in Chemistry****Credits: 1-3**

Prerequisite(s): CE-221, CE-221L, CE-242, CE-242L, an overall GPA of 2.00, fifteen credits completed at Monmouth University, and approval by the Department of Chemistry

Term Offered: Spring Term

Course Type(s): EX1

Provides an opportunity to apply chemical concepts and skills learned in lecture and laboratory to work-related experiences. Students and faculty sponsors will identify internship opportunities. Students will work forty hours per credit per semester in their internship positions. Students will maintain journals of their internship experiences and write reports demonstrating how their internship experiences helped them achieve the learning objectives identified at the start of the internships. This is a pass/fail course.

**CE-498 Special Topics in Chemistry (400 Level)****Credits: 1-3**

Prerequisite(s): CE-242 or as announced in the course schedule

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in chemistry to be announced prior to registration. May be conducted in a lecture, seminar, or laboratory format.

**CE-499 Independent Study in Chemistry****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Original research work planned and carried out with the assistance of a faculty research advisor. The number of course credits will be arranged with the advisor. Three hours per credit. Prior permission of the directing professor and department chair is required to take this course.

**CE-499T Independent Study in Chemistry**

Term Offered: All Terms

Course Type(s): None

Original research work planned and carried out with the assistance of a faculty research advisor. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 3**

## Communication (CO)

**CO-100 Communication Foundations**

Term Offered: All Terms

Course Type(s): None

An introduction to the Communication discipline and its central questions. Students will examine the applications of Communication knowledge in the world and explore key contemporary issues and debates within the field.

**Credits: 3****CO-102 Radio Production**

Term Offered: All Terms

Course Type(s): COSPT

Basic principles of radio broadcasting, with emphasis on pre-production, planning, and audio production techniques.

**Credits: 3****CO-106 Listening**

Term Offered: Fall Term

Course Type(s): COCCL

Practice listening skills in a variety of personal, academic, and professional contexts. Applying current research in listening theory. Understanding and appreciating the importance of listening every day and for a lifetime.

**Credits: 3****CO-120 Interpersonal Communication**

Term Offered: All Terms

Course Type(s): None

The principles and fundamentals of human oral communication in person-to-person and small group environments; the process of encoding and decoding messages, language usage, listening, and feedback.

**Credits: 3****CO-145 Introduction to Video Production**

Term Offered: All Terms

Course Type(s): IM

Introduction to basic video production equipment, production processes, and approaches to the creation of time-based video content. No previous video course work or experience is required. This course will demonstrate a wide variety of practical and critical tools that will help you gain a meaningful understanding of how video products are made, how to work with others in production teams, and how to work in front of and behind cameras to create and produce content.

**Credits: 3****CO-155 Media Literacy**

Term Offered: All Terms

Course Type(s): None

Introduces students to a range of critical thinking skills for use when encountering media materials, including television, radio, print, and Internet resources. Students will develop an understanding of the complex functions of the mass media industries and an understanding of the aesthetic, emotional, cognitive, and moral choices involved in interpreting media messages.

**Credits: 3****CO-199 Independent Study in Communication**

Term Offered: All Terms

Course Type(s): None

Guided research on selected topics in Communication. Prior permission of the directing professor and department chair is required to take this course, along with demonstrated ability in the proposed area of concentration.

**Credits: 3****CO-201 Producing Live Radio**

Prerequisite(s): CO-102

Course Type(s): COMCS, CORTA

Principles of radio interviewing, storytelling, and live music production will be covered, with an emphasis on pre-production, planning, and on-air techniques. A central focus of this class is to prepare students for creative work in radio. This class will require on-air performance on WMCX.

**Credits: 3****CO-204 Introduction to Media Writing**

Term Offered: All Terms

Course Type(s): None

The course introduces the diverse field of media writing and integrates a comprehensive scope of the various skills required of today's effective writer. Class sessions will offer students practical and critical tools designed to develop a range of writing styles and techniques while introducing related applications and career opportunities. Lab assignments and writing projects will integrate the tools explored in class.

**Credits: 3****CO-205 Topics in History of Sports and Media**

Term Offered: Fall Term

Course Type(s): COJPS, COMCS, COSPT

Examines the development and evolution of selected sports and fields of athletic endeavor primarily in the United States. Students will gain knowledge of various sports, how media has covered and influenced these sports, and how those sports have impacted and influenced American culture and society. This course is repeatable for credit.

**Credits: 3****CO-206 Issues in Sports Media**

Term Offered: Spring Term

Course Type(s): COJPS, COMCS, COSPT

Students examine the way that the media covers, analyzes, and critiques sports and sports issues. Media and sport have become two powerful and influential forces in society today. This class will demonstrate how the two have become irrevocably intertwined.

**Credits: 3****CO-210 Voice and Diction**

Term Offered: All Terms

Course Type(s): COCCL, COCSD, COMCS, CORTA

Analyzes voice, vocal production, articulation challenges, and cultural influences; Utilizes creative practices to improve vocal confidence, clarity, quality, variety, flexibility, and range.

**Credits: 3****CO-211 Introduction to Journalism**

Term Offered: All Terms

Course Type(s): COCCL, COSPT

Explores how concepts of news are changing and develops a hands-on understanding of the way news is created. Course covers basic journalism techniques and standards.

**Credits: 3****CO-215 Newswriting**

Prerequisite(s): CO-211; and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

Advanced theory and practicum involving newswriting and reporting.

**Credits: 3**

**CO-216 Journalism/PR Career Preparation****Credits: 1**

Term Offered: All Terms

Course Type(s): None

Instructs Communication majors how to effectively pursue opportunities for employment, professional training, and internships. It is designed specifically for Communication students emerging as professionals in the fields of Journalism and Public Relations.

**CO-217 Radio/Television Career Preparation****Credits: 1**

Term Offered: All Terms

Course Type(s): None

Instructs Communication majors how to effectively pursue opportunities for employment, professional training and internships. It is designed specifically for Communication students studying Radio and Television.

**CO-218 Communication Studies Career Preparation****Credits: 1**

Term Offered: All Terms

Course Type(s): None

Prepares Communication Studies concentration students how to effectively pursue opportunities for employment, career development and professional training in the field of Communication.

**CO-220 Public Speaking****Credits: 3**

Term Offered: All Terms

Course Type(s): None

An introduction to the principles and practices of effective public speaking, using traditional rhetorical principles as applied in the composition and delivery of various types of speeches.

**CO-221 Introduction to Digital Media****Credits: 3**

Term Offered: All Terms

Course Type(s): IM, TL

Provides the skills and theoretical context to produce, manage and optimize digital media to create dynamic and engaging websites, broadcast graphics and imagery for presentations. The course uses in class lectures, hands-on demonstrations, directed readings and discussions to help students understand the parameters of their digital tools and make high quality, socially engaged work.

**CO-222 User Experience and Interaction Design****Credits: 3**

Term Offered: All Terms

Course Type(s): COMCS, CORTW, IM

Guides students through research, planning, and designing of interactive, transmedia, web, mobile, and gaming formats and platforms. Topics covered include computer-mediated communication, transmedia storytelling, information architecture for digital experiences, human computer interfaces, wireframes, and web and mobile device prototyping.

**CO-223 Argumentation and Debate****Credits: 3**

Prerequisite(s): HU-201 or permission of the instructor

Term Offered: Spring Term

Course Type(s): COCSD

The principles of argumentation and their application in the debate situation; the nature and structure of reasoning, the types of evidence, the construction of briefs, and the researching of debate propositions.

**CO-224 Introduction to Mass Communication****Credits: 3**

Term Offered: All Terms

Course Type(s): COCCL, COJPS, COMCS

The historical development and functions of mass media, such as radio, television, print, and film.

**CO-225 Business and Professional Communication****Credits: 3**

Term Offered: All Terms

Course Type(s): COJPR, COJPS, COMCS, RD

Principles and techniques for oral and written communication skills within the business and professional situations; emphasis on job interviewing with resumes and cover letters, professional emails and social media posts, informative and persuasive presentations, and listening skills.

**CO-226 Intercultural Communication****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, CD, RE

The process of communication between people of different cultures; the influences of culture on communicative messages and meanings.

**CO-231 Multicultural Voices: From Page to Stage****Credits: 3**

Term Offered: Spring Term

Course Type(s): COCCL, COCSD

Explores contemporary multicultural voices through published short stories and poetry, including slam poetry/spoken word and new forms of digital literature. Using performance of literature as a method of analysis and presentation, students will also consider enactments of identity through diverse perspectives on race/ethnicity, gender, sexuality, class, ability, and nationality.

**CO-233 Rhetoric and Persuasion****Credits: 3**

Term Offered: All Terms

Course Type(s): COJPS

A humanistic examination of rhetorical communication. Surveys rhetorical theory from classical to modern times with particular application to its importance in civic life. Introduces the practice of rhetorical criticism of written, spoken, visual, and digital media texts.

**CO-234 Climate Communication****Credits: 3**

Course Type(s): RD

An examination of the role of communication in environmental science, activism, and policy. Topics include the challenges of communicating about science, risk communication, and environmental advocacy campaigns. These concepts will be put into practice through the study of argumentation practices and the performance of original, researched-based presentations.

**CO-235 Sports Broadcasting****Credits: 3**

Prerequisite(s): CO-102 or CO-145

Term Offered: All Terms

Course Type(s): COJPS, COMCS, COSPT

Prepares students for an internship at a public or commercial radio station or an entry-level position. Students will learn how to gather, organize, write, report, and broadcast radio sports.

**CO-236 Sports Reporting****Credits: 3**

Term Offered: Spring Term

Course Type(s): COJPS, COMCS, COSPT

Introduction to the field of sports journalism, which includes standardized news writing techniques as well as feature writing.

**CO-240 Smartphone Video Production****Credits: 3**

Term Offered: Fall Term

Course Type(s): COMCS, CORTP

Teaches students how to use their smartphones to produce high-quality videos which they can then share with a large and diverse online community. From the development of an idea and importance of pre-production planning to the final stages post-production and marketing, this class will guide students through the entire process of creating and sharing visual media.

**CO-241 Introduction to Screen Studies****Credits: 3**

Term Offered: All Terms

Course Type(s): COMCS, COSS, IM

Introduction to the disciplined study of the Screen Arts - motion picture film, television, video, and digital multimedia - with respect to the operation of the various elements of sound and image as they operate within the text of the visual work screened. Includes screening and discussion of various representative works.

**CO-242 Creating Good Radio****Credits: 3**

Prerequisite(s): CO-102

Term Offered: Spring Term

Course Type(s): COMCS, CORTP

Broadcasting as effective communication; practical experience in writing, producing, directing, and performing in radio programs; critical analysis of various professional broadcasts.

**CO-243 History of the Motion Picture****Credits: 3**

Term Offered: Spring Term

Course Type(s): COMCS, COSS

An introduction to the major phases of motion picture history from its origins to the present, including screenings and discussions of major film movements, technological innovations, and landmark directors.

**CO-246 Studio-Based Video Production****Credits: 3**

Prerequisite(s): CO-145

Term Offered: All Terms

Course Type(s): COMCS, CORTP

The application of aesthetic theory and production principles via video assignments produced in a production studio and control room. Emphasis is placed upon the professional crew positions to provide both a deep and wide-range of technical mastery. Experiences in this course prepare students for work in studio news, sports broadcasting, video podcasting, greenscreen work, Youtube channels, social media reels, and broadcast-style formats.

**CO-247 Live TV Sports Production****Credits: 3**

Term Offered: Fall Term

Course Type(s): COMCS, CORTP, COSPT

Hands-on introduction to the process of producing live television sports broadcasts. Students will examine each of the staff positions, and will serve in many of them as crew for the TV sports broadcasts on campus.

**CO-250 Global Communication****Credits: 3**

Course Type(s): BI.EL, COCCL, COJPR, COJPS, COJPT, GU, RE

Introduces students to the various aspects of global communication, primarily media communication, journalism, and public relations. Particular emphasis will be on the categories of difference such as gender, race, class, and ethnicity. Global communication is reshaping economic, social, cultural, and political aspects of our lives nationally and internationally. Hence, in this course students will explore essential components of global communication, emphasizing shifts in national, regional, and international media patterns and trends including production, distribution, and consumption.

**CO-262 Co-Curricular Practicum in Radio****Credits: 1**

Prerequisite(s): CO-378 or permission of the instructor

Term Offered: All Terms

Course Type(s): None

Credit for specified assignments at the University radio station, WMCX, is awarded after a term-end evaluation by the instructor of the project agreed upon with the student. May not count toward major requirements. May be repeated for a total of six credits; limited to students active at the radio station for at least one semester.

**CO-263 Co-Curricular Practicum in Television****Credits: 1**

Term Offered: All Terms

Course Type(s): None

Credit for specified assignments at the University television station is awarded after a term-end evaluation by the instructor of the project agreed upon with the student. May not count toward major requirements. May be repeated for a total of six credits; limited to students active at HAWK TV for at least one semester. Instructor permission is required to take this course.

**CO-264 Co-Curricular Practicum in Journalism****Credits: 1**

Term Offered: All Terms

Course Type(s): None

Credit for specified assignments at the University newspaper is awarded after a term-end evaluation by the instructor of the project agreed upon with the student. May not count toward major requirements. May be repeated for a total of six credits; limited to students active at The Outlook for at least one semester. Instructor permission is required to take this course.

**CO-265 Co-Curricular Practicum in Public Relations****Credits: 1**

Term Offered: All Terms

Course Type(s): None

Term Offered: All Terms

Course Type(s): None

One credit for specified assignments with MOCC and by extension the University Communication Department is awarded after a term-end evaluation by the instructor of the project agreed-upon with the student. The course may not count toward other major requirements. May be repeated for a total of six credits. Permission of the instructor is required to take this course.

**CO-268 Co-Curricular Practicum in HawkInteractive****Credits: 1**

Term Offered: All Terms

Course Type(s): None

This practicum serves as an opportunity for students to further develop their interactive media skills, work as part of a design team, and to grow their media portfolio with a focus on to the emerging media tools and platforms. Credit for specified assignments as part of Hawk Interactive Student Media Organization is awarded after a term-end evaluation by the instructor of the project agreed upon with the student. Hawk Interactive projects and activities make use of the IDM Research Lab, an experimental, digital media laboratory which is academically affiliated with and supported by the Department of Communication. The course may be repeated for a total of six credits; limited to students active in the Hawk Interactive Organization for at least one semester. Instructor permission is required to take this course.

**CO-271 Ethics, Justice and American Prisons****Credits: 3**

Prerequisite(s): SO-101 or higher or GS-225 or higher.

Term Offered: Fall Term

Course Type(s): SJS

Explores the rise of mass incarceration in the United States, with a critical look at the ethical, socio-cultural, political and economic factors that shape the American prison system today. The course is also the gateway course to The Monmouth University Academic Exchange Program, also referred to as MU-AEP, a collaborative effort between Monmouth University and the New Jersey Department of Corrections. This program, of which this course is a requirement, is offered by Monmouth University to help to facilitate a transformative exchange of ideas and perspectives between incarcerated students and non-incarcerated students and non-incarcerated students inside the New Jersey state prison. Also listed as SO-271.

**CO-272 Real People Reel Stories****Credits: 3**

Term Offered: Spring Term

Course Type(s): COMCS, CORTP, EX5

Learning to tell a story through video testimonies/interviews. Socially conscious topics will be chosen from quality of life issues being explored by our on-campus Polling Institute or those presented by community aid organizations. Instructor permission is required to take this course.

**CO-275 Performance for Broadcasting****Credits: 3**

Prerequisite(s): CO-102

Term Offered: All Terms

Course Type(s): CORTA

The fundamentals of radio announcing will be stressed along with station orientation. The student will develop strong vocal skills for a variety of radio personalities over the air.

**CO-289 Internship in Communication****Credits: 3**

Prerequisite(s): CO-216 or CO-217 or CO-218, departmental approval, and Junior standing

Term Offered: Summer Term

Course Type(s): EX1

Supervised, practical experience in communication (radio, television, public relations, journalism, and human communication); emphasis on the application of discipline specific technologies and theories in a professional environment directly related to one's course of study.

**CO-290 Media Law****Credits: 3**

Term Offered: All Terms

Course Type(s): COCCL, COCST, COJPT, COMCS, CORTT, PSAL

How the mass media is constrained and protected by the law and court interpretation. Overview will focus on libel, copyright, obscenity, free press, and other legal/illegal aspects of mass communication. Also listed as PS-290.

**CO-292 Communication Research Methods****Credits: 3**

Prerequisite(s): CO-100 and at least 6 credits in Communication.

Term Offered: All Terms

Course Type(s): None

Introduction to the use of the scientific methods, various research approaches, and application of both qualitative and quantitative methods for application in the field of communication.

**CO-293 Social Media****Credits: 3**

Term Offered: All Terms

Course Type(s): COCCL, COJPR, COJPS, COJPT, COMCS, IM

An interactive, intensive study of social media with regard to the field of public relations. Students will be introduced to new contexts and forms of social media, an ever-growing area of study.

**CO-295 Introduction to Public Relations****Credits: 3**

Term Offered: All Terms

Course Type(s): COCCL, COSPT

A comprehensive survey of the field of public relations. Emphasis on the evolution, role, functions, and scope of public relations in American society.

**CO-296 Digital Fundraising and Events****Credits: 3**

Prerequisite(s): CO-295

Term Offered: Spring Term

Course Type(s): COJPR, COJPS, COJPT, COMCS, COSPT

Designed to provide an introduction to the practice, programs, and publics of fund raising. Development of a fund raising campaign will be produced for a nonprofit client. Written and oral communication skills essential to the professional fund raiser will be practiced in class and through assignments. May be offered in a hybrid format (partially online).

**CO-298 Special Topics in Communication (200 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in communication to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**CO-299 Independent Study in Communication****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided research on selected topics in Communication. Prior permission of the directing professor and department chair is required to take this course, along with demonstrated ability in the proposed area of concentration.

**CO-300 Co-Curricular Practicum in Service Learning****Credits: 1**

Prerequisite(s): Two 200+ level courses in Communication, permission of the instructor, and a minimum G.P.A. of 2.50

Term Offered: Spring Term

Course Type(s): None

Students will apply communication theory in dynamic community settings, working on impactful service learning projects while developing communication skills and engaging with industry professionals. The course may not count toward other major requirements. Permission of the instructor, and a minimum G.P.A. of 2.50 are required to take this course.

**CO-301 Topics in Communication Theory and Research Credits: 3**  
 Prerequisite(s): CO-292, EN-101, EN-102, and eighteen credits in Communication; or permission of the instructor  
 Term Offered: All Terms  
 Course Type(s): WT  
 Explores a specialized topic or paradigm in Comm. Theory and Research. The course will include deep exploration of the discipline-specific theories and research methods for understanding and studying the focal topic.

**CO-303 Creating a Culture of Peace Credits: 3**  
 Term Offered: Spring Term  
 Course Type(s): COCST, COJPT  
 An introduction to theories of nonviolent communication, the use of practical communication skills for nonviolent conflict resolution, and applications of nonviolent communication in historical and contemporary peace movements.

**CO-304 Onstage and in the Streets: Performance and Culture Credits: 3**  
 Course Type(s): CD, COCSD, COCST  
 Introduction to understanding diverse popular performance practices as unique and contested expressions of culture and identity. Studying human performances within everyday life, in public spaces, and through cultural rituals, street theatre, and professional productions, a variety of contemporary theories, methods, and critical issues are considered within the fields of communication, theatre, performance, and cultural studies. Students must be enrolled in the Study Abroad program in Cadiz, Spain. Also listed as FS-304.

**CO-306 Interactive Media Productions Credits: 3**  
 Prerequisite(s): CO-221  
 Course Type(s): COMCS, CORTA, IM  
 This course uses audio, video, augmented, and virtual reality technologies in creative and professional production contexts. Traditional techniques from Communication, Media, & Performance Studies will be applied to new technologies to develop a series of Mixed Reality Performances. Students will collaborate on solo and group exercises that will culminate in a final creative project. Narrative, storytelling, marketing and design, worldbuilding, and embodiment will be foundational topics in this course.

**CO-309 Family Communication Credits: 3**  
 Term Offered: All Terms  
 Course Type(s): COCCL, COCSP, COCST  
 Explores couple and family communication processes. Focuses on how individuals use interaction to establish, maintain, and change personal, romantic and family relationships.

**CO-311 Communication Ethics Credits: 3**  
 Term Offered: All Terms  
 Course Type(s): COCCL, COJPS, COMCS  
 An introduction to communication ethics and related contemporary issues intended to support students in making principled communication decisions.

**CO-313 Digital Media Writing Credits: 3**  
 Prerequisite(s): CO-295  
 Term Offered: All Terms  
 Course Type(s): None  
 A study into the fundamentals of effective public relations writing, including production of media releases, position papers, and media kits. The course focuses on writing style and technique, along with form and distribution methods.

**CO-315 Making the Short Film Credits: 3**  
 Prerequisite(s): CO-145  
 Term Offered: Fall Term  
 Course Type(s): COMCS, CORTP  
 Students will be given the opportunity to study and apply both the technical and aesthetic principles of film and video production, in addition to examining the characteristics of successful short narrative films. Students will enhance their skills in visual storytelling by developing and producing three short films to screen on both the big and small screen.

**CO-317 Civic Journalism Credits: 3**  
 Prerequisite(s): CO-211  
 Term Offered: Spring Term  
 Course Type(s): COJPS, COJPW, EX5  
 News with a community service attitude. Gain hands-on experience through speakers, field trips, interviews, and involvement with local issues. Students write civic journalism news stories and host a community symposium to encourage dialogue among diverse community groups.

**CO-318 Topics in Film Credits: 3**  
 Term Offered: All Terms  
 Course Type(s): COCCL, COCST, COMCS, CORTT, COSS  
 Explores in-depth a specialized topic relevant to film and cultural studies. The topic changes each time the course is taught and may include a particular film director, genre or historical period. This course is repeatable for credit.

**CO-320 Small Group Communication Credits: 3**  
 Course Type(s): COCCL, COCST, EX3  
 Students explore academic perspectives on the process of group communication, leadership, conflict, decision-making, and problem solving, then reflect on and apply these perspectives outside the classroom in the context of a service learning project. Also listed as SO-320.

**CO-321 Nonverbal Communication Credits: 3**  
 Term Offered: All Terms  
 Course Type(s): COCCL, COCST  
 We constantly communicate without words. We interpret and respond to people around us based on their communication with or without words. How we dress, the eye contact we do or do not make and the reason(s) why, whether we meet "on time" or "noon-ish," how we greet and part company, and many more nonverbals provide numerous, simultaneous channels of information exchange. Nonverbal Communication explores a range of communication types and channels, including kinesic, haptic, proxemic, vocalic, and chronemic forms of communication. Students learn not only how we use and interpret meaning within the nonverbal realm, but also how to more effectively manage their own enactment and impression management across the vast array of signals being sent and received nonverbally. Application of nonverbal communication includes romantic relationships, careers, and media contexts.

**CO-323 Persuasion Credits: 3**  
 Prerequisite(s): CO-100 or CO-233, or permission of the instructor  
 Term Offered: Spring Term  
 Course Type(s): COCCL, COCSP, COCST, COJPS  
 Concepts and principles of communicative messages that influence thoughts, attitudes, and behavior; roles of source, message, channel, and receiver.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                   |

| <b>CO-333 Multimedia Journalism</b><br>Prerequisite(s): CO-211<br>Course Type(s): COJPR, COJPW, IM<br>Explore the world of electronic information from a journalist's perspective. Learn to use and evaluate electronic resources including search engines, e-mail, news groups, directories, and databases for reporting news. Covers reporting and composing news stories for online publication and the legal and ethical questions raised by online news.                                                                                                                                                                                                           | <b>Credits: 3</b> | <b>CO-343 Performance and Social Activism</b><br>Term Offered: Spring Term<br>Course Type(s): COCCL, COCSD, COMCS<br>Students survey the recent history, theories, and methods of creative activist performance and produce original performances that function as embodied visions of social change and/or resistance to social norms. Emphasis is placed on representations of gender, race/ethnicity, sexuality, class, ability, etc. as well as structural inequalities and social injustice.                                                                 | <b>Credits: 3</b> |
| <b>CO-335 Group Techniques in Performance</b><br>Term Offered: Spring Term<br>Course Type(s): COCCL, COCSD<br>Students will learn creative group-based practices and methods of inquiry to develop original performances based on pressing social issues. Collaborative approaches will include historical research, multicultural and critical perspectives, embodied devising, verbatim theatre techniques, and adaptations of texts for public presentation. Also listed as TH-335.                                                                                                                                                                                  | <b>Credits: 3</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                   |

**CO-344 Games and Worldbuilding****Credits: 3**

Prerequisite(s): CO-221

Course Type(s): COMCS, CORTT, IM

This course presents theories of interaction, narrative, and game play. Students will situate such theories in terms of the historical, business, and socio-cultural considerations of interaction and gaming as they learn theoretical tools for understanding interactive narrative structures. Students will learn to analyze and parse game content for storytelling devices, mise-en-scène, game mechanics, player motivations, interactivity, and playability facets. Students will also collaboratively conceptualize and describe characters, levels, and worlds and engage with design theories to analyze and prototype transmedia narratives, paratext, mechanics, and interactive exchanges.

**CO-345 Producing & Directing Video****Credits: 3**

Prerequisite(s): CO-145

Term Offered: Spring Term

Course Type(s): COMCS, CORTP

This course focuses on the executive roles of producers, directors, and showrunners in the crafting of film and video from concept to streaming distribution. Producers and directors lead projects through the various phases of completion forming agreements along the way. Students will delve into the various kinds of positions and crews that may be associated with visual projects. This course will prepare entry-level practitioners to read and prepare production documentation and have familiarity with the workflow and relationships within visual production.

**CO-346 Documentary Film and Video****Credits: 3**

Term Offered: All Terms

Course Type(s): COMCS, CORTW, COSS

An introduction to the history and development of documentary film and video, with screenings and discussions of examples of works from the major movements in documentary, and small group production of an original documentary.

**CO-347 Advanced TV Sports Production****Credits: 3**

Prerequisite(s): CO-247

Course Type(s): COMCS, CORTP, COSPT

Hands-on advanced study of the process of producing live and live-on-tape television sports broadcasts. Students will study each of the crew positions, and will serve in many of them as crew for the TV sports broadcasts on campus.

**CO-348 Advanced Digital Media****Credits: 3**

Prerequisite(s): CO-221

Course Type(s): COJPS, COMCS, CORTP

Building on introductory digital skills, students will advance and expand their knowledge of digital media techniques and workflows while conceptualizing and producing transmedia digital projects. Topics and techniques covered in the course include: motion tracking for video production, drone videography, sound design for visual media, compositing special/practical effects, batch encoding for transmedia, computer scripting for media post-production, interactive visualizations, brand activation, and game asset design.

**CO-350 Broadcast Newswriting and Reporting****Credits: 3**

Prerequisite(s): CO-145

Term Offered: Spring Term

Course Type(s): COJPS, COMCS, CORTW

Writing and reporting techniques for broadcast news; the process of news preparation from leads or sources through copy preparation, to on-air delivery.

**CO-351 Broadcast Copywriting****Credits: 3**

Prerequisite(s): CO-102 or CO-145

Term Offered: All Terms

Course Type(s): COMCS, CORTW

Practical application of creative writing for radio and television.

**CO-352 Broadcast News Operation****Credits: 3**

Term Offered: All Terms

Course Type(s): COMCS, CORTP

Overview of TV studio and newsroom operations with an emphasis on news writing, field reporting and studio production. Students will produce news content, green screen commentaries and specialized packages. Class sessions will provide students with practical and critical tools that will help them gain a better understanding of how compelling, informative content is constructed for broadcast and online news. Open to all majors.

**CO-357 Acting for Television****Credits: 3**

Prerequisite(s): TH-154

Term Offered: Spring Term

Course Type(s): CORTA

Techniques that the on-camera performer uses in various TV situations, commercials, daytime drama, situation comedy, and serious drama. Also listed as TH-357.

**CO-360 Feature Writing****Credits: 3**

Prerequisite(s): CO-211 or permission of the instructor; Junior standing, and EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): COJPR, COJPS, COJPW, WT

Upper level journalism/writing course that examines techniques in writing feature stories for magazines and newspapers. These articles tell true stories combining both journalistic and literary techniques. Personality profiles, issue stories, trend stories and how-to stories are included, among other forms. Readings include Pulitzer Prize winning features.

**CO-365 Screenwriting****Credits: 3**

Prerequisite(s): CO-155 or permission of the instructor

Term Offered: All Terms

Course Type(s): COMCS, CORTW, COSS

Writing techniques for film and television, with an emphasis on the process of screenwriting, from concept to completion and revision, as well as marketing scripts written for the screen.

**CO-367 Media Analysis****Credits: 3**

Prerequisite(s): CO-155; and EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): COCCL, COJPS, COMCS, CORTT, WT

Analysis and critical examination of the content of mass media.

**CO-368 Applied Ethics in American Prisons****Credits: 3**

Prerequisite(s): SO-271 or CO-271

Term Offered: Spring Term

Course Type(s): SJS

The second in the sequence of the Monmouth University Academic Exchange Program, a collaborative effort between Monmouth University and the New Jersey Department of Corrections. This program, of which this course is a requirement, is offered by Monmouth University to help to facilitate a transformative exchange of ideas and perspectives on the topics of ethics and social issues between incarcerated students and non-incarcerated students inside a New Jersey prison. Also listed as SO-368.

**CO-372 Podcasting**

Prerequisite(s): CO-102

Term Offered: Fall Term

Course Type(s): COJPS, COMCS, CORTP

A hands-on study of alternative broadcast mediums and their relation to social media and audience studies. Examples will include Podcasting specifically, with discussion on Internet radio, LPFM, Ham Radio and Pirate radio.

**Credits: 3****CO-373 Music Promotion**

Term Offered: Spring Term

Course Type(s): CORTT

A critical examination of the inner workings and business strategies that exist within the symbiotic relationship between the radio and music industry. Topics of discussion include: payola, marketing, promotion, indecency/obscenity, political economy theory, gate-keeping theory, subculture theory, and audience-making theories. Students must have Junior or higher standing to take this course.

**Credits: 3****CO-374 Radio Programming and Promotion**

Prerequisite(s): CO-102

Course Type(s): CORTP

Overview of the principles of radio programming and promotions: formats, FCC rules, ratings, on-air experience, theories, and music selection choice will all be stressed. The class will produce programming and promotions to be aired on Monmouth's radio station, WMCX.

**Credits: 3****CO-375 Television Criticism**

Prerequisite(s): CO-155; and EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): COMCS, CORTT, WT

Analysis and critical examination of the content of television programs.

**Credits: 3****CO-376 Radio Station Management**

Prerequisite(s): CO-102

Term Offered: Spring Term

Course Type(s): COMCS, CORTT

Principles of management for radio stations. Discussions and practicum include: programming, promotions, sales, public relations, production, community relations, sports, and news.

**Credits: 3****CO-377 Radio Operation Practice**

Prerequisite(s): CO-102 and permission of the instructor

Course Type(s): None

Seminar offered in summer only.

**Credits: 3****CO-378 Talk Radio**

Prerequisite(s): CO-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): COMCS, CORTA

Introduction to the preparation of documentaries, interviews, and phone-in talk shows. Students will produce a weekly show on WMCX.

**Credits: 3****CO-379 Advanced Radio Production**

Prerequisite(s): CO-102.

Term Offered: Spring Term

Course Type(s): COMCS, CORTP

Advanced audio production techniques utilizing digital technology, with emphasis on the conception and realization of effective messages in radio broadcasting.

**Credits: 3****CO-380 Organizational Communication****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): COCCL, COCSP, COCST, WT

Students will learn various techniques of understanding how people use communication to organize and coordinate their work. Sample discussion topics are: using social media for hiring decisions, dealing with workplace romances and sexual harassment, and managing conflict and emotions at work. Written assignments are decision-making case studies of real problems in actual organizations.

**CO-381 The Power of Story****Credits: 3**

Term Offered: Spring Term

Course Type(s): COCCL, COCSD, EX5

Storytelling is one of the oldest and most powerful means of human communication. This experiential education (EX ED) course explores cultural perspectives, aesthetic genres, and functions of storytelling. Methods may include ethnography, autoethnography, interviews, personal narratives, digital storytelling projects, and/or presentation of published stories. Students will analyze and develop a range of stories that apply to professional and personal goals. Stories will be presented on campus and in off-campus community settings. Junior standing or permission of the instructor is required to take this course.

**CO-383 Gender, Race, and Media****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): COCCL, COCSP, COCST, COJPR, COJPS, COJPT, COMCS, CORTT, GS, RE, WT

This course examines the social constructions of gender and race as represented across various forms of media. Learning how to recognize, evaluate, and critique representations of gender and race using an intersectional lens, students will analyze the cultural values and beliefs that inform these depictions and identify personal, social, political, and economic consequences.

**CO-384 Seminar in Leadership Communication****Credits: 3**

Prerequisite(s): CO-220 or CO-225 or HU-201.

Term Offered: All Terms

Course Type(s): COCCL, COCSP, COCST, COJPS

Students explore specific leadership topics utilizing theories and practices from a communication perspective. Students analyze their personal leadership styles and develop leadership skills through team projects and classroom exercises.

**CO-389 Internship in Communication****Credits: 1-3**

Prerequisite(s): CO-216 or CO-217 or CO-218, departmental approval, and Junior standing

Term Offered: All Terms

Course Type(s): EX1

Supervised, practical experience in communication (radio, television, public relations, journalism, and human communication); emphasis on the application of discipline specific technologies and theories in a professional environment directly related to one's course of study.

**CO-390 Washington Center Internship****Credits: 7-12**

Course Type(s): EX5

This internship allows students in all majors to intern at government agencies, public service organizations, and business associations located in Washington, DC. Under the supervision of Washington Center supervisors and faculty, students gain substantive entry-level professional experience along with academic credit over the course of one semester. In general, students are required to intern in a government agency or public organizations four and a half days per week and attend educational seminars and workshops and participate in professional forums conducted by the Washington Center. In addition, students must complete learning objectives and assignments specified by Monmouth University faculty sponsors. Also listed as PS-390 and SO-390.

**CO-392 Social Media****Credits: 3**

Term Offered: All Terms

Course Type(s): COCCL, COJPR, COJPS, COJPT, COMCS, IM, TL

This course teaches students how to use each of the major social media platforms to market and promote personal brands, organizations, and public figures. Students will learn how to develop a professional digital presence, create a comprehensive content calendar, design a blog, podcast, or YouTube channel, and create accompanying digital content on social media, including photos, short-form and long-form videos, storytelling pieces, written content, and promoted posts. An emphasis is placed on digital strategy, branding, content planning and development, audience cultivation and engagement, brand partnerships, influencer marketing, data analytics, SEO, AI tools, and leveraging social media trends.

**CO-393 Washington Center Course****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Students participating in a Washington Center Internship are required to enroll in a three credit seminar. A list of available courses is forwarded to all students prior to the beginning of the fall, spring, or summer term. Regular offerings include politics, professional communication, the fine and performing arts, and economics. Also listed as PS-393 and SO-393. Junior standing and a minimum G.P.A. of 2.50 is required to take this course.

**CO-398 Special Topics in Communication and Theatre (300 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in communication to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**CO-399 Independent Study in Communication****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided research on selected topics in Communication. Prior permission of the directing professor and department chair is required along with demonstrated ability in the proposed area of concentration to take this course.

**CO-402 Audience Studies****Credits: 3**

Prerequisite(s): CO-155

Term Offered: Spring Term

Course Type(s): CORTW, WT

This course explores audience studies methods for analyzing audiences of popular music genres, television shows, films, and videogames. The class utilizes various theoretical traditions (ideological, semiotic, economic, sociological, psychoanalytic, cultural studies, etc.), with a focus on their utility for interpreting the meanings of the aforementioned media phenomena and its relationship to society and everyday life. These conceptual tools will provide the basis for analyzing media phenomena and its relationship with audiences and fans. Combining theory with practice, the course emphasizes critical thinking and writing about media texts in its varied dimensions and forms.

**CO-404 Responsive Media****Credits: 3**

Prerequisite(s): CO-145 or AR-181

Term Offered: Spring Term

Course Type(s): COMCS, CORTP, IM

Students learn how to make interfaces for smart phones and tablets to create interactive audio and video. In addition, students will produce creative projects using data mapping, generative art and work collaboratively on a site-specific media project. Also listed as AR-404.

**CO-409 Professional Media Writing****Credits: 3**

Term Offered: Spring Term

Course Type(s): COJPS, COMCS, CORTW

Provides an introduction to the diverse field of professional writing and integrates a comprehensive overview of the various skills required of today's freelance media writer. Class sessions will offer students practical and critical tools designed to develop a range of writing styles and techniques, while introducing related applications and career opportunities. Lab assignments and writing projects will integrate the tools explored in class. Students must have at least a Junior standing to take this course.

**CO-412 Project Greenlight****Credits: 3**

Term Offered: All Terms

Course Type(s): COCSD, COMCS, CORTT, COSS, IM

An orientation to career opportunities/advancement based on the successful pitch process necessary to achieve "greenlight" status for proposed media projects. Provides a comprehensive overview of new media formats, stages of media production, and related entertainment media technologies, products and services. Additionally, the course will examine the vital roles of producers and creative executives in these processes. Students will learn how to transform themselves from media consumers to media producers. No previous media-related training or experience is required. Students must have Junior standing to take this course.

**CO-413 Advanced Public Relations Writing Layout and Design****Credits: 3**

Prerequisite(s): CO-295 and CO-313

Term Offered: Spring Term

Course Type(s): COJPR, COJPS, COJPW

Simulates a field public relations agency or department by providing students "real world" or field-applicable skills. An emphasis on media tools and production enables students to work in a fast-paced, deadline-intensive environment. The principles of communicating with media and specialized public audiences are core along with the preparation, production, and presentation of messages for mass consumption.

**CO-414 Media Strategy****Credits: 3**

Prerequisite(s): CO-295 and CO-313, or permission of the instructor

Term Offered: All Terms

Course Type(s): COJPR, COJPS, COJPW

Application of public relations techniques to various communicative environments, communication problems, and crisis management.

**CO-415 Public Relations Shark Tank****Credits: 3**

Prerequisite(s): CO-295

Term Offered: Fall Term

Course Type(s): COJPR, COJPS, COJPT

Examines, reviews, and predicts how corporate leaders solve today's public relations challenges. Curriculum focuses on existing field trends and evaluates effective and ineffective corporate strategies. Students develop an integral understanding of the role of public relations in organizations, stressing the issues management process in order to plan crisis administration programs and implement public communication. Assignments include case statements, branding collateral, position papers, and publicity tools.

**CO-425 Political Communication****Credits: 3**

Prerequisite(s): CO-100 or CO-220 or permission of the instructor.

Term Offered: All Terms

Course Type(s): COCCL, COJPS

The impact of communication on political action. Persuasive strategies and mediated reality that affect political choices. Focus on the interpretation of political rhetoric and the role media plays in campaigns.

**CO-427 Crisis and Issues Management****Credits: 3**

Prerequisite(s): CO-295

Course Type(s): COJPS, COJPT

Students learn to assess, understand, and navigate today's organizational crises through the critical lens of a public relations professional. Projects include crisis communication strategies and tactics through the process of research, analysis, and planning. Course features an emphasis on work to control crisis, rumor, public perception, corporate image, and reputation. Use of case studies, simulations, group exercises, and projects to develop skills in crisis and issues management.

**CO-483 Communication Internship Seminar****Credits: 3**

Term Offered: All Terms

Course Type(s): EX1

Supervised, practical experience in communication (radio, television, public relations, journalism, and human communication); emphasis on the application of discipline-specific technologies and theories in a professional environment directly related to one's course of study. On-campus seminar attendance is required. May be repeated once for credit. Junior standing is required to take this course.

**CO-489 Internship in Communication****Credits: 3**

Term Offered: All Terms

Course Type(s): EX1

Supervised practical experience in communication (radio, television, public relations, and human relations) or journalism; emphasis on the programming, production, and transmission aspects of mass media. Repeatable for credit. Junior standing, departmental approval, and placement are required to take this course.

**CO-491 Seminar in Communication****Credits: 3**

Prerequisite(s): CO-301, Senior standing, at least thirty credits in communication, and EN-102 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Communication as an organized body of knowledge and skills; advanced problems assigned according to the special interests of the student. For Communication majors only.

**CO-492 Interactive Storytelling with Data****Credits: 3**

Prerequisite(s): CO-211 and CO-221 or CO-222

Term Offered: All Terms

Course Type(s): COJPS, COJPW, COMCS, CORTP, IM

Designed to introduce students to the world of data journalism and teach them to tell interactive stories using raw data. We will start from asking what is data journalism and how we find stories in the data. Students will learn how to acquire data from the web, normalize the data into databases and finally use software to tell engaging, interactive stories with collected data. Students will also learn how to collect data from traditional sources that aren't necessarily found online. Students are expected to complete a data-driven journalism project as part of the course. Also offered as a graduate course, CO-592.

**CO-499 Independent Study in Communication****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Guided research on selected topics in Communication. Prior permission of the directing professor and department chair is required to take this course. Demonstrated ability in the proposed area of concentration is required to take this course.

## Computer Science (CS)

**CS-104 Introduction to Problem Solving and Software Development****Credits: 3**

Term Offered: All Terms

Course Type(s): TL

Introduces a broad overview of problem solving, computing topics, and fundamental concepts and methodologies of software development designed to provide students with awareness of the computing field's many aspects. Topics include fundamentals of computer architecture, operating systems, applications, problem-solving. It emphasizes the main phases of the software development lifecycle, such as requirements, design, implementation, testing, project planning. Also, it stresses the difference between the software product and process. Introduces social and ethical issues related to computing and explores the local and global impact of computing on individuals, organizations and society. It also gives students their initial exposure to group project work.

**CS-175 Introduction to Computer Science I****Credits: 3**

Co-requisite(s): CS-175L

Term Offered: All Terms

Course Type(s): None

Introductions to the basic concepts of program development in a modern object-oriented language; problem-solving methods and algorithm development; basic primitive and object data types; language syntax; style and documentation; and coding and testing of programs.

**CS-175L Introduction to Computer Science I lab****Credits: 1**

Co-requisite(s): CS-175

Term Offered: All Terms

Course Type(s): None

Introductions to the basic concepts of programming and program development in a modern Software Development Environment with debugger and source code control.

**CS-176 Introduction to Computer Science II****Credits: 3**

Prerequisite(s): CS-175 and CS-175L, both passed with a grade of C or higher

Co-requisite(s): CS-176L

Term Offered: All Terms

Course Type(s): None

Continuation in depth and breadth of problem solving and algorithm development, using the same modern object-oriented language as in CS-175. More advanced object-oriented design. Introduction to polymorphism, inheritance, and interfaces.

**CS-176L Introduction to Computer Science II Lab****Credits: 1**

Prerequisite(s): CS-175 and CS-175L, both passed with a grade of C or higher

Co-requisite(s): CS-176

Term Offered: All Terms

Course Type(s): None

Introduction to advanced concepts of programming and program development in a modern Software Development Environment with debugger and source code control.

**CS-199 Independent Study in Computer Science****Credits: 1-3**

Course Type(s): None

Independent study in a computer science topic not substantially treated in a regular course; for students with superior ability. One-hour consultation per week. Prior permission of the directing professor and department chair is required to take this course.

**CS-201 Introduction to Computer Programming for Data Science****Credits: 1**

Prerequisite(s): IT-100 or IT-102 or IT-150 or CS-104

Term Offered: Spring Term

Course Type(s): None

This course introduces the most important data structures available in R and their practical application. Methodologies to import data from external sources (files, databases, on-line resources), to manipulate and transform data, and to save/export data to data repositories are described. The course also describes how to compute descriptive statistics and how to build chart for effective data visualization tasks. The students will become familiar in using some R data manipulation and visualization libraries.

**CS-205 Data Structures and Algorithms****Credits: 3**

Prerequisite(s): MA-130, CS-176, and CS-176L, all passed with a grade of C or higher

Co-requisite(s): CS-205L

Term Offered: All Terms

Course Type(s): None

Introduction to the design, implementation, and use of fundamental data structures (lists, stacks, queues, trees); extensions of these structures and associated algorithms; informal complexity analysis.

**CS-205L Data Structures and Algorithms Lab****Credits: 1**

Prerequisite(s): MA-130, CS-176, and CS-176L, all passed with a grade of C or higher

Co-requisite(s): CS-205

Term Offered: All Terms

Course Type(s): None

Introductions to the basic concepts of programming and program development in a modern Software Development Environment with debugger and source code control.

**CS-286 Computer Architecture I****Credits: 3**

Prerequisite(s): CS-176 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Data representation and operations. Digital logic design. Processor data path. Memory hierarchy. Instruction set architecture. Assembly language programming.

**CS-289 Internship in Computer Science****Credits: 3**

Term Offered: All Terms

Course Type(s): EX1

Supervised practical experience in Computer Science. Repeatable for credit. Sophomore standing, departmental approval, and placement are required to take this course.

**CS-298 Special Topics in Computer Science (200 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in computer science to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. Three or four hours per week. If a prerequisite is required it will be announced in the course schedule.

**CS-299 Independent Study in Computer Science****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study in a computer science topic not substantially treated in a regular course; for students with superior ability. One-hour consultation per week. Prior permission of the directing professor and department chair is required to take this course.

**CS-301 Android Application Development****Credits: 3**

Prerequisite(s): CS-205 and CS-205L

Term Offered: Spring Term

Course Type(s): None

This course will teach students software methodologies for Android App Development. This will include Android Development Studio, Kotlin programming language, and interfaces to external services required to develop simple to moderately complex Android mobile apps. Also listed as SE-301.

**CS-305 Advanced Computing****Credits: 3**

Prerequisite(s): CS-205 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Introduction to fundamental concepts of computer science theory and methods of parallel and distributed programming. The course covers automata theory (including finite-state machines and Turing machines, algorithm complexity (including the distinction between P and NP problems), BNF specification of programming languages, methods of parallel programming, methods of distributed programming, measuring the speedup obtained by parallelization, and methods of addressing NP completeness through approximation. The course will provide experience in the implementation of parallel and distributed programming.

**CS-310 Advanced Object-Oriented Programming and Design Credits: 3**

Term Offered: All Terms

Course Type(s): WT

Object-oriented programming and design, using a language different from that used on CS-176. Use of classes, inheritance, polymorphism, and libraries. Topics will include flexible system design for such requirements as globalization. This is a writing-intensive course.

**CS-315 Theory of Computing Credits: 3**

Prerequisite(s): CS-176 passed with a grade of C or higher and either CS-202 or MA-120 or MA-130 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

An introduction to phrase structure languages and their relation to automata, computability, and program verification.

**CS-325 Software Engineering Concepts Credits: 3**

Prerequisite(s): CS-205 passed with a grade of C or higher; and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

Overview of software engineering concepts, analysis/design techniques, Unified Modeling Language (UML), software documentation, and group development of software.

**CS-335 Programming Language Concepts Credits: 3**

Prerequisite(s): CS-205 passed with a grade of C or higher

Course Type(s): None

Design, evaluation, and implementation of programming languages. Discussion of imperative, applicative, object-oriented and concurrent languages. Four hours per week.

**CS-336 Program Analysis for Security Credits: 3**

Term Offered: Spring Term

Course Type(s): None

The course will introduce students to concepts and constructs found in classical programming languages and their application in security. Topics include type systems, higher-order functions, and polymorphism, syntax and semantics, parsing, interpretation and advanced programming language theory of program analysis in security such as information flow control and taint analysis.

**CS-337 Enterprise Mobile iOS Apps Design and Development Credits: 3**

Prerequisite(s): CS-205 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Presents methodologies to build enterprise mobile apps on iPad tablets and iPhone smartphones using iOS. The course will cover technologies to use in the design and development of apps on mobile devices and integration of these apps with corporate data sources, sensor devices and cloud computing services. Also listed as SE-337.

**CS-350 Research in Computer Science Credits: 1-4**

Prerequisite(s): CS-306 passed with a grade of C or higher, a minimum of fifteen credits at Monmouth University and a minimum GPA of 3.25

Course Type(s): EX5

Original research work, associated with an external constituent and/or organization, planned and carried out with assistance of faculty research advisor. Research conducted by the student will be shared with the external constituency and submitted for outside publication and review. Number of credits arranged with advisor. Limited to Computer Science students with approval of chair, program director, or advisor.

**CS-357 Engineering Full-Stack Software Applications Credits: 3**

Prerequisite(s): CS-176 and CS-176L

Term Offered: Fall Term

Course Type(s): None

A practical introduction to the principles, methods, and tools required to create high-quality software applications for the distributed, client-server context of the Web. Emphasis is on architectural designs, and language and data access methods that are common in Web-based systems. Also listed as SE-357.

**CS-358 Software Frameworks Credits: 3**

Prerequisite(s): EN-101, EN-102, CS-205 and SE-207 both passed with a grade of C or higher; and SE-357 or CS-357, or permission of the instructor.

Course Type(s): WT

An introduction to Design Patterns and modern Software Frameworks, programming languages, data access methods and asynchronous Application Programming Interfaces (APIs). This is a writing intensive course. Restricted to Computer Science or Software Engineering students only. Also listed as SE-358. and SE-357 or CS-357 or permission of the instructor.

**CS-360 Introduction to Game Development Credits: 3**

Prerequisite(s): CS-205 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

An introduction to the creation of computer/video games and the different elements of games, including computer graphics, animation, artificial intelligence, algorithms, data structures, networking, software development cycles and human-computer interaction. Also listed as SE-360.

**CS-370 Program Development Under Unix Credits: 3**

Prerequisite(s): CS-176 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Introduction to the use of the UNIX operating system and its utilities for incremental and distributed program development, maintenance, and debugging. The course covers the UNIX shell, utilities, and program development tools that are used for large projects involving multiple developers on multiple machines. Three hours per week.

**CS-371 Scripting Languages Credits: 3**

Prerequisite(s): CS-176 or equivalent

Term Offered: Spring Term

Course Type(s): None

An introduction to programming using widely-used, dynamically-typed, interpreted programming languages, which are sometimes called "scripting" languages. Covers general-purpose scripting languages, such as Perl and Python that are used to develop a wide range of applications. Scripting languages, such as PHP, that are used primarily in web development, will not be covered in this course.

**CS-375 File Management Credits: 4**

Prerequisite(s): CS-205 passed with a grade of C or higher

Course Type(s): None

Overview of files, records and files, blocking and buffering, secondary storage devices; sequential file organization, external sort/merge algorithms; random access; relative file organization; tree-structured file organization; search trees, indexed sequential file organization; list-structured file organization; multiple-key file organization. Four hours per week.

**CS-388 Cooperative Education: Computer Science****Credits: 3**

Prerequisite(s): CS-205 passed with a grade of C or higher, Junior standing and thirty or more earned credits with at least fifteen taken at Monmouth University

Term Offered: All Terms

Course Type(s): EX2

Provides an opportunity for students who are engaged in a computer science-related experience. Fifteen to twenty hours of work experience per week. This course may be repeated for credit. Departmental approval is required to take this course.

**CS-389 Internship in Computer Science****Credits: 3**

Term Offered: All Terms

Course Type(s): EX1

Supervised practical experience in Computer Science. Repeatable for credit. Junior standing, departmental approval, and placement are required to take this course.

**CS-398 Special Topics in Computer Science (300 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in computer science to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. Three or four hours per week. If a prerequisite is required it will be announced in the course schedule.

**CS-399 Independent Study in Computer Science****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study in a computer science topic not substantially treated in a regular course; for students with superior ability. One-hour consultation per week. Prior permission of the directing professor and department chair is required to take this course.

**CS-414 Computer Networks****Credits: 3**

Prerequisite(s): CS-286 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

An introductory-level course on the hierarchy of networking software and hardware. Emphasis on the; description of protocols in the Internet, specifically, client-server Application Layer Protocols such as HTTP, SMTP, DNS, DHCP; Transport Layer Protocols such as UDP/TCP, Network Layer Protocols such as IP, ICMP, as well as Network Layer Routing and Forwarding techniques, such as RIP and OSPF for IPv4 and Tunneling for IPv6.

**CS-418 Compiler Construction****Credits: 3**

Prerequisite(s): CS-205 passed with a grade of C or higher

Course Type(s): None

The principles and practices of incorporating the theory of finite automata and context-free languages, the maintenance and use of semantic information, and the generation and optimization of code to produce a compiler. Four hours per week.

**CS-420 Survey of Artificial Intelligence Concepts and Practices****Credits: 3**

Prerequisite(s): CS-205 and MA-130 both passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Introduction of fundamental concepts and practices of artificial intelligence, covering search techniques, constraint satisfaction, knowledge representation, machine learning, planning, and natural language processing. The course will provide experience in the implementation of techniques from these areas. Three hours per week.

**CS-432 Database Systems****Credits: 3**

Prerequisite(s): CS-205 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Overview of database system concepts; data modeling; ER and UML diagrams; relational database schema definition; database design; query languages; introduction to NoSQL and comparison between relational and non-relational databases; hand-on experience of SQL, Oracle, and NoSQL.

**CS-438 Operating Systems Analysis****Credits: 3**

Prerequisite(s): CS-286 and CS-205 both passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Management of memory, processes, files, and devices. OS design principles and performance measures. Multiprogramming, multiprocessing, concurrency, deadlock, virtual machines. Competitive and cooperating processes. Programs will be written in C or in Java. Three hours per week.

**CS-450 Cyber Security****Credits: 3**

Prerequisite(s): CS-205

Term Offered: Fall Term

Course Type(s): None

Cover fundamental theory and practice of cyber security. Review cryptographic tools used to provide security, such as shared key encryption; public key encryption, key exchange, authentication, digital signature, and intrusion detection. Learn implementation of secure mechanisms in object-oriented programming languages. Also listed as SE-450.

**CS-451 Applied Computer Security****Credits: 3**

Prerequisite(s): CS-450 or SE-450

Term Offered: Spring Term

Course Type(s): None

This course will introduce students to multiple aspects of computer security and practice into a series of well-defined security topics such as network security and hacking tools. Also, the student will introduce different topics of digital forensics. Also listed as SE-451.

**CS-452 Introduction to Cloud Computing and Security****Credits: 3**

Prerequisite(s): CS-414 passed with a grade of C or higher.

Term Offered: Fall Term

Course Type(s): None

The course will introduce students to proven and mature cloud computing technologies and provide an overview of theory, practices, and methodologies of information security, focusing in particular on secure cloud computing.

**CS-471 System Administration****Credits: 3**

Prerequisite(s): CS-370 or CS-371 passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

Fundamental topics in system administration, focused primarily on UNIX administration with added coverage of Microsoft Windows NT descendant systems. The course is a hands-on introduction to installing and maintaining modern, multi-user, production UNIX-like operating systems and the essential services that are hosted on these systems.

**CS-488 Cooperative Education: Computer Science****Credits: 3**

Prerequisite(s): CS-205 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): EX2

Provides an opportunity for students who are engaged in a computer science-related experience. Fifteen to twenty hours of work experience per week. May be repeated for credit. Departmental approval is required to take this course. Junior standing, thirty or more earned credits with at least fifteen taken at Monmouth University and CS-205 passed with a grade of C or higher are required to take this course.

**CS-489 Internship in Computer Science****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX1

Supervised practical experience in Computer Science. Repeatable for credit. Junior standing, departmental approval, and placement are required to take this course.

**CS-490 Senior Project****Credits: 4**

Prerequisite(s): CS-325 and CS-432 both passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): RD

Affords the student an opportunity to integrate topics and techniques from previous coursework in a capstone project. The project will combine investigation into computer science literature and actual implementation, either in an area of current research or an application area of interest to industry. Implementation might involve collaboration with other students. The project will be presented formally, both orally and in written form. This course satisfies the reasoned oral discourse requirement for computer science students.

**CS-492A Computer Science Senior Project A****Credits: 3**

Prerequisite(s): CS-325 and CS-432, both passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): RD

Affords the student an opportunity to integrate topics and techniques from previous coursework in a capstone project. The project will combine investigation into computer science literature and actual implementation, either in an area of current research or an application area of interest to industry. Implementation might involve collaboration with other students. The project will be presented formally both orally and in written form. This course satisfies the reasoned oral discourse requirement for computer science students.

**CS-492B Computer Science Senior Project B****Credits: 3**

Prerequisite(s): CS-492A

Term Offered: All Terms

Course Type(s): RD

Affords the student an opportunity to integrate topics and techniques from previous coursework in a capstone project. The project will combine investigation into computer science literature and actual implementation, either in an area of current research or an application area of interest to industry. Implementation might involve collaboration with other students. The project will be presented formally both orally and in written form. This course satisfies the reasoned oral discourse requirement for computer science students.

**CS-498 Special Topics in Computer Science (400 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in computer science to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. Three or four hours per week. If a prerequisite is required it will be announced in the course schedule.

**CS-499 Independent Study in Computer Science****Credits: 1-4**

Term Offered: All Terms

Course Type(s): None

Independent study in a computer science topic not substantially treated in a regular course; for students with superior ability. One-hour consultation per week. Prior permission of the directing professor and department chair is required to take this course.

## Criminal Justice (CJ)

**CJ-101 Introduction to Criminal Justice****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Basic constitutional limitations of criminal justice; the development of law enforcement from feudal times; law enforcement agencies; and the court system as it pertains to criminal justice and corrections.

**CJ-198 Special Topics in Criminal Justice (100 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in criminal justice to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**CJ-201 Police Role in the Community****Credits: 3**

Prerequisite(s): CJ-101 or SO-101

Term Offered: All Terms

Course Type(s): None

Community perception of police, courts, and correction; concepts of community and public relations; community control; and problems of justice associated with racial and ethnic groups.

**CJ-204 Administration and Organization in Criminal Justice****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Criminal justice application of organizational theory and principles: administrative process; organizational factors; management techniques; and budgetary practices.

**CJ-205 Corrections****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Current correctional theories and practices; historical development of the correctional system.

**CJ-210 Judicial Administration****Credits: 3**

Prerequisite(s): CJ-101

Term Offered: Spring Term

Course Type(s): None

Management of judicial processes; administrative relationships of courts with defendants, police, prosecutors, defense counsel, bail agencies, probation officers, and correctional agencies; and grand and petit jury procedures.

**CJ-211 Statistics for Criminal Justice****Credits: 3**

Prerequisite(s): MA-105 or a higher level Math course

Term Offered: All Terms

Course Type(s): None

Introduction to the basic methodological and statistical techniques used in criminal justice; introduction to statistical terminology as variables, unit of analysis, statistical significance, measurement, correlation, causation, and hypothesis testing.

**CJ-215 Environmental Security****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

The protection and security of personal, company, and public property; measures intended to safeguard against theft, damage, assault, and sabotage.

**CJ-225 Law Enforcement****Credits: 3**

Prerequisite(s): CJ-101

Term Offered: All Terms

Course Type(s): None

The origin and development of law enforcement; police strategies, organizational factors, and problems.

**CJ-230 Criminal Investigation****Credits: 3**

Prerequisite(s): CJ-101

Term Offered: Spring Term

Course Type(s): None

Introduction to the principles of criminal investigations, the rules and procedures of preliminary and follow-up investigations, the art of interrogation, recording of statements, confessions, and the collection and preservation of physical evidence at the crime scene.

**CJ-240 Professional Writing in Criminal Justice****Credits: 3**

Prerequisite(s): CJ-101; and EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): WT

Designed to help students develop the writing skills necessary for a career in criminal justice. Completion and revision of various internal and external forms of communication that are commonly used by criminal justice professionals are entailed. Students are also helped to improve their outlining, proofreading, editing, and organizational skills to better communicate effectively in writing.

**CJ-241 Criminology****Credits: 3**

Prerequisite(s): CJ-101 or SO-101 or SO-102; and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

Explanations of the causes of property and violent offenses. Discussion of white collar, professional and organized crime, and the problem of criminal statistics. Also listed as SO-241.

**CJ-280 Introduction to Forensic Science****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Introduction to concepts of forensic science with emphasis on the recognition, identification, individualization, and evaluation of physical evidence by applying the natural sciences to law-science matters.

**CJ-288 Cooperative Education: Criminal Justice****Credits: 3**

Term Offered: Spring Term

Course Type(s): EX2

Professional work experience in a criminal justice-related position. May be repeated for credit. Departmental approval, a minimum G.P.A. of 2.00, and completion of thirty credits is required to take this course.

**CJ-298 Special Topics in Criminal Justice (200 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in criminal justice to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**CJ-299 Independent Study in Criminal Justice****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided readings on a topic not otherwise covered in the curriculum. Prior permission of the directing professor and department chair is required to take this course.

**CJ-301 Crime Control in the USA, Japan, and China****Credits: 3**

Course Type(s): BI,EL, GU

A comparative approach is used to examine formal, social control mechanisms that include law, police, courts corrections, and informal, social control mechanisms that contain values, beliefs, family, workplace, school, neighborhood, and other social organizations in three societies: the USA, Japan, and China.

**CJ-305 Criminal Law****Credits: 3**

Term Offered: All Terms

Course Type(s): None

The nature, purposes, principles, and doctrine of modern criminal law; landmark cases; and important issues.

**CJ-313 The Pre-Trial Prosecution System****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): PSAL, SJL

The pre-trial prosecution process as a political system. The roles, attitudes, and strategies of those authorities who allocate values within the system are examined. Also listed as PS-313. PS majors register for PS-313.

**CJ-315 Research Methods****Credits: 3**

Prerequisite(s): CJ-211 or MA-151, CJ-241 and EN-101 and EN-102

Term Offered: All Terms

Course Type(s): WT

Introduces students to the principles of scientific research in criminal justice and homeland security. It begins with a description of the importance of research by criminal justice and homeland security organizations and moves toward the tenets of sound research practices, including: the formulation of a research question, developing a hypothesis, collecting data, measurement, analysis, and evaluation. Special attention is devoted to practical, ethical, and political issues that can arise when conducting research. Also listed as HLS-315.

**CJ-317 Law of Evidence****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

The history and development of the rules of evidence, including relevancy and materiality, competency, burden of proof, direct and circumstantial, examination of witnesses, hearsay rule, unconstitutionally obtained, and presenting and collecting.

**CJ-325 Criminal Procedure****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Examination of the criminal justice process and underlying public policy considerations.

**CJ-330 Crisis Intervention****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Practical everyday handling techniques for intervention in such crises as suicide, emotional disturbance, and family conflicts; theory and research pertaining to intervention in life-stress situations. Attempts to raise the student's level of empathy and interpersonal sensitivity via role playing and self-reflection.

**CJ-332 Advanced Police Administration****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Advanced supervisory and managerial practices, analysis of policy formulation, decision-making, budgeting, planning, and innovative administrative procedures.

**CJ-335 Juvenile Justice****Credits: 3**

Prerequisite(s): CJ-101 or SO-101 or SO-102

Term Offered: All Terms

Course Type(s): None

Introduction to the area of juvenile justice; the juvenile court; a review of juvenile justice procedures; the interaction of police and juveniles; dispositional alternatives; and delinquency prevention programs.

**CJ-340 The American Penal System****Credits: 3**

Prerequisite(s): CJ-205

Term Offered: All Terms

Course Type(s): None

History, philosophy, and organizational structure of the correctional system in the United States, including issues of race, gender, and morality.

**CJ-341 Occupational Crime****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Economic and fiscal implications of white-collar and blue-collar crime; definitions, explanations, control strategies, enforcement techniques, and the role of the criminal justice system.

**CJ-350 Ethical Issues in Criminal Justice****Credits: 3**

Prerequisite(s): CJ-101, and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): None

Explore various ethical issues inherent in policing, courts, and correctional work. Address ethical standards in social-science research and political correctness.

**CJ-351 Sentencing Practices****Credits: 3**

Prerequisite(s): CJ-101 and CJ-205

Term Offered: Spring Term

Course Type(s): None

History, philosophy, and rationale behind past and present sentencing schemes: the indeterminate and determinate sentences; the death penalty; and non-custodial sentences.

**CJ-359 Crime Prevention and Control****Credits: 3**

Prerequisite(s): 6 credits in Sociology or 6 credits in Criminal Justice

Term Offered: Spring Term

Course Type(s): None

Problems in the definition of crime; crime prevention as a social movement; and review and evaluation of major models of crime prevention and control.

**CJ-360 Comparative Criminal Justice Systems****Credits: 3**

Prerequisite(s): CJ-101

Term Offered: Spring Term

Course Type(s): None

Comparison of selected foreign justice systems with that of the United States.

**CJ-362 Community-Based Corrections****Credits: 3**

Prerequisite(s): CJ-101 or SW-105, and CJ-205

Term Offered: Spring Term

Course Type(s): None

Methods for dealing with the offender in the community; probation, parole, residential treatment, restitution, and the evaluation of each.

**CJ-365 Forensic Pathology****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Introduction to the concepts of forensic pathology with an emphasis on the recognition and interpretation of diseases and injuries in the human body that is the basis for medico legal investigations.

**CJ-370 Institutional Treatment of the Offender****Credits: 3**

Prerequisite(s): CJ-205, and either CJ-101 or SW-105

Term Offered: Spring Term

Course Type(s): None

Strategies employed in providing treatment and support services to the inmate; physical, psychological, and social environmental factors.

**CJ-375 Internship in Criminal Justice****Credits: 3**

Prerequisite(s): CJ-101 or HLS-101, EN-101, EN-102, and permission of the instructor

Term Offered: All Terms

Course Type(s): CJHLS, EX1, WT

Provides practical experiences in the administration of criminal justice and homeland security through assignments to criminal justice and homeland security agencies under the joint-supervision of agency officials and Monmouth University instructors. Course assignments include a resume and cover letter application for an internship; journaling of real-world professional experiences; and the evaluation of criminal justice/homeland security policies and practices.

**CJ-380 Forensic Psychology****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Criminal personalities in relationship to specific crimes; exposure to techniques of interviewing and interrogating these criminals.

**CJ-384 Crime Scene Investigation****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

Understanding the nature of crime scene investigation and the basic principles necessary for a successful investigative outcome.

**CJ-386 Technology Crime****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Understanding the nature of technology crimes in terms of criminal investigation and collection of electronic evidence.

**CJ-387 Arson and Bomb Investigation****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Introduction to concepts of arson/bomb investigation with emphasis on reconstruction origin and cause analysis.

**CJ-388 Cooperative Education: Criminal Justice****Credits: 3**

Term Offered: Spring Term

Course Type(s): EX2

Professional work experience in a criminal justice-related position. May be repeated for credit. Departmental approval, a minimum G.P.A. of 2.00, and completion of thirty credits is required to take this course.

**CJ-390 Forensic Science I****Credits: 4**

Course Type(s): None

Designed to explain the concepts of recognition, identification, individualization, and evaluation of physical evidence by application of basic scientific principles used in the practice of forensic science.

**CJ-391 Forensic Science II****Credits: 4**

Prerequisite(s): CJ-390

Course Type(s): None

Designed to explain the concepts of recognition, identification, individualization, and evaluation of physical evidence, such as blood and semen, firearms, gunshot residue, fire debris, and explosions, in the context of real-world situations.

**CJ-398 Special Topics in Criminal Justice (300 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in criminal justice to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**CJ-399 Independent Study Criminal Justice****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

Guided readings on a topic not otherwise covered in the curriculum. Prior permission of the directing professor and department chair is required to take this course.

**CJ-401 Special Problems in Law Enforcement****Credits: 3**

Prerequisite(s): 9 credits in Criminal Justice

Term Offered: Spring Term

Course Type(s): None

Special problems that are not encountered in normal daily activities of police departments, including riots and emergency service functions, such as fire scenes, lost children, and crime prevention.

**CJ-402 Field Research in Criminal Justice****Credits: 3**

Prerequisite(s): 18 credits in Criminal Justice and permission of the coordinator

Course Type(s): None

Study, research, and specific projects in criminal justice under the supervision of a Criminal Justice faculty member; a written report is required.

**CJ-480 Criminal Justice Research Project****Credits: 3**

Prerequisite(s): CJ-315, Junior or Senior standing, and permission of the instructor and department chair

Course Type(s): None

Active participation in a research project chosen by and currently being pursued by the faculty sponsor. Student activities may include but are not limited to: literature search, data collection, data analysis, and preparation of a manuscript.

**CJ-488 Cooperative Education: Criminal Justice****Credits: 3**

Term Offered: Spring Term

Course Type(s): EX2

Professional work experience in a criminal justice-related position. Departmental approval, a minimum G.P.A. of 2.00, and completion of thirty credits is required to take this course.

**CJ-489 Internship in Criminal Justice II****Credits: 1-3**

Course Type(s): EX1

Directed individual study of Criminal Justice in areas of special interest. Junior standing or higher is required to take this course. Departmental approval is required to take this course.

**CJ-490 Seminar in Criminal Justice****Credits: 4**

Prerequisite(s): CJ-315 and Senior standing in Criminal Justice

Term Offered: All Terms

Course Type(s): CJHLS

Selected topics in criminal justice; presentation and discussion of a research paper. Homeland Security majors should register for HLS-490.

**CJ-498 Special Topics in Criminal Justice (400 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in criminal justice to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**CJ-499 Independent Study in Criminal Justice****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided readings on a topic not otherwise covered in the curriculum.

Senior standing, a minimum G.P.A. of 2.50 and prior permission of the directing professor and department chair is required to take this course.

## Dance (DA)

**DA-101 Dance Appreciation****Credits: 3**

Term Offered: All Terms

Course Type(s): AT

Introduction to the extraordinarily diverse dance forms found throughout the world. Development of an appreciation of dance as an art. The history, aesthetic elements, and communicative power of dance movements will be examined.

**DA-117 Social Dance I****Credits: 1**

Term Offered: All Terms

Course Type(s): RHYTH

Students will learn a comprehensive framework for exploring the various dimensions of dance and its significance in contemporary society. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques to increase competence in dance and rhythmic activities. The analysis of skills, basic choreography, etiquette, and safety will be covered. This course is a physical activity skills course. Skills course: Dance/Rhythmic Activities. This is a Pass/Fail course.

To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode. Also listed as PE-117. This is a pass/fail course.

**DA-118 Social Dance II**

Term Offered: Spring Term

Course Type(s): RHYTH

Provides a comprehensive foundation for both men and women to successfully perform on any social dance floor. Students will learn introductory steps of the Hustle, Salsa, and Tango. Intermediate/advanced skills of the Viennese Waltz, Foxtrot, and East Coast Swing will be taught. A minimum of eight step patterns per dance will be introduced. Students will practice dance etiquette and social skills, leading to increased confidence for social dancing and improved fitness. In addition, "partner" dance positions and keeping music tempos will be addressed. This course is a physical activity skills course. Skills course: Rhythmic (dual). To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode. This is a pass/fail course. Also listed as PE-118.

**Credits: 1****DA-151 Movement for the Performer**

Term Offered: All Terms

Course Type(s): AT

Designed for the students to gain body awareness and proper body alignment through physical practice and imagery, while learning proper dance terminology. Creative movement, improvisation, and choreography will also be addressed. By the end of the course, the student will be able to properly warm-up the body in preparation for performance.

**Credits: 3****DA-198 Special Topics in Dance (100 Level)**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular dance form to be announced prior to registration, involving the practical application of a dance form through practice and performance. If a prerequisite is required it will be announced in the course schedule.

**Credits: 1-3****DA-199 Independent Study in Dance**

Term Offered: Summer Term

Course Type(s): None

Guided Research in selected topics in Dance. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 1-3****DA-207 Modern Ballet I**

Term Offered: All Terms

Course Type(s): None

Integration of the techniques of modern and classical ballet; modern ballet history and theory to be examined, with emphasis on movement and performance.

**Credits: 3****DA-209 Jazz Dance I**

Term Offered: Spring Term

Course Type(s): None

Introduction to jazz dance techniques; skills development in jazz movement, body control, and stage performance.

**Credits: 3****DA-211 Jazz Dance II**

Prerequisite(s): DA-209 or permission of the instructor

Term Offered: Spring Term

Course Type(s): None

Advanced jazz dance techniques; advanced skills development in jazz movement, body control, and stage performance.

**Credits: 3****DA-220 Tap 1**

Term Offered: Spring Term

Course Type(s): None

An introduction to basic tap technique and movement patterns, covering basic tap dance vocabulary/steps and the methods of proper execution.

**Credits: 3****DA-298 Special Topics in Dance (200 Level)**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular dance form to be announced prior to registration. The course involves the particular application of the dance form through practice and performance. If a prerequisite is required it will be announced in the course schedule.

**Credits: 1-3****DA-299 Independent Study in Dance**

Term Offered: Spring Term

Course Type(s): None

Guided Research in selected topics in Dance. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 1-3****DA-301 Choreography**

Term Offered: Spring Term

Course Type(s): None

How to initiate, develop, manipulate, and edit movement to craft a dance with form and intent. Teaches creative and practical skills. The conception, planning, and realization of complete dances will be studied and practiced. Students will create and perform their own choreography. Outstanding work will be showcased in departmental productions.

**Credits: 3****DA-499 Independent Study in Dance**

Term Offered: Spring Term

Course Type(s): None

Guided research on selected topics in Dance. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 1-3**

## Education (ED)

**ED-050 English as a Second Language Instruction for Undergraduate International Students**

Term Offered: Spring Term

Course Type(s): None

This is a pass/fail course.

**Credits: None****ED-101 Transition to College**

Term Offered: All Terms

Course Type(s): None

The identification and management of the academic and socio-emotional issues confronting the student during the transitional stage from secondary to post-secondary education. Permission of the instructor is required to take this course.

**Credits: 1****ED-250 Psychological and Philosophical Foundations of Education****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Enhances a teacher candidate's background in principles and practices of elementary and secondary education, including curriculum planning, assessment, procedures, instructional technology, culturally and linguistically diverse students, diverse learning needs, classroom management, core curriculum standards, and school organization. Relevant information about national and state standards will be addressed. Social, historical, political, psychological, and philosophical foundations of education are examined. Observation and participation in actual classroom procedures are required through structural experiences. Service learning hours required. Education majors only.

**ED-299 Independent Study in Education**

Term Offered: Summer Term

Course Type(s): None

Independent research in education in an area not substantially treated in a regular course offering under the supervision of an education faculty member; written evaluation of the research is required. For students with superior ability. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 3****ED-300 Education and Culture**

Term Offered: Spring Term

Course Type(s): ADS, GU

Offers students the opportunity to become immersed in educational, cultural, and historical contexts while exploring contemporary issues relevant to various countries or regions. Students will be introduced to cross-cultural issues within that country. They will expand their understanding of the focus country; especially its educational practices, as they gain an immersive experience related to education, history, culture, art, and literature through travel and through participating in volunteer work in a school setting. Students in this course examine another culture in order to gain experience which may transform not only their understanding of that culture, but the way in which they understand culture in general. Not open to freshmen. This course may be repeated once for credit. A minimum G.P.A. of 3.00 is required to take this course.

**Credits: 3****ED-304 Social Studies and Literacy Methods for K-6****Credits: 3**

Prerequisite(s): EDL-326 and EDS-330.

Term Offered: Spring Term

Course Type(s): None

This course is designed to provide an interdisciplinary perspective and skills of teaching social studies from pre-kindergarten through grade 6, with an emphasis on literacy integration. Course content will teach how to cross disciplinary boundaries to promote social understanding and civic engagement and integrate knowledge, skills, and dispositions with authentic action, by emphasizing National Council for the Social Studies and the New Jersey Student Learning Standards for Social Studies, cross-curriculum integration, social problem solving, inquiry-based instruction, with a focus on disciplinary literacy. The essential elements of planning, instruction using technology, and assessment based on research and data are explored to teach culturally and linguistically diverse learners and students with diverse learning needs in social studies education.

**ED-305 Literacy, Science, and Social Studies Methods for Undergraduate P3 Students****Credits: 3**

Prerequisite(s): EDL-280 and EDL-333.

Term Offered: Spring Term

Course Type(s): None

This course is designed to provide an integrated perspective of teaching science and social studies to students in grades pre-kindergarten through grade 3. This course provides opportunities for experiential learning of interdisciplinary teaching methods with an emphasis on literacy integration. Following national and state standards for science and social studies, this course will utilize a diversity of instructional methods and strategies to provide each student with the opportunity to learn how to teach through inquiry and problem-solving. This course has a 50-hour field experience component.

**ED-315 Digital Media and Instructional Technology Skills for Teachers****Credits: 3**

Term Offered: All Terms

Course Type(s): TL

Aims to introduce teacher-candidates to computer science concepts and recent instructional technologies to support teaching and learning processes in K-12 classrooms. The course focuses on teacher-candidates' exploration and evaluation of technology-enhanced applications. Teacher-candidates learn how to use digital media, technologies, and interactive games to support their instructional strategies and student learning, enhance classroom management, aid formative and summative assessment techniques, and communicate professionally.

**ED-319 Content Literacy and Assessment****Credits: 3**

Prerequisite(s): ED-250; EN-101 and EN-102, Clinical Experience Hours Required, and a minimum G.P.A. of 3.00.

Term Offered: All Terms

Course Type(s): EX5, WT

Designed to focus on the development of students' reading, writing, and speaking skills as they are used in specific K-12 and secondary academic content areas, this course uses a backward design model to integrate discussions of assessment with content area literacy. It emphasizes the implementation of both teaching and learning strategies to develop K-12 students' gradual disciplinary language development, fostering their abilities to be independent learners and disciplinary communicators. The course includes research-based pedagogical strategies for teaching linguistically diverse students and teaching students with diverse learning needs. Limited to Education majors.

**ED-320 Teaching Emergent Multilinguals in an Inclusive Classroom****Credits: 3**

Prerequisite(s): ED-250, EN-101 and EN-102, and a minimum G.P.A. of 3.00.

Term Offered: All Terms

Course Type(s): RD, WT

This Writing Intensive course is offered to address issues and research-based pedagogical strategies of teaching Emergent Multilingual Students in today's mainstream classrooms. Teacher candidates will explore a variety of instructional strategies and develop cultural knowledge and its application in teaching Emergent Multilingual Learners. The course also includes incorporating instructional technology into the classroom, and utilizing data to inform instruction. Clinical Experience Hours Required. Education majors only.

**ED-327 Theories and Practice of ESL Instruction Part I****Credits: 3**

Prerequisite(s): ED-320 and a minimum GPA of 3.00

Term Offered: All Terms

Course Type(s): None

With an emphasis on teaching English as a Second Language through content, part one of this two-semester course will introduce the history of ESL teaching and critically explore exemplary curriculum designs and methods of teaching ESL. A wide range of ESL instructional materials, instructional technology, services, and assessment measures will be introduced and practiced, with an emphasis on standard-based content and ESL teaching. Both instructional design and implementation will be the focus for practice, with embedded language acquisition/learning theories and research studies carefully examined. Clinical Hours required. Education majors only.

**ED-328 Theories and Practice of ESL Instruction Part II Credits: 3**

Prerequisite(s): ED-327 or ED-374, EN-442, and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

A continuation of ED-327 examines public issues pertinent to ESL education, with an emphasis on making connections between theories or research findings and classroom practice. More approaches to ESL instruction will be introduced with an emphasis on various strategies, techniques, and instructional technology for teaching specific language skills in a standard-based content and ESL teaching program. Reflective practice is an integral part. Clinical Hours required.

**ED-331 Music for the Child Credits: 2**

Prerequisite(s): MU-151 and MU-218

Course Type(s): None

Focus on methods and materials of teaching in the elementary school (K-8): singing, rhythmic expression, listening, use of simple instruments, and correlating music with other areas of learning. It will include pedagogical strategies related to teaching linguistically diverse students, students with diverse needs, using instructional technology and using data to inform instruction. For Music majors only. Also listed as MU-331. Clinical Hours required.

**ED-333 The Teaching of Music in the Secondary School Credits: 2**

Prerequisite(s): MU-151 and MU-218

Term Offered: Spring Term

Course Type(s): None

Study and application of appropriate concepts, methods, skills, and materials for secondary-school music teachers. It will include pedagogical strategies for teaching linguistically diverse students, those with special needs using instructional technology and using data to inform instruction. For Music majors only. Clinical Hours required. Also listed as MU-333.

**ED-336 Applied Linguistics for the Language Educator Credits: 3**

Term Offered: Summer Term

Course Type(s): None

Designed to introduce students to the concepts of linguistics as related to bilingual education and the teaching of English as a second language. Students will also learn structural aspects of linguistics, including morphology (words), syntax (sentence patterns), semantics (the meaning of words), phonetics and phonology (the sounds of language), pragmatics (the way language works in the world), and English grammar. Students will gain familiarity with important theories, research, and how the English language works. Education majors only. Students must have a minimum G.P.A. of 3.00 to register for this course.

**ED-351 Methods of Teaching Art I Credits: 3**

Prerequisite(s): AR-114, AR-116, AR-192, and ED-320 and a minimum G.P.A. of 3.00.

Term Offered: All Terms

Course Type(s): None

The history and philosophy of art education; the construction of art curricula and the exploration of teaching methods; media and tools appropriate for the educational level. Methods I deals with the needs of the elementary school child. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instruction. Clinical Hours required. Also listed as AR-351.

**ED-352 Methods of Teaching Art II Credits: 3**

Prerequisite(s): ED-351 or AR-351 and Minimum G.P.A. of 3.0.

Term Offered: Spring Term

Course Type(s): None

The history and philosophy of art education; the construction of art curricula and the exploration of teaching methods; media and tools appropriate for the educational level. Methods II deals with the needs of the adolescent. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instruction. Clinical Hours required. Also listed as AR-352.

**ED-360 Methods of Teaching Mathematics in Grades P-6 Credits: 3**

Prerequisite(s): MA-205, EDL-326, and a minimum G.P.A. of 3.00.

Term Offered: All Terms

Course Type(s): None

ED-360 is designed to provide a profound understanding of the concepts taught in early childhood and elementary school mathematics. Teacher candidates participate in activities and learn interdisciplinary techniques to foster conceptual development of mathematics in young learners with literacy skills, as well as assess and remedy students' mathematical difficulties. The essential elements of instruction, assessment, grouping strategies, and effective questioning are illustrated and honed when planning mathematics lessons to address the instructional needs of diverse learners and students with disabilities. In this course, students learn cognitively guided instruction for mathematics, the eight mathematical teaching practices by NCTM, and how to implement them in the classroom. This course contains foundational knowledge that will be used during the clinical practice performance assessment. It will include research-based pedagogical strategies for teaching linguistically diverse students and those with special needs, using instructional and assistive technology, and using data to inform instruction. Clinical practice hours required.

**ED-361 Disciplinary Literacy and Methods of Teaching Elementary Science Credits: 3**

Prerequisite(s): ED-320, EDL-326 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): EX5

This course is designed to provide an integrated perspective of teaching science from pre-kindergarten through grade 6. This course provides opportunities for experiential learning of interdisciplinary teaching methods with an emphasis on literacy integration. Active learning of science concepts will be achieved through various inquiry activities. Following the learning theories that have produced both the Next Generation Science Standards and the New Jersey Student Learning Standards for Science, this course will utilize a diversity of instructional methods and strategies to provide each student with the opportunity to learn how to teach inquiry and problem-solving across the sciences with a focus on disciplinary literacy and argumentation in science. This course has a 50 hour field experience component.

**ED-365 Methods of Teaching Mathematics at the Secondary Level****Credits: 3**

Prerequisite(s): ED-319 or EDL-327, and ED-320 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

ED-365 focuses on the teaching of secondary mathematics. It is intended to deepen future secondary school teachers' understanding of the secondary mathematics curriculum and build their competencies at the level of instructional implementation. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instructions. Essential elements of effective instruction, including inquiry-based learning, implementing tasks that promote reasoning and problem-solving, assessment, facilitating meaningful mathematical discourse, eliciting and using evidence of student thinking, grouping strategies and effective questioning are explored as these are techniques utilized to bring conceptual understanding of mathematics to all learners. Education majors only.

**ED-367 Methods of Teaching English at the Secondary Level Credits: 3**

Prerequisite(s): ED-319 or EDL-327 and a minimum G.P.A. of 3.00, Education Majors Only

Term Offered: All Terms

Course Type(s): None

Provides in-depth preparation to teacher candidates desiring to teach English/Language Arts at the secondary level by extending the essential knowledge, skills, and strategies grounded in research and related to effective classroom instruction. Teacher candidates will have increased opportunities to apply theory and refine practices in the use of print and non-print texts and in the integration of the English Language Arts. New Jersey Professional Standards for Teachers (NJPSTs) will be an integral part of the course. Candidates are required to complete a 100 hour practicum in a local school. Education Majors Only.

**ED-369 Methods of Teaching Science at the Secondary Level Credits: 3**

Prerequisite(s): ED-319 or EDL-327 and a minimum G.P.A. of 3.00

Term Offered: Fall Term

Course Type(s): None

Science methods at the secondary level is designed for those with a background in science. The intent of this course is to provide an integrated perspective of teaching science from grade 7-12. This course will provide active learning of science concepts through various inquiry activities. Following the learning theories that have produced both the Next Generation Science Standards and the New Jersey Student Learning Standards for science, this course will utilize projects, cases, and problems in real world settings using a diversity of instructional methods and strategies to provide each student with the opportunity to learn how to teach inquiry and problem-solving across the sciences. Education majors only.

**ED-371 Methods of Teaching Social Studies at the Secondary Level****Credits: 3**

Prerequisite(s): ED-319 or EDL-327 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

The course will introduce students preparing for middle and secondary level teacher certification to social studies curriculum and methods. Course content will emphasize national and state standards for social studies education across the traditional social science discipline. The course will also explore the philosophical and theoretical foundations of social studies education. It provides the candidate with practical strategies necessary for success in teaching culturally and linguistically diverse students and students with diverse learning needs, using instructional technology, research, and assessment data to inform instruction in the context of social studies.

**ED-374 Issues and Practices in World Language Education Part II****Credits: 3**

Prerequisite(s): ED-320 and a minimum G.P.A. of 3.00

Term Offered: Fall Term

Course Type(s): EX5

Issues and practices in world language curriculum and instruction. Fieldwork required. Designed to expand future world language teachers' understanding of the complexities of the content-based instruction in curriculum design and strengthen their competencies with a focus on standard-based language instruction that addresses the national and state standards. A wide range of world language instructional materials, instructional technology, services, and assessment measures will be introduced and practiced. The experiential component of the course provides the students with opportunities for hands-on experiences for deepening understanding and strengthening competencies. For Education majors only. Clinical Practice hours required.

**ED-377 Integrated K-12 Teaching Methods****Credits: 3**

Prerequisite(s): ED-319, ED-320 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

Deepens future K-12 school teachers' understanding of the complexities of the curriculum and builds their competencies at the level of instructional implementation in specific subject areas. Focuses on a broad spectrum of instructional methodologies and techniques that are workable in today's classroom. A constructivist approach to planning and instruction will be emphasized. The experiential component of the course provides the students with opportunities for clinical work in the classroom, strengthening competencies and deepening understanding. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instruction. Clinical Practice hours required. Education majors only.

**ED-378 Methods of Teaching Elementary Physical Education and Health**  
**Credits: 3**

Prerequisite(s): ED-320 either as a prerequisite or corequisite, and a minimum G.P.A. of 3.00  
 Term Offered: Spring Term  
 Course Type(s): HEPE  
 Focus on the planning, implementing, and assessing of competency-based physical education and skill-based health in elementary settings. Preservice teachers will learn pedagogical strategies related to teaching culturally and linguistically diverse students and students with diverse (special) needs in addition to using instructional technology, research-based best practices, and assessment data to inform instruction in elementary physical education and health. The course will utilize a lecture-based format and lab-based activities to prepare preservice teachers to develop physical literacy and health literacy for PreK-5 students. During lab-based activities, preservice teachers will plan and implement physical education and health lessons to peers and PreK-5 students. Clinical practice hours are required in accordance with New Jersey state statutes. Education majors only.

**ED-379 Methods of Teaching Secondary Physical Education and Health**  
**Credits: 3**

Prerequisite(s): ED-320 as either a prerequisite or corequisite, and a minimum G.P.A. of 3.00  
 Term Offered: Fall Term  
 Course Type(s): HEPE  
 Focus on the planning, implementing, and assessing of competency-based physical education and skill-based health in secondary settings. Preservice teachers will learn pedagogical strategies related to teaching culturally and linguistically diverse students and students with diverse (special) needs in addition to using instructional technology, research-based best practices, and assessment data to inform instruction in secondary physical education and health. The course will utilize a lecture-based format and lab-based activities to prepare preservice teachers to develop physical literacy and health literacy for 6-12 grade students. During lab-based activities, preservice teachers will plan and implement physical education and health lessons to peers and 6th-12th grade students. Clinical practice hours are required in accordance with New Jersey state statutes. Education majors only. Prerequisite: a minimum G.P.A of 3.00. Prerequisite or corequisite: ED-320.

**ED-380 Middle Level Learning and Teaching**  
**Credits: 3**

Prerequisite(s): ED-250, ED-320 and a minimum G.P.A. of 3.00  
 Term Offered: Spring Term  
 Course Type(s): None  
 The candidate will examine aspects of middle-level schooling that are responsive to the nature and needs of adolescents. The candidate will apply knowledge of adolescents' cognitive and affective development to design learning environments and to structure and implement learning experiences that effectively promote academic achievement and personal growth for all middle-grade students. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instruction. Clinical Experience hours required.

**ED-398 Special Topics in Education (300 Level)**  
**Credits: 1-3**

Course Type(s): None  
 An intensive study of a particular subject or problem in education to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. A minimum G.P.A. of 3.00 is required to take this course. If a prerequisite is required it will be announced in the course schedule.

**ED-399 Independent Study in Education**  
**Credits: 3**

Term Offered: All Terms  
 Course Type(s): None  
 Independent research in education in an area not substantially treated in a regular course offering under the supervision of an education faculty member; written evaluation of the research is required. For students with superior ability. Students must have a minimum G.P.A. of 2.75 to take this course, along with prior permission of the directing professor and department chair.

**ED-401 Literacy Assessment to Inform Instruction**  
**Credits: 3**

Prerequisite(s): EDL-327.  
 Term Offered: All Terms  
 Course Type(s): None  
 Review of theory and research related to formal and informal assessment in P-6 literacy and its effects on teaching and learning will be explored. Focus will be on developing an assessment plan for use in the classrooms and instructional settings in which participants complete student teaching. Prerequisite: EDL-327 Corequisite: ED-406

**ED-402 Content Area Literacy and Assessment II**  
**Credits: 3**

Term Offered: All Terms  
 Course Type(s): None  
 Designed for secondary and K-12 education majors, this course reviews theory and research related to formal and informal assessment in content area literacy and its effects on teaching and learning will be explored. Focus will be on developing an assessment plan for use in the content area classroom and instructional settings in which participants complete student teaching.

**ED-406 Clinical Practice NEW**  
**Credits: 6**

Term Offered: All Terms  
 Course Type(s): None  
 Clinical practice is a collaborative learning experience facilitated by local school districts and Monmouth University that provides teacher candidates with an opportunity to practice and refine their pedagogical knowledge and skills under the supervision and guidance of exceptional master teachers (P-12 clinical educators) and highly qualified Monmouth University clinical educators. This experience requires teacher candidates to plan, instruct, and assess P-12 students and to analyze student learning and propose changes to teacher practice to address student learning needs. This full-time, full-semester clinical practice in a school setting requires clinical interns to observe, plan, instruct, and assess P-12 students under the guidance of a cooperating teacher and university clinical educator and reflect on the impact of their instruction on P-12 students' academic performance. In addition to the full-time, full-semester experience in schools, clinical practice requires clinical interns to attend and fully participate in on-campus seminar focus groups and online activities. All aspects of the requirements are linked to the New Jersey Professional Standards for Teachers (NJPST), which are aligned to the InTASC standards. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom, and utilizing data to inform instruction. Limited to Education majors. A minimum cumulative GPA of 3.00 is required to take this course. Passing the appropriate state required teacher examinations, Senior standing, and approval of the department, are also required.

**ED-416 Clinical Practice**

Term Offered: All Terms

Course Type(s): EX5

This full-time, full-semester clinical practice in a school setting requires clinical interns to observe, plan, instruct, and assess P-12 students collaborating with a cooperating teacher and university faculty. Clinical interns complete an edTPA portfolio and analyze their instruction and the effect on student achievement. In addition, there are on-campus seminars, focus groups and an online component. All aspects of the requirements are linked to the New Jersey Student Learning Standards (NJSLS) the NEW Jersey Professional Standards for Teachers (NJPST), and national Specialty Professional Association (SPA) standards. The course includes research-based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating instructional technology into the classroom and utilizing data to inform instruction. Limited to Education majors. A minimum G.P.A. of 3.00 is required to take this course. Passing the appropriate state required teacher examinations, Senior standing, and approval of the department, are also required.

**Credits: 8****ED-416S Clinical Practice Seminar**

Term Offered: All Terms

Course Type(s): None

A one-credit seminar to be taken in conjunction with Clinical Practice. Education majors only. A minimum G.P.A. of 3.00 is required to take this course.

**Credits: 1****ED-427 The Teaching of World Languages**

Term Offered: Spring Term

Course Type(s): None

This course is designed to prepare the World Language teacher candidate's understanding of the ACTFL performance guidelines and standards together with their application and assessment in the classroom. Various modes of teaching language will be explored including meaningful integration of the ACTFL 5 C's and Integrated Performance Assessments into each lesson. Professional development is explored and students must complete a professional Development Plan that includes joining professional affiliations. Preparation for the edTPA is included in this course with one lesson in the target language to be presented and videotaped in class for self and group assessment. This course will include pedagogical strategies related to teaching linguistically diverse students, students with diverse needs, using instructional technology and using data to inform instruction. These components provide the students with valuable pre-teaching experiences that will strengthen understanding of teaching strategies and capabilities. Also listed as FO-427. Clinical Hours are required.

**Credits: 3****ED-428 Culturally and Linguistically Responsive Teaching****Credits: 3**

Prerequisite(s): ED-250 and a minimum G.P.A. of 3.00

Course Type(s): OL

Students will focus on two aspects of culturally and linguistically responsive and relevant instruction. The first aspect is the focus on equity and diversity and the second aspect concentrates on pedagogy for infusing culturally and linguistically responsive teaching into instruction. Professionals will engage in self-reflection related to racism and other forms of discrimination in order to better understand how identities and ideologies impact everyday school practices and the educational experiences of all students, especially those from culturally and linguistically diverse backgrounds. The course also includes incorporating instructional technology into the classroom and utilizing data to inform instructions.

**ED-498 Special Topics in Education (400 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in education to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. A minimum G.P.A. of 3.00 is required to take this course. If a prerequisite is required it will be announced in the course schedule.

**ED-499 Independent Study in Education****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Independent research in education in an area not substantially treated in a regular course offering under the supervision of an Education faculty member; written evaluation of the research is required. For students with superior ability. Prior permission of the directing professor and department chair and a minimum G.P.A. of 2.75 are required to take this course. Application must be filed before registration.

## Education Educational Leadership (EDL)

**EDL-280 Introduction to Early Childhood Education****Credits: 3**

Prerequisite(s): ED-250.

Term Offered: Spring Term

Course Type(s): None

This is an introductory course, which examines the historical, philosophical, and theoretical foundations of early childhood education. The course will cover major aspects of the physical, socio-emotional, and cognitive development of young children from birth to 8 years of age. The course addresses major theories and concepts of child development, early childhood ethics and professionalism, developmentally appropriate practice, diverse early childhood curriculum and programs, inclusion and special needs children, the use of technology, the use of data(formative and summative) to inform instruction, and home-school partnerships. The course covers the tenets of culturally responsive teaching in order to meet the needs of culturally and linguistically diverse children. Education Majors Only.

**EDL-299 Independent Study in Educational Leadership****Credits: 1-3**

Course Type(s): None

Independent research in educational leadership in an area not substantially treated in a regular course offering under the supervision of an Educational Leadership faculty member; written evaluation of the research is required. For students with superior ability. Prior permission of the directing professor and department chair is required to take this course. Application must be filed before registration.

**EDL-325 Language and Early Literacy Development, Birth Through Kindergarten Credits: 3**

Term Offered: Spring Term

Course Type(s): None

This course, which involves a field experience, focuses on language development and early literacy of regular, special education, and young learners from culturally and linguistically diverse backgrounds, birth to kindergarten. The content includes the study of theories and acquisition of language development and sound awareness, the interrelated nature language development and literacy, the appropriate development and assessment of language and early literacy, using the results of the assessment and other formative and summative data to inform instruction, methods for engaging and motivating all young learners, the appropriate use of technology with young learners, and strategies for involving families and community members. Clinical Practice required. A minimum G.P.A. of 3.00 is required to take this course.

**EDL-326 Literacy Instruction in P-6 Educational Settings I Credits: 3**

Prerequisite(s): ED-250.

Term Offered: All Terms

Course Type(s): None

This course focuses on the literacy development of regular and special education children, including those from linguistically diverse backgrounds in grades P-6. Students will develop the pedagogical content knowledge and command of strategies to teach early literacy skills, including phonics, phonemic awareness, vocabulary, reading comprehension, fluency, and concepts of print. Ongoing assessment and instructional strategies will be explored through various multicultural and diverse literature sets.

**EDL-327 Methods of Teaching Content Literacy Including ELA and Social Studies Credits: 3**

Prerequisite(s): EN-101 and EN-102, and EDL-326.

Term Offered: All Terms

Course Type(s): WT

This course focuses on the literacy development (reading comprehension, writing, speaking, and listening) of general and special education children in Grades P-6 across the content areas. Using evidence-based strategies, candidates will plan, implement, and research techniques for supporting students' phonics, phonemic awareness, vocabulary, reading comprehension, and fluency with a variety of print and digital texts. In addition, they will engage in action research in the literacy classroom, expanding their repertoire of intentional strategy implementation. Ongoing assessment and instructional planning of modifications, accommodations will be explored in inclusive educational settings. Special attention is noted for students with special needs, including those with high incidence learning disabilities, dyslexia, and exceptional learners.

**EDL-333 Family Partnerships in Early Childhood Settings Credits: 3**

Prerequisite(s): EN-101 and EN-102, ED-250, and a minimum G.P.A. of 3.00.

Term Offered: Fall Term

Course Type(s): WT

The course will cover the history and significance of family and community involvement in early childhood education: An overview of perspectives regarding family diversity, parent-professional partnerships and communication, early intervention and special education services, and the legal and ethical rights of diverse contemporary families of young children to foster an understanding of the significant roles of families and communities.' Contextual factors, social, cultural, racial, exceptionality, and environment, known to impact learning, will be addressed with an approach to develop the skills and knowledge needed for teachers to create positive working relationships with families and communities. This course includes research based pedagogical strategies for teaching linguistically diverse students, those with diverse learning needs, incorporating appropriate instructional technology into the classroom, and utilizing data from formative and summative assessments to inform instruction. This course incorporates developmentally appropriate instructional technology into the classroom. Limited to Education majors.

**EDL-364 Early Childhood Capstone Research Seminar Credits: 3**

Prerequisite(s): EDL-333 and EDL-280

Term Offered: All Terms

Course Type(s): None

This course will examine basic principles and current research on early childhood curricula. The focus of the course is on designing an integrated, developmentally appropriate curriculum in order to strengthen all aspects of all children's development, including cognitive, language, social, emotional, and physical capabilities. Students are required to conduct action research focusing on their teaching philosophy, practices, and research understandings as reflective practitioners based on their field work. The course will discuss the appropriate teaching methods that meet children's individual, and developmental needs, with an emphasis on culturally responsive teaching in order to address the needs of linguistically and culturally diverse students as well as any students who have special education needs. The use of technology in order to collect formative summative data will also be addressed. Additionally, the results of the assessment data collected to inform instruction will be addressed. The course will also focus on the importance of observation and authentic assessment in curriculum planning. The course will also address the use of creative play to support children's learning and development in early childhood settings, including the use of technology to support play and learning. Foundations of speech language development, including screening and support of students with speech/language, articulation, and communication disorders. Clinical Practice hours required. A minimum G.P.A. of 3.00 is required to take this course. Prerequisites: EDL-333 and EDL-280

**EDL-398 Special Topics in Educational Leadership Credits: 3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in education to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. A minimum G.P.A. of 3.00 is required to take this course. If a prerequisite is required it will be announced in the course schedule.

**EDL-399 Independent Study in Educational Leadership Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Independent research in educational leadership in an area not substantially treated in a regular course offering under the supervision of an Educational Leadership faculty member; written evaluation of the research is required. For students with superior ability. Prior permission of the directing professor and department chair is required to take this course. Application must be filed before registration.

**EDL-499 Independent Study in Educational Leadership Credits: 1-3**

Course Type(s): None

Independent research in educational leadership in an area not substantially treated in a regular course offering under the supervision of an Educational Leadership faculty member; written evaluation of the research is required. For students with superior ability. Prior permission of the directing professor and department chair is required to take this course. Application must be filed before registration.

## Education Special Education (EDS)

**EDS-330 Foundations of Special Education: Child & Adolescent Development and Transition to Adulthood Credits: 3**

Prerequisite(s): ED-250 and a minimum G.P.A. of 3.00.

Course Type(s): None

Philosophical, historical, and legal foundations of special education. The Council of Exceptional Children (CEC) Code of Ethics and Standards for Practice are studied. Exploration of the similarities and differences among the cognitive, physical, cultural, social, and emotional development and needs of individuals with disabilities across the lifespan, including adolescent concerns and transition to adulthood. Examination of the educational implications of characteristics of various exceptionalities such as Autism Spectrum Disorders (ASD), Specific Learning Disabilities (SLD), ADHD, intellectual & developmental disabilities, emotional disabilities, and orthopedic impairment. Educational implications for learners from diverse cultures and second language learners will also be addressed through discussions on family characteristics and family systems theory. An overview of a continuum of service delivery models will be explored with implications for various learners. Education majors only. Clinical hours required.

**EDS-332 Family/School/Community Partnerships and Resources, P-12 Credits: 3**

Prerequisite(s): ED-250 and EDS-330;

Term Offered: All Terms

Course Type(s): None

Focus on the legal and historical perspectives of family involvement in special education. Family systems theory and parent-professional partnerships in decision making are included for all learners, P-12. Identifying appropriate community resources for persons with and without disabilities and their families and strategies for transition and career planning are addressed. Education majors only. A minimum GPA of 3.00 is required to take this course.

**EDS-336 Classroom Management Credits: 3**

Prerequisite(s): EDS-330 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

The study and application of various theories of behavior management for students with and without disabilities. Practical application of theories for classrooms are included. Addressing social competence skills and facilitating positive interpersonal relationships in classrooms are discussed. Clinical Experience hours required. Education majors only.

**EDS-337 Special Education Strategies in P-6 Social Studies and Content Instruction Credits: 3**

Prerequisite(s): EDS-330, EDS-336, EDS-338 and EDS-350

Term Offered: All Terms

Course Type(s): None

Course content includes the development of educational programs and applications of social studies and content area curricula, methods, and materials appropriate for the strengths and needs of all students, including those with disabilities, in inclusive settings in P-6 schools. Course content will emphasize national and state standards for social studies education, cross-curriculum integration, particularly world languages and culture, personal and social problem solving, and situated cognition in social studies education learning. The essential elements of planning, instruction using technology, and assessment based on research and data are explored to teach students, including those with disabilities. Focus on identifying and creating adaptations to support students with difficulty learning in inclusive classrooms. Education majors only. A minimum GPA of 3.0 is required to take this course. Clinical hours required.

**EDS-338 Assessment Approaches, P-12 Credits: 3**

Prerequisite(s): EDS-330 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

An introduction to the use of assessment in making decisions about instructional grouping, exceptionality, eligibility, and educational programming. Students in this course will learn about ethical standards for professional practice and standardized and teacher-developed assessment procedures. Practice is provided in using assessment data to make decisions about placement in a curriculum, pupil progress, appropriate measurable long-term goals and short-term instructional objectives, and selection of instructional strategies. The importance of parent participation in decision-making is included. Use of formal and informal assessment strategies are included. Education majors only.

**EDS-342 Instructional Methods and Materials for Students with Disabilities Credits: 3**

Prerequisite(s): EDS-330, EDS-336, EDS-338, and a minimum G.P.A. of 3.00

Term Offered: Spring Term

Course Type(s): None

Study and application of research-based methods, curriculum, and materials for students with disabilities. Focus on identifying and creating accommodations and modifications to meet the needs of all students in special education and inclusive settings. Includes pedagogy that is applicable to teaching literacy to struggling readers and students with disabilities, including literacy in the content areas. Clinical hours required. Education majors only.

**EDS-350 Individualizing Curricula and Systematic Instruction for Special Education Credits: 3**

Prerequisite(s): EDS-330 and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): None

The development and application of research-based, effective teaching techniques, necessary adaptations, and supports to meet the learning needs of exceptional students, prescriptive models for intervention, and ways of observing, recording, and responding to behaviors. Clinical Experience hours required. Education majors only.

**EDS-352 Curricula, Methods, and Materials for Learners with Difficulties** **Credits: 3**

Prerequisite(s): EDS-330, EDS-336, EDS-338 and a minimum G.P.A. of 3.00  
Term Offered: All Terms

Course Type(s): None

The development of educational programs and applications of curricula, methods, and materials appropriate for the strengths and needs of all students with disabilities and/or difficulties in special education and inclusive settings. Focus on identifying and creating adaptations to support students with difficulty learning in classrooms. Clinical Hours required. Education majors only.

**EDS-398 Special Topics in Special Education** **Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in education to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. A minimum G.P.A. of 3.00 is required to take this course. If a prerequisite is required it will be announced in the course schedule.

**EDS-399 Independent Study in Special Education** **Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study in special education in an area not substantially treated in a regular course offering under the supervision of a special education faculty member; written evaluation of the research is required. For students with superior ability. Students must have a minimum G.P.A. of 2.75 to take this course, along with prior permission of the directing professor and department chair.

**EDS-499 Independent Study in Special Education** **Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Independent research in education in an area not substantially treated in a regular course offering under the supervision of an Education faculty member; written evaluation of the research is required. For students with superior ability. Prior permission of the directing professor and department chair is required to take this course. Application must be filed before registration.

## English (EN)

**EN-100 Writing Workshop** **Credits: 3**

Term Offered: Summer Term

Course Type(s): None

Development of skills useful for essay writing; opportunity to write in other forms; and projects to fit individual student needs. Offered in summer only; restricted to EOF students.

**EN-101 College Composition I** **Credits: 3**

Term Offered: All Terms

Course Type(s): None

A college-level writing course designed to prepare students to make the transition from high school to college by familiarizing them with the standards for academic writing they will encounter throughout their educational and professional careers. Students will gain intense experience in writing academic prose that demonstrates knowledge, understanding, analysis, and application of ideas from a variety of progressively sophisticated and interrelated texts.

**EN-102 College Composition II** **Credits: 3**

Prerequisite(s): EN-101

Term Offered: All Terms

Course Type(s): None

Reinforces and expands the reading and writing activities taught in English 101 (academic writing demonstrating knowledge, understanding, analysis, and application of ideas). In addition to sustaining what has already been learned in other writing courses, EN 102 focuses on the academic "research" essay as a fundamental written form needed across the disciplines.

**EN-201 Literature I: Ancient Through Renaissance** **Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT

Works from the Ancient, Medieval, and Renaissance periods.

**EN-202 Literature II: Neoclassical to the Present** **Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT

Works from the Renaissance to the present.

**EN-209 Literature and the Environment** **Credits: 3**

Course Type(s): LIT

Ecocriticism, also called environmental criticism, examines the ways in which literary texts represent the natural world and human relationships with it. This course examines literary works from the pre-modern period through the twenty-first century, from anglophone and other traditions, to investigate how they represent natural and constructed environments, humans and non-human animals, how humans have interacted with the environment, and how constructed human categories such as race, gender, religion, and disability interact with various environments.

**EN-211 Environment and Pre-Modern Literature** **Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT

Environmental criticism, sometimes called "ecocriticism", examines the ways in which literary texts represent the natural world and human relationships with it. Looks at several works from the Ancient and Medieval periods, considering how people from different times and places before the modern era think about "nature" and natural resources.

**EN-212 Literature of Oppression** **Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): ADS, LIT

Selected works of the eighteenth, nineteenth, and twentieth centuries are covered, with attention to representations of oppression as displayed in slavery, colonialism, imperialism, and post-colonial responses.

**EN-213 Tragedy and the Tragic** **Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT

Explores the nature of literary tragedy by having students consider the conventions of both classical and Shakespearean tragedy and decide whether literary narratives that are merely sad - particularly those in contemporary times and from genres other than drama - may similarly be termed "tragedy".

**EN-214 The Irish: Home and Abroad**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT

A comparison of the Irish epic *The Tain* to *The Odyssey* and exploration of the literature and culture of Ireland and the Irish diaspora, which may include writers of Irish descent from Canada, the U.S., Australia, South America, and other parts of the world.

**Credits: 3****EN-215 Vampire Literature: Bite Me**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT

Literature about vampires starting with nineteenth-century European texts and moving into the twentieth and twenty-first centuries in the Americas. These texts involve themes of vampirism representative to cultural, ethical, and political issues for their times.

**Credits: 3****EN-216 Illness in Literature**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, LIT

An examination of illness in literature.

**Credits: 3****EN-217 Rebirth in Comedy**

Prerequisite(s): EN-101 and EN-102

Term Offered: Spring Term

Course Type(s): LIT

Selected texts of the tradition of comedy, from Ancient Greece to the present, including plays, novels, and movies.

**Credits: 3****EN-218 Here Be Dragons: Heroic Journeys**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT

Explores representative heroic journeys in literature. These heroes follow an archetypal path outlined by mythologist Joseph Campbell. The diverse heroes arrive to understand and engage ethical, moral, political, gender, social, economic, and ethnic challenges. They must learn to develop beyond their limitations and flaws in order to face the dragon, danger and evil, and to lead and save a people, place, and/or idea.

**Credits: 3****EN-219 Science Fiction**

Prerequisite(s): EN-101 and EN-102 or equivalent

Term Offered: Spring Term

Course Type(s): LIT

This LIT course on the literature of Science Fiction is designed to introduce students to the genre of Science Fiction (SF) from works that were written between the mid-nineteenth century and the late twentieth. As a uniquely modern form of literature, it is important to contextualize the genre historically, politically, and culturally, as it reflects attitudes about science, progress, and the human condition that dominated at the time the works were written and, often, provide clues to cultural orientations that persist to this day. We will examine both SF short stories and novels to more clearly understand how this genre of literature has become one of the most popular forms of social commentary on the past, present, and future of humanity.

**Credits: 3****EN-220 Literature of the Sea**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT

Literature of the sea since the Enlightenment with major texts representing diverse nations and global contexts.

**Credits: 3****EN-221 Literature and the Environment**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT, OL

Ecocriticism, also called environmental criticism, examines the ways in which literary texts represent the natural world and human relationships with it. This course examines literary works from the pre-modern period through the twenty-first century, from anglophone and other traditions, to investigate how they represent natural and constructed environments, humans and non-human animals, how humans have interacted with the environment, and how constructed human categories such as race, gender, religion, and disability interact with various environments.

**Credits: 3****EN-222 Superheroes: Echoes of Epic**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT

Close reading and analysis of narratives based on epic myths from Ancient through Contemporary periods in order to develop students' critical judgement of the texts and their knowledge of relevant historical, aesthetic, cultural, and ethical backgrounds. Development of writing and research abilities, building on skills learned in EN-101 and EN-102 (prerequisites) This course fulfills the General Education LIT requirement.

**Credits: 3****EN-223 The Campus Novel**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT

Explores literature depicting the college experience, campus life, and scholarly pursuits. Novels, short stories, and plays from the early 20th century to the present will be considered, as well as essays on campus related issues and controversies.

**Credits: 3****EN-224 Ghost Stories and Other Haunting Tales**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT

Close reading and analysis of ghost stories from ancient through contemporary periods in order to develop students' critical judgement of the texts and their knowledge of relevant historical, aesthetic, cultural, and ethical backgrounds. Development of writing and research abilities, building on skills learned in EN-101 and EN-102.

**Credits: 3****EN-225 Legal Fictions: Literature and the Law**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): LIT

Close reading and analysis of literary narratives about the law and justice from Ancient through Contemporary periods in order to develop students' critical judgment of the texts and their knowledge of relevant historical, aesthetic, cultural, and ethical backgrounds. Development of writing and research abilities, building on skills learned in EN-101 and EN-102 (prerequisites). This course fulfills the General Education LIT requirement.

**Credits: 3****EN-226 Literary Studies for English Majors**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

An introduction to literary studies. Close study of representative texts in fiction, poetry, drama, the essay, and literary theory and criticism; writing of analytical essays, integrating close reading of text with theoretical critical approaches.

**Credits: 3**

**EN-227 Foundations of British Literature****Credits: 3**

Prerequisite(s): EN-101 and EN-102; or permission of the instructor

Term Offered: All Terms

Course Type(s): LIT, ENCWU

A British and Irish literature survey from the Middle Ages through the late eighteenth century, emphasizing close analysis of texts and fundamental approaches to critical writing.

**EN-228 Foundations of American Literature****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): LIT, ENCWU

An American literature survey from the Colonial period to the Civil War, emphasizing fundamental critical terms and concepts and the use of writing to explore relationships between literature and criticism.

**EN-229 Non-European Literature in English****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): GU, LIT, ENCWU

Survey of national literature from the non-western, non-European world. Literary analysis and class reading of selected prose, poetry and dramatic literature.

**EN-251 Creative Writing: Introduction****Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): None

Students analyze in a workshop setting readings in two or more genres of literature (poetry, fiction, drama, non-fiction) to observe techniques in craft, and present their own creative writings for intensive examination by workshop participants.

**EN-252 Creative Writing: Fiction****Credits: 3**

Prerequisite(s): EN-251 or permission of the instructor

Term Offered: All Terms

Course Type(s): ENCWU

Short-story writing with critiques. This course is repeatable once for credit, with departmental permission.

**EN-253 Creative Writing: Poetry****Credits: 3**

Prerequisite(s): EN-251 or permission of the instructor

Term Offered: Spring Term

Course Type(s): ENCWU

Experiment with a variety of verse forms and techniques for the purpose of developing creativity and deepening the appreciation of poetry. Repeatable once for credit, with departmental permission.

**EN-254 Creative Writing: Drama****Credits: 3**

Prerequisite(s): EN-251 or permission of the instructor

Term Offered: All Terms

Course Type(s): ENCWU

The writing of one-act plays; development of comic and dramatic techniques. Repeatable once for credit with departmental permission.

**EN-255 Creative Writing: Non-Fiction****Credits: 3**

Prerequisite(s): EN-251 or permission of the instructor

Term Offered: Spring Term

Course Type(s): ENCWU

Development of advanced writing skills to explore a variety of personal essay forms, such as the memoir, travel writing, and the lyric essay. Repeatable once for credit, with departmental permission.

**EN-271 Professional Writing****Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): TL

An advanced writing workshop introducing the rhetorical principles and writing practices necessary for producing appropriate workplace writing; emphasis on a wide range of audiences, genres, ethical issues and contexts that professional writers commonly encounter.

**EN-298 Special Topics in English (200 Level)****Credits: 1-3**

Prerequisite(s): EN-101 and EN-102

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in English to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis.

**EN-299 Independent Study in English****Credits: 3**

Prerequisite(s): EN-101 and EN-102, three credits from any course with a designation of LIT, and permission of the instructor

Term Offered: All Terms

Course Type(s): None

Independent Study in English: Reading, writing, and research on a selected topic under the direction of an English department faculty member. For the CW or any of the Writing Minors, development of a major writing project under the guidance of a faculty member.

**EN-305 Shakespeare I****Credits: 3**

Prerequisite(s): EN-101 and EN-102, and three credits from any course with a course designation of LIT

Term Offered: All Terms

Course Type(s): WT

Shakespeare's life and times; theatrical conventions of the Elizabethan stage; close reading of dramatic poetry in representative early comedies, histories and tragedies.

**EN-306 Shakespeare II****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: Spring Term

Course Type(s): WT

Shakespeare's life and times, his dramatic technique, and the conventions of the Elizabethan stage, with emphasis on the later tragedies and romances.

**EN-307 Middle English Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: Fall Term

Course Type(s): None

Arthurian legends, dream visions, and the beginnings of English drama, from the twelfth through fifteenth centuries, in translation or in Middle English.

**EN-309 Renaissance in England****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: Spring Term

Course Type(s): None

Poetry, prose, and drama from the reign of Elizabeth I through the Protectorate, excluding Shakespeare. Authors may include: Spenser, Marlowe, Webster, Sidney, Bacon, Donne, Milton, and Marvell.

**EN-310 Restoration and Augustan Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: All Terms

Course Type(s): None

Survey of British poetry, prose and drama from the Restoration to the late eighteenth century, with special attention to genre and the development of the novel. Authors may include: Behn, Defoe, Swift, Pope, Johnson, Burney, Gray, Leapor, Austen, and Cowper.

**EN-312 British Romantic Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: All Terms

Course Type(s): None

The romantic involvement with self, including major poets and prose writers from Blake through Shelley.

**EN-315 British Victorian Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: Spring Term

Course Type(s): None

The post-romantic literature of crisis among the Victorians. Authors may include: Carlyle, Tennyson, the Brontes, and Browning.

**EN-316 Modern British and Irish Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: Spring Term

Course Type(s): None

British and Irish writers from the 1890's through the Second World War, including W.B. Yeats, James Joyce, Virginia Woolf, and Stevie Smith.

**EN-318 Contemporary British and Irish Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: Spring Term

Course Type(s): None

British and Irish writers since the Second World War, including Samuel Beckett, Philip Larkin, and Seamus Heaney.

**EN-319 Modern and Contemporary Irish Drama****Credits: 3**

Prerequisite(s): EN-101, EN-102, and 3 credits from any course with a course type of LIT.

Course Type(s): None

A study of Irish drama from the turn of the twentieth century to the present day. Authors may include Yeats, O'Casey, Beckett, and McPherson.

**EN-324 Literature of Colonial America****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: All Terms

Course Type(s): None

Major genres, texts, and narratives of the early Americas, from exploration and conquest to colonization. May include Native American narrative and poetry as well as the following writers: Cabeza de Vaca, John Smith, Mary Rowlandson, William Bradford, Anne Bradstreet, Jonathan Edwards, Edward Taylor, Benjamin Franklin, William Byrd, and Sarah Kemble Knight.

**EN-327 Mid-Nineteenth Century American Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: All Terms

Course Type(s): None

Literature of the United States from the rise of transcendentalism to the Civil War. Authors may include: Poe, Emerson, Thoreau, Whitman, Stowe, Douglass, Melville, and Hawthorne.

**EN-329 American Realism****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: Spring Term

Course Type(s): None

American literature from 1870 to 1910, emphasizing developments in realistic fiction and poetry.

**EN-331 Twentieth Century African American Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: All Terms

Course Type(s): ADS

An overview of African American poetry, drama, fiction and non-fiction in the context of the Harlem Renaissance, the Civil Rights movement, the African American feminist movement, and the new African American Renaissance, while considering the contemporary events and literary movements that affected the writers. Authors include McKay, Hurston, Hughes, Baldwin, Morrison, Walker, Angelou, Wilson.

**EN-332 Modern American Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: Spring Term

Course Type(s): None

American writers from World War I to World War II, including Willa Cather, William Faulkner, Robert Frost, and Richard Wright.

**EN-334 Contemporary American Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: Spring Term

Course Type(s): None

American writers from World War II to the present, including Arthur Miller, James Baldwin, John Updike, and Elizabeth Bishop.

**EN-342 Children's and Young Adult Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102 and three credits from any course with a course type of LIT

Term Offered: All Terms

Course Type(s): WT

Examines contemporary chapter books, pre-adolescent illustrated texts, and young adult literature, including realism, fantasy, and science fiction, as well as poetry. Through an exploration of representative authors, works, genres, and criticism, the course emphasizes trends and developments in literature written for children and youth. An introduction to basic bibliographic tools and review media is included. Authors studied may include: Maurice Sendak, Roald Dahl, E.B. White, J.K. Rowling, Jack Prelutsky, Lemony Snicket, Sandra Disneros, and winners of the Caldecott and Newberry Medals. EN-342 does not fulfill the 300-level English elective requirement for English majors.

**EN-352 Craft of Writing****Credits: 3**

Prerequisite(s): EN-251 or permission of the instructor

Term Offered: All Terms

Course Type(s): ENCWU

An in-depth study of the creative writing process, either single - or multi - genre. Students may develop a craft workbook that focuses on both traditional and contemporary literary forms and strategies. Students write by assignment and develop techniques of reviewing in order to compare and contrast major authors' aesthetics with their own creative gestures.

A final portfolio may consist of approximately thirty pages of revised fiction, nonfiction, or drama, or approximately fifteen pages of revised poetry, or twenty to twenty-five pages, revised, of some combination of genres agreed upon between the student and the professor. The collection should be titled and given a cohesive arrangement. Repeatable once for credit, with departmental permission. Open only to students with a creative writing concentration and minor only.

**EN-373 The Art and Practice of Persuasion****Credits: 3**

Prerequisite(s): EN-101, EN-102, and three credits from any course with a designation of LIT

Term Offered: Fall Term

Course Type(s): None

Classical and contemporary perspectives on the nature, functions, and scope of persuasion and rhetoric. Potential print and visual texts for analysis include but are not limited to non-fiction prose, novels, short fiction, speeches, films, video clips, and Web sites.

**EN-384 Language and Community****Credits: 3**

Term Offered: All Terms

Course Type(s): EX5

This course helps students explore a broad range of career options. Through readings, interviews, guest speakers, and outside-the-classroom experiences, students will take ownership of their own professional identities and career trajectories. This course does not qualify as a 300+ English elective.

**EN-388 Cooperative Education: English****Credits: 1-3**

Prerequisite(s): Completion of all required 100- and 200-level EN courses and at least two EN electives at the 200-level or higher; permission of department chair may also be required.

Course Type(s): EX2

Integration and application of knowledge gained in the academic setting with career-related or community experiences. Work in an external setting, meeting at least three times in the semester with a faculty sponsor from the English department to establish reasonable goals and expectations for the experience, to determine progress at or near the mid-term and to make the final presentation-oral and written-for evaluation. This course may be repeated for credit.

**EN-389 Internship in English****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX1

Supervised practical experience in English; repeatable for credit. Departmental approval and Junior standing are required to take this course.

**EN-398 Special Topics in English (300 Level)****Credits: 1-3**

Prerequisite(s): three credits from any course with a designation of LIT or permission of the instructor

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in English to be announced prior to registration.

**EN-399 Independent Study in English****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Reading and research on a selected topic under the direction of an English department faculty member. Prior permission of the directing professor and department chair is required to take this course.

**EN-405 Chaucer****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: Fall Term

Course Type(s): None

Selections from the Canterbury Tales, Troilus and Criseyde, and short poems in Middle English.

**EN-410 What is a Book?****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: Spring Term

Course Type(s): WT

A study of texts and codices in the transitions from manuscript to print and from print to digital which serves as a basis for exploring what can be both lost and gained in our current movement to digital transmission.

**EN-414 Place and Space in American Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from either EN-227, EN-228, and EN-229, or written permission of the instructor

Term Offered: Spring Term

Course Type(s): None

Defines and differentiates spaces and places in various genres of American literature and explores how select texts reflect aspects of American regions, time periods, literary groups, culture, politics, history, aesthetics, identity, and/or mores. Students will analyze and interpret what diverse places and spaces represent and will apply theory about space and place in their evaluation of select literature.

**EN-415 New Jersey Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: All Terms

Course Type(s): None

An advanced survey of New Jersey literary history from the Colonial period to the present.

**EN-416 Secret Gardens: Classic Children's Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: Spring Term

Course Type(s): None

English-language children's literature, focusing on "Golden Age" illustrated narratives by authors such as Nesbit, Burnett, Milne, and Grahame, but also including poetry and earlier prose fiction by Carroll and Alcott.

**EN-417 Writing World War II in Britain****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from courses with a designation of LIT, and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: All Terms

Course Type(s): None

Major poems and prose of World War II Britain that treat the Battle of Britain, the Blitz, the Holocaust, and the North Africa campaign.

**EN-421 African Diaspora Literatures****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, 3 credits from any course with a designation of LIT, and one course from either EN-227, EN-228, EN-229, or written permission of the instructor

Term Offered: Spring Term

Course Type(s): ADS, RE

The study of the twentieth century literatures of worldwide African Diaspora. Primary texts will be drawn from different genres - prose, poetry, and drama - and will represent the different shores and locations of African Diasporas worldwide.

**EN-424 Postmodern Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: Spring Term

Course Type(s): None

Explores the works of key figures in postmodern American and/or British literature and includes a study of theoretical structures and cultural changes that help define literary postmodernism.

**EN-425 Postcolonial Literature****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: All Terms

Course Type(s): ADS, RE

Selected literary representations of colonial and postcolonial discourses in literature, theory, and criticism. Focus on creative representation from African nations, the Caribbean, and the Indian Subcontinent.

**EN-426 The Short Story in English****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: Fall Term

Course Type(s): None

Development of the short story genre in English from the eighteenth century to the present, including critical readings.

**EN-427 Contemporary Poetry****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: Fall Term

Course Type(s): None

Analysis of selected, recent poets to evaluate developments in contemporary verse.

**EN-428 Novel in English****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Course Type(s): None

The development of long prose fiction from the eighteenth century to the present, with consideration of criticism that defines the novel as a genre.

**EN-430 Nature of Tragedy****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226 three credits from any course with a designation of LIT and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: Spring Term

Course Type(s): None

Tragic literature in various genres and periods from the ancient Greeks to the present.

**EN-431 Contemporary Women Novelists****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits for any course with a designation of LIT, and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: Spring Term

Course Type(s): GS

Critical analysis of selected novels in English by women from both literary, gender, and feminist perspectives.

**EN-441 Criticism and Theory****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from EN-227, EN-228, or EN-229, or written permission of the instructor.

Term Offered: Spring Term

Course Type(s): WT

Classic literary criticism and/or contemporary critical theory from Aristotle to Coleridge, Marx to Derrida, addressing how, why, and what we read. This course does not and cannot satisfy the Monmouth University LIT requirement.

**EN-442 Language and Linguistics****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT and one course from EN-227 or EN-228 or EN-229, or written permission of the instructor

Term Offered: Spring Term

Course Type(s): TL

A grounding in the structural aspects of general linguistics: morphology, syntax, semantics, phonology, and pragmatics. Examines the structure of the English language, including nouns and noun classes, ways of talking about actions and states, how ideas are combined into complex sentences, and how context and purpose affect how we use language. Also considers differences between learning a first and second language.

**EN-443 History of the English Language****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: All Terms

Course Type(s): WT

The development of the English language from its Indo-European roots to the present, including both linguistic and cultural factors in language change.

**EN-451 Advanced Creative Writing****Credits: 3**

Prerequisite(s): EN-226 and EN-251 or permission of the instructor

Term Offered: All Terms

Course Type(s): ENCWU

Students analyze in a workshop-setting longer works (long poems and/or poetic-sequences; novellas; plays; creative nonfiction) in American and World literature to observe techniques in craft, and present their own capacious, sustained, and at times self-generative creative writings for intensive full-revised and cohesive final portfolio of a length appropriate to the genre. Open only to students with a creative writing concentration or minor only. This course may be repeated once for credit.

**EN-470 Theory and Practice of Writing****Credits: 3**

Prerequisite(s): EN-101, EN-102, three credits from any course with a designation of LIT, or written permission of the instructor.

Term Offered: All Terms

Course Type(s): HY, WT

Instruction in theories of expressive and expository writing and integration of language skills, with a focus on writing process research and its applications. Cannot be taken as an English 300+ elective. Limited to Elementary Education, ISEE, and ECEE majors only.

**EN-474 Approaches to Composition Theory****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: Fall Term

Course Type(s): WT

Instructions in the foundations of composition theory, with a focus on writing process research and its applications. Cannot be taken as an English 300+ elective. Limited to Secondary Education majors only.

**EN-475 Writing for Digital Audiences****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-271; or permission of the instructor.

Term Offered: All Terms

Course Type(s): None

A study of theories and concepts of writing and rhetoric in digital media with emphasis on the uses of verbal and visual media in digital spaces, such as web sites, blogs, web articles, and social media. Topics examined include authorship and copyright, digital rhetoric, digital composition processes, multimodal composition theory, theories of new media, and theories of systemic oppression in digitally composed spaces and content.

**EN-488 Cooperative Education: English****Credits: 1-3**

Prerequisite(s): Completion of all required 100- and 200-level EN courses and at least two EN electives at the 200-level or higher; permission of department chair may also be required.

Course Type(s): EX2

Integration and application of knowledge gained in the academic setting with career-related or community experiences. Work in an external setting, meeting at least three times in the semester with a faculty sponsor from the English department to establish reasonable goals and expectations for the experience, to determine progress at or near the mid-term and to make the final presentation- oral and written-for evaluation. This course may be repeated for credit.

**EN-489 Internship in English****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX1

Supervised practical experience in English; repeatable for credit. Departmental approval and Junior standing are required to take this course.

**EN-491 Seminar in English****Credits: 3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: All Terms

Course Type(s): None

A concentrated study on a single author, a related group of authors, or a single topic or theme, which includes the production of a scholarly paper based on substantial, independent research. This course is repeatable for credit.

**EN-498 Special Topics in English (400 Level)****Credits: 1-3**

Prerequisite(s): EN-101, EN-102, EN-226, three credits from any course with a designation of LIT, and one course from either EN-227, EN-228, and EN-229, or written permission of the instructor

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in English to be announced prior to registration.

**EN-499 Independent Study in English****Credits: 1-3**

Prerequisite(s): EN-101, EN-102, EN-226, EN-201 or EN-202, and two courses from either EN-227, EN-228, or EN-229, or written permission of the instructor

Term Offered: All Terms

Course Type(s): None

Reading and research on a selected topic under the direction of an English Department faculty member. Prior permission of the directing professor and department chair is required to take this course.

## Experiential Education (EX)

**EX-287 Service Learning Projects****Credits: 1-6**

Term Offered: Spring Term

Course Type(s): EX3

Introduction to learning through community service. Under faculty supervision, students may work on service projects proposed by sponsors and agencies. Students will learn about the issues, problems, and techniques associated with projects that address and solve real-world problems, and provide services and benefits to the community. This course is repeatable for credit. Permission of the Experiential Education Committee is required to take this course along with 29 completed credits.

**EX-387 Service Learning Projects****Credits: 1-6**

Term Offered: All Terms

Course Type(s): EX3

Introduction to learning through community service. Under faculty supervision, students may work on service projects proposed by sponsors and agencies. Students will learn about the issues, problems, and techniques associated with projects that address and solve real-world problems, and provide services and benefits to the community. This course is repeatable for credit. Permission of the Experiential Education Committee is required to take this course along with 29 completed credits.

**EX-487 Service Learning Projects****Credits: 1-6**

Prerequisite(s): Permission of the Experiential Education Committee and 29 completed credits

Term Offered: All Terms

Course Type(s): EX3

## Foreign Language (FO)

### FO-COL Colloquium in Professional and Leadership Development

**Credits: None**

Course Type(s): None

University administrators, as well as student participants, will present topics of interest to include mentoring students on professional interview preparation, resume review, and leadership experience. Students will network with other students, professors, and speakers from various branches of interest in the field of global volunteerism. This is a zero credit course with pass/fail grading.

### FO-LTIOPI Oral Proficiency Interview - UG

**Credits: None**

Term Offered: All Terms

Course Type(s): None

Language Testing International Examination for undergraduate students; requires one hour preparation a week. This is a pass/fail course.

### FO-SSE Sector Specific Experience

**Credits: None**

Course Type(s): NOSRCH

Students must accumulate a minimum of 50 hours of volunteer or work experience in their specific sector (Agriculture, Community Economic Development, Education, Environment, Health, Youth in Development). This is a zero credit course with pass/fail grading.

### FO-198 Special Topics in World Languages and Cultures **Credits: 3**

Course Type(s): None

This is a special topics course offered through the World Languages and Cultures Department. Course content will vary from semester to semester. If a prerequisite is required it will be announced in the course schedule.

### FO-199 Independent Study in Foreign Language **Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided readings and research on an area or topic selected in consultation with the instructor. Prior permission of the directing professor and department chair is required to take this course.

### FO-298 Special Topics in Foreign Literature **Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Reading in English translation of works by foreign authors. Topics may center on works by a single author or be chosen from a period or genre, and will vary from semester to semester. If a prerequisite is required it will be announced in the course schedule.

### FO-299 Independent Study in Foreign Language **Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided readings and research on an area or topic selected in consultation with the instructor. Regular conferences with the instructor and written reports. Prior permission of the directing professor and department chair is required to take this course.

### FO-311 Independent Readings **Credits: 1-3**

Course Type(s): None

Supervised readings in the original language for students who wish to do intensive work in their major field; materials are selected in consultation with the student's advisor from the major field, and the student confers regularly with an instructor from the language staff.

### FO-312 Independent Readings

**Credits: 1-3**

Prerequisite(s): FO-311

Course Type(s): None

Supervised readings in the original language for students who wish to do intensive work in their major field; materials are selected in consultation with the student's advisor from the major field, and the student confers regularly with an instructor from the World Languages and Cultures staff.

### FO-389 Experiential Learning Internship

**Credits: 1**

Term Offered: Fall Term

Course Type(s): EX1

An opportunity to apply classroom theory in practice through actual work experience with a World Language. Departmental approval is required to take this course.

### FO-398 Special Topics in Foreign Literature

**Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

Students study text in the original language. Course content will vary from semester to semester. Some knowledge of the language is required to take this course. If a prerequisite is required it will be announced in the course schedule.

### FO-399 Independent Study in Foreign Language

**Credits: 3**

Term Offered: All Terms

Course Type(s): None

Guided readings and research on an area or topic selected in consultation with the instructor. Prior permission of the directing professor and department chair is required to take this course.

### FO-427 The Teaching of World Languages

**Credits: 3**

Term Offered: All Terms

Course Type(s): None

This course is designed to prepare the World Language teacher candidate's understanding of the ACTFL performance guidelines and standards together with their application and assessment in the classroom. Various modes of teaching language will be explored including meaningful integration of the ACTFL 5 C's and Integrated Performance Assessments into each lesson. Professional development is explored and students must complete a professional Development Plan that includes joining professional affiliations. Preparation for the edTPA is included in this course with one lesson in the target language to be presented and videotaped in class for self and group assessment. This course will include pedagogical strategies related to teaching linguistically diverse students, students with diverse needs, using instructional technology and using data to inform instruction. These components provide the students with valuable pre-teaching experiences that will strengthen understanding of teaching strategies and capabilities. Also listed as ED-427. Clinical hours are required.

### FO-498 Special Topics in Foreign Languages

**Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Students study text in the original language at an advanced level. Course content will vary from semester to semester. If a prerequisite is required it will be announced in the course schedule.

### FO-499 Independent Studies in the Teaching of World Languages

**Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Curriculum development in foreign languages at the elementary and secondary level; the study and application of teaching methods and materials. Prior permission of the directing professor and department chair is required to take this course.

## Foreign Language, Arabic (FA)

### FA-101 Elementary Arabic 1

Credits: 3

Term Offered: Fall Term

Course Type(s): None

Elements of language structure through oral and written practice in the classroom, supplemented by work in the language laboratory with emphasis on everyday Arabic and easy Arabic prose.

### FA-102 Elementary Arabic 2

Credits: 3

Prerequisite(s): FA-101 or at least three years of high school Arabic or permission of the department chair.

Term Offered: Spring Term

Course Type(s): None

Elements of language structure through oral and written practice in the classroom, supplemented by work in the language laboratory with emphasis on everyday Arabic and easy Arabic prose.

### FA-298 Special Topics in Arabic

Credits: 1-3

Course Type(s): None

Students study text in the original language at an advanced level. Course content will vary from semester to semester. If a prerequisite is required it will be announced in the course schedule.

### FA-299 Independent Study in Arabic

Credits: 1-3

Term Offered: Spring Term

Course Type(s): None

Guided readings and research on an area or topic of the Arabic language, culture and/or literature selected in consultation with the instructor.

Regular conferences with the instructor and written reports. Prior permission of the directing professor and department chair is required to take this course.

## Foreign Language, Chinese (FC)

### FC-101 Elementary Chinese I

Credits: 3

Term Offered: All Terms

Course Type(s): None

An elementary-level communicative based language course in standard Chinese, which is called Mandarin to distinguish it from regional dialects, with simplified characters, the standard script in China. This course is an introduction to basic Mandarin Chinese grammar, vocabulary, and communicative structures, and students participate in pair, small group, and whole-class conversation, listening, comprehension and writing activities that focus on the meaningful and accurate conveying of information. This course is intended for students who have no previous knowledge of Mandarin Chinese or have placed into FC-101 through the World Languages placement exam; or Zero to one year of high school study of Chinese; No more than 4 years of high school study of Chinese.

### FC-102 Elementary Chinese II

Credits: 3

Prerequisite(s): FC-101 or Placement into FC-102 through the World Languages placement exam.

Term Offered: All Terms

Course Type(s): None

A continuation of Elementary Chinese I, this course is an elementary-level communicative based language course in standard Chinese, which is called Mandarin, to distinguish it from regional dialects with simplified characters, the standard script in China. A continuation of the introduction to basic Mandarin Chinese grammar, vocabulary, and communicative structures, this course is intended for students who have completed Elementary Chinese I or have placed into FC-102 through the World Languages placement exam. Students participate in pair, small group, and whole-class conversation, listening, comprehension and writing activities that focus on the meaningful and accurate conveying of information.

### FC-199 Independent Study in Chinese

Credits: 3

Term Offered: Spring Term

Course Type(s): None

Guided readings and research on an area or topic of Chinese language, culture and/or literature selected in consultation with the instructor.

Regular conferences with the instructor and written reports. Prior permission of the directing professor and department chair is required to take this course.

### FC-398 Special Topics in Chinese

Credits: 3

Term Offered: Spring Term

Course Type(s): None

Elements of language structure through oral and written practice in the classroom, supplemented by work in the language laboratory with emphasis on everyday Chinese and easy Chinese prose. If a prerequisite is required it will be announced in the course schedule.

## Foreign Language, French (FF)

### FF-LAB Conversation Practice

Credits: None

Co-requisite(s): FF-201 or FF-202

Term Offered: All Terms

Course Type(s): None

Separate lab component from intermediate course(s). This is a pass/fail course.

### FF-101 Elementary French I

Credits: 3

Term Offered: All Terms

Course Type(s): None

An elementary-level, communicative-based language course, intended for students with no previous study of French or placement into the FF-101 level through the World Languages placement exam. Students with four or more years of high school study of French may not enroll in FF-101. FF-101 is to be taken before FF-102.

### FF-102 Elementary French II

Credits: 3

Prerequisite(s): FF-101

Term Offered: Spring Term

Course Type(s): None

An elementary-level, communicative-based language course, intended for students who have completed FF-101 or placed into FF-102 through the World Languages placement exam. FF-101 through FF-202 are sequential.

**FF-199 Independent Study in French****Credits: 1-3**

Term Offered: Summer Term

Course Type(s): None

Guided readings and research on an area or topic of the French language, culture and/or literature selected in consultation with the instructor.

Regular conferences with the instructor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**FF-201 Intermediate French I****Credits: 3**

Prerequisite(s): FF-102 or four years of high school French or placement into FF-201 through the World Languages placement exam.

Term Offered: Fall Term

Course Type(s): None

An intermediate-level, communicative-based language course. The FF-201/FF-202 course sequence emphasizes skill development in speaking, listening comprehension, reading, and writing in French through oral and written practice in the classroom and in small groups in the language laboratory. Through communicative and proficiency-building activities, students learn and review French grammar, vocabulary, and communicative structures. Students will also be introduced to Francophone literature and cultures through short literary and non-literary texts. Students who register for FF-201 must also register for a weekly session of conversation practice. FF-101 through FF-202 courses are sequential.

**FF-202 Intermediate French II****Credits: 3**

Prerequisite(s): FF-201

Term Offered: Spring Term

Course Type(s): None

An intermediate-level, communicative-based language sequence. A review of French grammar, vocabulary and communicative structures, this course sequence (FF-201 and FF-202) emphasizes skill development in speaking, listening comprehension, reading, and writing in French through oral and written practice in the classroom and in the language laboratory. **FF-299 Independent Study in French****Credits: 3**

Course Type(s): None

Guided readings and research on an area or topic of the French language, culture and/or literature selected in consultation with the instructor.

Regular conferences with the instructor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**FF-301 Survey of French Literature****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Survey of French Literature up to 1800.

**FF-303 Advanced French Composition and Conversation****Credits: 3**

Prerequisite(s): twelve credits in French

Term Offered: Spring Term

Course Type(s): None

Oral and written use of correct, idiomatic French vocabulary building, oral discussion, composition, and instruction in the presentation of material.

**FF-309 French Culture and Civilization****Credits: 3**

Course Type(s): None

Political, social, and other developments in France from the Middle Ages to 1800.

**FF-312 Independent Readings in French****Credits: 1-3**

Course Type(s): None

Supervised readings in the original language for students who wish to do intensive work in their major field; materials are selected in consultation with the student's advisor from the major field, and the student confers regularly with an instructor from the language staff. This course is repeatable for credit.

**FF-398 Special Topics in French****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Students study text in the original language. Course content will vary from semester to semester.

**FF-399 Independent Study in French****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Guided readings and research on an area or topic of the French language, culture and/or literature selected in consultation with the instructor.

Regular conferences with the instructor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**FF-499 Independent Study in French****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Guided readings and research on an area or topic of the French language, culture and/or literature selected in consultation with the instructor.

Regular conferences with the instructor and written reports. Prior permission of the directing professor and department chair is required to take this course.

## Foreign Language, German (FG)

**FG-LAB Conversation Practice****Credits: None**

Co-requisite(s): FG-201 or FG-202

Term Offered: Spring Term

Course Type(s): None

Separate lab component from intermediate course(s).

**FG-101 Elementary German I****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

Elements of language structure through oral and written practice in the classroom, with emphasis on everyday German and easy German prose.

This course is intended for students with no previous knowledge of German or who have placed into FG-101 through the World Languages placement exam.

**FG-102 Elementary German II****Credits: 3**

Prerequisite(s): FG-101 or placement into FG-102 through the World Languages placement exam

Term Offered: Spring Term

Course Type(s): None

Elements of language structure through oral and written practice in the classroom, with emphasis on everyday German and easy German prose.

This course is intended for students who have completed FG-101 or have placed into FG-102 through the World Languages placement exam.

**FG-199 Independent Study in German**

Term Offered: Spring Term

Departmental approval and Junior standing are required to take this course.

**FS-298 Special Topics in Spanish (200 Level)****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

Students study text in the original language at an advanced level. Course content will vary from semester to semester. If a prerequisite is required it will be announced in the course schedule.

**FS-299 Independent Study in Spanish****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Guided readings and research on an area or topic of the Spanish language, culture and/or literature selected in consultation with the instructor.

Regular conferences with the instructor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**FS-300A Advanced Spanish Conversation and Oral Discourse****Credits: 3**

Prerequisite(s): FS-202 or placement into FS-300 through the World Languages placement exam

Co-requisite(s): FS-LAB

Course Type(s): None

Intended for non-native speakers of Spanish and is a pre and/or co-requisite for FS-300B Advanced Conversation and Composition and a pre-requisite for all other 300 and 400-level courses in Spanish. This course is designed to bridge the gap between lower and upper division courses by providing students with optimal opportunities to practice their oral language skills at the high intermediate level. The course provides practice in all four language functions while placing special emphasis on conversation, listening, and oral presentation skills. Students who register for FS-300A must also register for a weekly one hour conversation practice lab at the time of registration. Prerequisite: FS-202 or placement into FS-300 through the World Languages placement exam

**FS-300B Advanced Spanish: Composition and Conversation II****Credits: 3**

Prerequisite(s): FS-202 or placement into FS-300 through the World Languages placement exam

Term Offered: All Terms

Course Type(s): None

This course is designed to bridge the gap between lower and upper division courses by providing students with optimal opportunities to practice and refine their writing and reading comprehension skills in Spanish at the high intermediate level. The course provides practice in all four language functions while placing special emphasis on writing, reading comprehension and analysis, and vocabulary building skills. Students who register for FS-300B must also register for a weekly one hour conversation practice lab at the time of registration. Prerequisite: FS-202 or placement into FS-300 through the World Languages placement exam

**FS-301 Introduction to Hispanic Literature****Credits: 3**

Prerequisite(s): FS-300A or FS-318, FS-300B; and EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): WT

Introduction to the four principal genres of Hispanic literature. Fundamentals of literary analysis through a selection of texts from Medieval through contemporary Spanish literature, and Colonial through twentieth-century Latin American literature.

**FS-304 Onstage and in the Streets: Performance and Culture****Credits: 3**

Course Type(s): CD, COCSO, COCST

Introduction to understanding diverse popular performance practices as unique and contested expressions of culture and identity. Studying human performances within everyday life, in public spaces, and through cultural rituals, street theatre, and professional productions, a variety of contemporary theories, methods, and critical issues are considered within the fields of communication, theatre, performance, and cultural studies. Students must be enrolled in the Study Abroad program in Cadiz, Spain. Also listed as CO-304.

**FS-305 Survey of Spanish-American Literature****Credits: 3**

Prerequisite(s): FS-301 or permission of the department and EN-101 and EN-102, or permission of the instructor

Term Offered: Spring Term

Course Type(s): WT

Survey of Latin-American literature studying representative works from the Colonial period through the twentieth-century. Genres covered include novel, drama, poetry, essay, and short story. Taught in Spanish.

**FS-307 Survey of Spanish Literature****Credits: 3**

Prerequisite(s): FS-301 or permission of the department chair

Term Offered: Spring Term

Course Type(s): None

Survey of Peninsular Spanish literature that focuses on drama, short story, and poetry from the Medieval period until the beginning of the eighteenth century. Emphasis will be on the drama of the Renaissance and Baroque periods incorporating playwrights such as Lope de Vega, Tirso de Molina, and Calderon de la Barca. In addition, poets and writers such as Garcilaso, Fray Luis, Santa Teresa, and Maria de Zayas are included. Taught in Spanish.

**FS-308 Afro-Hispanic Literature****Credits: 3**

Prerequisite(s): One semester of a 300-level Spanish course

Term Offered: Spring Term

Course Type(s): None

This course examines the development of Afro-Hispanic Literature and visual documentation from the Colonial period to the present. We will study the materials according to their historical and political context and examine the literary forms, genres, and techniques by spanning a range of analyses of textual criticism, political rhetoric, poetry, music, fiction, and non-fiction. This course engages students interested in learning more about Afro-Hispanic cultures as expressed through the lens of its literature, documentaries, and the visual arts. Students will appreciate artistic creations by Afro-Hispanic authors and exercise their analytical and creative abilities. The course is taught in Spanish, and fulfills the FS-305 or FS-307 requirement for Spanish minors and majors.

**FS-309 Culture and Civilization Spain****Credits: 3**

Prerequisite(s): FS-202 or FS-222 or placement into FS-300 through the World Languages placement exam

Term Offered: All Terms

Course Type(s): None

Study of the culture and civilization of Spain from pre-historic times to the present day. The first part of the course will present the major historical developments and artistic movements of the Iberian Peninsula with special focus placed upon the plastic arts (painting, architecture, sculpture). The second part of the course will focus on contemporary socio-cultural issues such as the Spanish economy, politics (dictatorship and democracy), society, and cultural life. Taught in Spanish. Prerequisite: FS-202 or FS-222 or placement into FS-300 through the World Languages placement exam

**FS-310 Culture and Civilization of Latin America****Credits: 3**

Prerequisite(s): FS-202 or FS-222, and EN-101 and EN-102; or permission of the instructor

Term Offered: All Terms

Course Type(s): RE, WT

Study of the natural aspects and historical evolution of the culture and civilization of Latin American countries. Landmarks in the political, economic, cultural and social history of the continents are traced from the pre-colonial times to the present. Students are introduced to, and familiarized with, the world of Latin American history, life, thought, and feelings. Emphasis is given to aspects of Latin America today such as the new political and economic map in the twenty-first century, women's impact in politics, LGBT issues, religion, education, science and technology, music, art, and film. Conducted in Spanish.

**FS-311 Independent Readings in Spanish****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

Supervised readings in the original language for students who wish to do intensive work in their major field; materials are selected in consultation with the student's advisor from the major field, and the student confers regularly with an instructor from the language staff.

**FS-312 Independent Readings in Spanish****Credits: 1-3**

Course Type(s): None

Supervised readings in the original language for students who wish to do intensive work in their major field; materials are selected in consultation with the student's advisor from the major field, and the student confers regularly with an instructor from the language staff.

**FS-313 Introduction to Spanish for Business****Credits: 3**

Prerequisite(s): FS-202 or FS-222 or placement into FS-300 through the World Languages placement exam

Term Offered: Spring Term

Course Type(s): None

Designed to acquaint students with business practices, documents, culture, and terminology of Spanish-speaking countries (including the U.S.). Additionally, students will review and practice Spanish grammar, and learn about Hispanic culture(s) and current topics in the Hispanic business world. This course is designed to give intermediate and advanced students a solid foundation in business vocabulary, basic business and cultural concepts, and situational practice (all in Spanish) necessary to be successful in today's Spanish-speaking business world, which includes the United States. Class participants will acquire key communicative and structural elements through commercial dialogs, translations, advertisements, and role-plays. Prerequisite: FS-202 or FS-222 or placement into FS-300 through the World Languages placement exam

**FS-314 Advanced Spanish for Health Care Professionals****Credits: 3**

Prerequisite(s): FS-202, FS-222 or placement into FS-300 through the World Languages placement exam

Term Offered: All Terms

Course Type(s): None

Advanced Spanish for Health Professionals is a high-intermediate communicative-based language course that satisfies a 300-level Spanish class for Health Studies, Nursing, Pre-Med or science majors, as well as for Spanish minors or majors. The course offers a continuation of study of Spanish grammar, vocabulary, and communicative structures as well as Hispanic cultures, within the context of the health professions. It is intended for students who have completed FS-202, FS-222 or have placed into FS-300 through the World Languages Placement exam. As a communicative-based course, the class is devoted to working in pairs, small group, and whole-class conversation/presentational activities that focus on meaningful and accurate communication of the material in the context of the health professions. Prerequisite: FS-202, FS-222 or placement into FS-300 through the World Languages placement exam

**FS-315 Introduction to Spanish Linguistics****Credits: 3**

Prerequisite(s): FS-202 or FS-222 or placement into FS-300 through the World Languages placement exam

Term Offered: All Terms

Course Type(s): None

An introduction to the linguistic analysis of the Spanish language from the point of view of its internal organization and sound system, including study of accents, dialects, register and regional variations. Intended for Spanish majors and minors and will be conducted entirely in Spanish. Students will be introduced to the morphological study of the language; an introduction to Spanish phonetics in theory and practice will incorporate the history of the Spanish language from Latin to modern Spanish. Discussion of Hispanic dialectology and geolinguistics, accompanied by interviews and student analysis of native Spanish speech. Prerequisite: FS-202 or FS-222 or placement into FS-300 through the World Languages placement exam

**FS-317 Cadiz y su sociedad (Social Issues in Cadiz) Mid-Level Credits: 3**

Prerequisite(s): FS-202

Co-requisite(s): FS-300A or FS-300B

Term Offered: Summer Term

Course Type(s): None

Analysis of diverse social issues in Cadiz through readings, visual media, interaction with various social and governmental organizations and assemblies as well as community service. It will be taught in Spanish.

**FS-318 Spanish Pronunciation, Voice, and Diction****Credits: 3**

Prerequisite(s): FS-202 or FS-222 or placement into FS-300 through the World Languages placement exam

Co-requisite(s): FS-LAB

Term Offered: All Terms

Course Type(s): None

An analytical, practical and hands-on study of contemporary Spanish pronunciation, conducted completely in Spanish. Students are introduced to the phonetics (the study of sounds) and phonology (the study of the sound system) of the Spanish language, and work to refine and improve their pronunciation, speech and presentational skills in Spanish. Prerequisite: FS-202 or FS-222 or placement into FS-300 through the World Languages placement exam

**FS-398 Special Topics in Spanish****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Students study text in the original language. Course context will vary from semester to semester.

**FS-399 Independent Study in Spanish****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided readings and research on an area or topic of Spanish language, culture, and/or literature selected in consultation with the instructor. Regular conferences with the instructor and written reports. Prior permission of the directing professor and department chair is required to take this course.

**FS-402 Advanced Spanish Conversation and Oral Proficiency Credits: 3**

Prerequisite(s): One semester of a 300-level Spanish course.

Term Offered: Fall Term

Course Type(s): None

Advanced conversational practice in Spanish and review of Spanish grammar and vocabulary. This course focuses on the improvement of oral and aural communication skills in Spanish and aims to prepare students to achieve an oral proficiency rating of Advanced Low or higher, according to the ACTFL scale. This course is intended for Spanish and Spanish/Education majors, and Spanish minors.

**FS-403 Spanish Literature of the Eighteenth and Nineteenth Centuries****Credits: 3**

Term Offered: Spring Term

Course Type(s): FS.LT

Novels, drama, and poetry, with emphasis on the works of Iriarte, Moratin, Espronceda, Zorrilla, Becquer, Galdos, and others.

**FS-404 Spanish Literature of the Twentieth Century****Credits: 3**

Term Offered: Spring Term

The evolution of Spanish literature from the Generation of 1898 to the present; analysis of the drama, novel, and poetry of the period.

**FS-405 The Spanish-American Short Story****Credits: 3**

Prerequisite(s): FS-301 or permission of the instructor; and EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): FS.LT, WT

A critical study of the cuento (short story) in Spanish America. Major authors and trends are studied in historical and social contexts. By studying a significant number of short stories by authors both male and female from different countries, students will become acquainted with the development of this genre in Spanish America and get to know some of the most representative authors of the genre. They will learn to use different critical approaches to analyze their work. Readings will include, among others, works by: Isabel Allende, Mario Benedetti, Jorge Luis Borges, Rosa Maria Britton, Rosario Castellanos, Martha Cerda, Julio Cortazar, Jose Donoso, Rosario Ferre, Renee Ferrer, Gabriel Garcia Marquez, Jose Luis Gonzalez, Angelica Gorodischer, Liliana Heker, Elena Poniatowska, Horacio Quiroga, Juan Rulfo, Luisa Valenzuela, and Bella Clara Ventura. Taught in Spanish.

**FS-406 Cervantes****Credits: 3**

Term Offered: Spring Term

Course Type(s): FS.LT

Analytical readings in Cervantes' Entremeses, Novelas Ejemplares, and Don Quixote.

**FS-407 The Spanish-American Novel I****Credits: 3**

Course Type(s): FS.LT

The development of the novel in Spanish-America. Semester I: movements in the nineteenth century, the novel of the Mexican Revolution. Semester II: the novel of the twentieth and twenty-first centuries. Conducted in Spanish.

**FS-408 The Spanish-American Novel II****Credits: 3**

Term Offered: Spring Term

Course Type(s): FS.LT

The development of the novel in Spanish-America. Semester I: movements in the nineteenth century, the novel of the Mexican Revolution. Semester II: the novel of the twentieth and twenty-first centuries. Conducted in Spanish.

**FS-409 Advanced Spanish: Grammar and Stylistics****Credits: 3**

Prerequisite(s): FS-300A and FS-300B; or FS-313

Course Type(s): None

Focuses on the study of advanced grammar and style through writing, translation, and oral practice in Spanish. It is intended for majors and for teachers or students intending to teach. (Native Spanish speakers only need to take FS-300B with departmental approval).

**FS-410 Contemporary Spanish-American Women Writers****Credits: 3**

Prerequisite(s): 6 credits in Spanish above the 300 level or permission of the instructor

Term Offered: All Terms

Course Type(s): FS.LT

A survey of the literature written by contemporary Spanish-American women writers. Texts examined will cover the genres of novel, short story, and poetry. Consideration of "women's" language and discourse, the relations between gender and writing considered within a historical context, and critical and theoretical aspects of gender and writing. Readings will include, among others, works by Claribel Alegria, Isabel Allende, Carmen Boullosa, Rosario Castellanos, Laura Esquivel, Rosario Ferre, Renee Ferrer, Elena Garro, Angelica Gorodischer, Liliana Heker, Silvia Molina, Cristina Peri-Rossi, Elena Poniatowska, Laura Restrepo, Marcela Serrano, Rosina Valcarcel, Zoe Valdes, Ana Lydia Vega.

**FS-411A Writing for the Media in Spanish****Credits: 3**

Prerequisite(s): CO-211 and CO-215

Co-requisite(s): FS-301, FS-300B, and FS-LAB

Course Type(s): None

Conducted in Spanish, focus will be on writing for all Spanish media (print and online news, television, and radio). Fundamentals of news writing, news editing, online journalism, editorial writing, and feature writing will be studied.

**FS-412 Advanced Business Spanish I****Credits: 3**

Prerequisite(s): FS-313

Term Offered: All Terms

Course Type(s): None

Introduces the terminology and the techniques used in commercial transactions, including interpretation and writing of business materials. Enhances students' ability to function effectively in an increasingly important commercial language environment, locally in the United States as well as abroad, in any Spanish-speaking country. Develops students' geographic literacy and cultural understanding of the Spanish-speaking world, as these are central to being able to successfully conduct business in Spanish. Concentrates on vocabulary and linguistic and cultural background needed when dealing with subjects such as goods and services, marketing, finance, foreign market, and import-export.

**FS-413 Advanced Business Spanish II****Credits: 3**

Prerequisite(s): FS-313; and EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): WT

Introduces the terminology and the techniques used in commercial transactions, including interpretation and writing of business materials. Enhances students' ability to function effectively in an increasingly important commercial-language environment, locally in the United States as well as abroad, in any Spanish-speaking country. Develops students' geographic literacy and cultural understanding of the Spanish-speaking world, as these are central to being able to successfully conduct business in Spanish. Concentrates on vocabulary and linguistic and cultural background needed when dealing with subjects such as goods and services, marketing, finance, foreign market, and import-export.

**FS-414 Current Issues in Business in the Spanish-Speaking World****Credits: 3**

Prerequisite(s): FS-300A and FS-300B; or FS-313

Term Offered: All Terms

Course Type(s): None

Explores various topics and aspects of current business conditions, thought and policy in Spanish-America, Spain and the United States. Intended for students majoring in Spanish and International Business and any Spanish major interested in learning more about current topics in business of the Spanish speaking world. With department approval, native Spanish speakers only need to take FS-300B.

**FS-415 The Literature and Culture of Post-Franco Spain****Credits: 3**

Prerequisite(s): FS-300B and FS-301

Term Offered: All Terms

Course Type(s): FS.LT

An in-depth analysis of the literary and cultural scene in contemporary Spain in light of the after-effects of the Spanish Civil War and subsequent forty-year dictatorship. Will consider particular problems and issues that have arisen in democratic Spain through close readings and discussions of some of the most significant narrative and cinematic texts of the Post-Franco period including relevant literary and cultural criticism. Will be taught completely in Spanish.

**FS-416 Medieval and Golden Age of Spanish Literature****Credits: 3**

Prerequisite(s): FS-301, FS-300B, and either FS-305 or FS-307 or permission of the department

Term Offered: Spring Term

Course Type(s): FS.LT

An in-depth study of three periods of Spanish Peninsular literature: Medieval, Golden Age, and Baroque. Works include Poema de Mio Cid, La Celestina, La vida de Lazarillo de Tormes and other picaresque novels. The poetry of Gongora and Quevedo will also be studied. Taught in Spanish.

**FS-417 Cadiz y su sociedad (Social Issues in Cadiz) Advanced Level****Credits: 3**

Prerequisite(s): FS-300A and FS-300B

Term Offered: Summer Term

Course Type(s): FS.LT

Offered in Spanish, this course analyzes diverse social issues in Cadiz within the framework of contemporary Spanish society. A significant component of the course includes consultation and collaboration with governmental and non-governmental agencies and community service.

**FS-489 Internship in Foreign Language****Credits: 3**

Term Offered: Spring Term

Course Type(s): EX1

Supervised practical experience in Spanish; repeatable for credit.

Departmental approval and Junior standing are required to take this course.

**FS-498 Special Topics in Spanish (400 Level)****Credits: 3**

Term Offered: All Terms

Course Type(s): None

In this course, students will review advanced Spanish grammar through cultural and literary expression with an emphasis on the role of social poetry. The art of poetic translation will be an important component.

**FS-499 Independent Study in Spanish****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Guided readings and research on an area or topic of Spanish language, culture and/or literature selected in consultation with the instructor.

Regular conferences with the instructor and written reports. Prior permission of the directing professor and department chair is required to take this course.

## Gender Studies (GS)

**GS-220 History of Advertising****Credits: 3**

Term Offered: All Terms

Course Type(s): GS, HSUS

Designed to develop a critical understanding of the historical evolution of advertising in the United States, with critical attention to race, class, gender, and sexuality. We will explore the economic, political, and cultural factors that have contributed to the development of advertising, and which have been affected by advertising. Some of the topics to be discussed include: the rise of national advertising; the relation of advertising to consumption; advertising to children; political advertising; the relationship between advertisers and the medium in which they appear (magazines, television, radio, etc.); and broadcast and Internet advertising. Also listed as AN-220 and HS-220.

**GS-225 Introduction to Gender Studies****Credits: 3**

Term Offered: All Terms

Course Type(s): CD, GS, SJS, SS.SV

Examines gender inequalities and the pervasiveness of gender as a way of structuring/organizing social life. Emphasizes how gender as a social structure intersects with other social structures such as race, class, and sexuality to legitimize power and privilege and/or constrain diverse groups of people. Critiques conventional theories of gender and sociology and covers a broad spectrum of topics using feminist and sociological perspectives. Also pays attention to the connection between social structure and human agency - how people's experiences are both shaped by social forces and shaped through human action. Also listed as SO-225.

**GS-252 Race and Ethnicity****Credits: 3**

Term Offered: All Terms

Course Type(s): CD, GS, RE, SIAR, SJS

Introduces students to the sociological study of race and ethnicity in the United States as interrelated social systems of power that grant a range of material and non-material advantages to different groups of people based on socially constructed definitions of race and ethnicity, particularly as race and ethnicity intersect with a variety of other social structures such as gender and class. Focuses on the historical legacy and current practices of institutionalized racism that have and continue to shape social relations in the U.S. Also listed as SO-252.

**GS-305 Women in US History**

Term Offered: Spring Term

Course Type(s): GS

Surveys women's historical experience in the U.S. The emphasis of the course will be on how women of different socio-economic backgrounds, races, and ethnic groups have shaped and been affected by U.S. History. Also listed as HS-305.

**Credits: 3****GS-307 History of Sexuality in America****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): CD, GS, HSUS, WT

Explores the social and cultural history of sexuality in the United States. How race, class, and gender have influenced ideas about sexuality, morality, and power. Major topics include: reproduction, gay and lesbian sexualities, sexually transmitted diseases, and sexual representation and censorship. Also listed as HS-307.

**GS-369 Feminist Theories****Credits: 3**

Prerequisite(s): SO-225 or GS-225

Course Type(s): GS

Advanced exploration of the major currents of feminist social theory as they have emerged from feminist movement histories in the U.S. and globally. Students will critically examine competing feminist explanations for the history and persistence of gender inequality, as well as deconstruct sex, gender, sexuality from a range of feminist perspectives. The course will also invite students to consider what it means to be "feminist" and how these meanings are connected to the relations and tensions between gender, sexuality, race/ethnicity, class, ability, and nation. In particular, students will compare and contrast key concepts and theoretical assumptions of major feminist theories with a commitment to intersectional analyses. Students will also apply feminist theory to better understand social relationships, organizations, and politics, and self-reflect on how course content applies to their lives as people situation within multiple social contexts and identities. Also listed as SO-369.

**GS-370 Gender Studies Seminar****Credits: 3**

Prerequisite(s): Three credits in Gender Studies elective courses

Course Type(s): GS

An examination of several disciplines from the perspective of sex and gender. Each discipline is reviewed, and sources of bias are identified. Special attention is given to new data and emergent paradigms generated by recent research in Gender Studies and their implications for traditional assumptions.

**GS-377 A Comparative Study of Women in the World****Credits: 3**

Prerequisite(s): GS-225 or SO-225

Term Offered: All Terms

Course Type(s): BI.EL, GS, GU, PSCG

A comparative study of the political, cultural, social, and economic statuses of women in the United States, Western Europe, Russia, Japan, Israel, and Third-World nations. Also listed as PS-377. Prerequisites: GS-225 or SO-225

**GS-399 Independent Study in Gender Studies****Credits: 3**

Prerequisite(s): GS-225, 6 credits from Gender Studies courses, and prior permission of the directing professor and department chair

Term Offered: Spring Term

Course Type(s): None

Guided research of a selected topic under the direction of a member of the Gender Studies faculty.

**GS-499 Independent Study in Gender Studies****Credits: 3**

Prerequisite(s): GS-225, 6 credits from Gender Studies courses, and prior permission of the directing professor and department chair

Term Offered: Spring Term

Course Type(s): None

Guided research of a selected topic under the direction of a member of the Gender Studies faculty.

## Geographic Information Systems (GIS)

**GIS-224 Introduction to Geographic Information Systems (GIS)****Credits: 3**

Term Offered: All Terms

Course Type(s): MEBP, SS.SV, TL

Provides both the theoretical and methodological background for proficient use of geographic information systems (GIS). A multidisciplinary integration of theories and applications pertinent to both natural and social science research. Lectures and discussions will introduce the conceptual and methodological platform that is necessary to design, implement, and interpret GIS research. Weekly lab exercises will develop problem-solving skills and emphasize common research techniques in GIS. Students will also learn field techniques of spatial data collection. In sum, demonstrates how both GIS tools and a geographic perspective may be applied to a broad range of social and ecological research problems. Not open to students who have taken GIS-250.

**GIS-235 GIS Applications in Homeland Security****Credits: 3**

Prerequisite(s): GIS-224

Term Offered: All Terms

Course Type(s): None

Introduces students to the basic theories in geographic information systems (GIS). It provides students with a hands-on practical approach to analyze homeland security related data. Students will develop a skill set to map homeland security data and perform spatial analytical tasks. Also listed as HLS-235.

**GIS-298 Special Topics in Geographic Information Systems****Credits: 3**

Prerequisite(s): GIS-224

Course Type(s): None

The study and application of GIS to a particular subject.

**GIS-299 Independent Study in Geographic Information Systems****Credits: 3**

Course Type(s): None

Conduct a geographic information systems (GIS) research project with a faculty member. Prior permission of the directing professor and department chair is required to take this course.

**GIS-324 Spatial Data****Credits: 3**

Prerequisite(s): GIS-224

Term Offered: All Terms

Course Type(s): None

Provides an introduction to the collection of various types of spatial data relevant to many GIS applications and basic database management for organization of the data. Students will be introduced to various data-collection techniques through a combination of lectures, discussions, readings, and hands-on experience in the field.

**GIS-325 Spatial Analysis**

Prerequisite(s): GIS-224

Term Offered: Spring Term

Course Type(s): None

Focus will be the analysis of spatial data, culminating in an applied research project. For this intermediate level course, it is expected that students have successfully completed an introductory course in Geographic Information Systems (GIS). Students will learn the theory and practical application of spatial analysis methods for a variety of disciplines. The methods applied in this course include, but may not be limited to, geoprocessing, overlay analysis, spatial statistics and interpolation, terrain modeling, and map algebra. These methods will be applied to analyze contemporary social and environmental problems.

**GIS-335 Advanced Geographic Information Systems and Homeland Security****Credits: 3**

Prerequisite(s): GIS-235 or HLS-235

Term Offered: Spring Term

Course Type(s): None

Students will build upon the skills and information learned in GIS-235 Geographic Information Systems and Homeland Security to demonstrate advanced techniques in the analysis of spatial data to help the homeland security enterprise prevent, mitigate, respond to, and recover from intentional, natural, and accidental threats. Also listed as HLS-335.

**GIS-336 Marine Applications of Geographic Information Systems****Credits: 3**

Term Offered: Fall Term

Course Type(s): EX3, MEBP

Students learn mapping technologies for coastal and marine planning. Techniques are then applied to coastal community for a service learning project in fulfillment of the Experiential Education graduation requirement. Services are provided in partnership with a community, and may include projects such as coastal zone planning or participatory workshops to many community resources.

**GIS-337 Fundamentals of Remote Sensing****Credits: 3**

Term Offered: Fall Term

Course Type(s): MEBP

Students learn the fundamentals of remote sensing technologies and of their application to environmental mapping and analysis. This course introduces concepts of light radiation behavior and detection, satellite and airborne imaging systems, image processing and classification, mapping, and map analysis. Students will apply this knowledge through a hands-on term project of their own design.

**GIS-400 Research Methods in GIS****Credits: 3**

Prerequisite(s): GIS-224

Course Type(s): None

Participants in this seminar will, with the instructor's guidance, 1) plan all aspects of their own discipline-specific research, 2) acquire all of the necessary data, 3) build and populate a spatial database for their data, 4) create a GIS to import, manipulate, and analyze their data, and 5) present their completed project.

**GIS-489 GIS Internship****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX1

Supervised practical experience in geographic information systems. Repeatable for credit. Departmental approval is required to take this course.

**GIS-499 Independent Study in Geographic Information Systems****Credits: 3**

Prerequisite(s): GIS-224 and prior permission of the directing professor and department chair is required to take this course

Term Offered: All Terms

Course Type(s): None

Conduct a geographic information systems (GIS) research project with a faculty member.

## Geography (GO)

**GO-100 People, Places, and Environments: Introduction to Geography****Credits: 3**

Term Offered: All Terms

Course Type(s): CD, TL

Emphasis on the introductory level, is on cultural, physical, and world-regional geography. Topics include cultural and physical dimensions of the earth and the interrelationships of humans and the environment.

**GO-101 Principles of Human Geography****Credits: 3**

Term Offered: All Terms

Course Type(s): CD, TL

The human environment in which we live; the influence and effect of space, place, location, scale, distance, and movement separately and in their mutual interaction with the cultural, economic, social, and political, urban circumstances of peoples and places.

**GO-102 Environmental Geography****Credits: 3**

Term Offered: All Terms

Course Type(s): SS.SV

Introduces students to the study of location, distribution, and interrelationships of the physical processes that form the environment, and how human activities influence these processes. Topics include: climate, biogeography, biodiversity, sustainability, as well as topography, map reading, and geographic information systems (GIS).

**GO-103 Physical Geography****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

A survey of the Earth sciences from a spatial perspective. We will use maps, diagrams, simulations, and computer mapping software to learn about the systems of the Earth. Students will gain an understanding of physical processes and patterns of the Earth's atmosphere, climate, landforms, and biosphere. Understanding of these systems will be used to examine the ways in which humans influence and adapt to Earth systems. The learning outcomes of this course satisfy a general education requirement for the Natural Sciences. Also listed as SC-103.

**GO-125 Maps and Mapping****Credits: 3**

Term Offered: All Terms

Course Type(s): SS.SV

Introduction to the study of maps and cartography from the perspective of the social sciences. Topics will include: map types, the content and structure of maps, map interpretation, the history of mapping, map propaganda, the use of maps in society, and sources of data. Students will use maps and mapping to represent and interpret past and present economic, political, social, and geographic phenomena.

**GO-199 Independent Study in Geography****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Reading and research on a selected topic under the direction of a faculty member. Prior permission of the directing professor and department chair is required to take this course.

**GO-220H The City in Film**

Course Type(s): HO

Through the study of popular images of the city in film, reflect on urban problems and issues, as well as perceptions of the city changing over time. Explores themes in urban studies through the medium of film. The films are augmented by related readings and serve as a starting point for illumination and critique of the political economy and sociocultural dimensions of cities and urban society.

**Credits: 3****GO-231 Urban Sociology**

Prerequisite(s): SO-101

Course Type(s): RE

Theoretical analysis of the modern urban community, including the history of the city and analysis of urban institutions and behavior patterns; problems relating to metropolitan and suburban areas, community planning, and urban renewal. Also listed as SO-231.

**Credits: 3****GO-267 Tourism Around the World**

Term Offered: All Terms

Course Type(s): BI,EL, GU, SUS

Introductory examination of the various factors that impact tourism in different parts of the world. Students will consider political, social, economic, cultural, and environmental factors that affect tourists, local populations, and the physical destinations. Also listed as AN-267.

**Credits: 3****GO-268 Urbanization**

Term Offered: All Terms

Course Type(s): CD, RE, SUS

Introduction to urbanization on a global scale. Historical and contemporary development of the world's cities, using geographical approaches to urban analysis. Includes examination of urban forms and the local global, social, cultural, economic, political, and physical processes that shape and are shaped by cities, and the large and rapidly growing cities of the developing world that dominate and control the global economy. Also listed as AN-268.

**Credits: 3****GO-275 Global Environmental Problems**

Term Offered: All Terms

Course Type(s): GU, HE,EL, SUS

Focus on the complex relationship between human beings and their environments in an effort to build an ecological perspective in a global framework. Discussion of basic issues of ecological science in terms of impact on both the Western and non-Western worlds. Also listed as AN-275.

**Credits: 3****GO-280 Introduction to Tour Guiding and Tourist Sites**

Course Type(s): None

Course will focus on the role and responsibilities of Tour Guides and the development of sites for use in tours and tourism. We will use scholarly articles and texts, as well as films and blogs to explore the complexities and possibilities of tour guiding in the 21st century.

**Credits: 3****GO-298 Special Topics in Geography (200 Level)**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in geography to be announced prior to registration. If a prerequisite is required it will be announced in the course schedule.

**Credits: 1-3****GO-332 Climate Change Adaptation and Policy**

Term Offered: Spring Term

Course Type(s): MEBP, SUS

Climate Change Adaptation and Policy provides a survey of the global engagements surrounding climate change adaptation and policy that currently affects billions around the globe. The subject matter covered includes understanding how to evaluate the proxies and impacts of climate change, the geography of climate change, and the policies and planning tools that are used in addressing the current and forecasted effects of climate change. The class includes local, regional, national, and international examples within a mixed-methods approach that simultaneously uses a scientific, natural processes understanding that is juxtaposed with policy-based initiatives that deal with the real-life costs and procedures in addressing climate change. Also listed as PS-332.

**Credits: 3****GO-398 Special Topics in Geography (300 Level)**

Course Type(s): None

An intensive study of a particular subject or problem in Geography to be announced prior to registration.

**Credits: 1-3****GO-399 Independent Study in Geography**

Term Offered: Spring Term

Course Type(s): None

Reading and research on a selected topic under the direction of a faculty member. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 3****GO-499 Independent Study in Geography**

Prerequisite(s): GO-101 and prior permission of the directing professor and department chair

Term Offered: All Terms

Course Type(s): None

Reading and research on a selected topic under the direction of a faculty member.

**Credits: 3**

## Geology (GL)

**GL-100 Diamonds, Drilling and Dinosaurs: Introductory Geology****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

Provides comprehensive coverage of the geosciences which spans from the formation of our universe to understanding the physical processes that affect the New Jersey coastline. The principles of geology and earth science are used to demonstrate to the student that the geosciences are involved in every aspect of their daily lives and to make them aware of the role they play in society both economically and physically.

**GL-199 Independent Study in Geology**

Term Offered: Fall Term

Course Type(s): None

Original research work planned and carried out with the assistance of a faculty research advisor. The number of course credits will be arranged with the advisor. Three hours per credit. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 3**

## Health Studies (HE)

### HE-101 Strategies for Healthy Living

Credits: 3

Term Offered: All Terms

Course Type(s): None

Factors influencing personal health; function of body cells and systems; lifestyle choices such as nutrition, exercise, alcohol, drug and tobacco use, sexuality, contraception, and sexually transmitted diseases; the U.S. health care system and those of other countries.

### HE-150 Medical Terminology

Credits: 3

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, NU.EL

Introduction of medical terminology to those students who have an interest in a wide variety of health care services. Presents a study of basic medical terms, including prefixes, suffixes, word roots, special endings, plural forms, abbreviations, and has a special emphasis on spelling, definition, usage, and pronunciation for each body system. A programmed learning, word building system will be used to learn word parts that are used to construct and analyze new terms. The accurate use and understanding of medical terminology used in communications between health care professionals, clients, and other providers of care will be enhanced by taking this course.

### HE-180 Introduction to Public Health

Credits: 3

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

This course is designed to provide an introduction to the field of public health. The history of the field as well as key philosophical perspectives are reviewed. It will address the core values of public health practice, and the role of public health agencies at the international, national, state and local levels. Determinants of health, public health initiatives, ethical practice and selected contemporary public health issues will be explored.

### HE-198 Special Topics in Health Studies

Credits: 1-3

Term Offered: Spring Term

Course Type(s): HE.EL, HEPE

An intensive study of a particular subject or problem in health studies to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

### HE-199 Independent Study in Health Studies

Credits: 3

Course Type(s): HE.EL, HEPE

Guided research and in-depth study of an area of health studies of particular interest to the student. Prior permission of the directing professor and department chair is required to take this course.

### HE-200 Becoming a Home Health Aide

Credits: 4

Term Offered: Spring Term

Course Type(s): HE.EL, NU.EL

Through classroom lecture, discussions, reading and laboratory practice the student will learn the 76-hour training program designed to meet the NJ requirements for the Certified Homemaker/Home Health Aide (HHA). After completion of this course the student will have the opportunity to sit for the state examination and become certified as a HHA. Once certified, the student will be able to gain employment as a certified HHA in numerous agencies and institutions in NJ.

### HE-201 Technology and Health Informatics

Credits: 3

Prerequisite(s): HE-101.

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, TL

This course examines the history of healthcare informatics, current issues, basic informatics concepts and health information management systems. The use of technology to help make decisions and to improve the health status of the individual, family, and community is emphasized. Students will apply informatics concepts to a current clinical practice setting suggesting methods to use technology to improve patient safety and work effectiveness. The student will also learn to identify, gather, process, and manage information/data.

### HE-212 Lifespan Development and Health

Credits: 3

Term Offered: All Terms

Course Type(s): HE.EL, RD

Health from conception through senescence using a developmental approach. Examines the factors that influence health at each stage of life, including the effect of environmental, biological, and genetic influences and common deviations from health. Using this approach, the student will investigate the effect of political and economic policies, education, epidemiology, health promotion, and illness prevention programs.

### HE-225 Mind-Body Connection

Credits: 3

Term Offered: Spring Term

Course Type(s): HE.EL

Focuses on the psychology of wellness and illness and the healing connections between the mind and body across diverse cultures. How stress is interpreted and expressed in different cultures will be explored. The healing practices and rituals of different faiths and cultural traditions will be explored.

### HE-235 Human Aging

Credits: 3

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Designed to provide an understanding of the major health problems, health promotion, and wellness concepts that affect older people. Offers an introduction to the physical and functional changes associated with human aging. Common illnesses that are often identified in older people will be discussed. In addition, factors will be presented that are believed to cause or influence the aging process, changes in physical function and quality of life.

### HE-260 Substance Use and Abuse

Credits: 3

Term Offered: All Terms

Course Type(s): HE.EL

Physical, psychological, and sociological aspects of addictive substances; legal and ethical concerns; alternative methods of dealing with stress in young adulthood; socially responsible behavior.

### HE-275 Anthrozoology, Ethics, and Health

Credits: 3

Course Type(s): HE.EL

Introduces students to the varied and complex ways in which animals contribute to human well-being and illness. Students will expand their understanding of the biological, social, psychological, environmental, occupational, spiritual, and cultural implications associated with the use of, and relationships with, animals. Students will critically examine cultural beliefs and practices that impact the well-being of humans, animals, and the planet.

**HE-290 Health Research Methods****Credits: 3**

Prerequisite(s): EN-101 and EN-102

Co-requisite(s): MA-105 or MA-151

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, HY, WT

Introduces students to the basic concepts in health sciences research. Students will gain an understanding of the rationale for conducting research, study designs, qualitative and quantitative inquiry, principles of instrumentation and measurement, data management and interpretation, and research proposal writing and presentation techniques. Students should be able to apply these concepts to evaluate research done by others.

**HE-299 Independent Study in Health Studies****Credits: 3**

Course Type(s): HE.EL

Guided research and in-depth study of an area of health studies of particular interest to the student. Prior permission of the directing professor and department chair is required to take this course.

**HE-315 Critical Research Appraisal****Credits: 3**

Prerequisite(s): MA-151 and HE-290

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, HO

This course will introduce the student to key concepts of the critical appraisal of literature within health science and public health. The first section of the course reviews relevant research design and statistical issues that will be helpful in understanding an evidence-based approach to the literature. The second section of the course reviews basic principles of an evidence-based approach and introduces evidence-based issues related to diagnosis and prognosis. The third section of the course introduces evidence-based issues related to intervention. Throughout the course, material presented in lecture will be accentuated with "real-world" data from the literature and the instructor's ongoing research. In addition, the student will have the opportunity to apply an evidence-based approach to answering a scientific clinical research question.

**HE-320 Principles of Health Education****Credits: 3**

Prerequisite(s): HE-101 and HE-290 or permission of the instructor

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, RD

Examination of the principles and practices of health education for adults in the community, including program development and implementation, educational strategies, behavioral objectives, learner characteristics, and institutional assessment. Essential factors for teaching, learning, and motivating clients to make behavioral changes to promote health.

**HE-324 Human Sexuality****Credits: 3**

Term Offered: All Terms

Course Type(s): GS, HE.EL, HEPE, NU.EL

Human Sexuality is an introductory course designed to help students reflect on their own personal experience, development, background, and value stance while becoming acquainted with research findings, current concepts, and diverse viewpoints about human sexuality. This information will focus on essential components of human sexuality and their relationship to human development. Social, cultural, and developmental determinants of sexual health will be examined. Content will include: anatomy, physiology, hormones, birth control, sexually transmitted infections, pregnancy/childbirth, sexual development, gender identity, sexual orientation, love, healthy relationships, sexual assault, sexual behavior/variation, and sexuality in media. Also listed as NU-324.

**HE-330 Women's Health****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, CD, GS, HE.EL, HEPE

Health care needs and concerns of women from diverse cultures will be examined. This course explores the biological, psychosocial, and sociocultural issues that impact women throughout the lifespan. Topics include the history and status of women's health globally, gender-based violence, sexual and reproductive health, and lifestyle choices that impact health. Throughout the course we will explore the impact of culture, ethnicity, socioeconomic status, systems of oppression, and gender on a woman's ability to be physically, mentally, and emotionally healthy. Also listed as NU-330.

**HE-340 Environmental Health Issues****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, GU, HE.EL, HEPE, SUS

A comprehensive study of current environmental, occupational health issues and associated health risks. Focus on the practical applications of assessing environmental, quality and occupational safety. Major topics include: population growth, water quality, use of pesticides, air pollution, food quality, and occupational health. Legal and regulatory issues also considered.

**HE-350 Epidemiology****Credits: 3**

Prerequisite(s): HE-290 passed with a grade of C- or higher and MA-151, or permission of the instructor

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

A study of the basic principles and methods of epidemiology. These include types of epidemiologic studies, choices in study design, measures of disease frequency and association, sources of bias, screening, and applications to public health. The course covers conceptual and practical issues in epidemiologic research and the interpretation of epidemiologic data.

**HE-360 Transcultural Health****Credits: 3**

Term Offered: Spring Term

Course Type(s): BI.EL, CD, HE.EL, RE

This course focuses on beliefs and practices by individuals and groups from a variety of cultures. Emphasis is placed on cultural sensitivity, cultural diversity, and implications for health. Differences in cultural beliefs related to health, illness, and the impact on the delivery of healthcare will be examined.

**HE-365 Wisdom, Wellness and Aging****Credits: 3**

Term Offered: All Terms

Course Type(s): CD, HE.EL, HEPE

Provides an understanding of the cross-cultural variations in the status of aging and health in older adults. Examples of various cultures include examining older adults from non-English speaking countries, such as North Korea, South Korea, Iran, Mexico, China, and Brazil. Examines factors that affect the economic, social, and health care decisions made by the older adults from these diverse populations as well as other nations. Topics to be covered include examinations of health implications on aging populations in non-English speaking countries. Compare countries, such as Japan, India, and Nigeria, to explore how their specific culture influences caregiving, social support networks, and community. Specific cultural views of love, intimacy, and sexuality in older adults will be examined. Also listed as NU-365.

**HE-370 Alternative/Complementary Health Therapies****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, GU, HE.EL, HEPE

Cultural origins of Complementary Alternative Medical (CAM) therapies will be discussed. Perspectives of health and healing through co-mingling Eastern Traditional Complementary and Alternative Medicine (TCAM) therapies and Western biomedical practices into an integrative strategy will be examined. Appropriate therapies for health promotion and specific illness contexts, potential risks/benefits, ethical issues addressing treatment choices and global entities that employ CAM therapies will be discussed. There will be an emphasis on choosing CAM therapies that are supported by research as safe and effective. Knowledge of reliable sources of information on the Internet will improve decision making regarding therapies. Also listed as NU-370.

**HE-375 Health in Developing Countries: A Cross-Cultural Perspective****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, GU, HE.EL, HEPE, SUS

Designed to introduce students to the concept of health as a cross-cultural issue. Students will examine their own health beliefs and practices and expand their understanding of health and health issues of the developing world. Contemporary health issues will be analyzed. Health care delivery systems in selected countries in Asia and Africa will be examined and compared to the American health care system. Students are expected to problem solve and postulate solutions to contemporary and emerging health issues. Also listed as NU-375.

**HE-376 Guatemala Public Health****Credits: 3**

Term Offered: Spring Term

Course Type(s): CD, EX3, HE.EL, HEPE

Guatemala Public Health will introduce students to the concepts and practice of public health in a low and middle income country. Students will expand their understanding of health issues that exist in Guatemala and they will deliver a health education lesson to "Las Amigas", Guatemalans who are being trained to be community health care workers. The group will also work on a construction project during the work week. Students and faculty will fly to Guatemala City and travel to Chichicastenango and Antigua and several surrounding towns. This is a hybrid course that involves asynchronous on-line work. Permission of the instructor is required to take this course.

**HE-380 Nutrition and Health****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL

An introduction to the physiology of nutrition, basic concepts of normal nutrition and nutrition in chronic disease (such as diabetes mellitus, and cardiovascular disease and obesity) will be explored. A study of the basic nutrients and the gastrointestinal system in its role of digestion, absorption, and metabolism. Food needs of an individual throughout life (birth to old age) will be considered along with necessary dietary modifications caused by decreased activity. Food fads and fallacies will be discussed, as will factors to consider in choosing a healthy diet. Current concerns, such as how safe are the additives in our foods; the role of sugar, salt, and highly processed foods; and alternative therapies, such as herbal remedies and phytochemicals and their potential roles in modern nutrition will be studied. Weight management will be addressed as it relates to medical-nutrition therapy.

**HE-389 Internship in Health and Physical Education****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX1, HE.EL, HEPE

Supervised, pre-professional field experience in health and physical education. The student will secure an internship site related to his/her interests and career goals. Potential internship sites include health and fitness clubs, community wellness agencies, coaching opportunities, hospitals, corporations, and private services. The student will work fifty hours per credit per term at his/her internship site. Students are required to obtain a faculty sponsor, develop learning objectives at the start of their internship, keep a journal of their internship activities throughout their placement, and write a final paper reflecting upon their internship experience. Also listed as PE-389. This is a pass/fail course. Departmental approval is required to take this course. Junior standing (and others by permission of a faculty advisor), placement opportunity and approval by the Health and Physical Education Department are required to take this course. Limited to Health majors.

**HE-398 Special Topics in Health Education (300 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

This course explores the foundational principles and effective practices of instructional strategies within the context of health education. Students will examine various teaching methodologies, learning theories, and assessment techniques that are applicable in health promotion and education settings.

**HE-399 Independent Study in Health****Credits: 1-3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Guided research and in-depth study of an area of health of particular interest to the student. Prior permission of the directing professor and department chair is required to take this course.

**HE-430 Health Advocacy****Credits: 3**

Prerequisite(s): HE-101 and HE-290, and Junior standing; or permission of the instructor

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Focus is on personal and peer health advocacy. Being healthy involves making decisions that are right for each individual and being part of a community that promotes healthy behaviors. Advocating for individual health requires that the student has the confidence, basic understanding of advocacy, resources, and skills to make proper health decisions. Foster student health advocacy as skills are taught while students grapple with personal and social questions that affect their overall health and the health of others. Put student-health promotion into the hands of the students. They will be required to create a health initiative. These initiatives will foster a healthier Monmouth University community.

**HE-435 Community Health****Credits: 3**

Prerequisite(s): HE-101, HE-290, and Junior standing; or permission of the instructor

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Healthcare of groups and communities; this includes community and public health theories, epidemiology, health promotion, illness prevention, research, ethics, vulnerable populations, and common deviations from health.

**HE-440 Health Policy****Credits: 3**

Prerequisite(s): EN-101, EN-102, HE-290 and Junior standing or permission of the instructor

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, WT

Delves into the core elements that define health policy. Describes factors, such as the healthcare delivery systems (public/non-profits vs. private/for profits), access to care, healthcare financing, quality-of-care issues, and social issues, such as gender and culture, and their impact on health and healthcare. The dynamics of the policy-making process at different levels (federal, state and local) will be explored, along with policy analysis and how policy influences healthcare decisions. The complexities and challenges of healthcare reform will be identified. Also listed as NU-440.

**HE-476 Interpersonal Violence****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Examines the various types and patterns of violence related to cultural values, beliefs, biases, and societal issues, as well as the historical perspectives of violence. Course content includes: family, community, youth, and workplace violence; child, domestic, elder, and sexual abuse. Theories concerning gender violence, gangs, bias and hate crimes, and terrorism are challenged. Public health and health care issues related to violence, and primary, secondary, and tertiary-level interventions for victims and offenders of violence are discussed. Individual responsibilities associated with identification and reporting violence are identified. Health care measures to identify and prevent violence are analyzed. Methods of treatment for victims and perpetrators of violence are evaluated. Also listed as NU-476.

**HE-485 Professional Seminar in Health****Credits: 3**

Prerequisite(s): HE-101, HE-290, and Junior standing; or permission of the instructor

Term Offered: All Terms

Course Type(s): EX5, HE.EL, HEPE

Provides students with the experiential education requirement for the BS in Health Studies. Students will have a placement in a health setting where they will have the opportunity to work with a health professional and to apply what they have learned in class to the experiential setting. Weekly seminars will be designed to allow the students to share their experiences with their peers.

**HE-489 Internship in Health and Physical Education****Credits: 1-3**

Term Offered: Summer Term

Course Type(s): EX1, HE.EL, HEPE

Supervised, pre-professional field experience in health and physical education. The student will secure an internship site related to his/her interests and career goals. Potential internship sites include health and fitness clubs, community wellness agencies, coaching opportunities, hospitals, corporations, and private services. The student will work fifty hours per credit per term at his/her internship site. Students are required to obtain a faculty sponsor, develop learning objectives at the start of their internship, keep a journal of their internship activities throughout their placement, and write a final paper reflecting upon their internship experience. This is a pass/fail course. Departmental approval is required to take this course. Junior standing (and others by permission of a faculty advisor), placement opportunity and approval by the Health and Physical Education Department are required to take this course. Limited to Health majors.

**HE-498 Special Topics in Health****Credits: 3**

Course Type(s): HE.EL, HEPE

An intensive study of a particular subject or problem in health education to be announced prior to registration. If a prerequisite is required it will be announced in the course schedule.

**HE-499 Independent Study in Health Studies****Credits: 1-3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Guided research and in-depth study of an area of health studies of particular interest to the student. Prior permission of the directing professor and department chair is required to take this course.

## History (HS)

**HS-101 Western Civilization in World Perspective I****Credits: 3**

Term Offered: All Terms

Course Type(s): HS.SV

An introduction to the major historical developments in the history of Western society and its intellectual tradition. Secondly, it is also an introduction to the uses of history itself. Our survey will consider ancient Greece and Rome, Medieval Europe, the Renaissance, the Reformation, and the rise of nation-states in Europe. To understand the history of the West in a larger context, we will examine it in relation to the history of the Middle East, particularly at points of contact such as the Crusades.

**HS-102 Western Civilization in World Perspective II****Credits: 3**

Term Offered: All Terms

Course Type(s): HS.SV

A readings-based introduction to Western history, from the seventeenth century to the present, in the perspective of a major non-Western civilization. Topics include the Enlightenment, the Industrial Revolution, the Great Depression, the World Wars, the Cold War, and Globalization.

**HS-107 Love and Marriage in Historical Perspective****Credits: 3**

Term Offered: All Terms

Course Type(s): HS.SV

Love and Marriage in Historical Perspective is a reading-and-discussion-based thematic history course. This course is designed to expose students to the history of love and marriage from classical antiquity to the present in global perspective. Marriage is one of the oldest social institutions in human culture: and, as an institution, it has not always been associated with the concept of love. This course considers the transformation of marriage as both a public, private, political, economic, social, and emotional institution that has been fundamental to the development of human societies. This includes a discussion of the Greco-Roman world, the Middle Ages, the Romantic era and marriage in the global village at the present. Why is traditional marriage on the decline in Western societies? What is traditional marriage? When, why, and how did the idea of love get tangled up with marriage and how successful has the love-marriage connection been over time? Why is marriage in crisis? What does love have to do with it? What are the revolutionary implications of the rise and fall of marriage as a love-match? These are some of the questions we will contemplate in this course as associated with issues related to sex, gender, sexuality, race and class by examining love and marriage in literature, poetry, music, and in philosophical treatises on the subject utilizing the historical method as the primary approach.

**HS-108 Human Gods: Science, Technology, and Culture in History****Credits: 3**

Term Offered: All Terms

Course Type(s): HS.SV

This is a readings and discussion based history course on the interplay between science, technology, and culture in history from the global scientific revolution to the human genome project. The overarching theme of the course is "Human Gods" because we will pay close attention to how scientists in their attempts to manipulate nature in a sense "play god" and how playing god may have devastating consequences for marginalized groups in particular and humanity more generally. Some various arenas of science and technology including medicine, military technology, and computer technology are examined in the course to demonstrate how individuals, industries, and governments have harnessed science and technology to control nature (such as with disease control, other nations in warfare, and general human activity via computer technologies).

**HS-110 Historical Studies****Credits: 3**

Term Offered: All Terms

Course Type(s): HS.SV

Through a deep study of a single historical topic, students will learn how historians draw and revise conclusions about the past. They will examine the uses and abuses to which history is put, and they will practice advancing historical arguments of their own.

**HS-198 Special Topics in History (100 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in history to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar-basis. If a prerequisite is required it will be announced in the course schedule.

**HS-201 United States History I****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

The development of the multi-ethnic American nation. Colonial origins, the Revolution, the Age of Jackson, slavery, the Civil War, and Reconstruction.

**HS-202 United States History II****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

The development of the multi-ethnic American nation. The emergence of modern industrial America, domestic reform and civil rights, world conflict, and leadership.

**HS-203 New Jersey History: A Mirror on America****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): HSUS, WT

An introduction to and overview of New Jersey history (1600-1950). Various trends in local history are tied to national developments. Important people, events, and trends in the state history are examined.

**HS-204 Popular Culture in East Asia****Credits: 3**

Term Offered: All Terms

Course Type(s): GU, HSAS, HSNW

This course will examine the history and culture of East Asia through the lens of popular culture (film, television, novels, manga, music, etc.). Topics to be covered may include but are not limited to: empire, World War II, gender, globalization, etc.

**HS-209 The History of African-Americans****Credits: 3**

Term Offered: Spring Term

Course Type(s): ADS, CD, HSUS, RE

The study of African-Americans from their first contacts with Europeans through the rise of the Black Power movement in the 1960's; the status of African-American society and contributions to American culture.

**HS-212 Introduction to Public History****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Defines public history, explains its past, and explores its intricacy to the future of the historical profession. Topics covered will include oral history, museums and archives management, history's influence on public policy, teaching history, history and the media, cultural tourism, the politics of memory, and digital history. Students will put what they have learned in the classroom to work in the field via a capstone service learning project. All students will, throughout the course of the semester, produce portfolio items suitable for presentation to future employers.

**HS-219 United States Military History****Credits: 3**

Term Offered: Spring Term

Course Type(s): HSUS

Surveys the American experience of war, from the first Native American-European contact through the military interventions at the dawn of the twenty-first century; examines not only the major conflicts in this period, but also the evolution of strategy, military institutions, civil-military relations, and the American way of war.

**HS-220 History of Advertising****Credits: 3**

Term Offered: All Terms

Course Type(s): GS, HSUS

Designed to develop a critical understanding of the historical evolution of advertising in the United States, with critical attention to race, class, gender, and sexuality. We will explore the economic, political, and cultural factors that have contributed to the development of advertising, and which have been affected by advertising. Some of the topics to be discussed include: the rise of national advertising; the relation of advertising to consumption; advertising to children; political advertising, the relationship between advertisers and the medium in which they appear (magazines, television, radio, etc.), and broadcast and Internet advertising. Also listed as AN-220 and GS-220.

**HS-227 History in the Movies****Credits: 3**

Prerequisite(s): EN-101 and EN-102.

Term Offered: All Terms

Course Type(s): WT

Moviemakers began interpreting historical subjects on screen even before they had established audiences willing to pay to watch. This wildly popular form of mass entertainment has been shaping public memory ever since: not only at the height of its power in the 20th century, but even as it competes with other story-telling media today. In this course, we will look at movies' peculiar influence over what we believe about history, be it how nations were founded, how wars were waged, how people related to one another, and even what different historical milieu looked and sounded like. Please see the "notes" section to see the topical focus of the current semester's course.

**HS-233 Classical Civilizations****Credits: 3**

Term Offered: All Terms

Course Type(s): HSEU, HSPRE

Mediterranean civilizations from the Ancient Near East through Classical Greece and Rome, to the close of the Western Roman Empire.

**HS-243 Medieval Europe I (300-1400)****Credits: 3**

Term Offered: Spring Term

Course Type(s): HSEU, HSPRE

Europe from the decline of Rome through the fourteenth century.

Semester I (to 1100): barbarian invasions, rise of the Church, early medieval culture, Byzantium and Islam, feudalism and manorialism.

Semester II: Empire vs. Papacy, the Church at its height, the flowering of medieval culture.

**HS-244 Medieval Europe II (300-1400)****Credits: 3**

Term Offered: Spring Term

Course Type(s): HSEU, HSPRE

Europe from the decline of Rome through the fourteenth century.

Semester I (to 1100): barbarian invasions, rise of the Church, early medieval culture, Byzantium and Islam, feudalism and manorialism.

Semester II: Empire vs. Papacy, the Church at its height, the flowering of medieval culture.

**HS-251 History of the British Isles I****Credits: 3**

Term Offered: Fall Term

Course Type(s): HSEU, HSPRE

Roman, Anglo-Saxon, and Celtic cultures; consolidation of the Anglo-Norman Feudal Monarchy; the impact of the Reformation and Tudor absolutism; and constitutional crisis and revolution to 1688.

**HS-252 History of the British Isles II****Credits: 3**

Term Offered: Spring Term

Course Type(s): HSEU

Union between England and Scotland, Parliamentary reform, Industrial Revolution, Empire and Commonwealth, Ireland and Home Rule, democracy and the welfare state, and contemporary Britain and Ireland.

**HS-253 History of Ireland****Credits: 3**

Term Offered: Spring Term

Course Type(s): HSEU

Selected themes in Irish history from prehistoric times to the present, including Celtic Christianity, Norman Conquest and Gaelic Recovery, Protestant Ascendancy, Rebellion and Revolution, the Famine and Emigration, Home Rule, the Irish Republic, the Troubles in Northern Ireland and the European Union.

**HS-261 History of Russia I****Credits: 3**

Term Offered: Fall Term

Course Type(s): BI.EL, GU, HSAS, HSEU, HSNW, HSPRE

Russia from ancient times to the Nuclear Age. Semester I: the consolidation and decline of the Kievan state, the Muscovite and Imperial eras, the impact of the West to about 1855.

**HS-262 History of Russia II****Credits: 3**

Term Offered: Spring Term

Course Type(s): ARHIS, CD, HSAS, HSEU, HSNW

Russia from ancient times to the Nuclear Age. Semester II: the reform era, revolutionary movements, the Soviet state, and the evolution and collapse of the communist regime.

**HS-264 North American Indians****Credits: 3**

Term Offered: All Terms

Course Type(s): GU, HSPRE, HSUS, RE

Survey of the cultural, social, and linguistic diversity of pre-Columbian North American societies and problems of contemporary Indian groups. Also listed as AN-264.

**HS-266 Historical Archaeology****Credits: 3**

Prerequisite(s): AN-103 or HS-201; and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): HSPRE, HSUS, WT

Provides an introduction to historical archaeology, the archaeology of the modern world (c.1492+). Focuses on archaeological sites in the United States. Students are introduced to the various written and material sources that historical archaeologists use to interpret the recent past, including artifacts, vernacular architecture, grave markers, documents, photographs and other visual sources. Archaeological field methods are also introduced with a minimum of one class period spent excavating an archaeological site. Also listed as AN-266.

**HS-271 Europe, 1914-1939****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Course Type(s): BI.EL, GU, HSEU, WT

Europe during and after World War I: the consequences of that war, the crisis of European democracy, Communism and the Soviet Union, the rise of Fascism in Italy and National Socialism in Germany, and the failure of collective security.

**HS-272 Europe Since 1939****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): GU, HSEU, WT

World War II and post-war Europe: the Cold War, European recovery, economic integration, Communism in Eastern Europe, the Soviet Union as a major power, and Europe's changing role.

**HS-283 The Civilizations of Asia (India, China, Japan)****Credits: 3**

Term Offered: All Terms

Course Type(s): HSAS, HSNW, HSPRE

A survey of Asia's great cultural traditions through literature, art, science, religion and institutions, and the interplay of these traditional cultures with Western civilization.

**HS-284 Modern East Asia****Credits: 3**

Term Offered: Spring Term

Course Type(s): GU, HSAS, HSNW

This course is a broad introduction to modern East Asian history from the mid-19th century to the end of the 20th. Through three spatial modules-Japanese archipelago, Chinese mainland, and Korean peninsula-we will explore the interconnections and divisions between these different spaces during a time of rapid change. By diving deeply into a selection of primary and secondary sources (both visual and in translation) from this period, we will examine the major social, cultural, and political shifts over the 19th and 20th centuries in East Asia. We will in particular explore what modernity means in the context of East Asia.

**HS-285 Modern China****Credits: 3**

Course Type(s): GU, HSAS, HSNW

This course will explore the last two centuries of Chinese history, including the opium wars and the fall of the Qing dynasty, the rise of the Chinese Communist Party and founding of the People's Republic of China, post-1949 attempts at socialist transformation, as well as the evolution and consequences of economic reform since the early 1980s. We will draw upon historical writing, memoirs, reportage, and fiction, as well as translations of original documents.

**HS-290 Popular Culture and the Middle East****Credits: 3**

Course Type(s): GU, HSNW, RE

Examines recent events, traditional cultural practices, and the perceptions of the Middle East through the lens of popular media (film, graphic novels, journalism, etc.). Topics to be covered may include but are not limited to: religion, the Arab Spring (2011), the Iranian Revolution, the Arab-Israeli Conflict, women's rights/roles, Orientalism and racism, and common governing structures. Also listed as AN-290.

**HS-291 Introduction to Islamic History****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): BI.EL, GU, HSAS, HSEU, HSNW, HSPRE, RE, WT

Examines the history and development of the Islamic umma (the community of Muslim believers) across time and space. Traces the development of Islam, taking care to understand the environment into which it was first introduced, and follow its development in terms of philosophy and spirituality to the present day. Takes into account variation within the religion as it spread out of the Arabian Peninsula and across the world.

**HS-292 The Middle East and the Rise of the Gunpowder Empires****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): BI.EL, GU, HSAS, HSNW, WT

Examines the history of the Middle East from the 1200s through the end of the 1700s. In the West this era is typically known as the high-water mark for Islamic Civilization, an era marked by a height for Islamic art, architecture, and political organization, this era also marks the time during which Islamic governments held power over the largest swath of territory. To understand this time period students will examine Persian, Ottoman, Egyptian, Indian, and Magrabi/Andalusian history.

**HS-293 The African Diaspora in the Americas****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): ADS, GU, HSNW, HSUS, RE, WT

The dispersion of African people across the world was a seminal event in the history of humankind. African people have profoundly influenced the development of human history from this dispersion. Includes a comprehensive historical overview of the African Diaspora in the Caribbean, Latin America, and North America, from the height of the Atlantic Slave Trade in the eighteenth century to the present.

**HS-295 History of Africa****Credits: 3**

Term Offered: All Terms

Course Type(s): ADS, GU, HSAF, HSNW, RE

Africa in modern times, emphasizing the sub-Saharan part of the continent; traditional African civilizations; European colonization and its impact on Africa; economic, social, and political transformation; and the problems of nation-building.

**HS-296 Cultures and Societies of Africa****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): ADS, CD, HSAF, HSNW, RE, WT

Examines the history, cultures, and societies of Africa from the precolonial to the contemporary period. Discusses the cultural, political, and economic changes that have taken place in Africa as a result of Western influence. Also listed as AN-296.

**HS-297 History of West Africa****Credits: 3**

Prerequisite(s): HS-101, HS-102, EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): ADS, CD, HSAF, HSNW, HSPRE, RE, WT

An examination of the history of West Africa from AD 1000 to the present. Special topics include: the sources of West African history, the peoples and empires of West Africa, agriculture and the trans-Saharan trade, the introduction of Islam, the coming of the Europeans, and the post-independent period of West Africa.

**HS-298 Special Topics in History (200 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in history to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**HS-299 Independent Study in History****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided study of a selected topic in history not substantially treated in a regular course, under the direction of a member of the History faculty. Extensive reading and at least one written report are required. Prior permission of the directing professor and department chair is required to take this course.

**HS-303 American Colonial and Early National Period****Credits: 3**

Term Offered: Spring Term

Course Type(s): HSUS

The evolution of the British colonies from their establishment to the American Revolution. The first problems in the development of the new nation to the era of Andrew Jackson.

**HS-304 Monuments and Commemoration: Loss and Remembrance****Credits: 3**

Course Type(s): HSUS

Examines the evolution of American attitudes towards commemoration and remembrance from the colonial period to the present. Focuses on the analysis of landscapes and artifacts, e.g., monuments, grave markers, cemeteries, and historic sites. Topics discussed include the evolution of American burial grounds from colonial burial grounds to the rural cemeteries of the Victorians, and modern memorial parks. Changing grave marker designs and iconography are examined. Distinct ethnic, regional, and national memorial practices are also studied. Public memorials in the form of statuary, commemorative institutions, and historic sites will also be discussed. There will be field trips to select sites. Also listed as AN-304.

**HS-305 Women in US History****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): GS, HSUS, WT

Surveys women's historical experience in the US. The emphasis of the course will be on how women of different socio-economic backgrounds, races, and ethnic groups have shaped and been affected by US History. Also listed as GS-305.

**HS-306 Jazz Age and Harlem Renaissance****Credits: 3**

Term Offered: All Terms

Course Type(s): ADS, HSUS, RE, WT

Focus will be on race, gender, class and sexuality in Jazz Age America as related to the development of the Harlem Renaissance. Harlem was the center of black culture in the 1920s; but this "New Negro Movement" stretched far beyond Harlem. In this course, we will explore both the national and transnational dimensions of the Harlem Renaissance and how the culture of the Harlem Renaissance helped to shape modern American culture more broadly. This course will include an examination of the Harlem Renaissance in American history from multiple perspectives including literary, artistic, cinematic, economic and philosophical aspects of the Renaissance in American history.

**HS-307 History of Sexuality in America****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): CD, GS, HSUS, RE, WT

Explores the social and cultural history of sexuality in the United States. How race, class, and gender have influenced ideas about sexuality, morality, and power. Major topics include: reproduction, gay and lesbian sexualities, sexually transmitted diseases, and sexual representation and censorship. Also listed as GS-307.

**HS-308 The American Civil Rights Movement****Credits: 3**

Term Offered: All Terms

Course Type(s): ADS, HSUS, RE

Includes a historical examination of the major personalities, groups, and organizations central to the development of the American Civil Rights Movement in the 1960s. Students will be introduced to important scholarship and participant histories crucial to the Movement through an examination of both primary and secondary source material.

**HS-309 Readings in African-American Intellectual History****Credits: 3**

Term Offered: Spring Term

Course Type(s): ADS, CD, HSUS, RE

Examines some of the major themes and thinkers in the development of the African-American intellectual tradition from the black abolitionists to the present. Major topics of the course include the formation of black oppositional leadership in the Reconstruction south, Booker T. Washington and racial accommodation, W.E.B. DuBois and integration, along with Black Nationalism and contemporary, black-feminist theory.

**HS-310 Business and Economic Development of the United States****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): HSUS, WT

The impact of political and economic decisions on the structure of society: agrarianism, merchant capitalism, laissez-faire industrialism, neomercantilism, and the social welfare state.

**HS-312 Oral History****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

Students will learn about oral history by reading about it, researching it, and actually doing it. Students will end the semester with a solid understanding of when, why, and how to conduct oral history interviews, as well as an awareness of the logistical, ethical, and legal considerations involved in doing so. All students will, throughout the course of the semester, produce portfolio items suitable for presentation to future employers.

**HS-313 History of the Book in America****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): HO, HSUS, WT

Examines the impact of printed text in America historical development from the colonial era to the present day. It will cover selected topics that will demonstrate that the printed text in all of its various manifestations was shaped by a nascent and evolving American culture and, in turn, was instrumental in shaping this culture.

**HS-314 Exploring History and Heritage Sites****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

The days of whitewashed, feel good history; staid curators; dusty, static museum displays; and musty, hushed archives are fading. Today, the public history community is constantly reassessing what constitutes a history or heritage site, and how traditional sites like museums and archives should operate in the 21st century. In this class, we will consider what history and heritage sites look like, and what they can do to stay relevant while still honoring their core values. In addition to reading the latest in the historiography, students will spend several class sessions visiting local sites, which will act as case studies related to designated readings.

**HS-315 Field Research in Archaeology****Credits: 3**

Prerequisite(s): AN-103 or AN-107 or permission of the instructor

Course Type(s): EX5, HSUS

Archaeological field methods, analysis of data, and anthropological interpretation; students will do supervised work on local sites. May be repeated for a maximum of six credits. Also listed as AN-315.

**HS-317 Museum and Archives Management Basics****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

Introduces students to the best practices and procedures of museum and archives management. Topics covered will include the basics of museum and archives administration, as well as the basics of records management, collections care, exhibition, and interpretation.

**HS-325 Digital Humanities****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): CD, WT

Students will learn the history of and think critically about the field and methodologies known as "Digital Humanities." We will investigate what the digital humanities are, how they have changed over time, their role in academia, their accessibility to the public, the systemic biases and issues within digital humanities and technology, and the possibilities of digital humanities to bring about change in the humanities and the public understanding of the humanities more broadly.

**HS-330 The Civil War and Reconstruction****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): HSUS, RE, WT

Covers the military, political, and social history of the American Civil War, and the rise, the fall, and the legacies of the postwar Reconstruction.

**HS-331 World War II****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Course Type(s): HSEU, HSUS, WT

Considers the military, economic, and political characteristics of the Allied and Axis powers and the strategies they produced; examines the military campaigns, the wartime economies, life on the home fronts, the experience of combat, the dynamics of occupation, and the roles of morality and immorality in the conduct of the war.

**HS-332 The Cold War****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): HSEU, HSUS, WT

Examines the rivalry between the United States and the Soviet Union that organized global politics for forty-five years; the roles of ideology, economy, and security that fueled it; and the diplomacy, propaganda, and the armed might use to wage it; and the impact it had on participants' politics and culture.

**HS-333 The Vietnam Era****Credits: 3**

Term Offered: Spring Term

Course Type(s): HSUS, RE

The Vietnam Era, which grew out of America's longest war, was a major influence on American society at home and abroad. Explores the military and political role the U.S. played in this conflict, its influences on American society, and the living legacy of this turbulent era.

**HS-344 French Revolution and Napoleon****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): CD, HSEU, WT

Study of France and French influence on Europe between 1789 and 1815; the causes and changing aims of the Revolution, the conflict of ideologies, the failure of the First Republic, and the Napoleonic Empire.

**HS-349 Slavery in the Atlantic World****Credits: 3**

Prerequisite(s): AN-380 or GS-252 or SO-252

Course Type(s): ADS

The emergence and decline of racial slavery in the Atlantic World from 1492 to 1888 is the primary focus of this course. Students will learn to understand and articulate the major forces that facilitated the development and collapse of modern slavery in the Atlantic World and how the residual impact of this system continues to shape contemporary race relations and systems of power at the present. There will be an emphasis on the interrelationship between race, gender, and class in New World plantation societies as evolving systems of power in North America, Latin America, and the Caribbean over time including some discussion of the Black Atlantic. The class serves as a required course for students minoring in race and ethnic studies.

**HS-351 Victorian Culture****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): CD, HSEU, WT

Victorian England was the first nation to experience the full force of the societal upheaval caused by industrialization. This course will focus on selected aspects of this culture to demonstrate the complexity of the problems faced by Victorians and the ensuing debates in all theaters of life on proposed solutions to these problems. Specific emphasis will be placed on Victorianism, the middle class ethos, which was both product and agent of Victorian culture.

**HS-352 Militant Nationalism****Credits: 3**

Term Offered: All Terms

Course Type(s): HSEU, HSNW, RE, WT

Examines the development of militant nationalist groups and the ideologies behind militant nationalism over the course of the twentieth century. Several case studies will be examined including, but not necessarily limited to: the Irish Republican Army (IRA), the National Liberation Front of Algeria (FLN), the Euskadi Ta Askatasuna (ETA), and the Tamil Tigers (LTTE).

**HS-357 Blood & Iron: Germany in the Nineteenth Century****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): CD, HSEU, WT

Prussian militarism, legacy of the French Revolution, 1848, Bismarck and Unification, social tensions in the Empire, industrialization, nationalism and racism, and causes of World War I.

**HS-358 Modern Germany, 1914-Present****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): CD, HSEU, WT

World War I, Revolution of 1918-19, Weimar Republic, origins of Nazism, the Third Reich, World War II, the Occupation, post-war Germanys, and Unification.

**HS-359 The Holocaust****Credits: 3**

Term Offered: All Terms

Course Type(s): HSEU, RE

An examination of the Holocaust with special emphasis on the historical background in European political, social, economic, and religious institutions; the implications of the planned extermination of European Jewry for world civilization; and the question of responsibility.

**HS-361 Revolution and Reaction: Jews of the Russian Empire and the Soviet Union (1772-1939)****Credits: 3**

Course Type(s): CD, HSEU

This cultural, social, religious, economic and political history of the Jews of the Russian Empire in the 19th and early 20th centuries. Who were they and where did they come from? What was their place in society and what policies were invoked in the Russian Empire to deal with the "Jewish problem?" How did their lives change after the Bolshevik revolution and the establishment of the Soviet Union?

**HS-391 The Modern Middle East****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Course Type(s): GU, HSNW, RE, WT

Covers the history of the geographic Middle East, North Africa and some of South and Central Asia (largely the heartland of the Islamic world) from 1798 to the present. Particularly interested in examining the fall of empires and monarchies and the rise of modern nationalist movements in addition to the rise of religious fundamentalist and socialist movements across the region as well.

**HS-392 History of the Arab-Israeli Conflict****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): BI.EL, CD, HSAS, HSEU, HSNW, RE, WT

Examines the development of the conflict over a region known as Palestine (post-1948: Israel) from the late 1800s to the present. Special emphasis will be placed on themes related to imperialism, nationalism, cultural definition, religion, ethnicity, gender, militancy, and the environment.

**HS-396 Colonial Africa**

Term Offered: All Terms

Course Type(s): ADS, GU, HSAF, HSNW

Examines the process of European colonization of Africa in the second half of the nineteenth century. The main issues include: the scramble for and partition of Africa; African resistance to European imperialism and colonization; colonial political, economic, and social policies; the rise of nationalism, and the process of decolonization.

**Credits: 3 HS-436 The Reformation****Credits: 3**

Prerequisite(s): 12 credits in History or Junior standing

Term Offered: All Terms

Course Type(s): HSEU, HSPRE

A study of sixteenth- and early seventeenth-century religious and political developments in Europe; causes of the Reformation, its political and social institutionalization, ideas of reformers, wars of religion, and the Counter-Reformation. Also listed as RS-436.

**HS-397 Globalization and Africa****Credits: 3**

Term Offered: All Terms

Course Type(s): ADS, GU, HSAF, HSNW, RE

Globalization has profoundly influenced and transformed Africa in multi-dimensional ways-economically, politically, and socially. While globalization is not a new development, it has had a significant impact on Africa since the late nineteenth century. Africa has been connected to the world market thereby leading to opportunities for economic growth and development. Although African states are still grappling with sustainable economy, they remain strongly attached to the world economic system. Politically, there has been a transition from the monarchical to the parliamentary/presidential systems. This course will examine the concept of globalization, how it has impacted Africa, how Africa has responded to the economic, political, and social changes and challenges. We will also discuss the ways Africa can become more relevant in global affairs.

**HS-437 Power and Enlightenment: Europe 1648-1789****Credits: 3**

Course Type(s): HSEU, HSPRE

A study of European history from the Treaty of Westphalia to the French Revolution, emphasizing the contrast between political and military developments, and cultural and intellectual trends. Special emphasis on the development of absolutism in France, Prussia, Austria, Spain, and Russia; the struggle against absolutism in Britain, Sweden, and the Netherlands; the ideals and goals of the European enlightenment, developing social and political tensions, and enlightened despotism.

**HS-398 Special Topics in History (300 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in history to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**HS-453 Tudor - Stuart England****Credits: 3**

Prerequisite(s): 12 credits in History of Junior standing, and EN-101 and EN-102, or permission of the instructor

Term Offered: Summer Term

Course Type(s): HSEU, HSPRE, WT

Focus will be on society, politics, and religion in sixteenth- and seventeenth-century England. Major topics for discussion will include the English Reformation, the Age of Elizabeth and Shakespeare, the British Civil Wars, the Restoration, and the Revolution of 1688. Each topic will be discussed with reference to the social and economic changes that helped to mold this period.

**HS-399 Readings and Research in History****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided study of a selected topic in history not substantially treated in a regular course, under the direction of a member of the History faculty. Extensive reading and at least one written report are required. Senior standing; status as a History, History and Political Science, or History and Education major with a 3.00 or higher G.P.A. in major coursework; and prior permission of the directing professor and department chair are required to take this course.

**HS-461 Research Seminar in History****Credits: 3**

Prerequisite(s): Senior standing and 18 credits in History above HS-202

Term Offered: All Terms

Course Type(s): RD

The development, research, and writing of a research paper in history, with special emphasis on scrupulous documentation, use of primary sources, clear expository writing, and oral presentation of research results. Country or region of study is open.

**HS-410 American Music History Internship****Credits: 1**

Prerequisite(s): HS-212.

Term Offered: All Terms

Course Type(s): EX1

Supervised, professional experience in public history at the Bruce Springsteen Archives and Center for American Music. Emphasis on the development of professional skills in areas such as the care and management of historical collections, public education and outreach programming, collections research and analysis, and grant research and writing.

**HS-489 History Internship****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX1

Supervised, professional experience in public history programs and institutions (e.g., museums, archives, historical societies, preservation agencies). Emphasis on the development of professional skills in areas such as the care and management of historical collections, public education and outreach programming, collections research and analysis, and grant research and writing. This course is repeatable for credit. Junior standing, departmental approval, and placement are required to take this course.

**HS-435 The Renaissance****Credits: 3**

Prerequisite(s): HS-101 and HS-102

Course Type(s): HSEU, HSPRE

Europe in transition from the fourteenth to the sixteenth century; the crisis of the Church, humanism and art, politics, diplomacy, exploration and discovery, science and the occult.

**HS-498 Special Topics in History (400 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in history to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**HS-499 Readings and Research in History****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Guided study of a selected topic in history not substantially treated in a regular course, under the direction of a member of the History faculty. Extensive reading and at least one written report are required. Senior standing; status as a History, History and Political Science, or History and Education major with a 3.00 or higher G.P.A. in major coursework; and prior permission of the directing professor and department chair are required to take this course.

## Homeland Security (HLS)

**HLS-101 Introduction to Homeland Security****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Introduction to the fundamental components of homeland security. The course examines historic events that shaped homeland security policy and practice, as well as providing students with an understanding of the interdisciplinary, interagency, interjurisdictional, and all-hazards nature of homeland security. Homeland security hazards include adversarial/human caused threats (terrorism, crime), natural threats (hurricanes, tornadoes, earthquakes, storms), and technological/accidental threats (industrial/transportation). Homeland security policies and practices endeavor to prevent, mitigate, respond to, and help the Nation recover from all hazards.

**HLS-199 Independent Study in Homeland Security****Credits: 3**

Term Offered: Summer Term

Course Type(s): None

Independent study on a Homeland Security topic not substantially treated in a regular course. Prior permission of the directing professor and department chair is required to register for this course.

**HLS-235 GIS Applications in Homeland Security****Credits: 3**

Prerequisite(s): GIS-224

Term Offered: All Terms

Course Type(s): None

Introduces students to the basic theories in Geographic Information Systems (GIS). Provides students with a hands-on practical approach to analyze homeland security related data. Students will develop a skill set to map homeland security data and perform spatial analytical tasks. Also listed as GIS-235.

**HLS-245 Strategic Security Management****Credits: 3**

Prerequisite(s): HLS-101

Term Offered: All Terms

Course Type(s): None

Analysis of the post-September 11, 2001 strategic security environment. The course focuses on threat and vulnerability assessments, and the use of data to drive security strategy. Students will assess and evaluate current and evolving business practices to protect private sector and government architecture and critical infrastructure assets. The course explores current and evolving security technology, techniques, procedures, and risk-based resource allocation of personnel and security-technologies.

**HLS-285 Domestic and International Terrorism****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Provides students with an in-depth examination of terrorism and its implications for society. Examines terrorist ideologies, motivations, goals, strategies, and tactics. Focuses on issues related to the operational and organizational dynamics of terrorist organizations, state and political terrorism, religious-motivated terrorism, domestic terrorism, the relationship between the media and terrorism, terrorist tactics and targeting, and counter-terrorism methodologies.

**HLS-286 Principles of Emergency Management****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Introduces students to the background components and systems involved in the management of disasters and other emergencies. Focusing on the United States, the course will illustrate current practices, strategies and key players involved in emergency management.

**HLS-287 Theoretical Approaches to Homeland Security****Credits: 3**

Prerequisite(s): HLS-101, HLS-285, HLS-286, EN-101, and EN-102

Term Offered: All Terms

Course Type(s): WT

Examines the various theories that describe, explain, predict, and judge the causes of terrorism and crime, as well as the behaviors associated with natural, technological/accidental, and adversarial/human caused disasters. Topical issues include terrorism, transnational crime, extreme weather, and emergent threats including climate, economic, energy, environmental, food, human, technology, and water security.

**HLS-298 Special Topics in Homeland Security****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

An intensive study of a particular subject or problem in Homeland Security to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**HLS-299 Introduction to Homeland Security****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Homeland Security topic not substantially treated in a regular course. Prior permission of the directing professor and department chair is required to register for this course.

**HLS-301 Homeland Security Intelligence****Credits: 3**

Prerequisite(s): EN-101, EN-102, and HLS-101

Term Offered: All Terms

Course Type(s): WT

Examines the role of intelligence in homeland security policy and practice. The course focuses on the duties and responsibilities of intelligence collectors, analysts, and policy makers in the intelligence cycle. Topical issues include intelligence policy, law and ethics; threat and vulnerability assessments; and interagency information-sharing processes.

**HLS-302 Advanced Homeland Security Intelligence****Credits: 3**

Prerequisite(s): HLS-301

Term Offered: Summer Term

Course Type(s): None

Examines the role of strategic intelligence in homeland security policy and practice. The course focuses on intelligence methodologies that bring a broad range of information to bear on difficult strategic questions, select that information which is most significant, and then tailor the information for decision makers. The course will examine recent terrorist attacks and other events with strategic implications as well as projected future threats.

**HLS-303 Open Source Intelligence****Credits: 3**

Prerequisite(s): HLS-301

Term Offered: Spring Term

Course Type(s): None

Open source intelligence is publically available information including academic and trade publications, court documents, news sources, business websites, and social networks, forums, and blogs that are collected, evaluated, and disseminated in a timely manner for the purposes of addressing specific intelligence requirements. The course examines the rapidly evolving open-source information landscape and the implications for U.S. homeland security. Students will apply the tenets of open-source intelligence to current homeland security issues.

**HLS-310 Transport Security****Credits: 3**

Prerequisite(s): HLS-101

Term Offered: All Terms

Course Type(s): None

Examines transportation security issues in the homeland security era. The course examines topics associated with the security of aircraft, airports, bridges, roadways, seaports, vehicles, trains, train stations, vessels, tunnels, waterways, and utilities (cable lines, telephone lines, pipelines, and powerlines), as well as border security, hazardous material risks, intermodal transportation, and supply chain resilience. The course also examines technological solutions employed to enhance transportation security.

**HLS-315 Homeland Security Research Methods****Credits: 3**

Prerequisite(s): CJ-211 or MA-151, EN-101 and EN-102

Term Offered: All Terms

Course Type(s): WT

Introduces students to the principles of scientific research in criminal justice. It begins with a description of the importance of research by criminal justice and homeland security organizations and moves toward the tenets of sound research practices, including: the formulation or a research question, developing a hypothesis, collecting data, measurement, analysis, and evaluation. Special attention is devoted to practical, ethical, and political issues that can arise when conducting research. Also listed as CJ-315.

**HLS-320 Critical Infrastructure Security****Credits: 3**

Prerequisite(s): HLS-101

Term Offered: All Terms

Course Type(s): None

Introduces students to the identification and protection of the Nation's sixteen critical infrastructure sectors, and their roles in homeland security. The course examines the roles of government and the private sector in identifying, mitigating, and protecting critical infrastructure from all-hazards. The course focuses on risk-based implementation of protective measures and practices.

**HLS-335 Advanced Geographic Information Systems and Homeland Security****Credits: 3**

Prerequisite(s): HLS-235 or GIS-235

Term Offered: Spring Term

Course Type(s): None

Students will build upon the skills and information learned in HLS-235 Geographical Information Systems and Homeland Security to demonstrate advanced techniques in the analysis of spatial data to help the homeland security enterprise prevent, mitigate, respond to, and recover from intentional, natural, and accidental threats. Also listed as GIS-335.

**HLS-375 Homeland Security Internship****Credits: 3**

Prerequisite(s): CJ-101 or HLS-101, EN-101, EN-102 and permission of the instructor

Term Offered: All Terms

Course Type(s): CJHLS, EX1, WT

Provides practical experiences in the administration of criminal justice and homeland security through assignments to criminal justice and homeland security agencies under the joint-supervision of agency officials and Monmouth University instructors. Course assignments include a resume and cover letter application for an internship; journaling of real-world professional experiences; and the evaluation of criminal justice/homeland security policies and practices.

**HLS-385 Cyber Security****Credits: 3**

Prerequisite(s): HLS-101

Term Offered: All Terms

Course Type(s): None

The internet and cyber technologies have created unparalleled opportunities for commerce, education, entertainment, and public discourse. Accompanying these opportunities are unprecedented criminal and terrorist threats. This course examines security issues related to securing the cyber space including information infrastructure maintenance, information assurance, continuity planning, cybercrime, cyber terrorism, privacy, and emerging technologies.

**HLS-386 Emergency Management Planning****Credits: 3**

Prerequisite(s): HLS-286

Term Offered: Spring Term

Course Type(s): CJHLS

This course provides students with a comprehensive overview of emergency management planning. The course examines the multifaceted inter-agency participatory processes inherent to emergency management planning and provides students with the opportunity to develop emergency operations plans with fellow students. Topical issues include the four phases of emergency management, continuity of operations planning (COOP), hazard vulnerability assessment, and business continuity.

**HLS-387 Emergency Management Table-Top Exercises****Credits: 3**

Prerequisite(s): HLS-286

Term Offered: Fall Term

Course Type(s): CJHLS

This course provides a comprehensive overview of emergency management scenario and exercises planning. The course focuses on the National Preparedness System and stakeholder preparedness. Topical issues include table-top exercises, field-exercises, computer generated simulations, assessment, preparedness, core capabilities, and media relations.

**HLS-398 Special Topics in Homeland Security****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in homeland security to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**HLS-399 Independent Study in Homeland Security****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Homeland Security topic not substantially treated in a regular course. Prior permission of the directing professor and department chair is required to take this course.

**HLS-489 Internship in Homeland Security****Credits: 3**

Term Offered: Spring Term

Course Type(s): EX1

Supervised practical experience in homeland security. Repeatable for credit. Junior standing, departmental approval, and placement are required to register for this course.

**HLS-490 Senior Research Project in Homeland Security****Credits: 4**

Prerequisite(s): CJ-315 or HLS-315 and Senior standing

Term Offered: All Terms

Course Type(s): CJHLS

Provide the student with an opportunity to complete a senior thesis in the area of homeland security. By exploring and analyzing the practical as well as theoretical problems, the student will be able to recommend changes with homeland security based upon empirical study. Criminal Justice majors should register for CJ-490.

**HLS-498 Special Topics in Homeland Security****Credits: 1-3**

Prerequisite(s): HLS-385 or CS-104

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in homeland security to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis.

**HLS-499 Independent Study in Homeland Security****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study on a Homeland Security topic not substantially treated in a regular course. Prior permission of the directing professor and department chair is required to register for this course.

## Honors (HO)

**HO-101 Cultural Engagement I****Credits: 1**

Course Type(s): HO

Designed to help students develop a life-long engagement with cultural and intellectual discourse. Requires students to attend various on and off campus events (theater, music, dance, art, seminars). The events are enriched through discussion of their meaning and significance and the preparation of written assessments.

**HO-102 Cultural Engagement II****Credits: 1**

Term Offered: Spring Term

Course Type(s): HO

Designed to help students develop a life-long engagement with cultural and intellectual discourse. Students are required to attend various on and off campus events (theater, music, dance, art, seminars). The events are enriched through discussion of their meaning and significance and the preparation of written assessments.

**HO-103 Great Works I: on the Natural and Social Sciences****Credits: 3**

Term Offered: Spring Term

Course Type(s): HO

First year Honors School students will be introduced to a sampling of the classic works that have come to define the natural and social sciences. Through an integration of some of the classics of the ancient and medieval (Plato, Aristotle, Thucydides, Cicero, Confucius, Sun-Tzu, Augustine, Galileo, Ibn-Rushd) with those of the modern (Machiavelli, Bacon, Newton, Hobbes, Locke, Rousseau, Pascal, Darwin, Freud, Einstein, Skinner, Marx, Smith, Keynes, Hayek, Wollstonecraft, Butler, Carson), Honors students will gain insight into the foundation of what has become known as the natural and social sciences. Without a strong understanding of Plato's views on justice, Darwin's views on evolution, Skinner's views on behavior, Marx's conceptions of alienation, and/or Butler's views on sexuality, students' understanding of the social and natural sciences will be incomplete. For Honors Students only.

**HO-104 Great Works II: On the Arts and Humanities****Credits: 3**

Course Type(s): HO

Introduces first-year Honors School students to selected major works in the literary, historical, philosophical, and/or creative arts. Through integrated study of ancient and medieval classic and more recent works, students will gain insight into the foundation of the contemporary arts and humanities. First-year Honors student status, or permission of the Honors School dean is required to register for this course.

**HO-198 Special Topics in Honors (100 Level)****Credits: 1-6**

Term Offered: Spring Term

Course Type(s): HO

An intensive study of a particular subject or problem to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**HO-199 Independent Study in Honors (100 Level)****Credits: 1-4**

Course Type(s): HO

Guided study of a topic not substantially treated in a regular course, under the direction of a faculty member. Extensive reading and at least one written report are required. Prior permission of the directing professor and department chair is required to take this course.

**HO-202 Leadership & Professional Development Through Honors Education****Credits: 1**

Term Offered: All Terms

Course Type(s): HO

Students will learn to use their honors education to help build leadership and professional skills. The course focuses on students can strategically use their college experience to help build their resumes, make themselves more marketable for internships, and prepare for their future career.

**HO-296 Honors Thesis/Capstone Preparation****Credits: 1**

Term Offered: All Terms

Course Type(s): HO, HY

This course is designed to provide students with the opportunity to develop a strong topic, research question, and thesis/artist statement before beginning their Honors Proposal in HO 396. Students will be given a set of assignments that will provide them with greater organization and focus as they develop their proposal for their Honors thesis/capstone project. Upon completing the assignments and course requirements, students should be well on their way to the development of a comprehensive proposal for their honors thesis/capstone project. For Honors students only. Non-honors students allowed by permission of the Dean of the Honors School only.

**HO-298 Special Topics in Honors (200 Level)****Credits: 1-6**

Term Offered: All Terms

Course Type(s): HO

An intensive study of a particular subject or problem to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**HO-299 Independent Study in Honors (200 Level)****Credits: 1-4**

Term Offered: Spring Term

Course Type(s): HO

Guided study of a topic not substantially treated in a regular course, under the direction of a faculty member. Extensive reading and at least the written report are required. Prior permission of the directing professor and department chair is required to take this course.

**HO-396 Honors Thesis/Capstone Proposal****Credits: 2**

Term Offered: All Terms

Course Type(s): HO

This course focuses on the formal development of the honors thesis or capstone project proposal under the direction of at least one professor (first reader) and possible additional professor (second reader) with expertise in the student's area(s) of interest related to the capstone. HO-396 is the first half of the two-part thesis/project completion series. HO-396 involves the student undertaking secondary research, reading, thinking, writing, and generally delving into the project topic. Students work to complete this course mostly independently but always in consultation with their reader(s) and Honors Thesis Advisor, as well as the Honors School Dean, culminating in a thesis/capstone proposal. Honors students only. The course is open to non-honors students with permission of the Honors School Dean.

**HO-398 Special Topics in Honors (300 Level)****Credits: 1-6**

Term Offered: Fall Term

Course Type(s): HO

An intensive study of a particular subject or problem to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**HO-399 Independent Study in Honors (300 Level)****Credits: 1-4**

Term Offered: Spring Term

Course Type(s): HO

Guided study of a topic not substantially treated in a regular course, under the direction of a faculty member. Extensive reading and at least one written report are required. Prior permission of the directing professor and department chair is required to take this course.

**HO-496 Honors Thesis/Capstone Completion****Credits: 2**

Prerequisite(s): HO-396 passed with a grade of B or higher, and a minimum GPA of 3.30

Term Offered: All Terms

Course Type(s): HO

HO 496 is the second part of a two-part capstone series and focuses on the completion of the honors thesis or capstone project proposal under the direction of at least one professor (first reader) and possible additional professor (second reader). HO-496 involves the student carrying out the research or completing the project developed in HO-396 proposal. Students work to complete this course mostly independently but always in consultation with their reader(s) and permission of the Honors Thesis Advisor, as well as the Honors School Dean, culminating in a completed research thesis/capstone project. For Honors students, however non-honors students can register at the discretion and with the permission of the Honors School Dean.

**HO-498 Special Topics in Honors (400 Level)****Credits: 1-6**

Course Type(s): HO

An intensive study of a particular subject or problem to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**HO-499 Independent Study in Honors (400 Level)****Credits: 1-4**

Course Type(s): HO

Guided study of a topic not substantially treated in a regular course, under the direction of a faculty member. Extensive reading and at least one written report are required. Prior permission of the directing professor and department chair is required to take this course.

## Humanities (HU)

**HU-201 Critical Discourse****Credits: 3**

Prerequisite(s): EN-102

Term Offered: All Terms

Course Type(s): RD

An introduction to basic principles of clear thinking and effective argument, combined with small group discourse and collaborative problem solving.

## Information Techonology (IT)

**IT-100 Information Technology****Credits: 3**

Term Offered: All Terms

Course Type(s): TL

Introduction to computer-based information management concepts that provide an integrated approach to computer software in a Windows environment. These include the ability to create, edit and format documents, spreadsheets, databases, presentation graphics, and internet applications; information retrieval from the Internet and online library resources; fundamental computer literacy; and the ethical and societal implications of computer technology. Hands-on experience in a computer lab is provided. Not open to students who have completed CS-104 or IT-102 or IT-150.

**IT-102 Information Technology for Scientists****Credits: 3**

Term Offered: All Terms

Course Type(s): TL

Introduction to computer-based information management that provides an integrated approach to computer software in a Windows environment, which includes the ability to create, edit and format documents, spreadsheets, mathematical models, databases, presentation graphics, and Internet applications. Emphasizes scientific applications, technical report preparation and presentation. Hands-on experience in a computer lab is provided. Not open to students who have completed CS-104 or IT-100 or IT-150.

**IT-103 Applied Information Technology****Credits: 3**

Term Offered: Fall Term

Course Type(s): TL

Applies the principles and tools of information technology toward a deeper understanding of their impact on scientific, social and ethical issues via a central theme for the semester such as (but not limited to) climate change, big data, health-care cost analysis and others. This course will use software such as spreadsheets, databases, modeling, simulation, data analysis, software, electronic-communication applications; information retrieval from the internet and on-line library resources; social media, intranet and extranet systems to help students emerge with thematic materials in a way that deepens their understanding of associated topics.

**IT-150 Information Technology for Business****Credits: 3**

Term Offered: All Terms

Course Type(s): TL

Introduction to computer-based information business management that provides an integrated approach to computer software in a Windows environment. This includes fundamental technology literacy; operating systems, the ability to create, edit and format documents, spreadsheets, databases, presentation graphics, and internet applications; computer and network security; troubleshooting; information retrieval from the Internet and on-line library resources; and the ethical, societal, legal, and economic implications of computer technology. Hands-on experience in a computer lab is provided. Not open to students who have completed CS-104 or IT-100 or IT-102.

**IT-200 Advanced Information Technology****Credits: 3**

Prerequisite(s): IT-100 or IT-102; or CS-104 or IT-150

Term Offered: All Terms

Course Type(s): None

Advanced concepts and techniques in computer-based information management are provided through an integrated approach to personal computer hardware and software in a Windows environment. These include: hardware and software considerations; societal and ethical considerations; the program development life cycle; creating tables; merging documents and desktop publishing in word processing; creating templates, workbooks with multiple worksheets, and creating a data map in electronic spreadsheets; creating custom reports and an application system using macros in database management; and using embedded visuals in presentation graphics applications. Hands-on experience with a microcomputer on a networked system is provided.

**IT-250 Web Application Design****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Introduction to creating websites and applications for the Web that adapt to smart phones, tablets and desktop computers. Creation of web applications with content, images that can link to other apps. Creation of modern style layouts for various applications. Skills include: HTML, CSS, and embedding JavaScript code. Hands-on experience using the computer labs and web server.

**IT-275 Data Analytics for Web Applications****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Define Data Analytics and the key steps in the Data Analytics process involving collecting, wrangling, mining, and visualizing data. Concepts include different types of data structures, file formats, sources of data, and Big Data. Collecting data from public websites. Making use of Generative AI. Students will learn about and take on various Roles: Data Engineer, Data Analyst, Data Scientist, Business Analyst, and Business Intelligence Analyst.

**IT-298 Special Topics in Information Technology (200 Level)****Credits: 3**

Prerequisite(s): IT-100 and as announced in the course schedule

Course Type(s): None

Topics of current interest in Information Technology.

**IT-299 Independent Study in Information Technology****Credits: 3**

Term Offered: Summer Term

Course Type(s): None

Reading and research on a selected topic under the direction of a faculty member.

**IT-300 Web Programming****Credits: 3**

Prerequisite(s): IT-250 or permission of the department

Term Offered: All Terms

Course Type(s): None

Introducing dynamic web actions such as: app sign-up and processing data forms, creating blogs, creating animations, advertisements, popup windows, selling products online, email blasts etc. Students will also learn processing the meta data of a website/application (ie number of visits, clicks, duration per visit, returning customers etc.). Simple examples in Gaming, AI and Data Analytics can be used. Skills include: php, JavaScript, MySQL.

**IT-398 Special Topics in Information Technology (300 Level)****Credits: 3**

Prerequisite(s): IT-100 and as announced in the course schedule

Course Type(s): None

Topics of current interest in Information Technology.

**IT-399 Independent Study in Information Technology****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Reading and research on a selected topic under the direction of a faculty member. Prior permission of the directing professor and department chair is required to take this course.

**IT-450 Information Systems Project Management****Credits: 3**

Prerequisite(s): IT-250 or permission of the department

Co-requisite(s): IT-300

Term Offered: All Terms

Course Type(s): EX5

Students will use their skills to create web applications for local businesses and vendors as their client. Students will create applications and promote them using: social media, creating QR (Quick Response) and using codes, search engine marketing strategies. Students will work on small teams and use tools and skills of a system analyst for project management. Project management software will be used to track progress for reporting to a client.

**IT-498 Special Topics in Information Technology (400 Level)****Credits: 3**

Prerequisite(s): IT-100 and as announced in the course schedule

Course Type(s): None

Topics of current interest in Information Technology.

**IT-499 Independent Study in Information Technology****Credits: 3**

Course Type(s): None

Reading and research on a selected topic under the direction of a faculty member.

## Interdisciplinary Studies (IS)

### IS-288 Cooperative Education Interdisciplinary Studies Credits: 3

Course Type(s): EX2

Application of skills from two or three interdisciplinary study areas in a career-related position under faculty supervision. Students will work at least ten hours per week at an approved site and carry out academic assignments in coordination with their faculty sponsors. Departmental approval is required to take this course.

### IS-290 Professional and Organizational Ethics Credits: 3

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): WT

Ethical theory and its applications to interdisciplinary social issues. Examination of moral principles, basic to professional practice, organizational behavior, and public policy making.

### IS-388 Cooperative Education: Interdisciplinary Studies Credits: 3

Term Offered: Spring Term

Course Type(s): EX2

Application of skills from two or three interdisciplinary study areas in a career-related position under faculty supervision. Students will work at least ten hours per week at an approved site and carry out academic assignments in coordination with their faculty sponsors. Departmental approval is required to take this course.

### IS-401 Senior Integrative Thesis Proposal Credits: 2

Prerequisite(s): Completion of ninety credits

Term Offered: Spring Term

Course Type(s): None

Independent research guided by a chief advisor and second reader.

Research should access the methods and materials of the chosen disciplines, focus on a specific problem or topic, and relate to a stated career ambition. Conventional library research, lab experiment component, survey, creative project, etc., are all acceptable.

### IS-402 Senior Integrative Thesis Credits: 2

Prerequisite(s): IS-401 passed with a grade of B or higher

Term Offered: Spring Term

Course Type(s): None

Thesis based on research completed in IS-401. A thoroughly developed research project, which must integrate chosen disciplines, focus on a specific problem, and relate to a career objective.

### IS-410 Integrative Seminar for Elementary Education Credits: 3

Term Offered: Fall Term

Course Type(s): None

This is a capstone seminar for students in the Interdisciplinary Studies for Elementary Educators major, to be taught jointly by a faculty member in one of the subject disciplines and a faculty member in the School of Education. Each semester a theme that can be approached from the perspectives of literature, social sciences, mathematics, and the physical or biological sciences will be chosen for the seminar. Class discussions will include how the material can be approached at different grade levels in elementary school. Sample semester topics include people and the environment, bullying, climate change, poverty, and urbanization. Senior standing in the ISEE major or approval of the instructor is required to take this course.

### IS-488 Cooperative Education: Interdisciplinary Studies Credits: 3

Term Offered: Spring Term

Course Type(s): EX2

Application of skills from two or three interdisciplinary studies areas in a career-related position under faculty supervision. Students will work at least ten hours per week at an approved site and carry out academic assignments in coordination with their faculty sponsors. Departmental approval is required to take this course.

### IS-499 Independent Study in Interdisciplinary Studies Credits: 1-3

Prerequisite(s): Completion of ninety credits, a 3.00 or higher GPA in major course work, and prior permission of the directing professor and chair

Term Offered: All Terms

Course Type(s): None

Guided research and in-depth study of a selected topic of an interdisciplinary nature under the direction of a faculty member through Interdisciplinary Studies. Conference(s) with sponsoring professor, extensive reading, and at least one written report are required.

## Life Career Services (LC)

### LC-300 Career Search Credits: 1

Term Offered: All Terms

Course Type(s): None

Course teaches students the basic skills used to successfully secure employment after graduation and familiarizes students with the hiring process used in most organizations. May not be used to satisfy major or distribution requirements.

### LC-399 Independent Study in Career Search Credits: 3

Term Offered: Spring Term

Course Type(s): None

Reading and research on a selected topic under the direction of a faculty member. Prior permission of the directing professor and department chair is required to take this course.

## Mathematics (MA)

### MA-050 Pre-Algebra Mathematics Credits: 3

Term Offered: All Terms

Course Type(s): None

The language of mathematics, terms and symbols, the real number system, arithmetic operations on real numbers, including exponents and roots, emphasis on fractions and decimals, and evaluation of expressions. Special topics on divisibility, figurate numbers, and introduction to college algebra. Three hours per week, plus mandatory attendance with mathematics lab. This course cannot be used to satisfy graduation requirements.

### MA-100 Quantitative Reasoning and Problem Solving Credits: 3

Prerequisite(s): MA-050 passed with a grade of C- or higher or MA-LVL2 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Basic mathematical concepts studied through solving problems in collaborative groups; examination of decision-making and problem-solving techniques and various formats for representing quantitative information.

**MA-101 College Algebra****Credits: 3**

Prerequisite(s): MA-050 passed with a grade of C- or higher or MA-LVL2 or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

The axioms and properties of the real number system. Manipulating expressions representing quantities; functions and their representations as rules, graphs or tabulations; linear and polynomial functions; zero, factoring techniques, and graphical properties of polynomials; the logarithm and exponential; solving systems of equations; sequences and summations; and combinations and permutations. Calculators required for selected topics. This course cannot be used in satisfaction of the general education mathematics requirement.

**MA-103 Foundations of Elementary Mathematics****Credits: 3**

Prerequisite(s): MA-050 passed with a grade of C- or higher or 3 credits in Math

Term Offered: Spring Term

Course Type(s): None

Careful examination of mathematical ideas behind the mathematics taught in grades K-8, and their history and applications to daily life. Intended primarily for future elementary-school teachers to provide them with a better understanding of the mathematics they will teach. This course will also be of value for any student who wants a better understanding of these ideas. Focus on understanding and exploring the mathematics behind computation through problem solving, projects, group explorations, use of manipulatives, and some use of technology. Topics include: number systems, measurement, probability, statistics, and geometry. Not open to freshmen.

**MA-105 Mathematical Modeling in the Social Sciences****Credits: 3**

Prerequisite(s): MA-050 passed with a grade of C- or higher or MA-LVL2 or MA-LVL3 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Exploration and aspects of algebra, mathematical modeling, and data analysis, which are important in the social sciences. Topics include: an introduction to data, the use of variables, assorted kinds of graphs to represent data, the concept of function, the problem of fitting functions to data, representing change over time, rates of change, linear functions and linear models, piecewise-linear functions, and an introduction to non-linear functions. Pedagogical methods to be used include: projects using real data, computer explorations, and group work. MA-LVL4 may not take this course.

**MA-107 Mathematics in the Arts****Credits: 3**

Prerequisite(s): MA-050 or MA-LVL2 or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: Spring Term

Course Type(s): None

Study of artistic design in architecture, painting, sculpture, and crafts; math of music.

**MA-109 Pre-Calculus Mathematics****Credits: 4**

Prerequisite(s): MA-101 passed with a grade of C- or higher or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

The real number system, algebraic expressions, exponents, radicals, solution of equations, solutions of inequalities, functions, graphing of functions, and trigonometry. Not open to students who have successfully completed MA-125.

**MA-115 Pre-Calculus Modeling for the Biological Sciences****Credits: 3**

Prerequisite(s): MA-101 passed with a grade of C- or higher or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Provides a development of an understanding of linear, exponential, logarithmic, polynomial and trigonometric functions related to biological phenomena. The development is from an algebraic, graphical and modelling perspective. In addition, the solutions of equations and inequalities related to these functions are studied. Use of related technology is included.

**MA-116 Calculus for the Biological Sciences****Credits: 3**

Prerequisite(s): MA-115 or MA-109 passed with a grade of C- or higher or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Introduction to calculus, from a primarily graphical perspective, through applications to biological and ecological phenomena. Topics include: differentiation, integration, and differential equations.

**MA-117 Quantitative Analysis for Business I****Credits: 3**

Prerequisite(s): MA-101 or MA-105 passed with a grade of C- or higher or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Linear equations and models, systems of linear equations and applications, matrices and techniques for solving systems of equations, linear programming and applications, quadratic functions and models, and exponential and logarithmic models. A computer laboratory component is incorporated. Designed for students majoring in Business Administration; other students by permission of the Mathematics Department.

**MA-118 Quantitative Analysis for Business II****Credits: 3**

Prerequisite(s): MA-117 passed with a grade of C- or higher, or permission of the department

Term Offered: All Terms

Course Type(s): None

Functions, limits, continuity, polynomial calculus, including optimization models, anti-derivatives, area and applications to business models; introduction to probability and statistics as applied to business models.

**MA-120 Introduction to Mathematical Reasoning****Credits: 4**

Prerequisite(s): MA-101 passed with a grade of C- or higher or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Introduction to reasoning, proof, and exposition in mathematics. Topics include: Boolean logic, set theory, counting techniques, functions, mathematical induction, permutations, and the proofs of various elementary theorems.

**MA-125 Calculus with Analytic Geometry I****Credits: 4**

Prerequisite(s): MA-109 or MA-115 passed with a grade of C- or higher or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Functions, limits, continuity, and the differential and integral calculus of algebraic, trigonometric, and exponential functions.

**MA-126 Calculus with Analytic Geometry II****Credits: 4**

Prerequisite(s): MA-125 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Functions, limits, continuity, and the differential and integral calculus of algebraic, trigonometric, exponential functions.

**MA-130 Applied Discrete Mathematics****Credits: 3**

Prerequisite(s): MA-109 or MA-117 passed with a grade of C- or higher or MA-LVL4 passed with a grade of P.

Term Offered: All Terms

Course Type(s): None

Introduction to reasoning, proof, and exposition in mathematics. Topics include: Boolean logic, set theory, counting techniques, functions, mathematical induction, permutations, and the proofs of various elementary theorems.

**MA-151 Statistics with Applications****Credits: 3**

Prerequisite(s): MA-101 or MA-105 passed with a grade of C- or higher or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Analysis of data, probability, random variables, normal distribution, sampling theory, confidence intervals, and statistical inference. Not open to computer science majors or to students required to complete MA-125, except software engineering majors.

**MA-198 Special Topics in Mathematics (100 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in mathematics to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. If there is a prerequisite for this course it will be announced in the course schedule.

**MA-199 Independent Study in Mathematics****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study in a topic not substantially treated in a regular mathematics course; for students with superior ability; weekly consultation required. Prior permission of the directing professor and department chair is required to take this course.

**MA-203 Foundations of Elementary Mathematics I****Credits: 3**

Prerequisite(s): MA-050 or MA-LVL2 or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: All Terms

Course Type(s): None

Careful examination of mathematical ideas behind the mathematics taught in grades K-6, their history, and applications to daily life. Intended primarily for future elementary-school teachers to provide them with a better understanding of the mathematics they will teach. This course, along with MA-204, Foundations of Elementary Mathematics II, will also be of value for any student who wants a better understanding of these ideas. Focus on understanding and exploring mathematics through problem solving, projects, group explorations, use of manipulatives, and some use of technology. MA-203 concentrates on problem solving, whole number arithmetic and theory, discrete math, integers, fractions, decimals, and algebraic concepts. MA-203 does not count toward the mathematics major or minor requirements. Students who take MA-203 are not eligible to take MA-205. Prerequisite: MA-050 or MA-LVL2 or MA-LVL3 or MA-LVL4 passed with a grade of P

**MA-204 Foundations of Elementary Mathematics II****Credits: 3**

Prerequisite(s): MA-203 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Careful examination of mathematical ideas behind the mathematics taught in grades K-6, their history and applications to daily life. Intended primarily for future elementary-school teachers to provide them with a better understanding of the mathematics they will teach. This course, along with MA-203, Foundations of Elementary Mathematics I, will also be of value for any student who wants a better understanding of these ideas. Focus on understanding and exploring mathematics through problem solving, projects, group explorations, use of manipulatives, and some use of technology. Topics in MA-204 include: fractions, ratios and percent, data analysis, counting and probability, geometry of shape, measurement, and measurement geometry (perimeter, area, surface area, volume). MA-204 does not count toward the mathematics major or minor requirements. Students who have taken MA-204 are not eligible to take MA-207.

**MA-205 Number Systems****Credits: 3**

Prerequisite(s): MA-050 or MA-LVL2 or MA-LVL3 or MA-LVL4 passed with a grade of P

Term Offered: Fall Term

Course Type(s): None

Careful examination of mathematical ideas behind the mathematics taught in grades K-6, and their history and applications in daily life. Intended primarily for future elementary school teachers to provide them with a better understanding of the underlying concepts of the mathematics they will teach. MA-205 concentrates on the various number systems of school mathematics: whole numbers, integers, fractions, decimals. It does this by examining, in other number bases, standard algorithms for addition, subtraction, multiplication and division, as well as alternative algorithms in base ten, including student-generated algorithms. The course will focus on developing educators' conceptual understanding and exploring the mathematics through problem solving, projects, group explorations, and use of manipulatives as practices for mathematics instruction. MA-205 does not count towards the mathematics major or minor requirements, except for the mathematics and elementary education major. Students who have taken MA-205 are not eligible to take MA-203.

**MA-206 Algebraic Thinking, Probability and Statistics****Credits: 3**

Prerequisite(s): MA-205 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Careful examination of mathematical ideas behind the mathematics taught in grades K-6, and their history and applications to daily life. Intended primarily for future elementary school teachers to provide them with a better understanding of the underlying concepts of the mathematics they will teach. MA-206 concentrates on the algebraic thinking, probability and statistics. It develops algebraic thinking by extending concepts from Number Systems (MA-205) via problem-solving, proportional relationships, pattern-recognition, generalization and identities. Probability introduces key concepts from discrete mathematics and applies proportional relationships. Statistics involves systematic organization of data. The course will focus on developing educators' conceptual understanding and exploring the mathematics through problem solving, projects, group explorations, and use of manipulatives as practices for mathematics instruction. MA-206 does not count towards the mathematics major or minor requirements.

**MA-207 Elementary Geometry****Credits: 3**

Prerequisite(s): MA-205 passed with a grade of C- or higher

Term Offered: Fall Term

Course Type(s): None

Careful examination of mathematical ideas behind the mathematics taught in grades K-6, and their history and applications to daily life. Intended primarily for future elementary school teachers to provide them with a better understanding of the mathematics they will teach. This is an activity-centered course. Content will focus on geometric shapes, motions and change, length, area and volume and their measurement. There is an emphasis on understanding a variety of problem solving strategies, conjectures, reasoning, mathematical representations including manipulatives, and communicating. MA-207 does not count toward the mathematics major or minor requirements. Students who take MA-207 are not eligible to take MA-204.

**MA-220 Probability and Statistics I****Credits: 3**

Prerequisite(s): MA-116 or MA-118 or MA-126 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

To provide an axiomatic, calculus-based approach to probability and introductory statistics. The course is built around the process of performing a statistical analysis; posing the question, collecting the data, describing the data, analyzing and modeling the data, and drawing inferences from the data regarding the original question. Specific topics covered include sampling, descriptive analysis of data, probability, random variables, discrete and continuous distributions, expectation, confidence intervals, one sample hypothesis testing, chi-square analyses, correlation and regression.

**MA-221 Linear Algebra****Credits: 3**

Prerequisite(s): MA-120 or MA-130; and MA-125 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Systems of equations, matrix algebra, linear transformations, Eigenvectors, linear programming, and computational methods.

**MA-225 Calculus with Analytic Geometry III****Credits: 4**

Prerequisite(s): MA-126 passed with a grade of C- or higher

Course Type(s): None

Infinite series, partial differentiation, multiple integration, and associated solid analytic geometry.

**MA-237 Programming and Technology in Mathematics****Credits: 4**

Prerequisite(s): MA-120 and MA-126 both passed with a grade of C- or higher

Co-requisite(s): MA-311 or MA-221 or MA-225

Term Offered: All Terms

Course Type(s): TL

Provides an introduction to the use of technology as it applies to mathematics. A major component of the course will be to build a solid foundation in the skills needed to apply mathematical concepts to programming. In addition, the use of technology in presentations, scholarly searches, and its role and limitations in computer and Internet security will be covered. Students will gain an appreciation of the important ethical and social issues involving the use of technology.

**MA-298 Special Topics in Mathematics (200 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in mathematics to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**MA-299 Independent Study in Mathematics****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study in a topic not substantially treated in a regular mathematics course; for students with superior ability; weekly consultation required. Prior permission of the directing professor and department chair is required to take this course.

**MA-301 Careers in Mathematics Seminar****Credits: 1**

Prerequisite(s): MA-220 and MA-221

Term Offered: Fall Term

Course Type(s): None

An orientation to career opportunities and graduate level programs and degrees available to students with a background in mathematics and statistics.

**MA-305 Mathematical Problem Solving****Credits: 3**

Prerequisite(s): MA-205, MA-206, and MA-207 all passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): WT

The final mathematics course in the four- course sequence for future elementary school teachers. Designed to strengthen their mathematical content knowledge, problem solving skills, conceptual understanding and ability to communicate about mathematics, through the investigation of mathematically challenging problems. Problems will require creative thinking and utilization of past content knowledge in new situations. Students will work in groups and individually, and write up their solutions. This course does not count towards the mathematics major or minor requirement.

**MA-311 Differential Equations****Credits: 3**

Prerequisite(s): MA-126 and MA-221 both passed with a grade of C- or higher

Term Offered: Fall Term

Course Type(s): None

Designed to provide students with the fundamentals of differential equations. The topics include elementary methods of solution, nth order linear equations, systems of linear equations, Laplace transform methods, numerical solutions, and initial and boundary value problems.

**MA-312 Numerical Analysis****Credits: 3**

Prerequisite(s): MA-126 and MA-221 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

The main objective of the course is to develop a basic understanding in the construction and analysis of processes used to solve mathematical problems with the aid of a computer. The focus will be on leveraging the mathematical framework to achieve efficient and accurate numerical algorithms. The course also includes exposure to basic programming techniques in the context of implementing several of the algorithms as well as exposure to various applications of mathematics.

**MA-314 Number Theory****Credits: 3**

Prerequisite(s): MA-120 or MA-130 and MA-221 both passed with a grade of C- or higher and EN-101 and EN-102, or permission of the instructor.

Term Offered: All Terms

Course Type(s): RD

Properties of integers, divisibility, prime numbers, congruence, and Diophantine equations.

**MA-317 Geometry****Credits: 3**

Prerequisite(s): MA-120 or MA-130 and either MA-221 or MA-225 passed with a grade of C- or higher.

Term Offered: All Terms

Course Type(s): None

Study of Euclid's axioms, fifth postulate and its substitutes, absolute geometry, projective geometry, constructions, and convexity.

**MA-318 Combinatorics and Graph Theory****Credits: 3**

Prerequisite(s): MA-120 or MA-130 or CS-202 passed with a grade of C- or higher, and MA-221 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Combinatorics is the study of countable discrete mathematical structures. Graph theory is the study of mathematical structures involving a collection of objects, known as the vertex set, along with a collection of pairs of vertices, known as the edge set. These two inseparable areas of mathematics are ripe with beautiful theory and endless applications. Students will learn the techniques required to answer questions in these fields, as well as appropriate applications.

**MA-320 Probability and Statistics II****Credits: 3**

Prerequisite(s): MA-116 or MA-118 or MA-126 passed with a grade of C- or higher, MA-151 or BE-251 or MA-220 passed with a grade of C- or higher, EN-101 and EN-102

Term Offered: Spring Term

Course Type(s): WT

A continuation of MA-220, including sample distributions, exploratory data analysis, estimation methods, regression and correlation, as well as applications to quality control.

**MA-321 Statistical Consulting****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Gives students a working knowledge of statistical consulting in the world outside of the classroom by working with real clients. Students will interview clients, translate client needs into statistical language, design statistical experiments, generate data collection plans, assist in data collection, analyze data, interpret their analyses, and present their finding to the client. Throughout the process students will interact with their clients regarding ongoing questions that occur. By the end of the course, students will be able to choose and apply appropriate statistical design and analysis methodologies. They will also be able to interpret, evaluate, and present their conclusions in oral and written form. Topics covered will depend upon client needs and may include designing experiments with power and sample size considerations, multiple and logistic regression, survival analyses, t- and chi-square tests, ANOVA/MANOVA/ANCOVA, and principal component analysis. This course may be repeated once for additional credit to either continue work on a long-term project, or to take part in a new statistical consulting project.

**MA-325 History of Mathematics****Credits: 3**

Prerequisite(s): MA-314 or MA-317 or MA-318 passed with a grade of C- or higher, and EN-101 and EN-102

Term Offered: Spring Term

Course Type(s): GU, WT

Surveys historical milestones in the development of mathematics from ancient times to the Nineteenth century, with modern topics as time permits.

**MA-327 Design and Analysis of Biological Experiments****Credits: 3**

Prerequisite(s): MA-151 or MA-220 or BE-251 passed with a grade of C or higher or permission of the instructors.

Term Offered: Spring Term

Course Type(s): MEBP

The purpose of this course is to learn about the statistical design & analysis of biological experiments. After learning mathematical techniques of designing experiments, and statistical analyses customized to them, students will be presented with a broad research question by the instructors. Literature surveys will be a critical part of the course to allow students to find pertinent, relevant, potentially publishable biological questions that address a specific aspect of the larger question posed by the instructors. Students will design their own experiment addressing their question, generate their own data collection plan, collect their data, and then analyze their data using statistical techniques taught in class. This course will involve field/lab work for data collection and computer work in the statistical analysis of the final data. Students will defend their question, design and analysis from both a statistical and biological perspective. At the end of the semester students will complete a formal manuscript in journal format. This course can be used to fulfill the Mathematics or Statistics minor and the Bio/MEBP elective. This course is a research based course and students must have demonstrated a strong interest in and potential for research. Also listed as BY-327.

**MA-334 Problem Solving Seminar****Credits: 3**

Prerequisite(s): MA-120 or MA-130; and MA-126 all passed with a minimum grade of C- or higher, and permission of the instructor

Course Type(s): None

Problem solving techniques and the ability to use them in applications lie at the core of learning and applying mathematics. The course covers important strategies for solving mathematical problems, most of which are only tangentially studied in the usual mathematics curriculum. The strategies are an assortment of both overarching themes and particular techniques of more limited applicability. Each strategy is covered in a theoretical context followed by implementation to specific problems. Polya's classic framework for the problem solving processes will be referenced and used throughout the course. This course is repeatable for credit.

**MA-350 Computation and Statistics****Credits: 3**

Prerequisite(s): MA-116 or MA-118 or MA-126 passed with a grade of C- or higher, and either MA-151 or BE-251 or MA-220 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Covers topics related to computational statistics, including obtaining large, realistic, real-time datasets, calculation and visualization of basic statistical features, regression, empirical distributions, and time-series features. Also covered will be principal components analysis (PCA), analysis of variance (ANOVA), correlation, prediction, and stochastic volatility estimation (GARCH). Portfolio theory will also be covered.

**MA-380 Research in Mathematics****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Mathematical or statistical research work carried out under the mentorship of a faculty research advisor. Research conducted by the students will be submitted for presentation, publication or review. The number of credits will be determined by arrangement with the advisor. Three hours/week per credit. This class is repeatable up to six credits total.

**MA-388 Cooperative Education: Mathematics****Credits: 3**

Prerequisite(s): MA-311 and MA-220, both passed with a grade of C- or higher if a Mathematics major; or MA-120 and MA-126, both passed with a grade of C- or higher if other major, a cumulative G.P.A. of 2.00 and Junior or Senior standing

Term Offered: Spring Term

Course Type(s): EX2

Affords the student an opportunity to apply mathematical theory to practical work-related experience. Includes both academic and experiential components. Involves ten hours per week of work experience. The academic aspect includes a reflective journal and a written report; repeatable for credit.

**MA-389 Internship in Mathematics****Credits: 1-3**

Course Type(s): EX1

Supervised practical experience in math; repeatable for credit. Student must have at least Junior status. Departmental approval is required to take this course.

**MA-398 Special Topics in Mathematics (300 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in mathematics to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**MA-399 Independent Study in Mathematics****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study in a topic not substantially treated in a regular mathematics course; for students with superior ability; weekly consultation required. If a prerequisite is required it will be announced in the course schedule.

**MA-407 Topology****Credits: 3**

Prerequisite(s): MA-221 and MA-225, both passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Topology is the study of the structure of space and is one of the major theoretical areas in modern mathematics. The course serves as both a rigorous foundation for advanced study in the field and as a survey of important techniques established since its inception. After building the necessary framework of point-set topology, the course will move on to selected topics such as the classification of surfaces, knot theory, and algebraic topology.

**MA-410 Modern Algebra****Credits: 3**

Prerequisite(s): MA-221, and either MA-314 or MA-317 or MA-318 or MA-407 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Beginning with the natural numbers, the integers and rational numbers are developed. Complex numbers and roots of unity are followed by groups, rings, and polynomials.

**MA-411 Group Theory****Credits: 3**

Prerequisite(s): MA-221, and MA-314 or MA-317 or MA-318 or MA-407, both passed with a grade of C- or higher

Course Type(s): None

Group Theory is the study of symmetry, and is one of the core branches of abstract algebra. The course will explore the theory and applications of groups. In addition to covering many examples of groups, course topics will include subgroups, group homomorphisms and isomorphisms, permutations, quotient groups, Sylow Theorems, and the structure of finitely generated abelian groups.

**MA-413 Complex Analysis****Credits: 3**

Prerequisite(s): MA-225 and either MA-314 or MA-317 or MA-318 or MA-407 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Complex numbers and plane, functions, derivatives, line integrals, and Cauchy integral theorem. Cauchy's formula, series, applications.

**MA-415 Real Analysis****Credits: 3**

Prerequisite(s): MA-225 and either MA-314 or MA-317 or MA-318 or MA-407 passed with a grade of C- or higher and EN-101 and EN-102, or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

Metric spaces, real number system, limits, functions, continuity, differentiation and integration, and counter-examples.

**MA-419 Introduction to Mathematical Modeling****Credits: 3**

Prerequisite(s): MA-220, MA-311, MA-221 all passed with a grade of C- or higher; Junior standing, and EN-101 and EN-102, or permission of the instructor

Term Offered: Spring Term

Course Type(s): EX5, WT

Introduction to mathematical modeling, which is a process in which a real-world situation is studied, simplified, and abstracted to the point that mathematical tools can be applied to gain understanding. Introduction to the process, first via a text and mini-projects, then in teams investigating problems from local industries or organizations.

**MA-421 Design of Experiments and ANOVA****Credits: 3**

Prerequisite(s): MA-116 or MA-118 or MA-126 passed with a grade of C- or higher and either MA-151 or BE-251 or MA-220 passed with a grade of C- or higher

Term Offered: Fall Term

Course Type(s): None

Provides a working knowledge of multivariate regression and ANOVA methods balanced with the theory underlying these techniques. Intended for students considering a career in statistics, including but not limited to biostatistics, financial mathematics and theoretical statistics. Topics include: an introduction to experimental design, power and effect size calculations, data screening and transformation to meet assumptions of the analyses, multivariate regression, multinomial logistic regression, multivariate survival analysis, ANOVA/ANCOVA/MANOVA/MANCOVA, and time permitting, an introduction to time series analysis. Extensive use is made of real- world case data from business/finance, health/biology, and education/psychology.

**MA-440 Regression and Time Series Analysis****Credits: 3**

Prerequisite(s): MA-116 or MA-118 or MA-126 passed with a grade of C- or higher and either MA-151 or MA-220 or BE-251 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Covers topics related to multiple regression techniques, including testing the assumptions required for each to be valid. This includes applications to yield curve smoothing, pricing, and investment models, and the use of principal component analysis. Also covered are techniques for the analysis and modeling of time series data and forecasting.

**MA-460 Multivariate and Categorical Statistics****Credits: 3**

Prerequisite(s): MA-116 or MA-118 or MA-126 passed with a grade of C- or higher and MA-151 or MA-220 or BE-251 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

This advanced statistics course provides students with skills in advanced multivariate analysis and its applications. Students will learn the material through projects using data from business, finance, and biology. Topics include MANOVA, discriminant analysis, cluster analysis, multidimensional scaling, and factor analysis. Topics may also include conjoint analysis, canonical correlation and structural equation modeling.

**MA-488 Cooperative Education: Mathematics****Credits: 3**

Prerequisite(s): MA-220 and MA-311 passed with a grade of C- or higher if a Math major

Term Offered: Spring Term

Course Type(s): EX2

Affords the student an opportunity to apply mathematical theory to practical work-related experience. Includes both academic and experiential components. Involves ten hours per week of work experience. The academic aspect includes a reflective journal and a written report; repeatable for credit. Departmental approval is required to take this course. MA-311 and MA-320, both passed with a grade of C- or higher are required, if a mathematics major; or MA-120 and MA-126, passed with a grade of C- or higher, if another major; a cumulative GPA of 2.00 and Junior or Senior standing.

**MA-489 Internship in Mathematics****Credits: 1-3**

Course Type(s): EX1

Supervised practical experience in math; repeatable for credit.

Departmental approval and Junior standing are required to take this course.

**MA-498 Special Topics in Mathematics (400 Level)****Credits: 1-3**

Prerequisite(s): MA-126 and MA-221 both passed with a grade of C- or higher and Junior standing

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in mathematics to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**MA-499 Independent Study in Mathematics****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent study in a topic not substantially treated in a regular mathematics course; for students with superior ability; weekly consultation required. Prior permission of the directing professor and department chair is required to take this course.

## Medical Laboratory Science (ML)

**ML-411 Clinical Internship in Medical Laboratory Science I** **Credits: 16**

Term Offered: All Terms

Course Type(s): EX1, WT

First half of an intensive one-year clinical internship and training at an approved, partner medical institution in the requisite skills for a career in medical laboratory science. Practical experience in tests and procedures of hematology, histology, blood bank, clinical microscopy, clinical chemistry, bacteriology, parasitology, mycology, immunology, serology, radioisotopes, and related subjects. Limited to Medical Laboratory Science majors who have completed all other degree requirements.

**ML-412 Clinical Internship in Medical Laboratory Science II** **Credits: 16**

Prerequisite(s): ML-411

Term Offered: Spring Term

Course Type(s): EX1

Second half of an intensive one-year clinical internship and training at an approved, partner medical institution in the requisite skills for a career in medical laboratory science. Practical experience in tests and procedures of hematology, histology, blood bank, clinical microscopy, clinical chemistry, bacteriology, parasitology, mycology, immunology, serology, radioisotopes, and related subjects. Limited to Medical Laboratory Science majors who have completed all other requirements.

## Monmouth Medical (MM)

**MM-490 Experience in Clinical Medicine****Credits: 9**

Term Offered: All Terms

Course Type(s): EX5

Intensive, practical, first-hand experience in clinical medicine at Monmouth Medical Center. A comprehensive introduction to the skills required to practice medicine: excellent communication, critical reading of the literature, epidemiologic methods (disease patterns in populations), and understanding medicine as a human experience. The practicum consists of clinical observations, seminars, community service, discussion groups, and a research paper. This course is under the auspices of the Biology Department. Limited to Monmouth Medical Center Scholars with Junior standing. This is a pass/fail course.

## Music (MU)

### **MU-REC Senior Recital - Music Major**

**Credits: None**

Term Offered: All Terms

Course Type(s): None

Senior Recital - Music Major. This is a pass/fail course.

### **MU-101 Music Appreciation**

**Credits: 3**

Term Offered: All Terms

Course Type(s): AT

Development of insights into historically significant examples of Western vocal and instrumental music.

### **MU-121 Fundamentals of Musicianship**

**Credits: 3**

Term Offered: All Terms

Course Type(s): AT

MU-121 is a prerequisite for MU-221. Students have the option to test-out of MU-121 if they pass the Music Theory I, MU-221, placement assessment. MU-121 is a course requirement for Music Majors who do not pass the Music Theory I, MU-221, placement assessment. This is a pre-music theory course designed to introduce and develop students' fundamental understanding of musical concepts, terminology, and music reading abilities. Topics of discussion include clefs, key signature, time signatures, notation, rhythm, scales, intervals, chords, and the circle of fifths. Three hours per week. Requirement for Music Majors who do not pass the Music Theory I, MU-221, placement assessment. This course cannot be used to satisfy graduation requirements.

### **MU-140 The Music Industry Landscape**

**Credits: 1**

Term Offered: All Terms

Course Type(s): AT

Students will be introduced to the modern music business ecosystem, find out how all facets of the evolving business function, and learn about the skills needed for a variety of diverse careers in the industry.

### **MU-142 Monmouth University Pep Band**

**Credits: 1**

Course Type(s): AT

The Monmouth University Pep Band is a campus-wide ensemble that is open to all students, and performs a wide array of music in varied styles. Attendance is required for all scheduled athletic events throughout the semester. Students may take this course up to eight semesters.

### **MU-145 Band I**

**Credits: 1**

Course Type(s): AT

Instrumental experience in concert and stage band combinations to improve one's musicianship; public performances on campus and in the community; two concerts a year. May be taken for as many as eight semesters.

### **MU-146 Band II**

**Credits: 1**

Term Offered: Spring Term

Course Type(s): AT

Instrumental experience in concert and stage band combinations to improve one's musicianship; public performances on campus and in the community; two concerts a year. May be taken for as many as eight semesters.

### **MU-147 Chorus**

**Credits: 1**

Term Offered: All Terms

Course Type(s): AT

Training in choral music of various styles, in vocal technique, and in aspects of expressive performance; concert participation required. Each semester, new repertoire is advanced, making each course unique in its new content. May be taken for as many as eight semesters.

### **MU-148 Chorus II**

**Credits: 1**

Term Offered: Spring Term

Course Type(s): AT

Training in choral music of various styles, in vocal technique, and in aspects of expressive performance; concert participation required. Each semester, new repertoire is advanced, making each course unique in its new content. May be taken for as many as eight semesters.

### **MU-150 Introduction to Piano**

**Credits: 3**

Term Offered: All Terms

Course Type(s): AT

Group instruction in piano with an emphasis on developing beginning skills in keyboard technique, music reading, harmonization, and performance of repertoire. Designed for students with little or no previous musical experience.

### **MU-151 Group Piano I**

**Credits: 3**

Term Offered: All Terms

Course Type(s): AT

Group instruction in piano with an emphasis on music reading, music theory, piano technique, harmonization, improvisation, and performance of repertoire. Designed for music majors and students with some previous musical experience.

### **MU-152 Group Piano II**

**Credits: 3**

Prerequisite(s): MU-151

Term Offered: Spring Term

Course Type(s): AT

Group instruction in piano with an emphasis on more advanced music reading, music theory, piano technique, harmonization, improvisation, and performance of repertoire. Designed for students who would like to continue to develop the skills acquired in MU-151.

### **MU-154 Blue Hawk House Band**

**Credits: 1**

Term Offered: All Terms

Course Type(s): AT, HY

The Blue Hawk House Band is a pop music recording ensemble reinterpreting classic songs from seminal albums. House Band members select songs, analyze, arrange, create and record their individual parts culminating in live performances and in web-streamed music videos.

### **MU-156 Chamber Orchestra**

**Credits: 1**

Term Offered: All Terms

Course Type(s): AT

The Monmouth University Chamber Orchestra is a small orchestral ensemble of strings with woodwinds, brass, and percussion that is designed to meet the needs of the Music and Theatre Department and public performances on campus and in the community. Each semester, new repertoire is advanced, making each course unique in its new content. May be taken for as many as eight semesters.

**MU-157 Chamber Choir**

Term Offered: Fall Term

Course Type(s): None

The Monmouth University Chamber Chorus is an ensemble of sixteen to twenty-four auditioned singers who wish to extend their knowledge and skills in choral arts in a challenging musical setting. The repertoire for this ensemble requires a moderate/high degree of individual musicianship and mastery of specific singing techniques and period music interpretation. The group functions as a concert-ready and portable ensemble that responds to requests for particular types of venues, such as: sporting events, concert tours as a vehicle for a wider public performance experience with regard to public relations, meaningful connections with other academic institutions, and university recruitment. Each semester, new repertoire is advanced, making each course unique in its new content. Audition is required and registration is by the instructor. This course is repeatable for credit.

**Credits: 1****MU-158 Chamber Choir II**

Prerequisite(s): MU-157

Term Offered: Spring Term

Course Type(s): None

A continuation of MU-157, the Monmouth University Chamber Chorus is an ensemble of sixteen to twenty-four auditioned singers who wish to extend their knowledge and skills in choral arts in a challenging musical setting. The repertoire for this ensemble requires a moderate/high degree of individual musicianship and a mastery of specific singing techniques and period music interpretation. The group functions as a concert-ready and portable ensemble that responds to requests for particular types of venues, such as: sporting events, lecture/presentations, dedications, special events, and graduation ceremonies. Additionally, the group will undertake periodic concert tours as a vehicle for a wider, public performance experience and with regard to public relations, meaningful connections with other academic institutions, and university recruitment. Each semester, new repertoire is advanced, making each course unique in its new content. Audition is required and registration is by instructor. This course is repeatable for credit.

**Credits: 1****MU-161 Group Instrument I**

Course Type(s): None

Designed to develop instrumental technique and repertoire; open to students who have some proficiency in strings, woodwinds, brass, or percussion.

**Credits: 2****MU-162 Group Instrument II**

Term Offered: Spring Term

Course Type(s): None

Designed to develop instrumental technique and repertoire; open to students who have some proficiency in strings, woodwinds, brass, or percussion.

**Credits: 2****MU-163 Group Strings**

Term Offered: All Terms

Course Type(s): AT

Designed especially for music education students who are required to have some proficiency in group strings to meet state certification guidelines. Open to beginners only. Non-music majors may enroll by permission of the Department of Music and Theatre Arts.

**Credits: 1****MU-164 Group Woodwinds**

Term Offered: Spring Term

Course Type(s): AT

Designed especially for music education students who are required to have some proficiency in group woodwinds to meet state certification guidelines. Open to beginners only. Non-music majors may enroll by permission of the Department of Music and Theatre Arts.

**Credits: 1****MU-165 Group Brass**

Term Offered: All Terms

Course Type(s): AT

Designed especially for music education students who are required to have some proficiency in group brass to meet state certification guidelines. Open to beginners only. Non-music majors may enroll by permission of the Department of Music and Theatre Arts.

**Credits: 1****MU-166 Group Percussion**

Term Offered: Spring Term

Course Type(s): AT

Designed especially for music education students who are required to have some proficiency in group percussion to meet state certification guidelines. Open to beginners only. Non-music majors may enroll by permission of the Department of Music and Theatre Arts.

**Credits: 1****MU-167 Introduction to Electronic Music**

Course Type(s): None

Fundamentals of electronic music acquired through lectures, recordings, and hands-on use of electronic synthesizers.

**Credits: 3****MU-170 Electronic Music Composition**

Course Type(s): None

A course designed for musicians who wish to compose and record music in a soundtrack, avant-garde, or classical genre. Students will be required to use university recording facilities.

**Credits: 3****MU-171 Group Voice**

Term Offered: All Terms

Course Type(s): AT

Fundamentals of technique and performance of song literature; voice production and principles of singing, including breath control, resonance, tone quality, diction, and pronunciation. Each semester, new repertoire is advanced, making each course unique in its new content.

**Credits: 3****MU-172 Group Voice II**

Term Offered: Spring Term

Course Type(s): AT

Fundamentals of technique and performance of song literature; voice production and principles of singing, including breath control, resonance, tone quality, diction, and pronunciation. Each semester, new repertoire is advanced, making each course unique in its new content.

**Credits: 3****MU-180 Applied Music: Jazz Piano**

Term Offered: Spring Term

Course Type(s): None

Weekly, fifty-minute private lessons in jazz piano; may be repeated for additional credits.

**Credits: 1****MU-181 Applied Music: Bass**

Term Offered: All Terms

Course Type(s): AT

Weekly, fifty-minute private lessons in bass; may be repeated for additional credits.

**Credits: 1****MU-188 Fundamentals of Guitar**

Term Offered: Spring Term

Course Type(s): None

General music skills as applied to guitar playing; students develop left- and right-hand technique; introduction to basic repertoire and history of repertoire.

**Credits: 3****MU-190 Applied Music: Percussion**

Term Offered: All Terms

Course Type(s): AT

Weekly, fifty-minute private lessons in percussion; may be repeated for additional credit

**Credits: 1**

|                                                                                                                                                                                                                                                                                                                                                                |                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                   |

**MU-223 Musical Cultures of the World****Credits: 3**

Course Type(s): AT, GU

Provides an introductory survey of music in selected traditions and cultures in global perspective. It explores music both as a phenomenon of sound and a phenomenon of culture. It aims to familiarize students with music sound and music structure of different peoples, to help them appreciate music in its cultural context, to guide them in listening to music on a basic analytical level, and to give them a broad global view of music as a human activity/behavior with social functions and as artistic expression. Special attention is placed on how political, economic, social, and religious factors influence musical aesthetics and notions of identity among performers and audiences-all concerns of Ethnomusicology.

**MU-224 Global Popular Music****Credits: 3**

Term Offered: Spring Term

Course Type(s): AT, GU

In the age of globalization and the Internet, popular music (music produced for commercial purposes and transmitted through mass media to a large audience) is an increasingly global phenomenon and can provide a unique perspective into the social, political, and economic conditions of various cultures around the world. This course introduces students to some of the popular musics from around the world through the perspective of ethnomusicology, the study of music and culture and the ways that they intersect and influence one another. Emphasis is placed on analyzing musical innovations, trends, and movements in relation to location, culture, counter-culture, and the social/geo-political climate. In doing so, this course draws upon geographical case studies of popular music (for example, Algerian Rai, K-Pop, Bollywood, Indonesian dangdut, or the Afrobeat of Fela Kuti) to view how historical, social, and political factors have influenced their development. These issues will be explored through directed reading and listening assignments, response papers, a mix tape project, and focused class presentations and discussions.

**MU-227 Introducing the Beatles!****Credits: 3**

Term Offered: Fall Term

Course Type(s): AT, HY

This course addresses the Beatles' musical career in terms of their wide-ranging cultural and artistic influence. Particular attention will be devoted to examining their songs within the context of their composition and in terms of their place (and placement) on the band's albums. In addition to investigating their biographical lives, we will discuss the Beatles' overtly literary and textual intentions, especially their various attempts at irony, parody, and satire. This course's chronological design is arranged in order to capture the band's artistic trajectory from two-track recording and the relatively primitive Please Please Me album through the sonic heights of Revolver, Sgt. Pepper's Lonely Hearts Club Band, The White Album, and Abbey Road. The thrust of this course is interpretive in nature, with the Beatles' songs and albums receiving considerable scrutiny in terms of their composition, production, and attendant musicianship. Developments in recording and instrument technology are germane to our understanding of the Beatles' evolving aesthetic, as is the bandmates' development as songwriters who eventually eschew issues associated with romance in order to address larger and more prescient subjects in their music such as loneliness, oppression, nostalgia, ethics, and redemption.

**MU-240 Record Label Strategies****Credits: 1**

Prerequisite(s): MU-140 and MU-301.

Term Offered: All Terms

Course Type(s): None

Students will be introduced to a variety of skills needed in the music industry. Each student will be required to complete specific, hands-on projects in preparation for a major internship off campus.

**MU-241 Advanced Record Label Strategies****Credits: 1**

Prerequisite(s): MU-140, MU-240, and MU-301

Term Offered: All Terms

Course Type(s): None

Students will be introduced to a variety of skills needed in the music industry. Each student will be required to complete a specific hands-on project as preparation for a major internship off campus. Limited to Music majors.

**MU-254 Arts Administration and Concert Promotion****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

Explore in-depth arts administration and management for a major Performing Arts Center, including concert promotion, operations and fundraising.

**MU-290 Rock and Roll in American Culture****Credits: 3**

Term Offered: All Terms

Course Type(s): WT

Impact of rock and roll on American culture and music history; rock genres, including rockabilly, protest rock, blues-rock, punk, heavy metal, and rock and roll as a global phenomenon.

**MU-291 Jazz in America****Credits: 3**

Term Offered: Spring Term

Course Type(s): RE, WT

Musical and cultural overview of the jazz tradition in America, with special emphasis on Dixieland, swing, bop, and jazz fusion, and artists such as Louis Armstrong, Count Basie, Duke Ellington, Charlie Parker, and John Coltrane.

**MU-292 Roots, Rock, Reggae****Credits: 3**

Term Offered: Spring Term

Course Type(s): RE

A survey of Jamaican reggae music from its inception to the present. The music form's political, religious, and cultural connections will also be examined, as will the major works of reggae composers, such as Bob Marley, Jimmy Cliff, and Peter Tosh.

**MU-298 Special Topics in Music (200 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in music to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**MU-299 Independent Study in Music****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Reading and research on a selected topic under the direction of a faculty member.

**MU-301 The Business of Music**

Term Offered: All Terms

Course Type(s): None

An introduction to the inner workings and business strategies of the music industry. In addition to an analysis of the recording arm of the industry, other areas such as concert production, management, media relations, and talent acquisition will also be examined.

**Credits: 3****MU-321 Music Theory III**

Prerequisite(s): MU-221 and MU-222

Term Offered: Fall Term

Course Type(s): None

Music Theory III is the third semester of a sequential, two-year music theory curriculum. After a brief review of the material covered in Music Theory I (MU-221) and Advanced Theory and Harmony (MU-222), an introduction to the music materials and stylistic practices associated with nineteenth-century music is provided. Procedure will entail examining and working with melodic, rhythmic, harmonic, and structural elements found in the music being studied.

**Credits: 3****MU-322 Music Theory IV**

Prerequisite(s): MU-221, MU-222, and MU-321

Term Offered: Spring Term

Course Type(s): None

Music Theory IV is the fourth semester of a sequential, two-year music theory curriculum. After a brief review of the material covered in Music Theory I (MU-221), Advanced Theory and Harmony (MU-222), and Music Theory III (MU-321), an introduction to the music materials, stylistic practices and the unique forms and approaches associated with twentieth-century music is provided. Procedure will entail examining and working with the melodic, rhythmic, harmonic, and structural elements found in the music being studied.

**Credits: 3****MU-326 Life and Work of Bruce Springsteen**

Term Offered: Spring Term

Course Type(s): AT, HY

The course explores Bruce Springsteen's musical career in terms of his wide-ranging cultural and artistic influence. Particular attention will be devoted to examining his songs within the context of their composition and in terms of their place (and placement) on his albums. In addition to investigating his biographical life, we will discuss his overtly literary and political intentions as they evolve across the decades. This course's chronological design is arranged in order to capture Springsteen's artistic trajectory from his Greetings from Asbury Park, NJ and The Wild, The Innocent, and the E Street Shuffle albums through the creative heights of Born to Run, Darkness on the Edge of Town, The River, and Nebraska. The thrust of this course will be interpretive in nature, with Springsteen's songs and albums receiving considerable scrutiny in terms of their composition, production, and attendant musicianship. Particular attention will also be devoted to Springsteen's interactions with the music business, especially involving his management and the development of his career.

**Credits: 3****MU-327 Instrumental Arranging and Basic Orchestration**

Prerequisite(s): MU-222

Term Offered: All Terms

Course Type(s): None

Practical problems of orchestration, including transposition, characteristics and limitation of various band, orchestral, keyboard, and electronic instruments; arranging for instrumental ensembles of various sizes.

**Credits: 3****MU-328 Conducting**

Prerequisite(s): MU-218 and MU-151, and MU-145 and MU-146 or MU-147 and MU-148

Term Offered: All Terms

Course Type(s): None

Basic choral and instrumental conducting techniques with emphasis on the physical problems of coordination and control, as well as interpretation, rehearsal, performance, and program planning. Each student will function as an assistant to the choral/instrumental conductors.

**Credits: 2****MU-329 Conducting II**

Prerequisite(s): MU-328.

Term Offered: Spring Term

Course Type(s): None

A continuation of MU-328. Basic choral and instrumental conducting techniques with emphasis on the physical problems of coordination and control, as well as interpretation, rehearsal, performance, and program planning. Each student will function as an assistant to the choral/instrumental conductors.

**Credits: 2****MU-329W Workshop in the Techniques of Composing Music****Credits: 2**

Prerequisite(s): MU-222

Term Offered: Spring Term

Course Type(s): None

Explores problems in melody, rhythm, and harmony, including texture and the elements of musical form, presented in line with the needs of individual students as revealed in their original composition.

**MU-331 Music for the Child****Credits: 2**

Prerequisite(s): MU-151 and MU-218

Term Offered: All Terms

Course Type(s): None

Focus on methods and materials of teaching in the elementary school (K-8): singing, rhythmic expression, listening, use of simple instruments, and correlating music with other areas of learning. It will include pedagogical strategies related to teaching linguistically diverse students, students with diverse needs, using instructional technology and using data to inform instruction. For Music majors only. Also listed as ED-331. Clinical Hours required.

**MU-333 The Teaching of Music in the Secondary School****Credits: 2**

Prerequisite(s): MU-151 and MU-218

Term Offered: Spring Term

Course Type(s): None

Study and application of appropriate concepts, methods, skills, and materials for secondary-school music teachers. It will include pedagogical strategies for teaching linguistically diverse students, those with special needs using instructional technology and using data to inform instruction. For Music majors only. Clinical Hours required. Also listed as ED-333.

**MU-335 Music Technology in Music Education****Credits: 2**

Term Offered: All Terms

Course Type(s): None

Music Technology in Music Education will prepare and equip students in the use of technology in the music classroom. This includes identifying and using Digital Audio Workstations in the music creation process; using MIDI; setting up and running a sound system, as well as how to lead a music technology course at the K-12 level.

**MU-340 Music and Music Publishing for TV, Radio, and Film Credits: 3**

Course Type(s): None

Defines and examines the many opportunities available to the musician in the mass media, including theme composition, post scoring, jingle production, news music, production libraries, music editing, soundtrack production, on-air and cable network yearly campaigns, EFX and usage, available orchestrational sources, client relations, timings and conversations, on-air and theatrical publishing, professional societies (ASCAP, BMI, SESAC), budgeting, and union relations and affiliations.

**MU-341 Songwriting I****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Designed to analyze and study the many components of songwriting, focusing on today's contemporary music featured on radio, film, and television. Various styles will be studied and developed, from rap to country music. Nashville style group writing will be used as will Writer in the Round type performances. Ability to play an instrument is recommended but not required.

**MU-342 Songwriting II****Credits: 3**

Term Offered: All Terms

Course Type(s): None

A continuation of Songwriting I and will focus on final arrangements and production of songs to be presented to publishers, record labels, etc. Also covered will be how to properly present works to producers and session musicians in the form of basic lead sheets and music notation.

**MU-345 Record Production****Credits: 3**

Term Offered: All Terms

Course Type(s): IM

Examines all of the aspects of record production, from choice of artist and material to the actual art of recording itself. Will meet in a fully equipped recording studio and will be co-taught by the lecturing professor and a professional sound engineer. The recording techniques to be taught will be applicable to all forms of music, including classical jazz, rock, and mass/multimedia. The student will have hands-on instruction on the use of analog and digital recording machines, sound boards, and outboard gear.

**MU-353 Contemporary Rock Ensemble I****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Designed to run as a professional touring band would in preparation for a major tour and/or recording session. Covers many different genres with varying instrumentation. Taught by a seasoned road veteran with twenty years of experience in major tours/acts.

**MU-354 Contemporary Rock Ensemble II****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

A continuation of Rock Ensemble I, which is designed to run as a professional touring band would in preparation for a major tour and/or recording session. It will cover many different genres with varying instrumentation. Taught by a seasoned road veteran with twenty years of experience in major tour/acts.

**MU-398 Special Topics in Music (300 Level)****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in music to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**MU-399 Independent Study in Music****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in music to be announced prior to registration. Prior permission of the directing professor and department chair is required to take this course.

**MU-401 Music Business Internship Seminar****Credits: 3**

Prerequisite(s): MU-301, departmental approval, Junior standing, and proof of internship prior to enrollment.

Term Offered: All Terms

Course Type(s): EX5

Practical experience in the music industry in fields such as concert production, promotion, publicity, music publishing, and management. This course is repeatable for credit.

**MU-402 Music Internship Seminar II****Credits: 3**

Prerequisite(s): MU-401

Term Offered: All Terms

Course Type(s): EX5

Practical experience in the music industry in fields such as concert production, promotion, publicity, music publishing, and management. Limited to Music majors only.

**MU-403 Music Internship Seminar III****Credits: 3**

Prerequisite(s): MU-402

Term Offered: Spring Term

Course Type(s): EX5

Practical experience in the music industry in fields such as concert production, promotion, publicity, music publishing, and management. Limited to Music majors only.

**MU-405 Composition****Credits: 3**

Prerequisite(s): MU-218, MU-219, MU-221, and MU-222

Term Offered: Spring Term

Course Type(s): None

Using the technique of Replicate-Generate From-Generate, this course combines the student's knowledge of traditional styles, form, and analysis in order to replicate music in many styles. The student will then begin to combine his or her own musical ideas into these compositions. The second half of the semester will be devoted to the original compositions of the student while employing the disciplines previously studied. Classical as well as contemporary motifs will be explored in this lecture-discussion-workshop course.

**MU-406 Composition II****Credits: 3**

Prerequisite(s): MU-405

Course Type(s): None

Using the technique of Replicate-Generate From-Generate, this course combines the student's knowledge of traditional styles, form, and analysis in order to replicate music in many styles. The student will then begin to combine his or her own musical ideas into these compositions. The second half of the semester will be devoted to the original composition of the student while employing the disciplines previously studied. Classical as well as contemporary motifs will be explored in this lecture-discussion-workshop course.

**MU-453 Advanced Record Production****Credits: 3**

Prerequisite(s): MU-345

Term Offered: All Terms

Course Type(s): None

Addresses the aesthetics of record production. Studio techniques, pre-production approaches, actual recording and final mixing are at the heart of this course. Students will learn microphone techniques as well as control room techniques. The full responsibilities of the producer will be taught and discussed in the class, as well as practiced outside of the studio/classroom. Lectures and demonstrations will precede the students' practical application and final product.

**MU-489 Internship in Music****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX1

Supervised practical experience in music; repeatable for credit.

Departmental approval and Junior standing are required to register for this course.

**MU-498 Special Topics in Music (400 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in music to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**MU-499 Independent Study in Music****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

Reading and research on a selected topic under the direction of a Music Department faculty member. Prior permission of the directing professor and department chair is required to take this course.

## Nursing (NU)

**NU-100 Technology and Health Informatics****Credits: 3**

Term Offered: All Terms

Course Type(s): TL

This course examines the history of healthcare informatics, current issues, basic informatics concepts, and health information management systems. The use of technology to help make decisions and to improve the health status of the individual, family, and community is emphasized. Students will learn to identify, gather, process, and manage information/data. Students will discuss the use of informatics concepts that can be used to improve patient safety, quality care, cost efficiency, and work effectiveness. Requires a minimum grade of C+.

**NU-104 Medical Terminology for Nursing****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

Medical terminology serves as a universal language across diverse healthcare settings. Mastering these terms is essential for anyone pursuing a career in nursing. This course is designed to help students understand and apply essential medical terms by deconstructing them into key components such as prefixes, suffixes, word roots, special endings, plural forms, and abbreviations. The curriculum places a strong emphasis on the accurate spelling, definition, usage, and pronunciation of terms related to each body system. By fostering a shared understanding of medical terminology, this course minimizes miscommunication and equips students to use these terms precisely when interacting with healthcare professionals, patients, and care providers. This competency supports effective communication and promotes optimal healthcare delivery. This course requires a passing grade of C+ or better.

**NU-205 Pathophysiology****Credits: 3**

Prerequisite(s): BY-111 and BY-112, both passed with a grade of C+ or higher.

Co-requisite(s): CE-109 passed with a grade of C+ or higher.

Term Offered: All Terms

Course Type(s): None

Concepts for anatomy, physiology, and chemistry courses provide the foundation for exploring human dysfunction across the lifespan. Emphasis is placed on the relationship of health patterns of major body systems to changes that occur during the illness experience. Major pathophysiologic concepts are explored using a symptom-based approach that focuses on the most common diagnoses encountered in the clinical setting. Theories relation etiology, pathogenesis, and clinical manifestations are used to study common disease processes. Concepts learned in this course are fundamental to nursing practice. A minimum grade of C+ in this course is required to continue to NU-206.

**NU-207 Transcultural Health****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, CD, HE.EL, RE

This course focuses on beliefs and practices by individuals and groups from a variety of cultures. Emphasis is placed on cultural sensitivity, cultural diversity, and implications for health. Differences in cultural beliefs related to health, illness, and the impact on the delivery of healthcare will be examined. This course requires a minimum grade of C+. Nursing majors only.

**NU-210 Nutrition and Health****Credits: 3**

Term Offered: All Terms

Course Type(s): None

An introduction to the physiology of nutrition, basic concepts of normal nutrition, and nutrition in chronic disease (such as diabetes mellitus, cardiovascular disease, and obesity) will be explored. A study of the basic nutrients and the gastrointestinal system in its role of digestion, absorption, and metabolism. Food needs of an individual throughout life (birth to old age) will be considered, along with necessary dietary modifications caused by decreased activity. Food fads and fallacies will be discussed, as will factors to consider in choosing a healthy diet. Current concerns, such as how safe are the additives in our foods, the role of sugar, salt and highly processed foods, alternative therapies such as herbal remedies, and phytochemicals and their potential roles in modern nutrition, will be studied. Weight management will be addressed as it relates to medical nutrition therapy. This course requires a minimum passing grade of a C+.

**NU-215 Issues and Trends in Professional Nursing****Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): WT

The course introduces the student to the art and science of nursing by exploring the historical role of the nurse as a professional practitioner and member of the interprofessional health care team. Nursing theories are introduced with emphasis on the nursing process as a framework for designing and delivering nursing care. Quality and safety education for nursing (QSEN) competencies, ethical issues, cultural influences are discussed globally. Emerging roles are evaluated in relation to changing healthcare delivery systems. Standards of practice are referenced in the analysis of professional nursing during this and all subsequent nursing courses. The roles of critical thinking and therapeutic communication in the development of safe nursing practice are explored. This course requires a minimum grade of C+.

**NU-301 Foundations of Nursing Practice I****Credits: 6**

Prerequisite(s): BY-111, BY-112, CE-109, NU-205, NU-215 or NU-311 all passed with a grade of C+ or higher.

Co-requisite(s): NU-301L, NU-301P, NU-310, and NU-312.

Term Offered: Fall Term

Course Type(s): None

This course provides an introduction to the practice of nursing. Emphasis is placed on the knowledge and skills needed to provide safe, quality care. The theoretical foundation for basic assessment and nursing skills is presented, and the student is given an opportunity to demonstrate these skills in a clinical/laboratory setting. Students are introduced to the nursing process as a framework for the development of decision-making and clinical judgement skills. For Nursing majors only.

**NU-301CL Nursing I Clinical****Credits: None**

Co-requisite(s): NU-301 and NU-301L

Term Offered: Fall Term

Course Type(s): None

Students will learn the didactic content and apply the associated nursing skills during the clinical experience in the medical setting with live patients. This is a pass/fail course. Students must pass all sections of NU-301 to progress otherwise they must repeat all sections.

**NU-301L Nursing I Lab****Credits: None**

Co-requisite(s): NU-301 and NU-301P

Term Offered: Fall Term

Course Type(s): None

Communication skills, the nursing process and medical mathematical calculations are areas of development. Methods for interpretation of medical orders, calculation of safe medications dosing and preparation, and administration of medications will be emphasized. This is a pass/fail course.

**NU-308 Maternal, Pediatric, and Newborn Nursing****Credits: 6**

Prerequisite(s): NU-301, NU-310, and NU-312 all passed with a grade of C+ or higher.

Co-requisite(s): NU-325, NU-308MCL, and NU-308PCL.

Course Type(s): None

This course provides an integrative, family-centered approach to the care of mothers, newborns, and children. Emphasis is placed on normal and high-risk pregnancies, normal growth and development, family dynamics, pediatric disorders and the promotion of healthy behaviors in patients. Clinical experiences provide the student with an opportunity to apply theoretical concepts and implement safe patient care to mothers, newborns, and children.

**NU-308MCL Maternal Nursing Clinical****Credits: None**

Term Offered: All Terms

Course Type(s): None

Students will learn the didactic content and apply the associated nursing skills during the clinical experience in the medical setting with live patients. This is a pass/fail course. Students must pass all sections of NU-308 to progress otherwise they must repeat all sections.

**NU-308PCL Pediatric and Newborn Nursing Clinical****Credits: None**

Term Offered: All Terms

Course Type(s): None

Students will learn the didactic content and apply the associated nursing skills during the clinical experience in the medical setting with live patients. This is a pass/fail course. Students must pass all sections of NU-308 to progress otherwise they must repeat all sections.

**NU-310 Introduction to Pharmacology for Nurses****Credits: 3**

Prerequisite(s): NU-205 and NU-215 Both passed with a grade of C+ or higher.

Co-requisite(s): NU-301 and NU-312

Term Offered: All Terms

Course Type(s): None

This course provides an introduction to the principles of pharmacology, including pharmacokinetics, pharmacodynamics, medication interactions and potential adverse reactions. Emphasis is placed on drug classifications and nursing care related to the safe administration of medication to patients. A minimum grade of C+ is required in this course. Prerequisites: NU-205 and NU-215 both passed with a grade of C+ or higher.

**NU-312 Individual Health Assessment****Credits: 3**

Prerequisite(s): NU-205 passed with a grade of C+ or higher

Co-requisite(s): NU-301, NU-310, and NU-312L

Term Offered: All Terms

Course Type(s): None

This course provides a framework for preparing students to perform comprehensive health assessments on patients in a variety of settings. Emphasis is placed on taking a thorough nursing history, performing physiological, psychological, sociological, cultural, and spiritual assessments, as well as identification of stressors and health risks. Laboratory/clinical experiences provide an opportunity to practice assessment skills on adult and older adult live and /or simulated patients. Prerequisite: NU-205 passed with a grade of C+ or higher.

**NU-312L Individual Health Assessment Lab****Credits: None**

Prerequisite(s): NU-205 passed with a grade of C+ or higher

Co-requisite(s): NU-301, NU-310, and NU-312

Term Offered: All Terms

Course Type(s): None

This course provides a framework for preparing students to perform comprehensive health assessments on patients in a variety of settings. Emphasis is placed on taking a thorough nursing history, performing physiological, psychological, sociological, cultural, and spiritual assessments, as well as identification of stressors and health risks. Laboratory/clinical experiences provide an opportunity to practice assessment skills on adult and older adult live and /or simulated patients.

**NU-324 Human Sexuality****Credits: 3**

Term Offered: All Terms

Course Type(s): GS, HE.EL, HEPE, NU.EL

Human Sexuality is an introductory course designed to help students reflect on their own personal experience, development, background, and value stance while becoming acquainted with research findings, current concepts, and diverse viewpoints about human sexuality. This information will focus on essential components of human sexuality and their relationship to human development. Social, cultural, and developmental determinants of sexual health will be examined. Content will include: anatomy, physiology, hormones, birth control, sexually transmitted infections, pregnancy/childbirth, sexual development, gender identity, sexual orientation, love, healthy relationships, sexual assault, sexual behavior/variation, and sexuality in media. Also listed as HE-324.

**NU-325 Medical Surgical Nursing I****Credits: 6**

Prerequisite(s): NU-301, NU-310, and NU-312 all passed with a grade of C+ or higher.

Co-requisite(s): NU-325L, NU-325P;

Term Offered: Spring Term

Course Type(s): None

Professional nursing care for individuals and their significant others experiencing acute and/or chronic illness is emphasized. Students continue to develop skills in nursing diagnosis, problem solving, decision-making and critical thinking skills in caring for adult and geriatric patients. The nursing process is applied in caring for adult/geriatric patients and their significant others across health care settings such as the hospital, end of life facilities, and home care. There is a weekly lab and practicum component with this course. A minimum grade of C+ is required in this course to continue to NUOB-203 and NUPD-203.

**NU-325CL Medical Surgical Nursing I Clinical****Credits: None**

Co-requisite(s): NU-325 and NU-325L.

Term Offered: Spring Term

Course Type(s): None

Students will build upon their foundational experience with live patients in the hospital setting. Basic nursing skills will be expanded and focus is on the adult geriatric patient in a variety of students' clinical settings. Involvement with the live patients in the actual medical setting provides students with experiential knowledge and builds their confidence. This is a pass/fail course. Students must pass all sections of NU-325 to progress otherwise they must repeat all sections.

**NU-325L Medical Surgical Nursing I Lab****Credits: None**

Co-requisite(s): NU-325 and NU-325P;

Term Offered: Spring Term

Course Type(s): None

Foundational clinical experiences help students to develop plans and implement strategies for health promotion, risk reduction, health maintenance, rehabilitation, injury prevention and treatment of acute and complex health issues of adult and geriatric patients from diverse backgrounds. Critical thinking and evidence-based practice are introduced for students to formulate differential diagnoses, clinical impressions, nursing diagnoses for treatment and evaluation of care provided to adult and geriatric patients. Clinical opportunities are provided to deliver safe, legal, and ethical care for adult and geriatric patients in a variety of clinical settings. This is a pass/fail course.

**NU-330 Women's Health****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, CD, GS, NU.EL

Health care needs and concerns of women from diverse cultures will be examined. This course explores the biological, psychosocial, and sociocultural issues that impact women throughout the lifespan. Topics include the history and status of women's health globally, gender-based violence, sexual and reproductive health, and lifestyle choices that impact health. Throughout the course we will explore the impact of culture, ethnicity, socioeconomic status, systems of oppression, and gender on a woman's ability to be physically, mentally, and emotionally healthy. Also listed as HE-330.

**NU-355 Research Methods in Nursing****Credits: 3**

Prerequisite(s): MA-151, EN-101, and EN-102 or permission of the instructor.

Term Offered: Fall Term

Course Type(s): HY, WT

This course is designed to promote clinical decision making through the exploration and integration of current scientific evidence, the use of clinical reasoning, and scholarly review. Focus is placed on the analysis and synthesis of evidence to answer a clinical question relevant to nursing practice. This course requires a minimum grade of C+.

**NU-365 Wisdom, Wellness and Aging****Credits: 3**

Term Offered: All Terms

Course Type(s): CD, HE.EL

Provides an understanding of the cross-cultural variations in the status of aging and health in older adults. Examples of various cultures include examining older adults from non-English speaking countries such as North Korea, South Korea, Iran, Mexico, China, and Brazil. Examines older adults from these diverse populations as well as other nations. Topics to be covered include examinations of health implications on aging populations in non-English speaking countries. Compare countries, such as Japan, India, and Nigeria, to explore how their specific culture influences caregiving, social support networks, and community. Specific, cultural views of love, intimacy, and sexuality in older adults will be examined. Also listed as HE-365.

**NU-370 Alternative/Complementary Health Therapies****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, GU, NU.EL

Cultural origins of CAM therapies will be discussed. Perspectives of health and healing through co-mingling Eastern Traditional Complementary and Alternative (TCAM) therapies and Western biomedical practices into an integrative strategy will be examined. Appropriate therapies for health promotion and specific illness contexts, potential risks/benefits, ethical issues addressing treatment choices and global entities that employ CAM therapies will be discussed. There will be an emphasis on choosing CAM therapies that are supported by research as safe and effective. Knowledge of reliable sources of information on the Internet will improve decision-making regarding therapies. Also listed as HE-370.

**NU-375 Health in Developing Countries: A Cross-Cultural Perspective****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, GU, NU.EL, SUS

Designed to introduce students to the concept of health as a cross-cultural issue. Students will examine their own health beliefs and practices and expand their understanding of health and health issues of the developing world. Contemporary health issues will be analyzed. Healthcare delivery systems in selected countries in Asia and Africa will be examined and compared to the American healthcare system. Students are expected to problem solve and postulate solutions to contemporary and emerging health issues. Also listed as HE-375.

**NU-390 Nursing Care of the Aging Adult****Credits: 3**

Prerequisite(s): NU-205 and NU-215 both passed with a grade of C+ or higher

Course Type(s): HY

This course provides an introduction to the care of aging adults while focusing on their unique physiological and psychosocial needs. Emphasis is placed on promoting healthy aging and retaining functional ability within a home or residential environment. Common health alterations of the older adult as well as safety and end-of-life care are introduced.

**NU-398 Special Topics in Nursing (300 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in nursing to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**NU-399 Independent Study in Nursing****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

Guided research and in depth study of an area of nursing and/or healthcare of particular interest to the student. Permission of the directing professor and department chair is required to take this course.

**NU-400 Population Focused Care****Credits: 6**

Prerequisite(s): NU-492 passed with a grade of C+ or higher.

Co-requisite(s): NU-400P, NU-450, NU-490 and NU-490P.

Course Type(s): EX5, HY

This course is intended to orient students to nursing care of individuals, families, aggregates, communities, and populations. Principles and practices of community health are discussed. Emphasis is placed on assessing factors that influence the health of populations and the use of evidence-based practices in the delivery of spiritually and culturally appropriate health promotion and disease prevention interventions. The role of the nurse as an advocate for social justice is explored. Students are provided clinical experiences within the community. Nursing majors only.

**NU-400CL Population Focused Care Clinical****Credits: None**

Co-requisite(s): NU-400

Course Type(s): None

This clinical experience focuses on population health nursing. The nursing process is utilized as students apply their knowledge in providing care to clients from the formation of the family through senescence. This clinical experience allows students to incorporate evidence-based practice strategies in the provision of care including health teaching, screening, outreach, disease and outbreak investigation, referral, and follow-up, across various aggregates, communities, and populations. Students must pass the clinical portion (NU-400CL) to pass the course NU-400. This is a pass/fail course. Students must pass all components of this course to progress.

**NU-401 Medical Surgical Nursing II****Credits: 6**

Prerequisite(s): NU-308 and NU-325 Passed with grade of C+ or higher.

Co-requisite(s): NU-401P and NU-492.

Term Offered: Fall Term

Course Type(s): None

This course focuses on the care of adult patients with complex medical/surgical health problems. Emphasis is placed on helping patients and their families cope with alterations in body functions. Concepts of pharmacology, health promotion and education, evidence-based practice, and interdisciplinary collaboration will be integrated throughout the course. Clinical experiences provide the student with an opportunity to apply theoretical concepts and implement safe care to patients and selected groups in a variety of settings.

**NU-401CL Medical Surgical Nursing II Clinical****Credits: None**

Prerequisite(s): NU-308 and NU-325, both passed with a C+ or higher.

Co-requisite(s): NU-401 and NU-492.

Term Offered: Fall Term

Course Type(s): None

This course focuses on the care of adult patients with complex medical/surgical health problems. Emphasis is placed on helping patients and their families cope with alterations in body functions. Concepts of pharmacology, health promotion and education, evidence based practice, and interdisciplinary collaboration will be integrated throughout the course. Clinical experiences provide the student with an opportunity to apply theoretical concepts and implement safe care to patients and selected groups in a variety of settings. For Nursing majors only. This is a pass/fail course. Students must pass all components of this course to progress.

**NU-440 Health Policy****Credits: 3**

Prerequisite(s): EN-101, EN-102, HE-290 and Junior standing or permission of the instructor

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, WT

Delves into the core elements that define health policy. Describes factors, such as the healthcare delivery systems (public/non-profits vs. private/for profits), access to care, healthcare financing, quality-of-care issues, and social issues, such as gender and culture, and their impact on health and healthcare. The dynamics of the policy-making process at different levels (federal, state and local) will be explored, along with policy analysis and how policy influences healthcare decisions. The complexities and challenges of healthcare reform will be identified. Also listed as HE-440.

**NU-450 Leadership in Nursing and Healthcare****Credits: 3**

Prerequisite(s): NU-401 and NU-492 both passed with a grade of C+ or higher

Co-requisite(s): NU-400 and NU-490

Term Offered: Spring Term

Course Type(s): None

The acquisition of knowledge and skills necessary for personal and professional growth designed to address the elements of successful leadership in a manner that is practical and relevant for today's professional nurse.

**NU-476 Interpersonal Violence****Credits: 3**

Term Offered: All Terms

Course Type(s): NU.EL

Examines the various types and patterns of violence related to cultural values, beliefs, biases, and societal issues, as well as the historical perspectives of violence. Course content includes: family, community, youth, and workplace violence; child, domestic, elder, and sexual abuse. Theories concerning gender violence, gangs, bias and hate crimes, and terrorism are challenged. Public health and health care issues related to violence, and primary, secondary, and tertiary-level interventions for victims and offenders of violence are discussed. Individual responsibilities associated with identification and reporting violence are identified. Health care measures to identify and prevent violence are analyzed. Methods of treatment for victims and perpetrators of violence are evaluated. Also listed as HE-476.

**NU-490 Transition to Professional Practice****Credits: 6**

Prerequisite(s): NU-401 and NU-492 both passed with a grade of C+ or higher

Co-requisite(s): NU-400, NU-400P, NU-450, and NU-490P

Term Offered: Spring Term

Course Type(s): RD

This course is a comprehensive review of essential concepts and skills related to care of patients incorporating online review modules aligned with the NCLEX-RN detailed test blueprint. Students focus on those concepts necessary to prepare for the successful practice of professional nursing. Standardized testing is incorporated that includes a comprehensive examination and results-based remediation to support the successful completion of the NCLEX-RN exam and effective transition into nursing practice. Clinical experiences provide the student the opportunity to apply learned concepts while providing care to assigned patients and when functioning in a leadership role. For Nursing majors only.

**NU-490CL Transition to Professional Practice Clinical****Credits: None**

Co-requisite(s): NU-490

Term Offered: Spring Term

Course Type(s): None

This capstone clinical course serves as a transition between the role of student and professional nurse. The major purpose is to increase independence in providing nursing care to groups of individuals in an acute care setting. The focus of this course is on organization, delegation and supervision of care and evaluation of outcomes. Clinical is Pass/Fail. Student must pass NU-490CL in order to pass NU-490.

**NU-492 Mental Health Tertiary Care****Credits: 5**

Prerequisite(s): NU-308 and NU-202 both passed with a grade of C+ or higher.

Co-requisite(s): NU-401 and NU-492P.

Course Type(s): None

Part I: This course focuses on the care of patients experiencing mental and behavioral disorders. Emphasis is placed on the management of patients facing emotional and psychological stressors as well as promoting and maintaining the mental health of individuals and families. Concepts of crisis intervention, therapeutic communication, anger management, and coping skills are integrated throughout the course. Clinical experiences provide the student with an opportunity to apply theoretical concepts and implement safe patient care to patients in mental health settings. Part II: Tertiary care nursing: Care for individuals, families, and aggregates highly specialized consultative care that involves advanced and complex procedures and treatments performed by medical specialists (such as pediatric centers, Oncology centers, burn centers, palliative care, plastic surgery, psychiatric hospitals) and community. The focus of tertiary care includes, but not limited to management of complex health issues, health promotion, disease prevention, risk reduction, health maintenance, and rehabilitation, injury prevention of adult and geriatric patients from diverse backgrounds. This course allows the students to improve and advance their abilities to critically think and apply evidence-based practice to formulate differential diagnoses, clinical impressions, nursing diagnoses for treatment and evaluation of care provided to adult and geriatric patients.

**NU-492CL Mental Health Clinical****Credits: None**

Co-requisite(s): NU-492

Course Type(s): None

Students will learn the didactic content and apply the associated nursing skills during the clinical experience in the medical setting with live patients. For Nursing majors only. This is a pass/fail course. Students must pass all components of this course to progress.

**NU-498 Special Topics in Nursing (400 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): NU.EL

An intensive study of a particular subject or problem in nursing to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**NU-498P Special Topics in Nursing****Credits: None**

Term Offered: Spring Term

Course Type(s): None

Practicum for NU 490.

**NU-499 Independent Study in Nursing****Credits: 1-3**

Prerequisite(s): NU-312, NU-324, NU-355, and permission of the directing professor and department chair

Term Offered: Spring Term

Course Type(s): None

Guided research and in-depth study of an area of nursing and/or health care of particular interest to the student.

**NUOB-203 Nursing III - Obstetrics****Credits: 3**

Prerequisite(s): NU-202 passed with a grade of C+ or higher and NU-202L and NU-202P both passed with a grade of P

Co-requisite(s): NUOB-203P, NUPD-203, and NUPD-203P

Term Offered: Spring Term

Course Type(s): None

Family theory is applied for examining families in childbearing years through pregnancy, labor, birth, post-partum mothers and their newborns, infancy, childhood and adolescence. The concentration is on the changing needs of women and families during the reproductive life cycle in the delivery of ethically sound nursing care. Care is adapted to the unique health and developmental needs of children and their families to maximize health potential. Health promotion, risk reduction, disease prevention and restoration of developing children and women are integrated and facilitated in the care of mothers, neonates, families and children in acute and community-based settings. There is a weekly practicum component with this course. A minimum grade of C+ is required in this course NUOB-203.

**NUOB-203P Nursing III Obstetrics Practicum****Credits: None**

Prerequisite(s): NU-202 passed with a grade of C+ or higher, and NU-202L and NU-202P both passed with a grade of P

Co-requisite(s): NUOB-203 and NUPD-203P

Term Offered: Spring Term

Course Type(s): None

Practicum for NUOB-203. This is a pass/fail course. Students must pass this practicum to pass the course NUOB-203.

**NUPD-203 Nursing III - Pediatrics****Credits: 3**

Prerequisite(s): NU-202 passed with a grade of C+ or higher and NU-202L and NU-202P both passed with a grade of P

Co-requisite(s): NUPD-203P, NUOB-203, and NUOB-203P

Term Offered: Spring Term

Course Type(s): None

Family theory is applied for examining families in childbearing years through pregnancy, labor, birth, post-partum mothers and their newborns, infancy, childhood and adolescence. The concentration is on the changing needs of women and families during the reproductive life cycle in the delivery of ethically sound nursing care. Care is adapted to the unique health and developmental needs of children and their families to maximize health potential. Health promotion, risk reduction, disease prevention and restoration of developing children and women are integrated and facilitated in the care of mothers, neonates, families and children in acute and community-based settings. There is a weekly practicum component with this course. A minimum grade of C+ in this course is required to continue to NUMS-204 and NUPY-204.

**NUPD-203P Nursing III Pediatrics Practicum****Credits: None**

Prerequisite(s): NU-202 passed with a grade of C+ or higher, and NU-202L and NU-202P, both passed with a grade of P.

Co-requisite(s): NUPD-203 and NUOB-203P

Term Offered: Spring Term

Course Type(s): None

Practicum for NUPD-203. This is a pass/fail course. Students must pass this practicum to pass the course NUPD-203.

## Perspectives (PR)

**PR-400 Love, Life, and Liberty****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

An examination of the historical and philosophical aspects of love and the assertion for freedom, starting from the biological concept of life. Throughout history, the various interpretations of these ideas have shaped the world. Students will be introduced to some of the most important, related works that are the fiber of History, Philosophy, and Science. The analysis of revered, cultural traditions will show the impact of love on the rational thinking and artistic creation. Also listed as RS-400.

**PR-401 Perceptions****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP, GS

An in-depth visual study dealing with the various ways that artists perceive the world around them as it relates to specific subject matter, aesthetics, and to cultural, historical, and psychological implications. Beauty and reality will be examined in all categories studied, with emphasis on the personal perceptions of the student.

**PR-403 Roma/Gypsies in Literature, Pop Culture, and History****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): ISP

Offers an interdisciplinary introduction to the people known as Gypsies (though the preferred term is Roma or Romani), whose ancestors left northern India by the Eleventh century, and who presently live dispersed in a world-wide diaspora. We will examine representations of Gypsies in world literature, pop culture, and history, and investigate this people's position at the confluence of myth, metaphor, and reality. We will discuss the particulars of Roma's history, including origins, migrations, experiences with slavery and the Holocaust, and their position within the New Europe. Special attention will be paid to the relation between historical and non-historical representations, and to the production of stereotypes and tropes associated with Gypsies/Roma.

**PR-404 Ethnic Lives****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

Institutional racism in America, its effect on intergroup relations, and the response of ethnic group members to it. Ethnicity in America is examined from a global perspective. Readings in Sociology and Literature.

**PR-406 The Individual and Society****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): ISP

The impact of two cultural ideologies; the influence of individualism and collectivism on individual thought and behavior, social interaction, societal values, and global order. The disciplines represented include Psychology, Ethics, Cultural Anthropology, and Sociology.

**PR-407 Morality and Community****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): GS, ISP

Problems involved in making moral decisions in complex situations. Focuses on lying and deceit, deleterious effects on the life of the community, and also on clarifying codes of ethical behavior. The disciplines represented include Literature and Ethics.

**PR-411 Gender and Global Culture****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): GS, ISP

Examines how gender influences cultural beliefs and practices around the world. Examines how gender shapes culture, particularly in ways that restrict and limit our lives. Uses an interdisciplinary approach to examine how gender and culture shape individual lives, as well as the larger global communities in which we live. Throughout the course, students will examine ethical and social issues concerning gender and culture.

**PR-418 Eastern-Western Approaches to Wellness, Health, and Healing****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): HE.EL, HEPE, ISP

Exploration and comparison of Eastern and Western approaches to wellness, health, and healing, known currently as the "mind/body question." Examination of how beliefs inherent in these traditions influence concepts of health and disease.

**PR-422 AIDS and the Global Society****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, ISP

A global perspective of the HIV/AIDS pandemic using three major disciplinary approaches of biology, public health, and social anthropology. The impact of the disease on individuals, families, and communities in Western and non-Western countries; associated social, psychological, ethical, economic, and health issues are explored.

**PR-423 Perspectives on Human Rights****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): None

An interdisciplinary and cross-cultural exploration of the question of human rights. The disciplinary perspectives of Philosophy, Political Science, History, and Literature are used to examine the different dimensions of human rights in the world.

**PR-424 Movies, Places, and People****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): ISP

Integrates geography, psychology, and film studies to examine the interrelationships of people, their identities, and their behaviors with places they experience both directly and through movies.

**PR-425 Critical Play: Theories and Aesthetics of Video Games****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

Critical examination of the role of video games and play toward the construction of cultural values, social structures, and identities. This interdisciplinary course studies the theories and aesthetics of video games by drawing from the fields that include, but are not limited to: Art and Art History, Anthropology, and Sociology.

**PR-428 Children's Folklore****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Summer Term

Course Type(s): ISP

An investigation of the theoretical perspectives of development psychologists, anthropologists, and comparative historians. Working in the field of Literary Studies, students will learn to analyze children's folklore with theoretical and methodological tools borrowed from the disciplines of anthropology, psychology, and comparative historical analysis. Topics include: rhymes, riddles, jokes, songs, lore, and other language use in American children and children from other cultural groups.

**PR-429 Health and Healing Across Cultures****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Fall Term

Course Type(s): ISP

A cross-cultural examination of health and healing. Through lecture, discussion of the readings, case studies, and film presentations, students will explore the biological and sociocultural factors that affect health, illness, disease, and healing, both now and in the past. Students will also examine the impact of the healer and supernatural belief systems on the process of healing. In addition to the evaluation of the cultural health aspects of Africans, African-Americans, Hispanics/Latinos, Haitians, and the Hmong, these populations will also be compared to the general American population in terms of overall health and access to health care.

**PR-430 Social Movements: Marches and Music****Credits: 3**

Term Offered: All Terms

Course Type(s): ISP, HY, OL

An examination of the creation, function, and effect of protest marches and music within social movements. We will do this by analyzing social movements through the perspectives of political science, political communication, social movements, rhetoric, cultural studies, and music.

**PR-432 Ethics and Professionalism in Science and Engineering****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

This course provides a broad view of ethics and professionalism in the context of Science and Engineering. It teaches valuable practical skills as well as the basic analytic tools required to make the ethical decisions confronted by professionals in any field. The course describes the special role of professionals in society and uses the key perspectives of engineering and philosophy to explore their responsibilities. Additional perspectives (e.g. organizational psychology, law) will be incorporated as appropriate. A key course dynamic will be the interplay between producers and consumers of technology as common ethical dilemmas are approached from both viewpoints. The topics covered will include: problem-solving in the context of ethics and codes of conduct, professional societies, working as a member of a team and international issues, as well as how to be a productive and contributing professional.

**PR-433 Death and Dying****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, ISP

A study of attempts to understand the meaning of death and the cultural practices that surround death and dying. The disciplines represented include: bioethics, literature, and philosophy.

**PR-434 Immigration and the United States****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): ISP

Traces the historical experience of immigrants in the U.S., examines their place in the stratification system, the forms of prejudice and discrimination they have encountered, and their patterns of assimilation into the larger society. The disciplines of History and Sociology are used to examine problems, including social and ethical issues, encountered by immigrants, United States citizens, and policy makers. Topics will include a historical examination of immigration policy, push/pull factors that influence immigration, and settlement patterns within the United States. Prepares students to identify immigration problems and research solutions.

**PR-435 The Way and the Word Hinduism****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): ISP

A comparison of classic texts central to two Asian traditions, The Bhagavad Gita and The Analects; the impact of the ethos of each tradition on secular narratives, Asian and Western. The disciplines represented include Comparative Religion and Literature. Also listed as RS-435.

**PR-436 Urban Legends**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

This is an interdisciplinary course that utilizes the disciplines of history, anthropology, media studies, psychology, and social psychology to examine urban legends from various perspectives. In this class, we will focus primarily on United States (U.S.) thought and culture, through an examination of the urban legend, in an attempt to map the American mind through a discussion of urban legends as moral panics, popular assumptions, and mass hysteria with a focus on race, gender and class.

**Credits: 3****PR-437 Perspectives on the Human Experiences: Family Violence****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): ISP

Designed as an interactive seminar course that engages students in interactive discussions and experiential exercises related to understanding and working with families who have experienced violence, including both survivors and perpetrators. The impact of culture on family violence across intergenerational family members (e.g., children, parents, and grandparents) and diverse populations and settings are thoroughly reviewed. Students learn a strengths-based empowerment approach and application of resiliency theory to assessment, prevention, intervention planning, and evaluation of individuals, families, and communities impacted by abuse and violence.

**PR-438 Nature of the Self: East and West****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

A comparative study of Asian and Western theories about the nature and definition of self using an interdisciplinary approach - philosophy, religion, and history. .

**PR-439 Interdisciplinary Perspective on Social Business****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): ISP

Micro-credit has become one of the most successful social business interventions in addressing poverty in the developing world. As a successful initiative, it is now traveling from the developing world to the developed world. Addresses the historical, philosophical, and theoretical underpinnings of social business, and will explore in an interdisciplinary approach the ethical and social issues related to social business. Social business, itself, is cross-disciplinary, providing a basis for working together, transcending our differences across disciplinary lines, and envisioning creating a world without poverty.

**PR-441 Countercultures in American History****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

Explores countercultures in the United States from multiple-disciplinary perspectives including history, literature, and sociology. Elements from philosophy and psychology will also be included. The course will show that the counterculture in the 1960's was just one historical manifestation of American historical movements that are anti-authoritarian and espouse personal and/or societal transformation/regeneration. By examining different groups, the course will show that countercultures have a legacy of change in American society.

**PR-442 Modern Images, Irrational Thought****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

Philosophy from the time of Plato has been an evolution of ideas, one set replaced by another, in a dialogue that changes from what has become accepted as normal to an ever changing view derived from rational thought as it relates to the present and the projected future. As in Philosophy, Art has a cyclical evolution; 1) an initial intuitive leap of newness, 2) a refinement and loosely agreed upon normalcy and 3) a stage, for lack of better description, "Istic," where nothing new is brought about and contributors either branch out or embellish what they can't penetrate with a new leap. Through the two main disciplines of Art and Philosophy, the course will investigate changes in rationality in the late nineteenth Century and trace their movements and influences into the twenty-first.

**PR-443 ESP, Yesterday and Today****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

From the first Paleolithic Shaman to Madam Marie on the Boardwalk in the twenty-first Century, civilizations have been fascinated by visionaries, mediums, psychics, and those who claim to channel entities from alternative realities. Clairvoyance, Telepathy, Astral Projection, and Psychokinesis are all part of the hidden, or sixth sense referred to as Telesthesia. The idea has surfaced and influenced mankind from Egyptian Soothsayers, the Oracle of Delphi, Revelations in the Bible, Nostradamus, Madam Blavatsky, Edgar Cayce, and as recently as Jane Roberts in the late twentieth century and is taking modern form in the concept of The New Age. Through the main disciplines of History and Psychology, this course will investigate the ever-changing social attitudes and beliefs concerning Extra Sensory Perception from the cave dwellers to the modern carnival.

**PR-444 Leadership, Public Health, and Higher Education****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): ISP

The disciplines represented in this course are Education and Health Studies. Content focuses on problems, including social and ethical issues, encountered by leaders in Higher Education and Public Health. Topics will include leadership theories, practice, and evaluation. Prepares students to identify problems, research solutions, implement plans, and evaluate results that advance the mission of non-profit organizations committed to improving public health and institutions of Higher Education. Emphasis will be placed on issues involved in Higher Education and Public Health.

**PR-445 Race, Satire, and the Black Aesthetic****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

This is an upper division course on race in American satire in relation to the Black aesthetic as exemplified in film and other forms of mass media in the twentieth century. Spike Lee films are a major focus in this class within the larger framework of U.S. history, society and culture. Lee is one of the major architects of the Post-Soul Aesthetic and sledgehammer satire. This class will consider various Spike Lee films from multiple disciplinary perspectives including history, film studies, sociology, and gender studies with an emphasis on the disciplines of history and media studies. We will critically examine Lee's work within the broad historical framework of African American intellectual history and in terms of his engagement with controversial social, political, and economic issues in American society within his work. These films will also be analyzed for the aestheticization of larger historical, cultural, and social aspects of U.S. society. The two main disciplines utilized in this course include: African American intellectual history and media studies.

**PR-446 The Confessional Poets: Surviving Madness****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

An exploration of the works of key figures in the confessional style of contemporary American poetry. These poets suffered multiple levels of mental anguish and used confessional poetry to share and heal their suffering, as they attempted to survive their lives.

**PR-447 A Graphic World: Sequential Art and World History****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

An interdisciplinary course that will use the perspectives of historical, literary, and artistic analysis to examine important themes such as, but not limited to, nationalism, inequality, industrialization, war, religion, or cultural diffusion, through the medium of the graphic novel.

**PR-448 Ecocriticism and Medieval England****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

An ecocritical study of historical documents and literary texts in medieval England.

**PR-449 The Helping Professions in Film and Media****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): ISP

Provides students an opportunity to look at ethical and social issues from a multidisciplinary perspective. Looks at the helping professions (for example: teachers, counselors, and medical professions), how the codes of ethics for these professions are similar but different, and how these professions have been villainized and romanticized in film.

**PR-451 Ethnic and Religious Conflicts and Their Political Implications****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

Examines the relationship between ethnicity, nationalism and violence. Focus will be on the formation and the causes that ignite ethnic conflicts. Discussion of the political tools and strategies to manage them as well as the role of international communities in preventing and resolving these conflicts. To understand the international implications of the ethnic conflict we shall examine examples from around the world but we shall focus mainly on five cases: Yugoslavia, Rwanda, Ireland, Russia, and Palestine.

**PR-452 and its Role in Modern Society and its Role in Modern Society****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): ISP

Designed to allow students to examine Theatre in intense and very specific ways using and examining the literature and visual arts aspects of theatre. The course content will focus on the Summer season of the Shadow Lawn Stage or an appropriate selection of plays during the academic year. Students will not only discuss in class the plays being performed, but will also have the experience of watching them being designed, constructed, and rehearsed. .

**PR-453 Censoring Culture: Banned and Burned in the USA****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

An interdisciplinary study of censorship in modern America. Utilizing the combined methodologies of history and literary criticism, broadly construed to include feminist and cultural theory, it will explore specific instances of censorship in art, literature and history in twentieth- and twenty-first-century American culture. It will focus on the "reading" of censored texts, novels, paintings, photographs, newspapers and film as cultural artifacts and probe the nuances and boundaries of freedom of speech and expression in a democratic society.

**PR-454 Word and Image****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): ISP

Explores the relationship between the two basic modes of representation in our culture - words and pictures. The interaction between the two will be investigated historically and theoretically through a close examination of a variety of media, from books and posters to comics and Web sites. Emphasis is on the power of word-image representations to define social and ethical concerns and also shape our lives, as well as on the beauty of some works of "composite art" created by poets and artists, from William Blake to Art Spiegelman.

**PR-456 Right Wing Extremism in Europe****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): ISP

Presents a comparative analysis of several far-right organizations in Western Europe as well as the characteristics of the right wing extremism in Eastern Europe. The course will identify the causes that led to the popularity of these groups, sub-culture of the skin-heads and the neo-Nazi and the attitude of the far right groups in Eastern Europe towards the Roma population. We shall also analyze their consequences for the political stability and democracy in the European Union.

**PR-457 Issues in Cognitive Science****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): ISP

Focuses on a number of key ideas about mental representations (e.g., logic, rules, concepts, and analogies) and contrasts how work in psychology (e.g., building computational models) helps us to evaluate their suitability as models of the human mind and of the nature of intelligence in general. Cognitive Science is an inherently interdisciplinary approach to the study of the mind and intelligence, drawing upon work in philosophy, psychology, artificial intelligence, neuroscience, linguistics and anthropology. The course will touch on many of these areas, but the focus is work in the disciplines of psychology and artificial intelligence. The course will also cover the ethical implications of work in cognitive science.

**PR-458 The Meaning of Meaning****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): ISP

Focuses on the various perspectives about meaning that have developed in the philosophical literature and their applications to actual language use as uncovered by linguists and anthropologists. Efforts to understand the meaning of meaning have been carried out in a variety of disciplines; philosophy, psychology, literary studies, artificial intelligence, linguistics and anthropology. Although the course will touch on many of these areas, the focus is on the work in the disciplines of philosophy, linguistics, and anthropology. The course will also cover the social and ethical implications of the different approaches to the meaning of meaning.

**PR-459 The Science and Politics of Climate Change****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP, SUS

Earth's climate has changed in the past and will change in the future; however, current climate science describes a rate of climate change expected in the next hundred years that is similar to those experienced during mass extinctions in the past. This rate of change implies emergency conditions for most living creatures including man, and a need for urgent action if human caused contributions to climate change are to be stopped or slowed. This course will examine the science and politics of climate change with an emphasis on understanding the physical science behind climate change, the biological impacts of changing climate in a variety of biomes, suggested political and physical remediation and the political consequences of suggested remediation. This course will also examine the actions of certain lobbyists, political parties, and multinational corporations and their impacts on the politics of climate change.

**PR-460 How Technology Affects Values****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): ISP

The correlation of values to technology; conceptualization of the interrelationships among science, technology, values, and society. Preparing to understand technical innovation, the impact of technical innovations on the quality of life, and the need for critical evaluation of societal matters involving the consequences of technology. The disciplines represented include History and Sociology.

**PR-461 The Great Recession and its Effect on Society****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): ISP

The Great Recession officially began in December 2007 and ended in June 2009. The severity and extended duration of the second biggest economic downturn in history have inflicted long-lasting damage on individuals, families, and communities. This course will explore the historical sequence of events, similarities with the Great Depression, business and government decisions, and the theoretical underpinnings culminating in the Great Recession. Emphasis is given to the evaluation of the aftermath- the severe adverse effect on society! The course explores economics, decision-making, ethics, political and social issues - knowledge essential to the intellectual development of future leaders.

**PR-462 Palestinian-Israeli Relations****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): ISP

Palestinian-Israeli relations are critically examined within the historical, political, postcolonial, and ethical contexts of Arab-Jewish and Arab-Israeli relations. The dual-narrative method is used, as are several documentaries and films that represent the perspectives of both Palestinians and Israelis. These are studied to understand how and why filmmakers portray Palestinian-Israeli relations the way they do and how these cinematic works challenge our conceptions of reality. History, political science, ethics, and film studies will be joined to provide an interdisciplinary perspective on the relations between Palestinians and Israelis.

**PR-463 Dissent in America****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): ISP

An interdisciplinary survey of the core American value of dissent. Students will read and interpret the evolution of dissent in America since colonial times. The focus will be on why dissent occurs and its impact on America. Students will examine this topic through a diverse range of disciplines such as history, political science, and sociology. With lecture providing background and context followed by class discussion, self-reflection and critical comparative analysis will be utilized. Students will be active participants through the use of Bloom's assessing outcomes.

**PR-464 American Popular Culture and Beatles****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

Explores the relationship between American popular culture and the Beatles from the perspectives of the disciplines of History and Communication, with a special emphasis on cultural studies, political economy, issues of authenticity, and reception theory. In this course, students will examine the ways in which American popular culture influenced the life and times of the Beatles and, in turn, the impact the Beatles had upon American popular culture. The course will trace not only the American musical influences on the Beatles, but also the role played by television, films, and the mass media both on the Beatles and the changing cultural landscape in the United States and Britain in the 1950s and 1960s. This course fulfills the Interdisciplinary Perspectives General Education Requirement.

**PR-465 Music and Religion****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): AT, ISP

This course explores the relationship between music and religion from a global perspective, examining ideas, values, and practices of music and sound in various religions and spiritual traditions around the world. In addition to learning about the music-cultures (context, instruments, repertoire, etc.) that coincide with various religious traditions, students will be encouraged to consider how worldview and ideology lend to differing perceptions of musical meaning, performance, form, symbolism, and the importance of sound, generally. This survey covers the most prominent world religions (Hinduism, Buddhism, Judaism, Christianity, and Islam) and their denominations, as well as Central Asian Shamanism, Japanese Shinto rituals, and religious traditions of Native Americans. Syncretic religious practices in the Americas, including, African American gospel music, Brazilian Candomblé, Cuban Santería, Haitian Voodoo, and Jamaican Rastafarianism are also presented to examine global issues such as colonization, transculturation, and the localization of culture and religion. Drawing upon academic articles, indigenous texts, musical recordings, and videos, students can expect to be introduced to a number of theoretical dimensions that arise within studies of music and religion globally. Also listed as RS-465.

**PR-467 Eco-Self: The Human-Nature Relationship****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): ISP

This course brings together eco-art, environmental writing and the newer, and often contested, field of eco-psychology to deepen our understanding of the human/nature relationship. Using the tradition of the "field journal", students will become amateur naturalists and use the creative arts, close observation, and critical thinking to better understanding their own relationship with nature, learn more about a place site of their choosing, and investigate larger societies' relationship with nature.

**PR-468 Fictional Politics in Literature, Film, and Television****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

An examination of the role of fictional depictions of politics in the ways that people develop a lens through which they view political power. Authors and media creators use their creative products to make arguments about politics. Through close readings of novels, film, and television shows we will look at the ways that culture depicts American politics and the effects of those depictions. We will use the theories and methods of several disciplines including political science and communication (rhetoric and media criticism).

**PR-469 Mind Over Matter****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

Will provide students with an overview of two conflicting explanations of how the mind works to define the universe, the interactions of mind/body in relation to the 21st Century, and consideration of ethical and social issues.

**PR-470 War and Peace****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

An exploration of the forces leading toward war and peace in our century. Through literature, history, and sociology, the course looks at the dynamics of the two world wars, the development and use of nuclear weapons and the subsequent arms race, and rapidly evolving, current situations, such as the dissolution of the Soviet Union, tensions in the Middle East, and the role of the United States in the "New World Order." The disciplines represented in the course include Literature, History, and Sociology.

**PR-471 The Historical Novel****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): ISP

Explores the history of the historical novel from Sir Walter Scott to the present and the impact that historical novels have on the way in which we perceive the past. Students will examine the ways in which the authors of historical novels are influenced by the times in which they are writing and the dynamic relationship between the times of the author and the historical period about which he or she is writing. The course will also trace developments in both history and literature that have contributed to the evolution of the historical novel in the past two centuries.

**PR-472 Management Lessons Through the Arts and Literature Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): ISP

Bridges business management with the arts and literature. Students will explore the link between management practices and some of the great works of literature, theatre, poetry, music, art, architecture, photography, film, and television.

**PR-473 Twentieth Century Psychoanalysis****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

Psychoanalysis has been one of the most influential and controversial traditions in 20th century and contemporary thought. What began as a method for healing psychic neuroses in suffering patients has developed into a philosophical paradigm for conceptualizing the human condition. Ironically banished from a meaningful place in psychology departments, psychoanalysis has found willing disciples in literature, sociology, philosophy and mostly left-wing politics. Yet, psychoanalysis has been adopted as an interpretative framework by both rightists and leftists, by conservatives and liberals alike. The interdisciplinary nature of psychoanalysis makes it fruitful for a humanities-oriented perspective course. This class concentrates on the intersection of psychoanalysis with literature and philosophy. It seeks to study the cultural and social significance of psychoanalysis through the material impact of literature and philosophy.

**PR-474 Indigenous Thought and Sustainability****Credits: 3**

Term Offered: All Terms

Course Type(s): ISP

This interdisciplinary course involves political theory, comparative politics, some biophysical science to understand environmental systems, and Indigenous studies, which itself involves at least art (of many kinds), anthropology, law, linguistics, sociology, history, ethics, and philosophy. We will compare and analyze Indigenous thought as it is presented by Indigenous authors and leaders as well as other academic literature. Indigenous thought consistently intersects with how to be a good ancestor, how to think about human, the non-human, and the land in order to maintain a good life and a healthy world-or, sustainability.

**PR-475 Bruce Springsteen's America: Land of Hope and Dreams****Credits: 3**

Term Offered: All Terms

Course Type(s): ISP

This interdisciplinary course focuses on the life, times, music and lyrics of Bruce Springsteen as they relate to American history and culture in the twentieth and early twenty-first centuries, using the disciplines of history and music.

**PR-481 Applied Rationality****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): ISP

The most powerful ability a person can have is the ability to think effectively. As humans, we are subject to an overwhelming variety of cognitive biases and other limitations to our reasoning powers; however, lying in the multidisciplinary nexus of the behavioral sciences and probability theory, there are tools for overcoming these limits. Come and proactively engage with the unseen forces that work upon us and through hands-on-activities, writing, and in-depth readings, become a more effective, indeed more rational, thinker.

**PR-483 Cold War Perspectives****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): ISP

An interdisciplinary study of the ethical dilemmas of the Cold War, considering approaches from history, the social sciences, literature, and the arts.

**PR-487 The Story of the Book****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

This course explores the history of the book and its timeless presence as one of the world's greatest and enduring inventions. From the perspectives of the disciplines of English, History, and Library Science, a holistic emphasis is placed on the book, which extends from its materiality and its cultural and historical impact, to concepts of textual originality and authenticity. Students will examine and learn about the earliest examples of portable writing-from scrolls and Roman codices-to the early days of Gutenberg and onward to new developments such as the graphic novel and the artist book. This course fulfills the Interdisciplinary Perspectives General Education Requirement.

**PR-490 Revolution and Creative Response****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

Revolution and Creative Response will study three revolutions: the Industrial Revolution, the Soviet Revolution, and the South African Revolution - the historical conditions, the critical events, and the central people. It will then analyze how certain artists responded or reacted to these. Combines elements of history and textual analysis (the methods used in the study of literature or film).

**PR-498 Special Topics in Perspectives (400 Level)****Credits: 3**

Prerequisite(s): Completion of eighty-seven credits

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in perspectives to be announced prior to registration.

## Philosophy (PL)

**PL-101 Introduction to Philosophy****Credits: 3**

Term Offered: All Terms

Course Type(s): None

A historico-critical inquiry into the nature of the philosophical enterprise; the meaning of existence; knowledge and truth; and values in their religious, ethical, and aesthetic significance.

**PL-104 Ethics****Credits: 3**

Term Offered: All Terms

Course Type(s): SJL

Theoretical ethics and its application to enduring and contemporary moral issues. Thorough examination of the basic principles of a rational, humane, and practical moral system. Also listed as RS-104.

**PL-106 Elementary Logic****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

A consideration of valid reasoning as it relates to language and definition. Primary attention is given to discerning and identifying informal fallacies, techniques for determining the validity of inference, and the evolution of symbolic systems. Recommended for students preparing to take the GRE or LSAT.

**PL-198 Special Topics in Philosophy (100 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in philosophy to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**PL-201 Philosophy of Religion****Credits: 3**

Prerequisite(s): PL-101

Term Offered: Spring Term

Course Type(s): None

An examination of certain salient features of Western religious thought, emphasizing the problems of religious language, the nature and validity of religious experience, traditional and contemporary ideas of God, morality, death, and evil. Also listed as RS-201.

**PL-202 Great Issues in World Philosophy****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

An examination of great philosophical works from several cultural traditions. The course uses original works from Western, Indian, and Chinese civilizations to focus on philosophical approaches to a cluster of "great issues" while putting the philosophers and their works in historical context.

**PL-202H Great Issues in World Philosophy****Credits: 3**

Term Offered: Spring Term

Course Type(s): HO

Critical investigation of some of the critical ideas and arguments that have been defended and promoted by thinkers in a variety of cultures.

Open only to students in the Honors Program.

**PL-203 Philosophy of Language****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Investigation of questions about the concepts of language, meaning, and understanding. Consideration of some of the major contributions on these and related concepts.

**PL-204 Existentialism****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Existentialism is about what it means to be an individual who has to create a meaning for his or her own life. Establish the context for existentialism within the history of philosophy as a whole, but also consider the impact that existentialist ideas have generally had in literature, art, and culture.

**PL-205 Ethics and Literature****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Explore the nature of ethical problems and theories through philosophy and literature.

**PL-210 Philosophy in Film****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

An introduction to philosophy using films in conjunction with traditional readings. Study some of the most important questions in the history of philosophy, such as: the nature of reality and its relationship to appearances, the nature of the self, human and artificial intelligence, the possibility of freedom, the nature of ethics, and the theory of meaning.

**PL-211 Social and Political Philosophy****Credits: 3**

Course Type(s): None

Comparative study of the philosophical assumptions underlying significant Western conceptions of social order and community.

**PL-212 The Christian Intellectual Tradition****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Students will explore the history of Christianity through some of its most provocative and significant "turning points." They will study both the historical context and the intellectual particulars of theological and philosophical debates over the origins of the universe, the humanity of Jesus Christ, the formation of the biblical canon, the nature of religious reformation, the nature of God, and the role of religion in public life. Also listed as RS-212.

**PL-216 Religions and Philosophies of India****Credits: 3**

Term Offered: Spring Term

Course Type(s): BI.EL, CD, CC

Introduction to the fundamental elements of the orthodox and non-orthodox philosophical and religious systems of India. Highlights plurality of timeless distinct gnostic systems that, having discovered the "Self," search for liberation from the stream of time. Also listed as RS-216.

**PL-250 History of Philosophy I****Credits: 3**

Course Type(s): None

The beginning of philosophical speculation in Ionia, its golden age in Athens, the Roman interlude, and the flourish and decline of medieval philosophy.

**PL-260 Informal Logic****Credits: 3**

Term Offered: All Terms

Course Type(s): RD

An introduction to some of the most important principles of informal logic. Topics include: concepts, classification, definitions, propositions, argument structure, diagramming arguments, explanation, and fallacies.

**PL-277 Comparative Religions****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, GU, RE

Students are introduced to the fundamental differences and similarities of world religions that, throughout history, were and are at war with each other. Highlights a plurality of distinct creeds that, postulating an Absolute Truth, search to regain that Ultimate Reality through various ways of life or moral codes. Also listed as RS-277.

**PL-298 Special Topics in Philosophy (200 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in philosophy to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**PL-298H Special Topics in Philosophy (200 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): HO

An intensive study of a particular subject or problem in philosophy to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. Only open to students in the Honors Program. If a prerequisite is required it will be announced in the course schedule.

**PL-299 Independent Study in Philosophy****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Guided research on selected topics; conference with sponsoring professor. Prior permission of the directing professor and department chair is required to take this course.

**PL-305 Philosophy of Art****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Place of beauty and art in human life; standards of taste and aesthetic experience; classical and contemporary theories.

**PL-307 American Philosophy**

Prerequisite(s): PL-101

Term Offered: Spring Term

Course Type(s): None

Classical and contemporary philosophical theories developed in the United States by such philosophers as Jonathan Edwards, Emerson, Royce, Santayana, James, Dewey, and Whitehead.

**Credits: 3****PL-316 The Modern Mind: From Descartes to the Present**

Prerequisite(s): 3 credits in Philosophy

Term Offered: Spring Term

Course Type(s): None

A systematic study of the central theses of philosophers and philosophical schools from early Continental Rationalism and British Empiricism to the contemporary patterns of philosophical thought.

**Credits: 3****PL-324 American Political Thought**

Prerequisite(s): PS-102 or PS-103

Course Type(s): PSAM

The development of political thought in the United States with emphasis on the late nineteenth- and twentieth-century philosophers and statesmen, along with the development of ideology of groups in American politics. Also listed as PS-324.

**Credits: 3****PL-340 Plato's Dialogues**

Term Offered: Spring Term

Course Type(s): RD

A critical study of Plato's dialogues, with a particular emphasis on the role that reasoned oral discourse plays in these texts.

**Credits: 3****PL-350 Multicultural Ethics**

Term Offered: Spring Term

Course Type(s): CD, RE

A study of some of the most influential authors in the history of ethical history, and also feminist and multicultural criticism of those classic sources.

**Credits: 3****PL-360 Philosophy and Literature**

Term Offered: Spring Term

Course Type(s): RD

An exploration of the intersections of philosophy and literature with a particular focus on questions concerning the nature of authorship and moral authority.

**Credits: 3****PL-370 Multicultural Social and Political Philosophy**

Term Offered: Spring Term

Course Type(s): CD, RE

A study of some of the most influential authors in the history of social and political philosophy, and also feminist and multicultural criticism of those classic sources.

**Credits: 3****PL-398 Special Topics in Philosophy (300 Level)**

Course Type(s): None

An intensive study of a particular subject or problem in philosophy to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**Credits: 1-3****PL-490 Seminar in Philosophy**

Course Type(s): None

Selected topics in which participating students present and discuss research papers. Approval of the philosophy faculty at the recommendation of the instructor is required for the student to take this course.

**Credits: 3****PL-498 Special Topics in Philosophy (400 Level)**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in philosophy to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**Credits: 1-3****PL-499 Individual Studies in Philosophy**

Prerequisite(s): Junior standing, twelve credits of Philosophy, and prior permission of the directing professor and department chair

Term Offered: All Terms

Course Type(s): None

Guided research on selected topics; conference with sponsoring professor. Junior standing, twelve credits of Philosophy, prior permission of the directing professor and department chair is required to register for this class.

**Credits: 3**

## Physical Education (PE)

**PE-103 Surfing**

Term Offered: Summer Term

Course Type(s): OUTDR

Students will learn the basic skills, history, etiquette, and strategy of surfing. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to surfing. The analysis of skills, etiquette, safety considerations, and strategy will be covered. This course is a physical activity skills course. Skills course: Outdoor Pursuits(Individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode. Student must know how to swim and will be tested by the instruction on their swimming ability.

**Credits: 1****PE-104 Biking**

Term Offered: Fall Term

Course Type(s): OUTDR

Students will learn the basic skills, safety, maintenance, and strategy for bike riding. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to riding and maintaining a bike. The analysis of skills, rules, safety considerations, and strategy will be covered. This course is a physical activity skills course. Skills course: Outdoor Pursuits(Individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**Credits: 1****PE-105 Bowling**

Term Offered: All Terms

Course Type(s): PERF

Students will learn the basic skills, history, rules and strategy for ten-pin bowling. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to ten-pin bowling. The analysis of skills, rules, safety considerations, and strategy of play will be covered. This course is a physical activity skills course. Skills course: Individual-Performance Activities (individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**Credits: 1**

**PE-106 Target and Reaction Games****Credits: 1**

Term Offered: Spring Term

Course Type(s): OUTDR

Students will learn the basic skills, rules and strategies for a variety of target and reaction games. The course will help students develop skills and strategies in target games such as baggo, disc golf, and foot golf. Students will also apply concepts of positioning, anticipation, and decision-making in reaction games such as Rampshot, paddle slam, and KanJam. This course is a physical activity skills course. Skills course: Outdoor Pursuits (Dual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-107 Pickleball****Credits: 1**

Term Offered: Spring Term

Course Type(s): PERF

Students will learn the basic skills, history, etiquette, and strategy of pickleball. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to pickleball. The analysis of skills, etiquette, safety considerations, and strategy will be covered. This course is a physical activity skills course. Skills course: Individual-performance (Dual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-110 Swimming****Credits: 1**

Term Offered: All Terms

Course Type(s): AQUA

Provides a comprehensive foundation for recreational swimming. Students will learn and practice skills associated with proper stroke development, water safety, and improved general fitness. This course is a physical activity skills course. Skills course: Aquatics (individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-112 Lifeguard Certification/Water Safety****Credits: 2**

Term Offered: All Terms

Course Type(s): AQUA

Lifeguard Certification and Water Safety will prepare the student to work as a pool lifeguard. Upon completing the course the student will be able to take American Red Lifesaving and Standard First Aid and CPR for the Professional Rescuer exams. If the student properly performs all required skills and passes all written examinations with a score of 80% or higher the student will earn the American Red Cross Lifeguard Certification. This course is a physical activity skills course. Skills course: Aquatics(Individual). This is a pass/fail course. Student must know how to swim and will be tested by the instruction on their swimming ability.

**PE-116 Badminton****Credits: 1**

Term Offered: All Terms

Course Type(s): PERF

Learn basic skills, history, rules and strategy for a single and double game in badminton. This course is a physical activity skills course. Skills course: Individual-Performance Activities (dual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-117 Social Dance I****Credits: 1**

Term Offered: All Terms

Course Type(s): RHYTH

Students will learn a comprehensive framework for exploring the various dimensions of dance and its significance in contemporary society. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques to increase competence in dance and rhythmic activities. The analysis of skills, basic choreography, etiquette, and safety will be covered. This course is a physical activity skills course. Skills course: Dance/Rhythmic Activities. This is a Pass/Fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode. Also listed as DA-117. This is a pass/fail course.

**PE-118 Social Dance II****Credits: 1**

Term Offered: Spring Term

Course Type(s): RHYTH

Provides a comprehensive foundation for both men and women to successfully perform on any social dance floor. Students will learn introductory steps of the Hustle, Salsa, and Tango. Intermediate/advanced skills of the Viennese Waltz, Foxtrot, and East Coast Swing will be taught. A minimum of eight step patterns per dance will be introduced. Students will practice dance etiquette and social skills, leading to increased confidence for social dancing and improved fitness. In addition, "partner" dance positions and keeping music tempos will be addressed. This course is a physical activity skills course. Skills course: Rhythmic (dual). To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode. This is a pass/fail course. Also listed as DA-118.

**PE-119 Golf I****Credits: 1**

Term Offered: All Terms

Course Type(s): PERF

Introduces the basic golf fundamentals, such as basic swings, equipment, rules, terms of the game, drills, etiquette, and playing the course. This course is a physical activity skills course. Skills course: Individual-Performance Activities (individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-122 Ultimate Frisbee****Credits: 1**

Course Type(s): GAMES

Students will learn the basic skills, history, rules and strategy for ultimate frisbee. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to game play. The analysis of skills, rules, safety considerations, and strategy of play will be covered. This course is a physical activity skills course. Skills course: Games and Sports (team). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-125 Tennis****Credits: 1**

Course Type(s): PERF

Students will learn the basic skills, history, rules and strategy for a singles and doubles game in tennis. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to game play. The analysis of skills, rules, safety consideration and strategy of play will be covered. This course is a physical activity skills course. Skills course: Individual-Performance Activities (dual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-127 Volleyball****Credits: 1**

Course Type(s): GAMES

Students will learn the basic skills, history, rules and strategy for playing the team sport of volleyball. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to game play. The analysis of skills, rules, safety consideration and strategy of play will be covered. This course is a physical activity skills course. Skills course: Games and Sports (team). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-128 Yoga****Credits: 1**

Term Offered: All Terms

Course Type(s): FIT, HY, OL

Students will learn and practice basic styles of Hatha Yoga. A combination of asanas (physical postures), breathing techniques and relaxation/meditation methods will help students improve fitness levels, reduce stress and enhance mind-body awareness. Emphasis will be placed on proper body alignment and exercise safety. This course is a physical activity skills course. Skills course: Rhythmic (individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-130 Basketball****Credits: 1**

Term Offered: All Terms

Course Type(s): GAMES

Students will learn the basic skills, history, rules and strategy for playing the team sport of basketball. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to game play. The analysis of skills, rules, safety consideration and strategy of play will be covered. This course is a physical activity skills course. Skills course: Games and Sports (team). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-131 Soccer****Credits: 1**

Term Offered: All Terms

Course Type(s): GAMES

Students are provided with learning experiences that will serve as a basic foundation for teaching the team sport of soccer. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to game play. The analysis of skills, rules, safety consideration and strategy of play will be covered. This course is a physical activity skills course. Skills course: Games and Sports (team). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-132 Softball****Credits: 1**

Term Offered: Fall Term

Course Type(s): GAMES

Students will learn the basic skills, history, rules and strategy for playing the team sport of softball. The main emphasis will be placed on skill acquisition with focus on specific movements and techniques important to game play. The analysis of skills, rules, safety consideration and strategy of play will be covered. This course is a physical activity skills course. Skills course: Games and Sports (team). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-142 Pilates****Credits: 1**

Term Offered: All Terms

Course Type(s): FIT

Students will apply the principles of Pilates exercises to improve the strength, flexibility and endurance of the core muscles. Consistent Pilates exercise practice will help to improve posture, balance, and coordination; relieve pain and tension; and enhance athletic performance. Students will learn and practice the proper form and technique for a variety of Pilates exercises. Emphasis will be placed on proper body alignment, mind-body awareness and exercise safety. This course is a physical activity skills course. Skills course: Fitness (Individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-143 Endurance Running****Credits: 1**

Course Type(s): FIT, OL, HY

Working together to develop and achieve individual endurance running goals while cultivating a life-long love of running in a low-stress, social atmosphere. Pre-and post-run discussions focus on select topics about the history, science, and culture of running. This course is a physical activity skills course. Skills course: Fitness (individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-144 T'ai Chi****Credits: 1**

Term Offered: All Terms

Course Type(s): FIT, HY, OL

Students will improve health, mental focus and overall well-being through the practice of QiGong and T'ai Chi. Often called "meditation in motion," this ancient Chinese form of exercise blends graceful flowing movements with breathing and relaxation techniques. Students will learn proper form and technique for a variety of movements, eventually combining them into a simplified adaptation of the Yang Short form of T'ai Chi. Particular emphasis will be placed on the use of T'ai Chi and QiGong to reduce stress and anxiety. This course is a physical activity skills course. Skills course: Fitness Activity. (Individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-156 High Intensity Interval Training****Credits: 1**

Term Offered: Spring Term

Course Type(s): FIT

Learn about and practice low and high intensity cardiorespiratory activities. Activities will also focus on flexibility, muscular endurance and strength. This course is a physical activity skills course. Skills course: Fitness This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**PE-161 Self Defense**

Term Offered: All Terms

Course Type(s): PERF

Designed to give the student an opportunity to experience physical activity through martial arts training at an introductory level. This course is a physical activity skills course. Skills course: Individual-Performance Activities (Individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**Credits: 1****PE-163 Weight Training**

Term Offered: All Terms

Course Type(s): FIT

Students will develop and practice an individualized, weight-training program using free weights and resistance machines. Proper training techniques, exercise safety and improvement of health and fitness will be emphasized. This course is a physical activity skills course. Skills course: Fitness (Individual). This is a pass/fail course. To pass the course, students must earn the specified amount of points required in three evaluation categories: participation, performance assessment, and a teaching episode.

**Credits: 1****PE-198 Special Topics in Physical Education**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject in physical education to be announced prior to registration. If a prerequisite is required it will be announced in the course schedule.

**Credits: 1****PE-199 Independent Study in Physical Education**

Course Type(s): None

Focus on an area in Physical Education under the direction of a Physical Education faculty member. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 1****PE-201 First Aid/CPR/AED Certification**

Term Offered: All Terms

Course Type(s): PERF

Safety problems that affect the individual, the community, and the nation: a standard course in first aid, including adult, child, and infant First Aid/CPR/AED. If the student attends all courses, properly performs all required skills and passes all written examinations, the student will earn the American Red Cross Adult/Child/Infant First Aid/CPR/AED Certification. This course is a physical activity skills course. Skills course: Individual-Performance Activities (Individual). This is a pass/fail course.

**Credits: 2****PE-203 Instructional Strategies in Physical Education and Health****Credits: 3**

Term Offered: Spring Term

Course Type(s): HEPE

This course is designed to introduce future professionals to effective teaching strategies and skills within the context of physical education and health. Grounded by national and state teaching standards, this course emphasizes academic language, curricular models, instructional styles, short- and long-term planning and implementation, instructional and managerial skills reflective practices, and professional responsibility. Lecture sessions are focused upon conceptual foundations of teaching physical education and health. Laboratory sessions devoted to "hands-on," practical applications and observational assessment of lecture concepts in a controlled environment with peers and children.

**PE-215 Fitness Concepts and Measurements****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Students will gain skills to assess key components of fitness including muscular strength and endurance, flexibility, cardiorespiratory fitness, and body composition. Students will build proficiencies in the design and implementation of exercise programs for both healthy individuals and those cleared for exercise by a medical professional. This course prepares students to take respected and accredited certifications such as the American College of Sports Medicine, the National Strength and Conditioning Association and others. Course content is delivered through lecture and hands-on laboratory experiences.

**PE-222 International Outdoor Adventure Education****Credits: 3**

Term Offered: Spring Term

Course Type(s): FLT, GU, HE.EL, HEPE, NU.EL, OUTDR

This faculty-led study abroad course is designed to introduce students to a variety of outdoor adventure activities in foreign countries while promoting cultural and global understanding. Lecture sessions at Monmouth University in the beginning of the course will highlight content knowledge related to outdoor adventure education, the theories and best practices for developing an outdoor adventure program, and students will explore their individual and collective responsibilities through analytical, practical, or creative responses to issues facing a globally interconnected society. While abroad, students will experience and reflect upon similarities and differences between a host of issuers (i.e., customs, norms, historical influences, language, religion, standard of living, food, art, music, dance, etc.) within the United States and the destination country. Students will describe how they see themselves within the context of that diversity and explore opportunities to interact in a global world. Student must pay additional travel expenses. This course also counts as a Physical Activity Skills Course. Skills Course: Outdoor Pursuits (Individual).

**PE-290 Open Water Scuba Certification Course****Credits: 2**

Course Type(s): MEBP, OUTDR

The Open Water Scuba Certification course entails completion of the Professional Association of Diving Instructors (PADI) Open Water Diver course, the world's most popular scuba course. Completion of this course leads to PADI scuba certification as an open water diver. This course is a physical activity skills course. Skills course: Outdoor Pursuits(Individual). This is a pass/fail course. Limited to 8 students. Also listed as BY-290.

**PE-310 Sport and Exercise Psychology****Credits: 3**

Prerequisite(s): EN-101, EN-102, and PY-103

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, WT

Explores the psychological determinants and consequences of physical activity, with an emphasis on psychological factors relevant to enhancing sport performance. Students will also analyze key theories in exercise psychology in order to understand exercise's influence on psychological health outcomes.

**PE-320 Exercise Physiology****Credits: 3**

Prerequisite(s): BY-111 or BY-211 and BY-112 or BY-212 and 3 credits from subject MA except MA-050, MA-100 and MA-103

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

A scientific foundation for understanding the physiological response and adaptation to exercise training. A comprehensive study of basic theories and practical applications of exercise physiology principles to physical education and sports performance. Focus on metabolic, cardiovascular-respiratory, neuromuscular-skeletal and endocrine systems as they relate to acute and chronic responses to exercise. Environmental concerns, cardiovascular disease risk factors and the immune response to exercise.

**PE-330 Biomechanics and Kinesiology****Credits: 3**

Prerequisite(s): MA-105 or higher and BY-111 or BY-211 and BY-112 or BY-212

Term Offered: All Terms

Course Type(s): HE.EL

Introduction to the major principles of biomechanics, providing students with foundational knowledge that allows for the systematic analysis of human movement. Emphasis is placed on analyzing key forces and movement in the context of sport and exercise.

**PE-340 Motor Development and Learning****Credits: 3**

Prerequisite(s): BY-111, BY-112 and 3 credits in Math except MA-050, MA-100, MA-101 or MA-103

Term Offered: All Terms

Course Type(s): HE.EL

Introduces students to the fundamental concepts of motor learning and development changes in human movement that occur over the lifespan. Basic research findings and applications of general human growth principles are discussed in relation to the development and acquisition of motor skills. Emphasis will also be placed on theoretical foundations for understanding motor learning principles that can be applied to the teaching and learning of physical activities.

**PE-350 School-Based Physical Activity****Credits: 4**

Term Offered: Fall Term

Course Type(s): EX3, HE.EL, HEPE

This experiential education service learning course is designed to introduce students to best practices for promoting physical activity in school-based programs in accordance with theoretical frameworks and empirical evidence associated with movement competencies, physical activity engagement, and prosocial skills for children. Lecture sessions will highlight pedagogical content knowledge related to the facilitation of standards-based, developmentally-appropriate developmentally-appropriate physical activity opportunities for children. Service learning sessions will provide opportunities for students to apply content via planning and facilitating physical activity in a school-based program.

**PE-351 Prevention and Care of Athletic Injuries****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

Students will gain foundational knowledge essential for the prevention, assessment, and management of athletic injuries. The course covers evidence-based practices in injury risk assessment, emergency action planning, rehabilitation strategies, and return-to-play protocols for diverse active and athletic populations, including those with special conditions. Students will gain proficiency in designing and implementing comprehensive injury prevention programs while understanding the physiological, biomechanical, and psychosocial factors that influence athletic injury and recovery.

**PE-360 Principles of Coaching****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE, HY, OL

A comprehensive introduction to the principles, knowledge, and skills that support effective coaching decisions and actions. This course combines national standards, sport science theory and research findings, with practical knowledge and best practices of expert coaches related to the five essential categories of coaching education and professional practice. An emphasis will be placed on the principles of coaching, behavior, teaching, physical training, and management. Ten hours of volunteer/observation are required in a local youth sport environment which can be completed across weekdays and weekends.

**PE-370 Strength and Conditioning Techniques****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, HEPE

This course is designed to prepare students for a career in a fitness, wellness, and exercise-science field. Lecture and laboratory sessions provide students with a hands-on approach to identifying exercises from different training modalities, developing proper exercise technique, selecting appropriate equipment/technology, and applying this information to best practices in teaching and coaching. The course contents include fundamental applications of exercise techniques which are relevant to careers in coaching, exercise science, health & fitness, rehabilitation as well as strength training and conditioning. Emphasis will be placed on weight training and Olympic lifting, body weight and implement training, balance and instability training, corrective exercise, ballistic training, speed and agility training, plyometric training, flexibility training, and facility design. This course helps prepare students for applied segments of certification exams, i.e. the Certified Strength and Conditioning Specialist exam offered by the National Strength and Conditioning Association.

**PE-389 Internship in Health and Physical Education****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX1, HE.EL, HEPE

Supervised, pre-professional field experience in health and physical education. The student will secure an internship site related to his/her interests and career goals. Potential internship sites include health and fitness clubs, community wellness agencies, coaching opportunities, hospitals, corporations, and private services. The student will work fifty hours per credit per term at his/her internship site. Students are required to obtain a faculty sponsor, develop learning objectives at the start of their internship, keep a journal of their internship activities throughout their placement, and write a final paper reflecting upon their internship experience. Also listed as HE-389. This is a pass/fail course. Junior standing (and others by permission of a faculty advisor), placement opportunity and approval by the Health and Physical Education Department are required to take this course. Limited to Physical Education majors only. Satisfies the Experiential Education General Education requirement.

**PE-398 Special Topics in Physical Education****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in physical education to be announced prior to registration. If a prerequisite is required it will be announced in the course schedule.

**PE-399 Independent Study in Physical Education****Credits: 1-3**

Term Offered: Summer Term

Course Type(s): None

Reading and research on a selected topic under the direction of a Physical Education faculty member. Prior permission of the directing professor and department chair is required to take this course.

**PE-410 Exercise Testing and Prescription****Credits: 4**

Prerequisite(s): HE-101, PE-320 and PE-330

Term Offered: All Terms

Course Type(s): HEPE

Provides the foundation of knowledge and skills necessary for assessing the health and physical fitness profile and developing effective exercise programs for healthy individuals and those with controlled chronic diseases.

**PE-411 Adapted Physical Education and Health****Credits: 3**

Term Offered: Fall Term

Course Type(s): CD, HE.EL, HEPE

This course introduces students to best practices for teaching individuals with disabilities skills related to health and physical education. Provides basic information on disabling conditions and on how to provide adapted physical education and health programs based upon an individual's assessed needs. It will also introduce students to best teaching practices for providing access to physical education and health curriculum for students with disabilities in inclusive settings. A clinical experience is an integral part of the course providing in school settings to gain practical experience in screening and assessment; identification, selection, and prescription of appropriate exercise programs and in teaching health to students with disabilities. Travel to and from the clinical site is the responsibility of the students.

**PE-489 Internship in Health and Physical Education****Credits: 1-3**

Term Offered: Summer Term

Course Type(s): EX1

Supervised, pre-professional field experience in health and physical education. The student will secure an internship site related to his/her interests and career goals. Potential internship sites include health and fitness clubs, community wellness agencies, coaching opportunities, hospitals, corporations, and private services. The student will work 50 hours per credit per term at his/her internship site. Students are required to obtain a faculty sponsor, develop learning objectives at the start of their internship, keep a journal of their internship activities throughout their placement, and write a final paper reflecting upon their internship experience. Limited to Physical Education majors only. Satisfies the Experiential Education General Education requirement. This is a pass/fail course.

**PE-499 Independent Study in Physical Education****Credits: 1-3**

Course Type(s): None

Reading and research on a selected topic under the direction of a Physical Education faculty member. Prior permission of the directing professor and department chair is required to take this course.

## Physics (PH)

**PH-101 Physics in Our Lives****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

Presents major concepts and methodologies in physics and their importance in today's society. Introduction to principles of physics and their applications to today's technology using lectures and demonstration.

**PH-103 The Physics of Sound and Music****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

Presents the topics of sound and music from a physics point of view. Covered topics are harmonic motion, waves (both traveling and standing), the human voice and ear, the production of music and musical scales and the physics of several representative instruments.

**PH-105 Physics for the Life Sciences I****Credits: 3**

Prerequisite(s): MA-101 or MA-109 or MA-115 or higher Math courses passed with grade of C- or higher.

Co-requisite(s): PH-105L

Term Offered: All Terms

Course Type(s): NS

An introduction to classical physics intended primarily for students majoring in the life sciences. Topics include: mechanics, dynamics, heat, electricity, magnetism, and optics.

**PH-105L Physics for the Life Sciences I Laboratory****Credits: 1**

Co-requisite(s): PH-105

Term Offered: All Terms

Course Type(s): None

Laboratory work to complement PH-105. Experiments in the fields of statics, dynamics, energy, momentum, heat, sound, electricity, magnetism, optics, and spectroscopy. Three hours per week.

**PH-106 Physics for the Life Sciences II****Credits: 3**

Prerequisite(s): PH-105 and PH-105L both passed with a grade of C- or higher

Co-requisite(s): PH-106L

Course Type(s): NS

An introduction to classical physics intended primarily for students majoring in the life sciences. Topics include, mechanics, dynamics, heat, electricity, magnetism, and optics.

**PH-106L Physics for the Life Sciences II Laboratory****Credits: 1**

Co-requisite(s): PH-106

Course Type(s): None

Laboratory work to complement PH-106. Experiments in the fields of sound, electricity, magnetism, optics, and spectroscopy. Three hours per week.

**PH-150 Principles of Astronomy****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

The historical development of astronomy and the modern concepts of the universe, including demonstrations and viewing sessions with optical telescopes.

**PH-199 Independent Study in Physics****Credits: 1**

Term Offered: All Terms

Course Type(s): None

Guided study of a selected topic in physics not substantially treated in a regular course, under the direction of a member of the Physics faculty. Prior permission of the directing professor and department chair is required to take this course.

**PH-211 General Physics with Calculus I****Credits: 3**

Prerequisite(s): MA-116 or MA-125

Co-requisite(s): PH-211L

Term Offered: Fall Term

Course Type(s): NS

The first of a two-semester sequence of courses that, taken together, provide a thorough introduction to classical physics using calculus.

Topics covered include: one- and two-dimensional motion, Newton's laws and their applications, energy, momentum and impulse, rotational mechanics, and thermodynamics.

**PH-211L General Physics with Calculus I Laboratory****Credits: 1**

Co-requisite(s): PH-211

Term Offered: Fall Term

Course Type(s): None

Laboratory experiments to complement the topics covered in PH-211.

Includes experiments in statics, dynamics, and thermodynamics.

**PH-212 General Physics with Calculus II****Credits: 3**

Prerequisite(s): PH-211 and PH-211L passed with a grade of C- or higher.

Co-requisite(s): PH-212L

Term Offered: Spring Term

Course Type(s): NS

The second of a two-semester sequence of courses that, taken together, provide a thorough introduction to classical physics using calculus.

Topics covered include: sound and wave mechanics, electrostatics, circuits, magnetic forces and fields, Faraday's Law, reflection and refraction, and optics.

**PH-212L General Physics with Calculus II Laboratory****Credits: 1**

Co-requisite(s): PH-212

Term Offered: Spring Term

Course Type(s): None

Laboratory experiments to complement the topics covered in PH-212.

Includes experiments in sound, electricity, magnetism, circuits, and optics.

**PH-270 Physical Oceanography****Credits: 3**

Prerequisite(s): BY-109, CE-111, CE-111L, CE-112, and CE-112L

Term Offered: Fall Term

Course Type(s): MEBP

Physical Oceanography provides a survey of physical, chemical and geological processes that define and affect the coastal ocean including ocean basins, beach formation and dynamic ocean processes (currents, waves, wind, weather). Environmental considerations include the role of the ocean in the association with global climate change issues, problems associated with coastal development, exploitation of marine resources, and ocean and coastal pollution.

**PH-298 Special Topics in Physics (200 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in physics to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**PH-299 Independent Study in Physics****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided study of a selected topic in physics not substantially treated in a regular course, under the direction of a member of the Physics faculty. Prior permission of the directing professor and department chair is required to take this course.

**PH-311 Theoretical Physics****Credits: 3**

Prerequisite(s): PH-212 passed with a grade of C- or higher

Term Offered: All Terms

Course Type(s): None

Presents physics topics aimed at the advanced undergraduate level.

The subjects range over classical mechanics, electromagnetism, and statistical mechanics, with explicit links made to topics from PH-301. The course is calculus-based, and seeks to round out the physics education of physics minors.

**PH-312 Modern Physics****Credits: 3**

Prerequisite(s): PH-311 passed with a grade of C- or higher

Term Offered: Spring Term

Course Type(s): None

Topics from physics of the twentieth century, including special relativity, the origins of quantum theory, quantum mechanics, atomic structure, nuclear physics, and elementary particles.

**PH-350 Research in Physics****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX5

Original research work, carried out under the mentorship of a faculty research advisor. Research conducted by the students may be submitted for presentation, publication, or review, as appropriate. The number of course credits will be determined by arrangement with the advisor. Three hours/week per credit, 1-3 credits.

**PH-399 Independent Study in Physics****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

Reading and research on a selected topic under the direction of a Physics faculty member. Prior permission of the directing professor and department chair is required to take this course.

**PH-499 Independent Study in Physics (400 Level)****Credits: 1-3**

Course Type(s): None

Reading and research on a selected topic under the direction of a Physics faculty member. Three hours per week per credit. Prior permission of the directing professor and department chair is required to take this course.

## Political Science (PS)

**PS-102 International Relations****Credits: 3**

Term Offered: All Terms

Course Type(s): GU, PSIP, SS.SV

The major theoretical concepts and issues of international relations, emphasizing theories, actors, structures, ideologies, and environment of international politics.

**PS-103 American National Government****Credits: 3**

Term Offered: All Terms

Course Type(s): SS.SV

A survey of United States government, emphasizing the Constitution, functions of political parties, pressure groups, the relationships of citizens to the government, the development of administrative control, and problems unique to each of the three branches of government.

**PS-104 Introduction to Policy Debate****Credits: 3**

Term Offered: Fall Term

Course Type(s): PSPA

This course is designed to introduce students to the activity of policy debate competition. Students will develop research and organizational skills, learn how to deliver and refute arguments, and will participate in classroom debate scrimmages in preparation for weekend long off campus debate tournaments against students from other universities.

**PS-105 Introduction to Public Policy****Credits: 3**

Term Offered: All Terms

Course Type(s): PQ, PSPA, SS.SV

Analysis of policy-making processes in American society, including health care, the environment, education, crime, and employment; application of competing perspective and value orientation to policy areas; impact on specific groups within American society and the global community.

**PS-107 Introduction to Social Justice****Credits: 3**

Term Offered: All Terms

Course Type(s): SS.SV

Provides a conceptual and practical basis to understand, interpret, and solve social problems in fair, equitable, and just ways. Also listed as SO-107.

**PS-108 Model United Nations****Credits: 3**

Term Offered: All Terms

Course Type(s): RD

International relations is a subfield of political science that examines the nature of power and its distribution around the world. Scholars interested in international relations have developed a variety of simulations to seek greater understanding of state behavior. This course will simulate the policies and procedures of the dominant organs of the United Nations in order to gain a greater understanding of international issues like climate change, terrorism, humanitarian aid, international trade and commerce, and war and peace.

**PS-109 Civic Engagement and Leadership****Credits: 1**

Term Offered: Spring Term

Course Type(s): None

Civic responsibility, engagement, and leadership are encouraged through active student involvement in a community or campus organization. Students will perform twelve hours of public service over the course of the semester working for an organization that addresses a particular issue of public concern. Also listed as SO-109.

**PS-198 Special Topics in Political Science (100 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in political science to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**PS-199 Reading and Research in Political Science****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided study of a topic in political science not substantially treated in a regular course, under the direction of a member of the political science faculty. Extensive reading and at least one written report are required. Prior permission of the directing professor and department chair is required to take this course.

**PS-202 State and Local Government****Credits: 3**

Prerequisite(s): PS-102 or PS-103; and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): PSAM, WT

A comparative study of state, local, and suburban politics in the United States with special emphasis on New Jersey and the New Jersey-New York metropolitan area.

**PS-211 Legal Analysis and Writing****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Fall Term

Course Type(s): PSAL

This course focuses on the fundamentals of legal analysis and writing. Effective legal analysis and writing are key skills required to succeed in law school and the legal profession. Students will understand the role of an attorney, analyzing their client's legal issue, drafting various pieces of legal writing, including legal memorandum and briefs, and arguing their client's case orally. Students will learn both objective legal analysis and persuasive legal writing and arguing skills.

**PS-212 Workshop in NJ's County Pre-Trial Prosecution System: Legal and Political Aspects****Credits: 3**

Term Offered: Spring Term

Course Type(s): PSAL, PSAM

Legal and political analysis of New Jersey's pretrial prosecution process. The roles, pressures, attitudes, and strategies of the county prosecution system personnel will be subjects for field research seminar study.

**PS-221 Early Political Thought****Credits: 3**

Prerequisite(s): PS-102 or PS-103; and EN-101 and EN-102 or permission of the instructor

Term Offered: Fall Term

Course Type(s): WT

Consideration of the major political theories of the Western world and their relevance to contemporary politics. Semester I: Plato to Marx. Semester II: later nineteenth-and twentieth-century political thinkers, with special emphasis on the behavioral school.

**PS-222 Modern Political Thought****Credits: 3**

Prerequisite(s): PS-102 or PS-103; and EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): WT

Consideration of the major political theories of the Western world and their relevance to contemporary politics. Semester I: Plato to Marx. Semester II: later nineteenth- and twentieth-century political thinkers, with special emphasis on the behavioral school.

**PS-223 Introduction to Global Sustainability****Credits: 3**

Term Offered: Fall Term

Course Type(s): MEBP, SUS

Introduces students to the global, environmental, economic and social foundations of sustainability and the policy and scientific challenges involved with accommodating population growth, development, and resources used while assuring that future generations will have the natural and economic resources to support an enhanced quality of life. An emphasis will be placed on understanding of sustainability principles from multiple perspectives and cross-disciplinary application of sustainable practices. Also listed as BY-221.

**PS-224 Theories of Political Economy****Credits: 3**

Prerequisite(s): EN-101 and EN-102 and PS-102 or PS-103

Course Type(s): WT

Theories of political economy studies the intersection of the state (politics) and markets (economy) to explain policy outcomes (student loans, sin taxes, agricultural subsidies, trade rules, etc.) as well overall economic development of nations. Economists assume a world of rational individuals pursuing their self-interest through markets - i.e., Adam Smith's "invisible hand" - while political scientists assume a world of rational actors seeking to maximize their political power. Combined, political economy presents a world in which political actors are influenced, guided and constrained by markets, budget constraints, and resource scarcity while economic markets reflect political power relationships surrounding property rights, contract enforcement, regulations, and tax rules. Drawing the line between state/public and market/private is a political process yet one with clear economic consequences. Take the example of healthcare. Two possibilities exist - private (market-based) or public (state-based) - and the choice boils down to a political process (i.e., executive, legislative and judicial branches plus interest groups) occurring in a context influenced by market constraints (i.e., costs, budget constraints, scarcity, taxes, and insurance).

**PS-240 Environmental Ethics****Credits: 3**

Term Offered: All Terms

Course Type(s): PSIP

This course will examine the ethical arguments/repercussions related to the environment. Topics will include the principles involved in combatting environmental problems such as pollution, loss of species and habitats, climate change, environmental justice, food insecurity, and economic and political impacts. As the environment faces a growing number of threats from human activities these core issues are becoming increasingly important. The purpose and importance of this course is to create a learning environment that stresses the understanding of ethics, its development as a major field, and its necessary role in understanding the environment.

**PS-250 Fundamentals of Social Science Research****Credits: 3**

Term Offered: All Terms

Course Type(s): TL

An introduction to the different ways in which social scientists study the social world. Designed to develop students' understanding of the major purposes of social research as well as the major types of quantitative and qualitative research designs. Students will learn the research process itself, from conceptualization and measurement to operationalization, sampling, ethics, and the analysis and presentation of their proposed study. As part of the research process, students will use spreadsheet, presentation, and word processing software to build datasets, analyze data, and design and present research. Also listed as SO-250. Sociology majors should register for SO-250. This course is for Political Science majors only or other majors with instructor consent.

**PS-274 Global Inequalities****Credits: 3**

Prerequisite(s): SO-101 or PS-102

Term Offered: All Terms

Course Type(s): BI,EL, GLS, GU, RE, SJS, SUS

A sociological and political look at global inequalities. Explores diverse themes and aspects of a global society, including the forces that are causing and perpetuating global inequalities. It also looks at the social, political, economic, and cultural consequences of those inequalities. Also listed as SO-274.

**PS-275 Politics and Policy of Latin America****Credits: 3**

Term Offered: All Terms

Course Type(s): PSCG, PSPA, RE

Introduces students to the critical political issues and challenges in Latin America, a geographic region that includes Mexico, Central America, the Caribbean and South America. Hemisphere integration continues to accelerate, and political developments south of the border increasingly impact the United States. Immigration, trade, drugs, and the environment require hemisphere collaboration among a diverse set of peoples and governments. Surveys contemporary politics and economics, as well as the basic regional history in a way that invites comparison and the development of regional (Southern Cone, Andean Region, Central America, Caribbean) and hemispheric perspectives on the challenges linked to hemispheric integration.

**PS-277 Gender and Politics****Credits: 3**

Term Offered: Spring Term

Course Type(s): GS, PSAM

The study of gender and how it relates to politics. Includes an analysis of the women's movement through historical literature by and about women. Also includes feminist and gender theories, the mass behavior of women, elite women, and public policy as it relates to women's issues.

**PS-278 International Political Economy****Credits: 3**

Prerequisite(s): PS-102

Term Offered: All Terms

Course Type(s): GLS, PSIP, RE

The role that international institutions, transnational actors, and foreign governments play in the production, distribution, and consumption of resources will be investigated. Since much of international political economy has to do with various thinkers and schools of thought, an appropriate emphasis will be given to some of the important works in the field. For example, we will be analyzing the contributions of Liberal, Marxist, and Statist thinkers and the various perspectives that have been used to analyze the way policies are made, agreements are reached, and resources distributed. Following the establishment of this theoretical framework, we will focus on the growth of regional integration, the role of hegemony in maintaining the stability of international systems, strategies of economic development, and the role of multinational and transnational companies in both the industrial and developing world. In essence, this course is concerned with looking at the relationship between power and wealth and the balance between the state and the market. Also listed as SO-278.

**PS-288 Cooperative Education: Political Science****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): EX2

Through actual work experience, connects classroom learning and real-world practice. Under the guidance of a faculty advisor, students select a cooperative placement. Students will spend ten to fifteen hours per week at their placement. Departmental approval is required to take this course. Repeatable for credit.

**PS-289 Political Science Internship****Credits: 3**

Prerequisite(s): PS-102 or PS-103 and the completion of sixty credits

Term Offered: Spring Term

Course Type(s): EX1

An internship in a political office. The student will keep a daily log and develop a research topic on the basis of the log and experience. By working an eight-hour day from Monday through Friday, the intern will develop firsthand knowledge of a state or local office and will secure an experience rating for future positions after graduation. Departmental approval is required to take this course.

**PS-290 Media Law****Credits: 3**

Term Offered: All Terms

Course Type(s): COCCL, COCST, COJPT, COMCS, CORTT, PSAL

How the mass media is constrained and protected by the law and court interpretation. Overview will focus on libel, copyright, obscenity, free press, and other legal/illegal aspects of mass communication. Also listed as CO-290.

**PS-298 Special Topics in Political Science (200 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in political science to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**PS-299 Reading and Research in Political Science****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Guided study of a topic in political science not substantially treated in a regular course, under the direction of a member of the political science faculty. Extensive reading and at least one written report are required. Prior permission of the directing professor and department chair is required to take this course.

**PS-301 Political Parties and Elections****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): PSAM

Historical and functional analysis of United States political parties; the workings of party machinery and practical politics, including national, state, and local party activities, election procedures, third party movements, interest groups, and public opinion.

**PS-302 Data Analysis for the Social Sciences****Credits: 3**

Prerequisite(s): PS-250 or SO-250

Term Offered: Spring Term

Course Type(s): None

Introduces students to techniques used to evaluate social science data; addresses strategies for analyzing qualitative data and presents social science applications of quantitative techniques such as cross tabulation, t-test, and regression. Students will learn to apply procedures to test hypotheses. Also listed as SO-302.

**PS-304 Public Opinion and Propaganda****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Course Type(s): None

The effects of mass communications upon political opinion, control of news, dissemination agencies, propaganda techniques, and pressure groups; the role of opinion polls and survey techniques.

**PS-305 The American Congress****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: All Terms

Course Type(s): PSAM

An analysis of the structure, organization, and functioning of Congress; the relationship between Congress and the executive and judicial branches of government, the importance of the Congressional investigative powers and of quasi-legislative agencies, boards and commissions.

**PS-306 The American Presidency****Credits: 3**

Prerequisite(s): PS-102 or PS-103, and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): PSAM, WT

The various theories of the presidency; the president's relationship with Congress, the public, the party structure, the administration, and the vice-president; and the president's powers and responsibilities in foreign and military affairs.

**PS-307 The American Judiciary****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: All Terms

Course Type(s): PSAL, PSAM, SJL

Systematic study of the judiciary at the federal and New Jersey level, including an analysis of the jurisdictional limits of courts and the procedural rules for actions in each respective system; an intensive study of institutions of law (legal systems, federal courts, state courts) and interpreters and consumers of law (judges, lawyers, litigants, interest groups) as well as a study of the impact of court decisions on federal and state public policy.

**PS-308 Resistance and Revolution: Exploring Social Movements & Social Change****Credits: 3**

Term Offered: All Terms

Course Type(s): SJS

Social movements are sustained efforts through which people act collectively to create or resist changes in political, social, economic, legal, and/or cultural systems, as well as specific institutions. Through a combination of theoretical exploration and case studies, this course is designed to generate an in-depth understanding of social movements of the past and the present. We will address questions such as: What events precipitate movements? How do political, social, economic and cultural forces shape movements and influence their outcomes? How have artistic works and creative tactics been used for pursuing social change? In what ways have social media changed the landscape of social action? How have social scientists researched and participated in movements? The course will also explore the work of organizing, strategizing, recruiting participants, leadership development, and tactical decision-making, in addition to the other forms of "on the ground" work within movements. Also listed as SO-308

**PS-309 Political Science Internship Seminar****Credits: 3**

Term Offered: All Terms

Course Type(s): EX5

Practical experience in the operation of a legal, political campaign, or government position to guide the intern's future professional development. The student will keep a journal and produce a report analyzing the intern's experience and/or work environment. Repeatable for credit.

**PS-311 Introduction to Constitutional Law****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: All Terms

Course Type(s): PSAL

Examination of United States constitutional law by the case method: the federal government and the relative powers of Congress, the President, and the Supreme Court.

**PS-312 Constitutional Law: Civil Rights****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Course Type(s): PSAL, RE, SJL

Examination of United States constitutional law by the case method: Constitutional, civil, and political liberty with special emphasis on the First, Fifth, and Fourteenth Amendments.

**PS-313 The Pre-Trial Prosecution System****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: All Terms

Course Type(s): PSAL, SJL

The pre-trial prosecution process as a political system. The roles, attitudes, and strategies of those authorities who allocate values within the system are examined. Also listed as CJ-313. CJ majors register for CJ-313.

**PS-315 Urban Politics****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): PSAM, PSPA, RE

The problems of urban life as they are manifested in the political process, the interaction of cities with other levels of government, and the performance of political functions within the urban environment.

**PS-324 American Political Thought****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): PSAM

The development of political thought in the United States with emphasis on the late nineteenth- and twentieth-century philosophers and statesmen, along with the development of ideology of groups in American politics. Also listed as PL-324.

**PS-325 Survey Research Consulting****Credits: 3**

Prerequisite(s): PS-250 or SO-250 or CO-292 or SW-409 or PY-220 or CJ-315 or HLS-315 or HE-290 or NU-355 or permission of the instructor

Term Offered: All Terms

Course Type(s): None

Provides students with real-world experience in the application of social science methodology, specifically survey research. The course is designed to strengthen social science research methods skills as well as competencies in professional communication and collaboration. Students, as a class, will work on a small-scale project (e.g. needs assessment, program evaluation, marketing study, etc.) for a "client" - a non-profit organization, government agency, small business, or academic institute - who has agreed to collaborate as a service learning opportunity. The client is not paying for this service and understands the limitations of working with consultants-in-training. However, the course will strive to adhere to the highest standards in both survey research practice and the client-consultant relationship. Also listed as SO-325.

**PS-330 Environmental Policy****Credits: 3**

Term Offered: All Terms

Course Type(s): MEBP, PSAM, PSPA, SUS

Introduces social, political, and organizational processes that influence and shape environmental and natural resource policy. Focuses on the political arena and examines how citizens and community groups influence legislative initiatives. Also listed as PS-330.

**PS-332 Climate Change Adaptation and Policy****Credits: 3**

Term Offered: Spring Term

Course Type(s): MEBP, SUS

Climate Change Adaptation and Policy provides a survey of the global engagements surrounding climate change adaptation and policy that currently affects billions around the globe. The subject matter covered includes understanding how to evaluate the proxies and impacts of climate change, the geography of climate change, and the policies and planning tools that are used in addressing the current and forecasted effects of climate change. The class includes local, regional, national, and international examples within a mixed-methods approach that simultaneously uses a scientific, natural processes understanding that is juxtaposed with policy-based initiatives that deal with the real-life costs and procedures in addressing climate change. Also listed as GO-332.

**PS-350 American Political Economy****Credits: 3**

Prerequisite(s): PS-103

Term Offered: Spring Term

Course Type(s): PO, PSAM, PSPA

Examines the institutional, economic, and political factors that influence the economic decision-making process at all levels of government. Analysis of the theories, processes, principles, and concepts of public budgeting and governmental management of the economy. Also listed as PO-350.

**PS-351 Public Administration****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): PSPA

The administration, organization, management, financial, and personnel problems within the various governmental agencies; problems arising from the interrelations of the three branches of government.

**PS-352 Public Personnel Administration****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Course Type(s): PSPA

The nature of the career service in government, effective tools in personnel administration, and the changing role of the Civil Service Commission.

**PS-353 Public Budgeting Process****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): PSPA

A treatment of the budget as an instrument of public policy and marginal control of public programs.

**PS-355 Administrative Law and Regulation****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): PSAL, PSPA, SJL

The federal and state regulatory agencies, commissions, and boards; how they function, the legal procedures they employ, to what extent they are successful in serving and protecting the community, and efforts to effect their reform.

**PS-360 Political Economy in the Developing World****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): PSIP, SJS

This course introduces undergraduate students to the core concepts, theories and debates of political economy in the context of developing world countries. The primary unit of analysis will be the national case study (i.e., Brazil or Indonesia) rather than the international system or international institutions (for example, World Bank, IMF or global financial markets.) The aim is to provide the intellectual tool set to evaluate questions and challenges of political and economic development and modernization across a range of national case studies from Latin America, the Caribbean, Africa, the Middle East and Asia. Also listed as SO-360.

**PS-361 Comparative European Governments****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: All Terms

Course Type(s): PSCG

A comparative analysis of political processes in Western-European governments, with special emphasis on the methodology of comparative politics.

**PS-364 Law and Society****Credits: 3**

Prerequisite(s): SO-101 or PS-102 or PS-103

Term Offered: All Terms

Course Type(s): PSAL, SIN, SJL

The evolution of law, social forces influencing law, social impact of law, and law as an instrument of social control and social change. Also listed as SO-364.

**PS-365 Sports Law I: Governance and Regulation****Credits: 3**

Term Offered: All Terms

Course Type(s): PSAL

Sports law is a subfield of law and political science that examines a broad mixture of laws that apply to athletes and the sports they play. Many legal scholars argue that the term "sports law" is a misnomer because "sports" represent the convergence of activity and entertainment that is governed by the legal system in its entirety. Accordingly, this course provides an overview of many areas of the law, particularly in the realm of governance and regulations. Through the assigned readings and research projects, students will gain valuable insight as to how "sports" are regulated by the laws of our country but also by the governing bodies and institutions that oversee the formation, activity, and "entertainment" of each sport. This course is related to Sports Law II: The Business of Sports Law in that both courses provide student with in-depth analysis of law as it relates to sports but also how "sports law" impacts society, business and the economy. However, the courses are non-sequential and students can be successful in each course independent from the other as they are both designed to be introductory courses related to governance and regulation, and legal implications in the business of sports, respectively.

**PS-366 Sports Law II: The Business of Sports Law****Credits: 3**

Course Type(s): PSAL

Sports law is a subfield of law and political science that examines a broad mixture of laws that apply to athletes and the sports they play. Many legal scholars argue that the term "sports law" is a misnomer because "sports" represent the convergence of activity and entertainment that is governed by the legal system in its entirety. Accordingly, this course provides an overview of many areas of the law, particularly in the realm of governance and regulations. This course is related to Sports Law II: The Business of Sports Law in that both courses provide student with in-depth analysis of law as it relates to sports but also how "sports law" impacts society, business and the economy. However, the courses are non-sequential and students can be successful in each course independent from the other as they are both designed to be introductory courses related to governance and regulation, and legal implications in the business of sports, respectively.

**PS-371 International Service Seminar****Credits: 3**

Prerequisite(s): PS-102

Term Offered: Spring Term

Course Type(s): PSIP

Students will learn to unite theory and practice by studying theories and policies based on human security, and learning about their applications through service-learning projects. Students will enhance their understanding of human security by volunteering in international community organizations and reflecting on the social, political, and economic factors and policies that affect them. Also listed as SW-371, AN-371, and SO-371.

**PS-372 Democracy in Asia and South Asia****Credits: 3**

Term Offered: Spring Term

Course Type(s): PSCG, RE

Explores the prospects of democracy in Asia and South Asia with a focus on Japan, South Korea, Taiwan, India, Pakistan, Afghanistan, Nepal, Bangladesh, and Sri Lanka. Provides the historical depth, cultural complexity, and comparative context in which to understand historical legacies and contemporary issues challenging democracy in Asia and South Asia.

**PS-373 Comparative Politics in Asia****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): PSCG, RE

Comparative study of the political processes of selected Asian nations with emphasis on problems arising as a result of the transition from traditional societies to modern nation states.

**PS-375 Islam and Politics****Credits: 3**

Course Type(s): PSCG, RE

Examination of the interrelationship between Islam as a religion and a way of life and politics in different regions of the world. Following a quick survey of the belief and practice of Islam since its inception, the focus will be placed on the past 100 years, particularly the Muslim responses to the challenges of colonialism, modernization, and globalization and Islam's reassertion in public affairs and society. Concludes with ways for improving Islam-West relations in the hope that these will generate better understanding and peace. Also listed as RS-375.

**PS-376 Comparative Politics of the Middle East****Credits: 3**

Term Offered: All Terms

Course Type(s): PSCG, RE

Comparative study of the political processes of selected Middle-Eastern nations with an emphasis on problems arising as a result of the transition from traditional societies to modern nation states.

**PS-377 A Comparative Study of Women in the World****Credits: 3**

Prerequisite(s): GS-225 or SO-225

Term Offered: All Terms

Course Type(s): BI.EL, GS, GU, PSCG

A comparative study of the political, cultural, social, and economic statuses of women in the United States, Western Europe, Russia, Japan, Israel, and Third-World nations. Also listed as GS-377. Prerequisites: GS-225 or SO-225

**PS-378 Ethics in International Relations****Credits: 3**

Prerequisite(s): PS-102

Term Offered: All Terms

Course Type(s): PSIP

Create a learning environment that stresses the understanding of ethics and its necessary role in the contemporary world. Through an evaluation of peace theories, patterns of diplomacy, and conflict in international relations, the learner will realize that ethical considerations are essential to the human experience.

**PS-382 International Organizations****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): PSIP, PSPA

The nature, functions, and development of international organizations with particular emphasis on the United Nations and its role in international relations.

**PS-383 Model UN Conference****Credits: 4**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): PSIP

Introduces students to how the United Nations works and will give them real-life experience in how countries bargain, negotiate, and resolve conflicts. It is a blend of theoretical/historical knowledge and practical/experiential components. The practical/experiential components will include taking part in actual negotiations at a collegiate-level Model United Nations conference. Experiential Education credit will only be given upon completion of the model UN conference. Repeatable for credit at the discretion of the department.

**PS-385 American Foreign Policy****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: All Terms

Course Type(s): PSIP, PSPA

A study of American foreign policy with emphasis on the theoretical framework and institutional setting of the contemporary policymaking process.

**PS-388 Cooperative Education: Political Science****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: All Terms

Course Type(s): EX2

Classroom learning and real-world practice are connected through actual work experience. Under the guidance of a faculty advisor, students select a cooperative placement. Students will spend ten to fifteen hours per week at their placement. Repeatable for credit. Departmental approval is required to take this course.

**PS-389 Political Science Internship****Credits: 3**

Prerequisite(s): PS-102 or PS-103 and completion of sixty credits

Term Offered: All Terms

Course Type(s): EX1

An internship in a political office. The student will keep a daily log and develop a research topic on the basis of the log and experience. By working an eight-hour day from Monday through Friday, the intern will develop firsthand knowledge of a state or local office and will secure an experience rating for future positions after graduation. Departmental approval is required to take this course.

**PS-390 Washington Center Internship****Credits: 7-12**

Term Offered: All Terms

Course Type(s): EX5

This internship allows students in all majors to intern at government agencies, public service organizations, and business associations located in Washington, DC. Under the supervision of Washington Center supervisors and faculty, students gain substantive entry-level professional experience along with academic credit over the course of one semester. In general, students are required to intern in a government agency or public organizations four and a half days per week and attend educational seminars and workshops and participate in professional forums conducted by the Washington Center. In addition, students must complete learning objectives and assignments specified by Monmouth University faculty sponsors. Also listed as CO-390 and SO-390.

**PS-393 Washington Center Course****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Students participating in a Washington Center internship are required to enroll in a three credit seminar. A list of available courses is forwarded to all students prior to the beginning of the fall, spring, or summer term. Regular offerings include: politics, professional communication, the fine and performing arts, and economics. Also listed as CO-393 and SO-393. Junior standing and a minimum G.P.A. of 2.50 is required to take this course.

**PS-398 Special Topics in Political Science (300 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in political science to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**PS-399 Independent Study in Political Science****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Guided study of a topic in political science not substantially treated in a regular course, under the direction of a member of the political science faculty. Extensive reading and at least one written report are required. Prior permission of the directing professor and department chair is required to take this course.

**PS-401 Seminar in Political Science****Credits: 3**

Prerequisite(s): EN-101, EN-102, PS-250, 15 credits in Political Science, and Junior Standing.

Term Offered: All Terms

Course Type(s): WT

Review of research methods and significant developments in political science. An individual research project, assigned according to the interest and needs of the student, is required.

**PS-431 Public International Law****Credits: 3**

Prerequisite(s): PS-102 or PS-103, EN-101 and EN-102

Course Type(s): GU, PSAL, PSIP, SJL, WT

Detailed examination of the system of rules governing relations among states including in-depth review of the sources of public international law, transnational entities involved in applying international law, domestic application of international law including jurisdiction and extraterritoriality, the validity of state action vis-a-vis public international legal restrictions, and enforcement of international law as to states and individuals.

**PS-488 Cooperative Education: Political Science****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): EX2

Classroom learning and real-world practice are connected through actual work experience. Under the guidance of a faculty advisor, students select a cooperative placement. Students will spend ten to fifteen hours per week at their placement. Repeatable for credit. Departmental approval is required to take this course.

**PS-489 Political Science Internship****Credits: 3**

Prerequisite(s): PS-102 or PS-103 and completion of sixty credits

Course Type(s): EX1

An internship in a political office. The student will keep a daily log and develop a research topic on the basis of the log and experience. By working an eight-hour day from Monday through Friday, the intern will develop firsthand knowledge of a state or local office and will secure an experience rating for future positions after graduation. Departmental approval is required to take this course.

**PS-498 Special Topics in Political Science (400 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in political science to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**PS-499 Readings and Research in Political Science****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Guided study of a topic in political science not substantially treated in a regular course, under the direction of a member of the political science faculty. Extensive reading and at least one written report are required. Senior standing; status as a Political Science or History and Political Science major with a 3.00 or higher G.P.A. in major coursework; and prior permission of the directing professor and department chair are required to take this course.

## Psychology (PY)

**PY-103 Introduction to Psychology****Credits: 3**

Term Offered: All Terms

Course Type(s): SS.SV

The scientific study of behavior and mental processes, including motivation, emotion, intelligence, maturation, learning, personality, perception, and thinking.

**PY-202 Career Preparation in Psychology****Credits: 1**

Term Offered: All Terms

Course Type(s): None

An orientation to career opportunities available with a background in psychology as well as preparation for employment and graduate/professional training in psychology. For Psychology majors only.

**PY-203 Child Psychology****Credits: 3**

Prerequisite(s): PY-103

Term Offered: All Terms

Course Type(s): NU.EL

Physical and mental development from conception to early adolescence; motor, emotional, and social behavior; intelligence and language development; personality formation; play and other imaginative activities.

**PY-204 Adolescent Psychology****Credits: 3**

Prerequisite(s): PY-103

Term Offered: All Terms

Course Type(s): NU.EL

Students are given up-to-date knowledge of the field of developmental psychology in general but particularly focuses on issues that are relevant to individuals as they transition from being children to young adolescents; as they go through the physical, emotional, cognitive, and social changes of adolescence; and finally as they experience emerging adulthood. It will enable students to understand, contrast, and critically evaluate various developmental theories that apply to adolescent development. Both the normative patterns of adolescent development and individual variability within these norms are covered.

**PY-205 Psychology of Adulthood and Aging****Credits: 3**

Prerequisite(s): PY-103

Term Offered: Spring Term

Course Type(s): None

Development from mid-life to old age; physical, intellectual, social, emotional, and personality changes, interests, attitudes, and maladjustments with emphasis on later life.

**PY-207 Social Psychology****Credits: 3**

Prerequisite(s): PY-103

Term Offered: All Terms

Course Type(s): None

A survey of human behavior and mental processes in their social context. Addresses interpersonal processes, including social influence, relationships, prosocial and antisocial behavior, prejudice, and group dynamics. Also addresses intrapersonal processes, including the self, social perception, social cognition, cognitive dissonance, and attitudes.

**PY-208 Psychopathology****Credits: 3**

Prerequisite(s): PY-103

Term Offered: All Terms

Course Type(s): None

An examination of the theoretical and clinical perspectives underlying various psychological disorders, including etiology, symptoms and presentation, therapeutic recommendations, and an introduction to the diagnostic process.

**PY-220 Research I: Methods and Basic Data Analysis Laboratory****Credits: 4**

Prerequisite(s): PY-103 and MA-101, or MA-105 or higher; and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): TL, WT

Introduces students to the essence of the scientific method and the use of empirical inquiry. Students will be introduced to various issues concerning data collection and other method procedures used in psychology. Students will learn to appropriately summarize, describe, and analyze obtained data to test research hypotheses.

**PY-230 History of Psychology**

Prerequisite(s): PY-103

Term Offered: All Terms

Course Type(s): None

The historical development of psychology, including its relationship to other disciplines; the contributions of philosophy and the growth of scientific methodology.

**Credits: 3****PY-298 Special Topics in Psychology (200 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in psychology to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If there is a prerequisite for this course it will be announced in the course schedule.

**PY-301 Psychology of Learning****Credits: 3**

Prerequisite(s): PY-103

Term Offered: All Terms

Course Type(s): None

Basic issues and methods in the scientific study of learning, with attention to major theories about mental and neural processes in conditioning, skill learning, and various types of cognitive learning and memory.

**PY-302 Memory and Cognition****Credits: 3**

Prerequisite(s): PY-103 and PY-220

Term Offered: Spring Term

Course Type(s): None

Scientific study of mental processes, especially pertaining to the acquisition, retention, and use of knowledge and mental skills. Emphasis on memory, imagery, and natural language, with limited attention to developmental and individual differences.

**PY-302L Memory and Cognition Thesis Laboratory****Credits: 1**

Prerequisite(s): PY-311 and PY-320 both passed with a grade of C or higher

Co-requisite(s): PY-302 and PY-491

Course Type(s): None

Techniques for the experimental study of memory, thought, and language processes. Includes pattern recognition, serial recall, memory organization, imagery, decision-making, and story schematization.

**PY-304 Applied Behavior Analysis****Credits: 3**

Prerequisite(s): PY-103

Term Offered: All Terms

Course Type(s): None

This course is an introduction to the field of applied behavior analysis (ABA), which is dedicated to the application of behavioral principles and procedures to real-world problems and settings. The topics covered will include: the basic principles and techniques used in ABA, the application of these principles to a diverse range of clients (e.g., individuals with disabilities and addictions, industry workers, children in classrooms, captive animals) based on scientific literature, training caregivers to conduct treatments based on the science of behavior, and legal and ethical issues in the treatment of clients in a diverse society. Prerequisite: PY-103

**PY-305 Theories of Personality****Credits: 3**

Prerequisite(s): PY-103

Term Offered: All Terms

Course Type(s): None

An introduction to methods for studying personality and building personality theories; psychodynamically oriented theories as well as biosocial, behavioristic, cognitive, humanistic, and existential approaches.

**PY-305L Social and Personality Thesis Lab****Credits: 1**

Prerequisite(s): PY-207 or PY-305, and PY-311 and PY-320 all passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Research strategies used in the scientific study of personality and social psychology. Deals with the following topics: constructing surveys, writing quality question items, correlational design, two-group design, multigroup design, factorial design, within-subjects design, and the use of statistical methods in research. These topics will be covered in the context of student projects. Each student will design and carry out his or her own research project. Three hours per week.

**PY-306 Introduction to Neurosciences****Credits: 3**

Prerequisite(s): PY-103 and 3 credits in Biology

Term Offered: All Terms

Course Type(s): None

The organization of the nervous system in terms of its anatomy, physiology, neurochemical correlates, and evolution; behavioral processes, such as attention, sleep, motivation, instinct, learning, and language.

**PY-306L Neurosciences Thesis Laboratory****Credits: 1**

Prerequisite(s): PY-311 and PY-320 both passed with a grade of C or higher

Co-requisite(s): PY-306 and PY-491

Course Type(s): None

Human and animal neuroanatomy; surgical techniques, including lesion, stimulation, and perfusion; histology; drug and hormone administration; and physiological recording techniques. Three hours per week.

**PY-310 Psychology Internship****Credits: 3**

Prerequisite(s): PY-208, PY-220, and completion of fifty-seven credits

Term Offered: All Terms

Course Type(s): EX5

Supervised, volunteer work in approved facilities, professional development and training and supervision provided by the agency in consultation with the psychology department.

**PY-311 Research II: Behavioral Statistics and Laboratory****Credits: 4**

Prerequisite(s): PY-220 passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): TL

A continuation in statistical concepts and application, including analysis of variance, nonparametric techniques, regression equations, correlations. Laboratory: Instruction in data analysis using SPSS (Statistical Package for the Social Sciences), training in software tools for formatting and presenting research findings.

**PY-320 Research III: Experimental Methods and Laboratory Credits: 4**

Prerequisite(s): PY-220 passed with a grade of C or higher; and EN-101 and EN-102, or permission of the instructor

Co-requisite(s): PY-311

Term Offered: All Terms

Course Type(s): WT

An introduction to theory and application of experimental methods in psychology. Three hours of lecture, two hours of individual laboratory work per week.

**PY-321 Qualitative Research Methods Credits: 4**

Prerequisite(s): PY-103

Term Offered: Spring Term

Course Type(s): WT

An interdisciplinary overview of qualitative research methods employed in the social sciences and education. Qualitative methods are offered as an alternative way of knowing about individuals and groups. Topics covered include: theory, fieldwork, interviewing, observational studies, time sampling, writing field notes, questionnaires (survey research), archival research, and conducting qualitative research in various settings. Emphasis also placed upon the factors that affect the fieldwork process (e.g., gender, emotions). Also listed as AN-321.

**PY-322 Industrial Organizational Psychology Credits: 3**

Prerequisite(s): PY-103

Term Offered: All Terms

Course Type(s): None

The application of psychological principles to human problems in business and industry: personnel psychology, counseling, motivation, supervision, organizational structure, efficiency, and engineering psychology.

**PY-331 Psychology of Women Credits: 3**

Prerequisite(s): PY-103

Term Offered: All Terms

Course Type(s): GS

The current state of knowledge about the psychology of women based on theoretical and empirical contributions from psycho-biology, personality, social and life-span psychology.

**PY-331L Psychology of Women Thesis Lab Credits: 1**

Prerequisite(s): PY-311, PY-320, both passed with a grade of C or higher; and either PY-331 or GS-225 or SO-225

Term Offered: All Terms

Course Type(s): GS

Research strategies used in the study of the psychology of women. Deals with the following topics: constructing surveys, writing quality question items, two-group design, multigroup design, factorial design, within-subject design, correlational design, and the use of statistical methods in research. These topics will be covered in the context of student projects. Each student will design and carry out his or her own research project. Three hours per week.

**PY-332 Psychology of the Male Experience Credits: 3**

Prerequisite(s): PY-103

Term Offered: Spring Term

Course Type(s): GS

Examines stereotypes about men in Western society, many of which are challenged in the light of empirical research; theoretical and empirical contributions from personality, social and life-span psychology, and psychobiology; consideration of methods and sources of bias in research used in gender studies.

**PY-335L Gender and Sex Roles Thesis Laboratory Credits: 1**

Prerequisite(s): PY-103; and PY-311 and PY-320, both passed with a grade of C or higher

Co-requisite(s): PY-331 or PY-491 or PY-332

Term Offered: Spring Term

Course Type(s): GS

Research strategies used in the study of gender and sex roles. Projects include: methods of archival research, interview and survey techniques, naturalistic observation, and correlational and experimental procedures. Students also design and carry out their own research project, and prepare written and oral reports of the findings. Three hours per week.

**PY-342 Children's Play and Culture Credits: 3**

Prerequisite(s): PY-203

Term Offered: Spring Term

Course Type(s): None

An intensive examination of children's play. Theoretical and empirical contributions from psychology and anthropology as a developmental and cross-cultural foundation for the following topics: the historical development of the concept of childhood, theories of play, conceptions of play and work, the functions of play, play and child development, gender differences, cross-cultural forms of play, and children's peer cultures. Also listed as AN-342. Anthropology majors should register for AN-342.

**PY-350 Evolutionary Psychology Credits: 3**

Prerequisite(s): PY-103

Term Offered: All Terms

Course Type(s): None

The role of evolutionary thinking in human psychology, including ideas and evidence from animal behavior; topics include a brief history of sociopolitical resistance to Darwinian ideas, basic principles of evolutionary (population) biology, behavioral strategies affecting cognitive and social psychology, especially survival issues (feeding, predator avoidance), mating systems (attraction, mate retention, reproduction and rearing offspring), and social exchange issues. Exploration of potential application in other disciplines (medicine, law, history, marketing and economics).

**PY-350L Evolutionary Psychology Thesis Laboratory Credits: 1**

Prerequisite(s): PY-103; and PY-311 and PY-320 passed with a grade of C or higher

Co-requisite(s): PY-350 and PY-491

Term Offered: Spring Term

Course Type(s): None

Research strategies used in studying the role of evolution in human psychology. Projects include: methods of archival research, interview and survey techniques, naturalistic observation, correlational and experimental procedures. Students will design and carry out their own research project and prepare written and oral reports of the findings. Three hours per week.

**PY-360 Intimate Relationships Credits: 3**

Prerequisite(s): PY-207

Term Offered: All Terms

Course Type(s): None

Provides an overview of current theory and research in the field of intimate relationships. Focuses on topics such as: our need for relationships, interpersonal attraction, love, attachment, communication, relationship maintenance, relationship trajectories, relationship dissolution, jealousy, and extra-dyadic relationships. Special attention will be given to understanding these topics through the use of scientific journal articles.

**PY-360L Intimate Relationships Thesis Laboratory Credits: 1**

Prerequisite(s): PY-311 and PY-320 both passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Research strategies used in the study of intimate relationships. Deals with the following topics: constructing surveys, writing quality question items, two-group design, multi-group design, factorial design, within-subject design, and the use of statistical methods in research. These will be covered in the context of student projects. Each student will design and carry out his or her own research project. Three hours per week.

**PY-370 Sensation and Perception Credits: 3**

Prerequisite(s): PY-103 and PY-220

Course Type(s): None

Evolution of animal and human sensory systems and perceptual mechanisms and processes; current research data and person-machines comparisons.

**PY-370L Sensation and Perception Thesis Laboratory Credits: 1**

Prerequisite(s): PY-311 and PY-320 both passed with a grade of C or higher

Co-requisite(s): PY-370 and PY-491

Course Type(s): None

Basic laboratory techniques for the study of perceptual experiences. Includes sensory thresholds, intensity scaling, color judgments, visual shape and depth, visual illusions, brain lateralization, interactions among sensory modalities, and attention. Three hours per week.

**PY-388 Cooperative Education: Psychology Credits: 3**

Prerequisite(s): Thirty completed credits and a minimum G.P.A. of 2.00

Term Offered: Spring Term

Course Type(s): EX2

Provides students with an opportunity to apply classroom theory in practice through actual work experience. Placements are selected to forward the student's career interest through experiential education. Repeatable for credit. Departmental approval is required to take this course.

**PY-389 Independent Internship in Psychology Credits: 1-3**

Prerequisite(s): 21 credits in Psychology, Junior standing, overall GPA of 3.00, approval by the Psychology Department

Term Offered: All Terms

Course Type(s): EX1

Students apply the psychological concepts they have learned in the classroom and laboratory to work-related experiences. Working with the cooperation of the Life Career Advising Center and a faculty sponsor, the student will secure an internship site. On a volunteer basis, students will work 50 hours per credit per term at their internship sites. Students are required to develop learning objectives at the start of their internship, keep a journal of their internship experience throughout their placement, and write a final paper that includes an integrated review of the literature and reports their progress in meeting their learning objectives. Limited to Psychology majors.

**PY-398 Special Topics in Psychology (300 Level) Credits: 1-3**

Prerequisite(s): PY-103

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in psychology to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If there is a prerequisite for this course it will be announced in the course schedule.

**PY-398L Special Topics in Psychology Thesis Laboratory Credits: 1-3**

Co-requisite(s): PY-491

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in psychology to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis.

**PY-399 Independent Study in Psychology Credits: 1-3**

Term Offered: Fall Term

Course Type(s): None

Guided study of a selected topic in psychology not substantially treated in a regular course, under the direction of a member of the Psychology faculty. Prior permission of the directing professor and department chair is required to take this course.

**PY-401 Introduction to Clinical Psychology Credits: 3**

Prerequisite(s): PY-208 and PY-305

Term Offered: All Terms

Course Type(s): None

The application of psychological approaches to the study and treatment of behavior problems, diagnosis, therapeutic techniques, and the professional role of the clinical psychologist in society.

**PY-401L Clinical Psychology Thesis Laboratory Credits: 1**

Prerequisite(s): PY-208; and PY-311 and PY-320 both passed with a grade of C or higher

Co-requisite(s): PY-401 and PY-491

Course Type(s): None

A practicum in assessment and therapeutic techniques, incorporating standard research procedures used in clinical psychology. The scientific study of individual differences and their impact on behavior.

**PY-404 Animal Behavior Credits: 3**

Prerequisite(s): PY-103 or BY-103 or above passed with a grade of C- or higher

Course Type(s): None

Why and how animals (vertebrates and invertebrates) do the things they do. Emphasizes rules governing the evolution of behavior rather than mere description of how animals behave. Focus includes behavioral ecology, habitat selection, feeding strategies, predator-prey tactics, mating systems and strategies, social behavior (conflict and cooperation) and population dynamics. The course begins with a historical overview and ends with the evolution of human behavior. Also listed as BY-404.

**PY-404L Animal Behavior Thesis Laboratory Credits: 1**

Prerequisite(s): PY-311 and PY-320 both passed with a grade of C- or higher

Co-requisite(s): PY-404 or BY-404

Course Type(s): None

Methods in the study of animal behavior. Projects on instinctive behavior, early experience, learning, dominance relationships, territoriality, behavioral ecology, and sociobiology. One all-day field trip and an independent project will be required.

**PY-407 Social Cognition Credits: 3**

Prerequisite(s): PY-103

Term Offered: Spring Term

Course Type(s): None

Focus on social cognition, a research area within social psychology that studies the social and cognitive processes through which individuals notice, interpret, remember, and use information about their social world. Exploration of past and present social research, current theoretical understanding, and potential applications of important social-cognitive processes.

**PY-407L Social Cognition Thesis Laboratory****Credits: 1**

Prerequisite(s): PY-311 and PY-320 both passed with a grade of C or higher

Co-requisite(s): PY-407 and PY-491

Course Type(s): None

Study and evaluation of empirical methods used in social cognition research. Students will critique published research and learn to identify and avoid common threats to the validity of their own research. Three hours per week.

**PY-408 Cultural Psychology****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

An interdisciplinary course that utilizes theoretical, empirical, and methodological contributions from psychology and anthropology to discuss the position of culture in understanding human behavior and thought. Culture is viewed as a cognitive construct that is learned, lived, shared, and performed. A sample of topics include: the history of cultural and cross-cultural psychology, methodological approaches, aggression, education, development, play, language, social relationships, intelligence, emotion, motivation, and mental health issues. Also listed as AN-408.

**PY-409 Leadership and Group Processes****Credits: 3**

Prerequisite(s): PY-103 and PY-207

Term Offered: All Terms

Course Type(s): None

An introduction to the study of group dynamics, particularly with regard to leadership and power. Exploration of past and present research on groups; current theoretical understanding of important group processes, such as group formation, changes over time, group decision-making and performance, social influence, and intermember relations.

**PY-409L Leadership and Group Processes Laboratory****Credits: 1**

Prerequisite(s): PY-103, PY-311, and PY-320 all passed with a grade of C or higher

Co-requisite(s): PY-409 and PY-491

Course Type(s): None

Study and evaluation of empirical methods used in group-dynamics research. Students will critique published research and learn to identify and avoid common threats to the validity of their own research. Three hours per week.

**PY-411 Field Experience in Animal Behavior****Credits: 3**

Prerequisite(s): PY-103; and PY-220 passed with a grade of C or higher or permission of the instructor.

Term Offered: Spring Term

Course Type(s): EX1

Covers psychological principles that are relevant to the psychology of animal behavior, animal training, and learning, memory, and cognition. Students are exposed to - and engage in- research on animal behavior management and watch demonstrations of these principles on-site at Six Flags Safari with a selection of exotic animals. Students will explore careers in applied animal behavior and apply what they have learned to other vocations with humans, such as teaching and therapy, in weekly discussions. Students gain public speaking experience via facilitating educational outreach events and developing and executing training and enrichment plans to promote animal welfare. Instructor permission required. Students of other majors with permission of instructor. PY-103; and PY-220 passed with a grade of C or higher or permission of the instructor.

**PY-423 Social Justice Journeys: Psychological Identity and Museum Exhibits****Credits: 3**

Prerequisite(s): PY-103.

Term Offered: All Terms

Course Type(s): GS, SIAR

By combining field trips to museums and classroom learning, students learn how we construct our psychological identities (e.g., gender, race and ethnic identities) and how images and exhibits in our society influence the cognitive processes underlying our identity development. Students will reflect on the impact of how historical events are retold on how we value ourselves and others. An intersectionality framework is employed. Career opportunities for psychology majors that overlap with museum science will be introduced.

**PY-426 Theories of Childhood and Development****Credits: 3**

Prerequisite(s): PY-203, PY-320, and PY-321

Term Offered: Spring Term

Course Type(s): None

An overview of and evaluative approach to developmental theories and conceptions of childhood. The theoretical frameworks covered include: constructivism, learning theory, psychoanalysis, psychosocial, and ethological/evolutionary approaches. Theorists discussed include: Bowlby, Dewey, Erikson, Freud, Montessori, Piaget, Skinner, and Vygotsky.

**PY-431 Psychological Tests and Measurements****Credits: 3**

Prerequisite(s): PY-103 and PY-220, both passed with a grade of C or higher

Term Offered: Spring Term

Course Type(s): None

Introduction to theory of measurement; its application to psychological and educational testing and exposure to frequently used tests with ethical and practical considerations. Prerequisites: PY-103 and PY-220, both passed with a grade of C or higher

**PY-488 Cooperative Education: Psychology****Credits: 3**

Term Offered: All Terms

Course Type(s): EX2

Provides students with an opportunity to apply classroom theory in practice through actual work experience. Placements are selected to forward the student's career interest through experiential education. Repeatable for credit.

**PY-489 Independent Internship in Psychology****Credits: 1-3**

Prerequisite(s): PY-208 and PY-220, and a minimum G.P.A. of 3.00

Term Offered: All Terms

Course Type(s): EX1

Working with the Department of Psychology's Field Placement Coordinator, the student will secure an internship site and be assigned a faculty sponsor. Students will intern fifty hours per credit per term in their placements. In collaboration with their faculty sponsor, students will develop learning objectives, maintain a journal and log of their hours, and submit assignments that demonstrate an advanced application of psychological concepts to their internship experiences. Weekly meetings with faculty sponsors are required. Limited to Psychology majors.

**PY-490 Senior Seminar in Psychology****Credits: 3**

Prerequisite(s): PY-320 passed with a grade of C or higher and 18 credits in Psychology

Term Offered: Spring Term

Course Type(s): None

Readings, invited speakers, student presentations, and discussion of current and review topics in psychology. Course emphasis to vary with orientation of directing professor.

**PY-491 Research IV: Thesis in Psychology****Credits: 2**

Prerequisite(s): PY-311 and PY-320 both passed with a grade of C or higher

Term Offered: All Terms

Course Type(s): None

Study and research in psychology under the supervision of a psychology faculty member, leading to the preparation of a senior thesis.

**PY-498 Special Topics in Psychology (400 Level)****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in psychology to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**PY-498L Special Topics in Psychology Thesis Laboratory****Credits: 1**

Course Type(s): None

An intensive study of a particular subject or problem in psychology to be announced prior to registration. If a prerequisite is required it will be announced in the course schedule.

**PY-499A Independent Study in Psychology****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Independent study in psychology (experimental) research under supervision of a faculty member. May be taken for a maximum of six credits. Junior standing and prior permission of the directing instructor and department chair are required to take this course.

**PY-499B Independent Study in Psychology****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Independent study in psychology (reading and theoretical) special project under supervision of a faculty member. May be taken for a maximum of six credits. Junior standing and prior permission of the directing instructor and department chair are required to take this course.

## Public Policy (PO)

**PO-330 Environmental Policy****Credits: 3**

Term Offered: All Terms

Course Type(s): MEBP, PO, PSAM, PSPA, SUS

Introduces social, political, and organizational processes that influence and shape environmental and natural-resource policy. Focuses on the political arena and examines how citizens and community groups influence legislative initiatives. Also listed as PS-330.

**PO-350 American Political Economy****Credits: 3**

Prerequisite(s): PS-103

Term Offered: Spring Term

Course Type(s): PO

Examination of the institutional, economic, and political factors that influence the economic decision-making process at all levels of government. Analysis of the theories, processes, principles, and concepts of public budgeting and governmental management of the economy. Also listed as PS-350.

**PO-402 Internship Seminar in Policy Studies****Credits: 3**

Prerequisite(s): Completion of ninety credits director approval, and placement

Term Offered: Spring Term

Course Type(s): PO

Supervised, practical experience in policy studies; emphasis on policy process, research, evaluation, and analysis.

**PO-499 Independent Study in Policy Studies****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Directed individual study of Policy Studies in areas of special interest.

Prior permission of the directing professor and department chair is required to take this course.

## Religious Studies (RS)

**RS-101 Introduction to Religious Studies****Credits: 3**

Term Offered: All Terms

Course Type(s): CD

Introduction to the study of religion. Emphasis on the cultural history of the study of religion, classical theories and methods in the study of religion, and contemporary conversations and issues in the study of religion. Readings drawn from anthropology, sociology, history, political theory, psychology, economics, and the biological sciences.

**RS-104 Ethics****Credits: 3**

Term Offered: All Terms

Course Type(s): SJL

Theoretical ethics and its application to enduring and contemporary moral issues. Thorough examination of the basic principles of a rational, humane, and practical moral system. Also listed as PL-104.

**RS-201 Philosophy of Religion****Credits: 3**

Prerequisite(s): PL-101

Term Offered: Spring Term

Course Type(s): None

An examination of certain salient features of Western religious thought emphasizing the problems of religious language, the nature and validity of religious experience, traditional and contemporary ideas of God, morality, death, and evil. Also listed as PL-201.

**RS-211 Introduction to Judaism****Credits: 3**

Term Offered: Fall Term

Course Type(s): CD

Introduction to Judaism provides students with a comprehensive view of Jewish thought, history, and life. Judaism has flourished in a great variety of cultures in the past and in the present. Our courses therefore examine it as a living and dynamic religion in the ancient, medieval, modern and contemporary worlds. Students will develop academically and professionally useful skills as they apply different methods and models for understanding religion, history, and culture.

**RS-212 The Christian Intellectual Tradition****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Students will explore the history of Christianity through some of its most provocative and significant "turning points." They will study both the historical context and the intellectual particulars of theological and philosophical debates over the origins of the universe, the humanity of Jesus Christ, the formation of the biblical canon, the nature of religious reformation, the nature of God, and the role of religion in public life. Also listed as PL-212.

**RS-216 Religions and Philosophies of India****Credits: 3**

Term Offered: Spring Term

Course Type(s): BI, EL, CD, RE

Introduction to the fundamental elements of the orthodox and non-orthodox philosophical and religious systems of India. Highlights plurality of timeless, distinct gnostic systems that, having discovered the "Self," search for liberation from the stream of time. Also listed as PL-216.

**RS-272 Magic, Witchcraft, and Religion****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

Explores the motivation of human behavior within the realm of religion and the supernatural with an emphasis on the role of gods and goddesses. A cross-cultural approach will be used while exploring cultures both past and present across the globe. Also listed as AN-272.

**RS-277 Comparative Religions****Credits: 3**

Term Offered: All Terms

Course Type(s): BI,EL, GU, RE

Students are introduced to the fundamental differences and similarities of world religions that, throughout history, were and are at war with each other. Highlights a plurality of distinct creeds that, postulating an Absolute Truth, search to regain that Ultimate Reality through various ways of life or moral codes. Also listed as PL-277.

**RS-298 Special Topics in Religion****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Exposition and discussion of a current event or an enduring human concern with religious significance. If a prerequisite is required it will be announced in the course schedule.

**RS-375 Islam and Politics****Credits: 3**

Term Offered: Spring Term

Course Type(s): RE

Examination of the interrelationship between Islam as a religion and a way of life and politics in different regions of the world. Following a quick survey of the belief and practice of Islam since its inception, the focus will be placed on the past 100 years, particularly the Muslim responses to the challenges of colonialism, modernization, and globalization and Islam's reassertion in public affairs and society. Concludes with ways for improving Islam-West relations in the hope that these will generate better understanding and peace. Also listed as PS-375.

**RS-397 Christianity in Africa****Credits: 3**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Course Type(s): RE, WT

Examination of Christianity from a historical perspective. Discussion of the foundation of the religion, its spread to the Roman Empire, and its introduction to Africa. Discussion of the proliferation of Christian missions and missionaries and the relationship between Christianity and other religions in Africa. Examination of the impact of Christianity on the social, cultural, and political life of Africans. Also listed as HS-397.

**RS-400 Love, Life, and Liberty****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: All Terms

Course Type(s): ISP

An examination of the historical and philosophical aspects of love and the assertion for freedom, starting from the biological concept of life. Throughout history, the various interpretations of these ideas have shaped the world. Students will be introduced to some of the most important, related works that are the fiber of History, Philosophy, and Science. The analysis of revered, cultural traditions will show the impact of love on the rational thinking and artistic creation. Prerequisite: Completion of seventy-five credits. Also listed as PR-400.

**RS-435 The Way and the Word Hinduism****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Term Offered: Spring Term

Course Type(s): ISP

A comparison of classic texts central to two Asian traditions, The Bhagavad Gita and The Analects; the impact of the ethos of each tradition on secular narratives, Asian and Western. The disciplines represented include Comparative Religion and Literature. Also listed as PR-435.

**RS-436 The Reformation****Credits: 3**

Prerequisite(s): 12 credits in History or Junior standing

Course Type(s): HSEU

A study of sixteenth and early seventeenth-century religious and political developments in Europe: causes of the Reformation, its political and social institutionalization, ideas of reformers, wars of religion, and the Counter-Reformation. Also listed as HS-436.

**RS-465 Music and Religion****Credits: 3**

Prerequisite(s): Completion of seventy-five credits

Course Type(s): AT, ISP

This course explores the relationship between music and religion from a global perspective, examining ideas, values, and practices of music and sound in various religions and spiritual traditions around the world. In addition to learning about the music-cultures (context, instruments, repertoire, etc.) that coincide with various religious traditions, students will be encouraged to consider how worldview and ideology lend to differing perceptions of musical meaning, performance, form, symbolism, and the importance of sound, generally. This survey covers the most prominent world religions (Hinduism, Buddhism, Judaism, Christianity, and Islam) and their denominations, as well as Central Asian Shamanism, Japanese Shinto rituals, and religious traditions of Native Americans. Syncretic religious practices in the Americas, including, African American gospel music, Brazilian Candomblé, Cuban Santería, Haitian Voodoo, and Jamaican Rastafarianism are also presented to examine global issues such as colonization, transculturation, and the localization of culture and religion. Drawing upon academic articles, indigenous texts, musical recordings, and videos, students can expect to be introduced to a number of theoretical dimensions that arise within studies of music and religion globally. Also listed as PR-465.

**RS-499 Independent Study in Religious Studies****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Guided research on selected topics; conference with sponsoring professor. Junior standing and prior permission of the directing professor and department chair is required to take this course.

## Science (SC)

**SC-100 Discovery and Thinking in Natural Sciences****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

The development of major concepts in the biological, chemical, and physical sciences; their importance today.

**SC-103 Physical Geography**

Term Offered: All Terms

Course Type(s): NS

A survey of the Earth sciences from a spatial perspective. We will use maps, diagrams, simulations, and computer mapping software to learn about the systems of the Earth. Students will gain an understanding of physical processes and patterns of the Earth's atmosphere, climate, landforms, and biosphere. Understanding of these systems will be used to examine the ways in which humans influence and adapt to Earth systems. The learning outcomes of this course satisfy a general education requirement for the Natural Sciences. Also listed as GO-103.

**Credits: 3 SC-150 Drug Discovery****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

Concepts of biology, chemistry and pharmacology are used to examine aspects of drug discovery from early recorded history to modern treatments for disease. Additionally, students will understand the impacts of key drug discoveries on society/public health. Note: No prior biology/chemistry knowledge is assumed.

**SC-160 Science of Energy****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

Energy consumption is a key aspect of society that has been profoundly impacted by abundant low-cost energy. What does the future of energy look like in terms of abundance and cost? This course examines energy sources, energy needs, and the transition from geologically stored energy sources (fossil fuels) to ecologically available energy sources and conservation. It also explores the potential environmental consequences of such transition in the immediate future and long-term.

**SC-110 Nutrition Science****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

An overview of the science of human nutrition, including the basics of protein, carbohydrate, lipid, vitamin, mineral, water, and alcohol metabolism. An analysis of the relationship of diet to various health issues and current controversies in nutrition will be covered. Students will learn the elements of nutritional analysis by evaluating their personal diets. Emphasis will be on the manner in which nutrition knowledge is acquired, including a nutrition study conducted by the students.

**SC-120 The Science of Food and Cooking****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

This course covers concepts from chemistry, biology and physics that underpin the principles of food science and the transformations that occur during food preparation and cooking. Students will develop a scientific understanding of food preparation, cooking techniques, and recipes. Cooking demonstrations and experiments will be used to illustrate the scientific concept involved. Note: This course involves the preparation and (optional) consumption of food. If you have specific food allergies or needs, contact the instructor to discuss any necessary arrangements.

**SC-130 Climate Science for 21st Century Citizens****Credits: 3**

Term Offered: All Terms

Course Type(s): SUS, NS

Earth's climate has changed in the past and will change in the future. Climate science and hypotheses about climate change and man's effects on climate figure prominently in the news and popular culture. However, forces and feedbacks impacting climate are poorly understood by the general public. This lack of understanding originates partially because climate science is complicated and interdisciplinary, and partially because addressing climate change requires significant changes in the global energy economy, turning it into a political issue with skewed and un-scientific public discourse. This course aims to cover parts of climate science that are well established, differentiate them clearly from parts of climate science where genuine uncertainty exists and use these contrasts to illustrate the scientific methods, culture of science and science practices of the 21st Century.

**SC-140 Forensic Science****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

An introductory course in which scientific principles will be applied to the methods used to investigate and solve crimes. The course will focus on the principles and methods utilized in the traditional sciences of biology, chemistry, and physics. The scientific techniques used to collect and analyze evidence will be covered.

**SC-170 Oceanography****Credits: 3**

Term Offered: All Terms

Course Type(s): NS

Oceanography provides a survey of physical, biological, chemical, and geological resources and the processes that define and affect ocean basins, coasts, beaches, estuaries, offshore waters and marine species. Environmental considerations include the role of oceans in global climate change issues, coastal development, exploitation of marine resources, and marine pollution. Students in the Marine and Environmental Biology and Policy (MEBP) program should take PH-270, Physical Oceanography, for elective credit.

**SC-198 Special Topics in Science****Credits: 3**

Term Offered: Spring Term

Course Type(s): NS

Study of a particular subject or problem in science to be announced prior to registration. May be conducted on either a lecture-discussion or seminar basis. Courses would meet General Education requirements in the natural sciences. If a prerequisite is required it will be announced in the course schedule.

**SC-233 Climate Science: Understanding our Changing Climate****Credits: 3**

Prerequisite(s): BY-109 or permission of the instructor

Course Type(s): NS, SUS

Climate Change is arguably the most important problem of the 21st century. Climate Science Understanding Our Changing Climate provides students with a quantitatively rigorous treatment of basic climate science as well as a scientific exploration of impacts caused by human-mediated climate change. This course aims to cover climate science from an explicitly interdisciplinary perspective, because climate science depends on chemistry, physics, biology, mathematics, computer modeling and geology for complete understanding of the climate system and because workable climate solutions are almost always interdisciplinary in nature. Climate modeling and assessment of future climate conditions and risks will be stressed.

## Social Work (SW)

### SW-105 Introduction to Social Work

Credits: 3

Term Offered: All Terms

Course Type(s): None

Social work and its professional practices, its goals, guiding philosophy, and basic assumptions; the uses of the professional relationship; roles of the professional social worker and collaborative activity in the helping process. Not open to students who have completed SO-105. Previously listed as SW-101.

### SW-198 Special Topics in Social Work (100 Level)

Credits: 1-3

Course Type(s): None

An intensive study of a particular subject or problem in social work to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

### SW-199 Independent Study in Social Work

Credits: 3

Term Offered: All Terms

Course Type(s): None

Directed individual study of social work in areas of special interest. Prior permission of the directing professor and department chair is required to take this course.

### SW-205 Global Human Rights and Social Justice

Credits: 3

Term Offered: All Terms

Course Type(s): BI,EL, GU, SJS, SUS

Examines social issues and injustices from a global perspective.

A central focus will be the struggles of individuals, families, and communities from around the world. Introduces the student to the concepts of social justice, human rights, social welfare and oppression, and discusses ways to promote social welfare from a human rights and social justice perspective.

### SW-223 Human Behavior and Social Environment

Credits: 3

Prerequisite(s): SW-105 or SW-205

Co-requisite(s): BY-104 or BY-105

Term Offered: All Terms

Course Type(s): GS

A study of significant life tasks in the physical, social, and emotional development of the individual.

### SW-260 Alcohol and Drugs

Credits: 3

Prerequisite(s): SW-105 or PY-103 or SW-205

Course Type(s): None

Addresses the special population in social work, specifically the substance abusing population. Through lecture, small group exercises, and films, the course will educate the students as to what are substance abuse and addiction, what treatment options are available, how to determine the appropriate treatment, as well as different forms of therapy and relapse-prevention work.

### SW-261 Diagnosing Mental Health Issues

Credits: 3

Prerequisite(s): SW-105 or PY-103 or SW-205

Term Offered: Fall Term

Course Type(s): None

A detailed explanation of the DSM IV and its practical use in the social work profession. Cultural applications, as well as international implications and the accurate assessment terminology, will be discussed.

### SW-263 Family Counseling

Credits: 3

Prerequisite(s): SW-105 or PY-103 or SW-205

Course Type(s): None

Introduces students to the assessment and treatment of various family systems. A continuation of the ecological perspective of systems theory and social work practice illustrated in Human Behavior and the Social Environment and Social Work Practice Techniques I. Ethnic, culture, and gender issues are included as they apply to families. Family violence, substance abuse, adolescence conflict, and marital discord are among the topics discussed.

### SW-264 Addictions

Credits: 3

Prerequisite(s): SW-105 or PY-103

Course Type(s): None

Addresses the addictions component of social work. Working with the clients and families to address the unbalance and dysfunction in their lives through assessment, treatment planning, and individual, group, and family therapy. Covering eating disorders, gambling, nicotine, sexual addiction, and workaholism.

### SW-265 Creative Therapies

Credits: 3

Prerequisite(s): SW-105 or PY-103 or SW-205

Course Type(s): None

With creative and interactive approaches, the students will recognize and appreciate their personal experiences to better assess the needs of their clients, as well as enhance conventional therapeutic methods. Also introduces alternate approaches to talk therapy to work with specialized client groups, such as young, traumatized, or non-verbal clients.

### SW-266 Spirituality and Social Work

Credits: 3

Prerequisite(s): SW-105 or PY-103 or SW-205

Course Type(s): None

Explores spirituality as it broadly relates to the profession of social work. Holistic concepts under the definition of spirituality will be explored. The many ways spirituality can be used in social work practice settings will be discussed. Methods of spiritual practice and approaches to healing will be covered. Spirituality will be differentiated from formal religion.

### SW-276 Administration of Gerontological Services

Credits: 3

Term Offered: Spring Term

Course Type(s): None

The examination of the theory and practice of the administration of programs designed to meet the needs of older adults, with an emphasis on structure of organizations, impact of public policies and funding patterns on agencies, styles of administration, development and presentation of a budget, management of public information, and relationships with other gerontological agencies.

### SW-278 Family Violence

Credits: 3

Term Offered: Spring Term

Course Type(s): GS

The characteristics and dynamics of violent families. Emphasis on the issue of domestic violence as it relates to cultural values and beliefs. Myths, motivations, and linkages to substance abuse will be addressed, as well as appropriate interventions and treatment methods.

### SW-298 Special Topics in Social Work (200 Level)

Credits: 1-3

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in social work to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**SW-299 Independent Study in Social Work****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Directed individual study of social work in areas of special interest. Prior permission of the directing professor and department chair is required to take this course.

**SW-317 Racism, Sexism, and Social Welfare****Credits: 3**

Term Offered: Spring Term

Course Type(s): CD, GS

Analysis of institutional racism and sexism in relation to social welfare; the nature of social work intervention with racial and ethnic minorities and women.

**SW-324 Environmental Justice and Sustainable Development in Social Work****Credits: 3**

Term Offered: Fall Term

Course Type(s): GU, HY

This course will address environmental justice and sustainable development in social work using a social justice and human rights framework embodied in Green Social Work and the UN Sustainable Development Goals. The course will highlight social work skills, knowledge and values necessary for working with communities, groups and organizations on issues of environmental justice and sustainable development. Social work pathways to facilitating environmental justice will be explored and developed, grounded in local and global policy and program solutions that "promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all".

**SW-326 Social Welfare Policy and Services****Credits: 3**

Prerequisite(s): SW-223 and either EN-101 or EN-102

Term Offered: Spring Term

Course Type(s): WT

Dimensions of choice in social welfare policy design; eligibility for service; structures, staffing, and funding for services; theoretical material related to current developments and services in the field.

**SW-332 Gender and Sexual Identities****Credits: 3**

Prerequisite(s): SO-101

Term Offered: Spring Term

Course Type(s): CD, GS, SI, SJS

Draws on sociological and feminist theories of identity to question the definitions, constructions, deconstructions, ambivalences, and socially constructed nature of gender and sexual identities. In questioning such identities, this course aims at helping students understand the connections between gender and sexuality, and how those two social forces shape people's individual identities and the identities of others. The course examines how structure of race, class, gender, and sexuality, and social institutions such as family and work shape gender and sexual identities. It pays particular attention to how one's social location within power structures shapes personal identities. Also listed as SO-332.

**SW-341 Social Work Practice with Groups****Credits: 3**

Prerequisite(s): SW-223 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Methods and skills utilized in generalist social work practice; major methods of social work intervention with individuals, groups, and communities using case analysis and theoretical concepts.

**SW-342 Social Work Practice with Individuals and Families** **Credits: 3**

Prerequisite(s): SW-105 and SW-223 both passed with a grade of C or higher

Co-requisite(s): SW-342L

Term Offered: Spring Term

Course Type(s): EX5

Methods and skills utilized in generalist social work practice; major methods of social work intervention with individuals, groups, and communities using case analysis and theoretical concepts. Students complete 100-hour internship.

**SW-342L Social Work Practice with Individuals and Families Lab****Credits: 1**

Prerequisite(s): SW-223

Co-requisite(s): SW-342

Term Offered: Spring Term

Course Type(s): None

Designed to provide students with a hands-on experience with the assessment skills and tools taught in Social Work Practice with Individuals and Families class (SW-342). Students will become familiar with videotaping equipment and will develop strong assessment skills to be used with clients in the field. For Social Work majors only.

**SW-344 Social Work Practice with Communities****Credits: 3**

Prerequisite(s): SW-223

Term Offered: Spring Term

Course Type(s): None

Examines conceptual models of community social work; development of skills to help promote social change.

**SW-371 International Service Seminar****Credits: 3**

Prerequisite(s): PS-102

Term Offered: Spring Term

Course Type(s): PSIP

Students will learn to unite theory and practice by studying theories and policies based on human security, and learning about their applications through service-learning projects. Students will enhance their understanding of human security by volunteering in international community organizations and reflecting on the social, political, and economic factors and policies that affect them. Also listed as PS-371, AN-371 and SO-371.

**SW-383 Migration and Intercultural Cooperation****Credits: 3**

Course Type(s): GU, RE

Students will become familiar with issues and strategies to deal with immigrant populations effectively. Discussions will be directed towards increasing intercultural cooperation, respect for the principle of peaceful co-existence, and diversity as a strength for economic growth and societal progress. Emphasis will also be given to the theories related to ethnicity, race, culture, and geographic location of the origin of immigrant populations. Special attention will be given to the diverse issues that arise from the varied cultural backgrounds of immigrants and refugees. Students will learn skills related to culturally appropriate and tailored interventions. Experiential learning will be utilized. Prepares students using a strength-based empowerment approach to effectively utilize required resources serving the needs of diverse, immigrant populations.

**SW-398 Special Topics in Social Work (300 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in social work to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**SW-399 Independent Study in Social Work****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Directed individual study of social work in areas of special interest. Prior permission of the directing professor and department chair is required to take this course.

**SW-409 Social Work Research Methods****Credits: 3**

Prerequisite(s): EN-101 and EN-102

Co-requisite(s): SW-421

Term Offered: Fall Term

Course Type(s): WT

Basic skills necessary for Social Work research: problem formulation, theoretical framework development, research design, methods of data collection, evaluation techniques, and data analysis.

**SW-411 Data Analysis for Social Work****Credits: 3**

Prerequisite(s): MA-105; this course is for Social Work majors only

Course Type(s): None

Introduction to the basic knowledge and skills necessary for the analysis of data collected or reported in social work research. Preparation for the social work practitioner to assess the adequacy of statistical procedures and to appropriately choose statistical procedures to make order out of data collected within their own research. Not open to students who have successfully completed MA-151. Limited to Social Work majors.

**SW-412 Practice Evaluation in Social Work****Credits: 3**

Prerequisite(s): SW-409, SW-411 or MA-151, Senior standing, and EN-101 and EN-102

Co-requisite(s): SW-422

Term Offered: Spring Term

Course Type(s): None

Applications of research methods to social work practice. Using skills in practice evaluation, advanced research in single-system design will be conducted.

**SW-421 Senior Practicum I****Credits: 6**

Prerequisite(s): SW-342 and SW-344 both passed with a grade of C or higher.

Co-requisite(s): SW-409 or CJ-315 (for CJ/SW majors).

Term Offered: Fall Term

Course Type(s): EX5

Supervised experience in a social agency; direct work with individuals, groups, or communities; preparation for professional responsibility upon graduation. Sixteen hours per week in placement and a weekly seminar at the University.

**SW-422 Advanced Senior Practicum II****Credits: 6**

Prerequisite(s): SW-421 passed with a grade of B- or higher.

Co-requisite(s): SW-412 or CJ-490 (for CJ/SW majors).

Term Offered: Spring Term

Course Type(s): EX5

Advanced Senior Practicum; direct services to individual clients, families, groups, and communities, with the possibility of administrative experiences. Sixteen hours per week in placement and a weekly seminar at the University.

**SW-424 New Perspectives on Human Sexuality****Credits: 3**

Prerequisite(s): 9 credits from either Social Work, Sociology, Psychology or Anthropology

Course Type(s): None

Recent research and developments in the field of human sexuality focusing on individual and social problems.

**SW-426 Seminar in Social Work****Credits: 3**

Prerequisite(s): EN-101, EN-102, SW-421 and Senior standing

Term Offered: Spring Term

Course Type(s): WT

Seminar focusing on topics of particular interest to Social Work students planning to enter practice or graduate school.

**SW-461 Culturally Diverse Child Welfare Practices****Credits: 3**

Term Offered: All Terms

Course Type(s): CD, RE

Provides an understanding of the context from which the practice of child welfare originates, examining the impact of policy upon the direct care of children at risk. Contemporary issues that face children at risk such as sexual abuse, neglect, physical abuse, poverty, and maternal substance abuse are covered, as well as recommended services and treatment that address these concerns. Public child welfare in New Jersey will be of central focus, including the impact and changes of the system's reform plan. In addition, issues of cultural diversity and cultural difference in child welfare practices and child rearing behaviors will be reviewed, with a focus on how the child welfare system could better infuse diversity of experience in policy and practice.

**SW-498 Special Topics in Social Work (400 Level)****Credits: 1-3**

Prerequisite(s): SW-421

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in social work to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If there is a prerequisite for this course it will be announced in the course schedule.

**SW-499 Independent Study in Social Work****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Directed individual study of social work in areas of special interest. Prior permission of the directing professor and department chair is required to take this course.

## Sociology (SO)

**SO-101 Introduction to Sociology****Credits: 3**

Term Offered: All Terms

Course Type(s): SS.SV

A systematic introduction to the major questions, perspectives, and methods of sociology; basic conceptual vocabulary; analysis of individual and group behavior within special areas.

**SO-102 Social Problems****Credits: 3**

Term Offered: Spring Term

Course Type(s): SS.SV

An analysis of social problems in contemporary society; poverty, race, gender and age inequality; work; urbanization; crime; mental illness; and drug use.

**SO-107 Introduction to Social Justice****Credits: 3**

Term Offered: All Terms

Course Type(s): SS.SV

Provides a conceptual and practical basis to understand, interpret, and solve social problems in fair, equitable, and just ways. Also listed as PS-107.

**SO-109 Civic Engagement and Leadership****Credits: 1**

Term Offered: Spring Term

Course Type(s): None

Civic responsibility, engagement, and leadership are encouraged through active student involvement in a community or campus organization. Students will perform twelve hours of public service over the course of the semester working for an organization that addresses a particular issue of public concern. Also listed as PS-109.

**SO-198 Special Topics in Sociology (100 Level)****Credits: 1-3**

Course Type(s): None

An intensive study of a particular subject or problem in sociology to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**SO-201 Global Social Problems****Credits: 3**

Course Type(s): GLS, RE

Leading areas of tension, crisis, and debate in the contemporary world with emphasis on global population trends, global poverty and hunger, and inequality among nations in the world's economic system and their social policy implications.

**SO-203 Career Course in Sociology****Credits: 1**

Term Offered: Spring Term

Course Type(s): None

An introduction to various career opportunities with an undergraduate degree in sociology. It will cover some of the skills necessary for successfully seeking employment and gaining acceptance into graduate school. It will provide sociology and related majors with the opportunity to reflect on professions that use the skills gained through a B.A. program in sociology and to consider their future interests and direction. Students will experience opportunities to prepare for career situations and develop materials to present their abilities to potential employers. This is a one-credit hour course meeting once a week.

**SO-207 Principles of Community Organizing****Credits: 3**

Prerequisite(s): SO-101 or higher or GS-225 or higher.

Term Offered: Fall Term

Course Type(s): SJS

Explores the basic principles of community organizing through the lens of sociological theory. Students are introduced to the history of community organizing in the United States, and to the major community organizing traditions that have been used in social justice and social movement work past and present. The course includes focus on central skills of organizing, including but not limited to issue identification, recruitment, actions, and research, as well as movement-building, popular education and training as related to core sociological concepts. Across the term, the course pays particular attention to the ways that race, class, gender, sexuality, indigeneity and other forms of difference shape privilege and power.

**SO-225 Introduction to Gender Studies****Credits: 3**

Term Offered: All Terms

Course Type(s): CD, GS, SJS, SS.SV

Examines gender inequalities and the pervasiveness of gender as a way of structuring/organizing social life. Emphasizes how gender as a social structure intersects with other social structures such as race, class, and sexuality to legitimize power and privilege and/or constrain diverse groups of people. Critiques conventional theories of gender and sociology and covers a broad spectrum of topics using feminist and sociological perspectives. Also pays attention to the connection between social structure and human agency - how people's experiences are both shaped by social forces and shaped through human action. Also listed as GS-225.

**SO-231 Urban Sociology****Credits: 3**

Prerequisite(s): SO-101

Course Type(s): RE

Theoretical analysis of the modern, urban community, including the history of the city and analysis of urban institutions and behavior patterns; problems relating to metropolitan and suburban areas, community planning, and urban renewal. Also listed as GO-231.

**SO-234 Sports and Society****Credits: 3**

Prerequisite(s): SO-101 or higher or GS-225 or higher.

Term Offered: All Terms

Course Type(s): COSPT, GS, HE.EL, HEPE

The increasingly important role of sports as an institution in modern society. Sports in relation to racism, sexism, education, values, and stratification systems.

**SO-241 Criminology****Credits: 3**

Prerequisite(s): CJ-101 or SO-101 or SO-102; and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

Explanations of the causes of property and violent offenses. Discussion of white collar, professional and organized crime, and the problem of criminal statistics. Also listed as CJ-241.

**SO-243 Juvenile Delinquency****Credits: 3**

Prerequisite(s): SO-101

Course Type(s): SJS

History of the concept of delinquency; extent and nature of delinquent behavior; explanations of delinquent behavior; police and court responses to juveniles; and a review of rehabilitative and treatment modalities.

**SO-244 Deviance****Credits: 3**

Prerequisite(s): SO-101 or SO-102 or CJ-101

Term Offered: Spring Term

Course Type(s): None

How society creates and responds to deviant behavior, ranging from violations of courtesy to homicide. Analysis of the system of social control, including the police, education, psychiatry, and the state.

**SO-245 Theories of Society I****Credits: 3**

Prerequisite(s): EN-101, EN-102, and SO-101

Term Offered: All Terms

Course Type(s): WT

The wide range of theoretical paradigms that characterized the discipline of sociology from the emergent period of industrialization to the rise of modernity are investigated. More specifically, the major foundations of classical sociology theory as it emerged in the mid-nineteenth century, moving beyond the narrowly constructed cannon of Marx, Weber and Durkheim, toward a more accurate and inclusive look at our intellectual roots as manifested in the works of Gilman, Simmel, DuBois and Mead are explored. Throughout the course, we critically engage in a kind of "sociology of knowledge" as we situate these central ideas and schools of thought in the social, political and economic contexts of the larger society, as well as their specific social history of the discipline. Finally, we engage the course with a preview of the ways in which the wide range of theoretical paradigms that characterized the nascent years of the discipline of sociology set the stage for the development of the modernist and postmodernist traditions, including, but not limited to critical theory; structural functionalism; symbolic interactionism; and feminist and critical race theories.

**SO-250 Fundamentals of Social Science Research****Credits: 3**

Term Offered: All Terms

Course Type(s): TL

An introduction to the different ways in which social scientists study the social world. Designed to develop students' understanding of the major purposes of social research as well as the major types of quantitative and qualitative research designs. Students will learn the research process itself, from conceptualization and measurement to operationalization, sampling, ethics, and the analysis and presentation of their proposed study. As part of the research process, students will use spreadsheet, presentation, and word processing software to build datasets, analyze data, and design and present research. Also listed as PS-250. Political Science majors should register for PS-250. This course is for Sociology majors only, or other majors with instructor permission.

**SO-252 Race and Ethnicity****Credits: 3**

Term Offered: All Terms

Course Type(s): CD, GS, RE, SIAR, SJS

Introduces students to the sociological study of race and ethnicity in the United States as interrelated social systems of power that grant a range of material and non-material advantages to different groups of people based on socially constructed definitions of race and ethnicity, particularly as race and ethnicity intersect with a variety of other social structures such as gender and class. Focuses on the historical legacy and current practices of institutionalized racism that have and continue to shape social relations in the U.S. Also listed as GS-252.

**SO-261 Sociology of Family****Credits: 3**

Prerequisite(s): SO-101 or higher or GS-225 or higher.

Term Offered: All Terms

Course Type(s): GS, SJS

Analysis of the institution of marriage and family in contemporary America with cross-cultural, sub-cultural, and historical references, including mate selection, family roles and relationships, parenthood, and childhood.

**SO-271 Ethics, Justice and American Prisons****Credits: 3**

Prerequisite(s): SO-101 or higher or GS-225 or higher.

Term Offered: Fall Term

Course Type(s): SJS

Explores the rise of mass incarceration in the United States, with a critical look at the ethical, socio-cultural, political and economic factors that shape the American prison system today. The course is also the gateway course to The Monmouth University Academic Exchange Program, also referred to as MU-AEP, a collaborative effort between Monmouth University and the New Jersey Department of Corrections. This program, of which this course is a requirement, is offered by Monmouth University to help to facilitate a transformative exchange of ideas and perspectives between incarcerated students and non-incarcerated students and non-incarcerated students inside the New Jersey state prison. Also listed as CO-271.

**SO-272 Economic Inequality****Credits: 3**

Prerequisite(s): SO-101

Term Offered: Spring Term

Course Type(s): CD, SI, SJS

Status, power, authority, and social mobility are the key concepts that sociologists use to study the role of social classes in contemporary, American society. The course covers notable studies of the American class system. It provides a close look at the power relations and lifestyles of various classes and considers the pervasive influence of class identity on social institutions.

**SO-274 Global Inequalities****Credits: 3**

Prerequisite(s): SO-101 or PS-102

Term Offered: All Terms

Course Type(s): BI, EL, GLS, GU, RE, SJS, SUS

A sociological and political look at global inequalities. Explores diverse themes and aspects of a global society, including the forces that are causing and perpetuating global inequalities. It also looks at the social, political, economic, and cultural consequences of those inequalities. Also listed as PS-274.

**SO-278 International Political Economy****Credits: 3**

Prerequisite(s): PS-102

Term Offered: Spring Term

Course Type(s): GLS, PSIP, RE

The role that international institutions, transnational actors, and foreign governments play in the production, distribution, and consumption of resources will be investigated. Since much of international political economy has to do with various thinkers and schools of thought, an appropriate emphasis will be given to some of the important works in the field. For example, we will be analyzing the contributions of Liberal, Marxist, and Statist thinkers and the various perspectives that have been used to analyze the way policies are made, agreements are reached, and resources distributed. Following the establishment of this theoretical framework, we will focus on the growth of regional integration, the role of hegemony in maintaining the stability of international systems, strategies of economic development, and the role of multinational and transnational companies in both the industrial and developing world. In essence, this course is concerned with looking at the relationship between power and wealth and the balance between the state and the market. Also listed as PS-278.

**SO-280 Peer Tutoring****Credits: 1**

Course Type(s): None

Peer tutoring experience. Students will prepare course-related information for presentation to students in courses at the 100- or 200-levels. Peer tutors will meet weekly with a faculty supervisor and assigned students. Permission of the instructor required.

**SO-298 Special Topics in Sociology (200 Level)****Credits: 1-3**

Prerequisite(s): SO-101

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in sociology to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**SO-299 Independent Study in Sociology****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

Guided readings on a topic not otherwise covered in the curriculum. Student must have a least a 2.50 cumulative G.P.A. Prior permission of the directing professor and department chair is required to take this course.

**SO-302 Data Analysis for Social Sciences****Credits: 3**

Prerequisite(s): SO-101 or higher and MA-105 or higher.

Term Offered: Spring Term

Course Type(s): None

Introduces students to techniques used to evaluate social science data; addresses strategies for analyzing qualitative data and presents social science applications of quantitative techniques such as cross tabulation, t-test, and regression. Students will learn to apply procedures to test hypotheses. Also listed as PS 302.

**SO-307 Practicum in Applied Social Research****Credits: 3**

Prerequisite(s): SO-101 or higher.

Co-requisite(s): PS-250 or SO-250; or PS-302 or SO-302; or permission of the instructor.

Term Offered: Spring Term

Course Type(s): SJS

An advanced introduction to the principles and methods of conducting social science research for the express purpose of solving social problems. Informed by sociological theories in the tradition of public sociology, students will explore a wide range of applied research strategies, including: community-based research (CBR); participatory action research (PAR); policy research; evaluation research; and power analyses for community organizing. The course also addresses key ethical, political and logistical challenges that shape the work of applied social scientists in the field.

**SO-308 Resistance and Revolution: Exploring Social Movements & Social Change****Credits: 3**

Term Offered: All Terms

Course Type(s): SJS

Social movements are sustained efforts through which people act collectively to create or resist changes in political, social, economic, legal, and/or cultural systems, as well as specific institutions. Through a combination of theoretical exploration and case studies, this course is designed to generate an in-depth understanding of social movements of the past and the present. We will address questions such as: What events precipitate movements? How do political, social, economic and cultural forces shape movements and influence their outcomes? How have artistic works and creative tactics been used for pursuing social change? In what ways have social media changed the landscape of social action? How have social scientists researched and participated in movements? The course will also explore the work of organizing, strategizing, recruiting participants, leadership development, and tactical decision-making, in addition to the other forms of "on the ground" work within movements. Also listed as PS-308

**SO-309 Sociology Internship Seminar****Credits: 3**

Term Offered: All Terms

Course Type(s): EX5

Provides an opportunity for students to apply classroom theory in practice through actual work experience. Includes both academic and experiential learning. The experiential part involves a minimum of 120 hours of work experience during the semester for three credit hours. The academic aspect includes maintaining a journal log and writing a final report.

**SO-316 Policy Research****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

The principles of social research, with emphasis on an understanding of the policy-making or planning process; development of applied research skills, combining policy-making, implementation, and scientific or empirical research.

**SO-320 Small Group Communication****Credits: 3**

Term Offered: Spring Term

Course Type(s): EX3

Students explore academic perspectives on the process of group communication, leadership, conflict, decision-making, and problem solving, then reflect on and apply these perspectives outside the classroom in the context of a service learning project. Also listed as CO-320.

**SO-325 Survey Research Consulting****Credits: 3**

Prerequisite(s): PS-250 or SO-250 or CO-292 or SW-409 or PY-220 or CJ-315 or HLS-315 or HE-290 or NU-355 or permission of the instructor

Term Offered: All Terms

Course Type(s): None

Provides students with real-world experience in the application of social science methodology, specifically survey research. The course is designed to strengthen social science research methods skills as well as competencies in professional communication and collaboration. Students, as a class, will work on a small-scale project (e.g. needs assessment, program evaluation, marketing study, etc.) for a "client" - a non-profit organization, government agency, small business, or academic institute - who has agreed to collaborate as a service learning opportunity. The client is not paying for this service and understands the limitations of working with consultants-in-training. However, the course will strive to adhere to the highest standards in both survey research practice and the client-consultant relationship. Also listed as PS-325.

**SO-331 Political Sociology****Credits: 3**

Prerequisite(s): SO-101

Course Type(s): None

Analysis of the interplay among political and social behavior, bureaucracies, voluntary associations, and government. The social basis of democracy; emphasis on conflict and consensus models of power.

**SO-332 Gender and Sexual Identities****Credits: 3**

Prerequisite(s): SO-101

Term Offered: Spring Term

Course Type(s): CD, GS, SI, SJS

Draws on sociological and feminist theories of identity to question the definitions, constructions, deconstructions, ambivalences, and socially constructed nature of gender and sexual identities. In questioning such identities, this course aims at helping students understand the connections between gender and sexuality, and how those two social forces shape people's individual identities and the identities of others. Examines how structures of race, class, gender, and sexuality, and social institutions such as family and work shape gender and sexual identities. It pays particular attention to how ones' social location within power structures shapes personal identities. Also listed as SW-332.

**SO-360 Political Economy in the Developing World****Credits: 3**

Prerequisite(s): PS-102 or PS-103

Term Offered: Spring Term

Course Type(s): PSIP, SJS

This course introduces undergraduate students to the core concepts, theories and debates of political economy in the context of developing world countries. The primary unit of analysis will be the national case study (i.e., Brazil or Indonesia) rather than the international system or international institutions (for example, World Bank, IMF or global financial markets.) The aim is to provide the intellectual tool set to evaluate questions and challenges of political and economic development and modernization across a range of national case studies from Latin America, the Caribbean, Africa, the Middle East and Asia. Also listed as PS-360.

**SO-364 Law and Society****Credits: 3**

Prerequisite(s): SO-101 or PS-102 or PS-103

Term Offered: All Terms

Course Type(s): PSAL, SIN, SJL

The evolution of law, social forces influencing law, social impact of law, and law as an instrument of social control and social change. Also listed as PS-364.

**SO-368 Applied Ethics in American Prisons****Credits: 3**

Prerequisite(s): SO-271 or CO-271

Term Offered: Spring Term

Course Type(s): SJS

The second in the sequence of the Monmouth University Academic Exchange Program, a collaborative effort between Monmouth University and the New Jersey Department of Corrections. This program, of which this course is a requirement, is offered by Monmouth University to help to facilitate a transformative exchange of ideas and perspectives on the topics of ethics and social issues between incarcerated students and non-incarcerated students inside a New Jersey prison. Also listed as CO-368.

**SO-369 Feminist Theories****Credits: 3**

Prerequisite(s): SO-225 or GS-225

Course Type(s): GS

Advanced exploration of the major currents of feminist social theory as they have emerged from feminist movement histories in the U.S. and globally. Students will critically examine competing feminist explanations for the history and persistence of gender inequality, as well as deconstruct sex, gender, sexuality from a range of feminist perspectives. The course will also invite students to consider what it means to be "feminist" and how these meanings are connected to the relations and tensions between gender, sexuality, race/ethnicity, class, ability, and nation. In particular, students will compare and contrast key concepts and theoretical assumptions of major feminist theories with a commitment to intersectional analyses. Students will also apply feminist theory to better understand social relationships, organizations, and politics, and self-reflect on how course content applies to their lives as people situation within multiple social contexts and identities. Also listed as GS-369.

**SO-371 International Service Seminar****Credits: 3**

Prerequisite(s): PS-102

Term Offered: Spring Term

Course Type(s): PSIP

Students will learn to unite theory and practice by studying theories and policies based on human security, and learning about their applications through service-learning projects. Students will enhance their understanding of human security by volunteering in international community organizations and reflecting on the social, political, and economic factors and policies that affect them. Also listed as SW-371, AN-371, and PS-371.

**SO-375 Social Movements and Social Change****Credits: 3**

Prerequisite(s): 9 credits in Sociology

Course Type(s): None

Overview of major contemporary and classical theories of social change within an international and historical context; the social impact of change; effects of social variables on change processes; and assessment of predictive models of change.

**SO-379 Work and Society****Credits: 3**

Prerequisite(s): 3 credits in Sociology

Term Offered: Spring Term

Course Type(s): SIN

An examination of the individual experience of work: socialization, occupational choice, career development, worker (dis)satisfaction, and unemployment; the organization of work: bureaucracy, professionalism, racism and sexism, theories of motivation, and the reward structure.

**SO-390 Washington Center Internship****Credits: 7-12**

Term Offered: Spring Term

Course Type(s): EX5

This internship allows students in all majors to intern at government agencies, public service organizations, and business associations located in Washington, DC. Under the supervision of Washington Center supervisors and faculty, students gain substantive entry-level professional experience along with academic credit over the course of one semester. In general, students are required to intern in a government agency or public organizations four and a half days per week and attend educational seminars and workshops and participate in professional forums conducted by the Washington Center. In addition, students must complete learning objectives and assignments specified by Monmouth University faculty sponsors. Also listed as CO-390 and PS-390. Junior standing and a minimum G.P.A. of 2.50 is required to register for this course.

**SO-393 Washington Center Course****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Students participating in a Washington Center Internship are required to enroll in a three credit seminar. A list of available courses is forwarded to all students prior to the beginning of the Fall, Spring, and Summer term. Regular offerings include: politics, professional communication, the fine and performing arts, and economics. Also listed as CO-393 or PS-393. Junior standing and a minimum G.P.A. of 2.50 is required to take this course.

**SO-396 Sociology of Education****Credits: 3**

Prerequisite(s): SO-101 or higher level course OR Permission of the Instructor.

Term Offered: Spring Term

Course Type(s): SIAR

This course encourages students to study education as a social institution using a sociological lens. The course introduces students to the study of education as a social institution, particularly examining how social inequalities such as race, class, gender, and sexuality shape educational experiences of youth today. Students will also examine the cultural, social, economic, and political structures that shape education as a social institution. The course will focus on education in the United States with an emphasis on racism and anti-racism, along with other forms of oppression.

**SO-397 The Sociology of Aging****Credits: 3**

Prerequisite(s): EN-101 and EN-102

Term Offered: All Terms

Course Type(s): EX5, WT

A service learning course that encourages students to become involved with the elderly population in the area. It introduces students to the sociological study of social gerontology or, more specifically, aging. Students will examine the cultural, social, and political structures that define the aging process and will study and practice ethnographic, life history in order to conduct life histories of seniors within the local community.

**SO-398 Special Topics in Sociology (300 Level)****Credits: 1-3**

Prerequisite(s): PY 103 or GS-225 or SO-101

Term Offered: All Terms

Course Type(s): None

An intensive study of a particular subject or problem in sociology to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If there is a prerequisite it will be announced in the course schedule.

**SO-399 Independent Study in Sociology****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Guided readings on a topic not otherwise covered in the curriculum. Students must have at least a 2.50 cumulative G.P.A. and prior permission of the directing professor and department chair to take this course.

**SO-403 Theories of Society II****Credits: 3**

Prerequisite(s): EN-101, EN-102 and 9 credits in Sociology

Course Type(s): WT

The wide range of theoretical paradigms that characterized the discipline of sociology from the emergent period of modernity to our current postmodern era is investigated. In the first half of the course, the traditions of critical theory; structural functionalism; symbolic interactionism; and phenomenology as key schools of thought in the modernist period are examined. In the second half, the most contemporary, and overlapping, additions to the theoretical landscape in sociology in our study of feminist and gender theories; critical race theories; post-modernism; and global theoretical perspectives are examined. Throughout the course, there will be critical engagement in a kind of "sociology of knowledge" as we situate these central ideas and schools of thought in the classic theoretical traditions from which they may intellectually descend, as well as in the more current political and economic contexts that influenced the emergence of these contemporary perspectives.

**SO-490 Sociology Thesis Proposal****Credits: 3**

Prerequisite(s): SO-101, 9 credits in Sociology and completion of fifty-seven credits

Term Offered: Spring Term

Course Type(s): None

Provides students with the opportunity to begin the process of conducting original research in sociology in which they will ultimately produce primary research, analyze data, and write up their findings, discussion, and conclusions. This course allows students to begin the work that they will complete in Sociology Thesis class (SO-491), thus ultimately resulting in a final Senior thesis. Students will write a comprehensive thesis proposal including an introduction and statement of purpose, theory section, literature review, and preliminary methods section.

**SO-491 Sociology Thesis****Credits: 3**

Term Offered: Fall Term

Course Type(s): RD

Provides students with the opportunity to complete an original research project in sociology in which they will conduct primary research, analyze their data, and write up their findings, discussion, and conclusion. This course will also allow students to combine the work conducted in their proposal class (SO-490) with the work conducted in this semester, thus resulting in a complete Senior thesis. Students will present their work two times: once as practice for the class and a second time for members of the Department of Political Science and Sociology and invited guests. Hence, the goal of this course is to present a holistic perspective to students and serve as their gateway to future studies and plans.

**SO-498 Special Topics in Sociology (400 Level)****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in sociology to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**SO-499 Independent Study in Sociology****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Guided readings on a topic not otherwise covered in the curriculum. Student must have at least at 2.50 cumulative G.P.A. and prior permission of the directing professor and department chair to take this course.

## Software Engineering (SE)

**SE-199 Independent Study in Software Engineering****Credits: 3**

Term Offered: Summer Term

Course Type(s): None

Independent Study of a particular subject or problem in software engineering under the guidance of a software engineering faculty member. Prior permission of the directing professor and department chair is required to take this course.

**SE-205 Requirements Engineering and Specifications****Credits: 3**

Prerequisite(s): CS-104 and CS-175

Term Offered: All Terms

Course Type(s): None

Elicitation, analysis, specification, validation, and management of user requirements; process, notations, methods and tools, requirements standards, system requirements specifications document (SRS).

**SE-207 Software Design and Architecture****Credits: 3**

Prerequisite(s): CS-104 and CS-176; and EN-101 and EN-102 or

permission of the instructor

Term Offered: Spring Term

Course Type(s): WT

Design process notations, methods, paradigms, and tools. System architecture tradeoff analysis; component and subcomponent specification. Generic (domain) design; architectural styles, frameworks, and patterns. Architecture standards; design tools.

**SE-289 Internship in Software Engineering****Credits: 3**

Term Offered: Summer Term

Course Type(s): EX1

Supervised practical experience in Software Engineering. Repeatable for credit. Junior standing, departmental approval, and placement are required to take this course.

**SE-299 Independent Study in Software Engineering****Credits: 3**

Term Offered: All Terms

Course Type(s): None

Independent Study of a particular subject or problem in software engineering under the guidance of a software engineering faculty member. Prior permission of the directing professor and department chair is required to take this course.

**SE-301 Android Application Development****Credits: 3**

Prerequisite(s): CS-205 and CS-205L

Course Type(s): None

This course will teach students software methodologies for Android App Development. This will include Android Development Studio, Kotlin programming language, and interfaces to external services required to develop simple to moderately complex Android mobile apps. Also listed as CS-301.

**SE-306 Formal Methods in Software Engineering****Credits: 3**

Prerequisite(s): MA-120 or MA-130, and MA-220, passed with a grade of C or higher.

Term Offered: All Terms

Course Type(s): None

Covers a variety of formal methods and applies them to software-specification development. Assumes a firm grounding in mathematical logic, knowledge of proof techniques, and skill in the translation of problems expressed in English into predicate logic.

**SE-312 Software Verification, Validation, and Maintenance****Credits: 3**

Prerequisite(s): CS-104 and CS-176

Term Offered: All Terms

Course Type(s): None

Covers inspections of requirements, design and code, as well as testing, the handling of change requests, software evolution, code comprehension, and change management.

**SE-337 Enterprise Mobile iOS Apps Design and Development****Credits: 3**

Prerequisite(s): CS-205 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Presents methodologies to build enterprise mobile apps on iPad tablets and iPhone smartphones using iOS. The course will cover technologies to use in the design and development of apps on mobile devices and integration of these apps with corporate data sources, sensor devices and cloud computing services. Also listed as CS-337.

**SE-352 Embedded and Real-Time Software****Credits: 3**

Prerequisite(s): CS-176, CS-176L, and SE-205 all passed with a grade of C or higher.

Term Offered: Spring Term

Course Type(s): None

Familiarizes students with the fundamental issues related to embedded and real-time software systems and gives them an opportunity to become familiar with a commercially available system for developing and testing embedded and real-time software. Topics include: definition of embedded systems, process concurrency, interprocess communications, synchronization, and process scheduling.

**SE-353 Comparative Languages****Credits: 3**

Prerequisite(s): CS-176

Course Type(s): None

Begins with a history of the development of programming languages that provides the background necessary to understand programming-language design and evaluation. This is followed by an introduction to the basic programming language constructs and then critically comparing their implementation in some of the most common languages. Included is a discussion of the advantages and disadvantages of modern programming languages for a variety of applications. Some of the languages discussed are LISP, C, Small Talk, C++, Java, Ada, PL/1, and Prolog.

**SE-357 Engineering Full-Stack Software Applications****Credits: 3**

Prerequisite(s): CS-176 and CS-176L

Term Offered: All Terms

Course Type(s): None

A practical introduction to the principles, methods, and tools required to create high-quality software applications for the distributed, client-server context of the Web. Emphasis is on architectural designs, and language and data access methods that are common in Web-based systems. Also listed as CS-357.

**SE-358 Software Frameworks****Credits: 3**

Prerequisite(s): EN-101, EN-102, CS-205 and SE-207 both passed with a grade of C or higher; and SE-357 or CS-357, or permission of the instructor.

Term Offered: Spring Term

Course Type(s): WT

An introduction to Design Patterns and modern Software Frameworks, programming languages, data access methods and asynchronous Application Programming Interfaces (APIs). This is a writing intensive course. Restricted to Computer Science or Software Engineering students only. Also listed as CS-358. SE-357 or CS-357 or permission of the instructor.

**SE-360 Introduction to Game Development****Credits: 3**

Prerequisite(s): CS-205 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

An introduction to the creation of computer/video games and the different elements of games, including computer graphics, animation, artificial intelligence, algorithms, data structures, networking, software development cycles and human-computer interaction. Also listed as CS-360.

**SE-370 Program Development Under Unix****Credits: 3**

Prerequisite(s): CS-176 passed with a grade of C or higher

Term Offered: Fall Term

Course Type(s): None

Introduction to the use of the UNIX operating system and its utilities for incremental and distributed program development, maintenance, and debugging. The course covers the UNIX shell, utilities, and program development tools that are used for large projects involving multiple developers on multiple machines. Three hours per week.

**SE-398 Special Topics in Software Engineering****Credits: 3**

Course Type(s): None

A 300-level intensive study of a particular subject or problem in software engineering to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. Three or four hours per week. If a prerequisite is required it will be announced in the course schedule.

**SE-399 Independent Study in Software Engineering****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Independent Study of a particular subject or problem in software engineering under the guidance of a software engineering faculty member. Prior permission of the directing professor and department chair is required to take this course.

**SE-402 Human Computer Interaction****Credits: 3**

Term Offered: Spring Term

Course Type(s): IM

Covers basic human psychology, computer technology, and the interface between them. The key topics of HCI are examined, grounded in the context of usability and the design lifecycle.

**SE-403 Software Process Improvement**

Prerequisite(s): CS-205

Term Offered: Spring Term

Course Type(s): None

Students will be introduced to the various aspects related to software processes. It will focus on the definition and modeling of a software process, as well as on methods for process assessment and improvement. The concepts will be illustrated through process-improvement case studies, followed by hands-on experience with the improvement of the personal software-development process.

**Credits: 3****SE-418 Software Project Management****Credits: 3**

Prerequisite(s): CS-176; and EN-101 and EN-102 or permission of the instructor

Term Offered: All Terms

Course Type(s): WT

Project management and its application to software-development projects. Emphasis will be on planning, organizing, monitoring, and controlling. Students will learn how to develop work breakdown structures, estimate task durations, assign resources, specify network precedence, and determine a project's critical path. Methods for scheduling in the face of resource constraints will be included, as well as function point counting, algorithmic models for estimating total project cost, and software tools for project planning and monitoring.

**SE-450 Cyber Security****Credits: 3**

Prerequisite(s): CS-205

Term Offered: Fall Term

Course Type(s): None

Cover fundamental theory and practice of cyber security. Review cryptographic tools used to provide security, such as shared key encryption; public key encryption, key exchange, authentication, digital signature, and intrusion detection. Learn implementation of secure mechanisms in object-oriented programming languages. Also listed as CS-450.

**SE-451 Applied Computer Security****Credits: 3**

Prerequisite(s): CS-450 or SE-450

Term Offered: Spring Term

Course Type(s): None

This course will introduce students to multiple aspects of computer security and practice into a series of well-defined security topics such as network security and hacking tools. Also, the student will introduce different topics of digital forensics. Also listed as CS-451.

**SE-485A Software Practicum****Credits: 3**

Prerequisite(s): CS-205, SE-205, SE-207, SE-312, SE-357 and SE-358 All passed with a grade of C or higher.

Term Offered: Fall Term

Course Type(s): EX5, RD

Team work on substantial software projects submitted by corporate sponsors. Interim progress reports required, with a final formal defense and presentation to corporate staff, faculty, and other students in the course. At the end of SE-485A, students must submit their software engineering portfolio for review by the Software Engineering faculty.

**SE-485B Software Practicum****Credits: 3**

Prerequisite(s): SE-485A

Co-requisite(s): SE-402

Term Offered: Spring Term

Course Type(s): EX5, RD

Team work on substantial software projects submitted by corporate sponsors. Interim progress reports required, with a final formal defense and presentation to corporate staff, faculty, and other students in the course. At the end of SE-485B, students must submit their software engineering portfolio for review by the Software Engineering faculty.

**SE-498 Special Topics in Software Engineering****Credits: 3**

Term Offered: Fall Term

Course Type(s): None

A 400-level intensive study of a particular subject or problem in software engineering to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. Three or four hours per week. If a prerequisite is required it will be announced in the course schedule.

**SE-499 Independent Study in Software Engineering****Credits: 1-3**

Term Offered: All Terms

Course Type(s): None

Independent Study of a particular subject or problem in software engineering under the guidance of a software engineering faculty member. Prior permission of the directing professor and department chair is required to take this course.

## Speech Language Pathology (SLP)

**SLP-201 Introduction to Communication Sciences and Disorders****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL

Provides an overview to the fields of speech-language pathology, audiology, and education of the hearing impaired. Will provide information regarding the nature, etiology, symptom, and remediation of organic and neurogenic disorders of speech, language, and hearing. Additionally, this course will provide an overview of various speech, language, and hearing disorders: the factors related to the causes and severity of these disorders and roles of professionals associated with the diagnosis and severity of these disorders and roles of professionals associated with the diagnosis and treatment, specifically speech-language pathologists and audiologists.

**SLP-202 Introduction to Language Development****Credits: 3**

Term Offered: All Terms

Course Type(s): HE.EL, OL

Provides an overview of the development of language over the course of the lifespan. An introduction to the normal acquisition of language including the components of language, as well as the physical, social, and cognitive basis for language. Theories of language development and how language evolves from infancy to adulthood will be discussed. Cultural influences on language development will also be explored.

**SLP-298 Special Topics in Speech-Language Pathology****Credits: 3**

Course Type(s): None

An intensive study of a particular subject or problem in Speech, Language and Pathology to be announced prior to registration. The course may be conducted on either a lecture-discussion or a seminar basis. A minimum G.P.A. of 3.00 is required to take this course. If a prerequisite is required it will be announced in the course schedule.

**SLP-301 Introduction to Phonetics****Credits: 3**

Term Offered: All Terms

Course Type(s): OL

Provides students with the skills needed to produce, transcribe and describe in articulatory terms, the individual sounds used in speech. Will provide an introduction to sound patterns, phonetic transcriptions using the International Phonetic Alphabet, acoustic aspects of phonetics and the application of these skills to clinical practice. Dialects and derivations of the English language will be explored.

**SLP-302 Anatomy and Physiology of Speech and Hearing****Credits: 3**

Term Offered: All Terms

Course Type(s): OL

Provides an understanding of the anatomical structures, as well as the physiological and functional mechanisms essential for speech production. Specifically, the anatomy and physiology of respiration, phonation, articulation, resonance, and hearing will be covered in depth.

**SLP-303 Neurological Bases of Speech and Language****Credits: 3**

Prerequisite(s): SLP-201

Term Offered: Spring Term

Course Type(s): OL

Students will learn the neuroanatomical and neurophysiological underpinnings of speech, language and hearing and will study how the nervous system controls communication. Additionally, the course will examine the cranial nerves and the circuits underlying sensory perception, motor action, and cognition as they relate to speech production and hearing.

**SLP-304 Observation Skills in Speech, Language, and Hearing Disorders****Credits: 1**

Prerequisite(s): SLP-201

Term Offered: All Terms

Course Type(s): OL

Provides students the opportunity to learn clinical and professional knowledge and skills through direct, guided observation of speech-language pathology practice. Prerequisite: SLP-201

**SLP-389 Internship in Speech, Language and Pathology****Credits: 1-3**

Term Offered: Spring Term

Course Type(s): EX1

Supervised practical experience in Speech, Language and Pathology; repeatable for credit. Departmental approval and Junior standing is required to take this course.

**SLP-401 Speech and Hearing Science****Credits: 3**

Prerequisite(s): SLP-301 and SLP-302

Term Offered: All Terms

Course Type(s): None

Studies the nature of sound, sound transmission, and units of measurement necessary to understand the physiologic, acoustic, and perceptual parameters of speech. Acoustics, speech production, and speech perception will be emphasized.

**SLP-402 Introduction to Audiology****Credits: 3**

Prerequisite(s): SLP-302

Term Offered: All Terms

Course Type(s): OL

An introduction to the field of audiology. Designed to acquaint students with topics regarding the anatomy and physiology of normal and abnormal hearing, basic concepts in pure-tone air and bone conduction audiometry, speech audiometry, interpretation of audiograms, immittance procedures, and basic management of the hearing loss of the hearing-impaired client.

**SLP-498 Special Topics in Speech-Language Pathology****Credits: 3**

Course Type(s): None

An intensive study of a particular subject or problem in educational leadership to be announced prior to registration. If a prerequisite is required it will be announced in the course schedule.

## Theatre (TH)

**TH-101 Theatre Appreciation****Credits: 3**

Term Offered: All Terms

Course Type(s): AT

Introduction to the elements of theatre, including film and TV as theatre media. Study of plays from script to stage through readings, lectures, and theatre-going experiences.

**TH-150 Introduction to the Theatre****Credits: 3**

Course Type(s): AT

Introduction to the elements of theatre, including cinema and television as theatre media; the study of a representative group of plays from script to stage.

**TH-154 Acting I (Non-Major)****Credits: 3**

Term Offered: All Terms

Course Type(s): AT

An introduction to acting the dramatic situation through guided improvisation based on material from dramatic literature.

**TH-155 Acting I (TH Major)****Credits: 3**

Course Type(s): None

Designed to enable students to explore the use of their imagination, instrument, and sense of playing to work within an ensemble. Basic skills, such as playing with intuition and listening and responding openly to a partner within given circumstances, will be the primary goals.

**TH-156 Acting II (TH Major)****Credits: 3**

Prerequisite(s): TH-155

Term Offered: Spring Term

Course Type(s): None

Builds from the previous exercise work with working on assigned scenes. Work will begin on open scenes and finish the term working on a scene from important plays of American theatre. Students will study the breakdown of a scene, structure, both verbal and non-verbal, and effective communication of intent.

**TH-190 Applied Theatre Techniques I****Credits: 1**

Term Offered: All Terms

Course Type(s): AT

First-year students are required to take this hands-on, practical course in building, painting, and crewing a department production.

**TH-191 Applied Theatre Techniques II****Credits: 1**

Term Offered: All Terms

Course Type(s): AT

Second semester in Applied Theatre requires students to take a more responsible position in the hands-on practical building, painting, and crewing of a department production.

**TH-199 Independent Study in Theatre****Credits: 1-3**

Course Type(s): None

Directed individual study of theatre in areas of special interest. Prior permission of the directing professor and department chair is required to take this course.

**TH-230 Acting II (non-Major)**

Prerequisite(s): TH-154

Term Offered: Spring Term

Course Type(s): None

Roles as an integral part of play production; the basic principles of acting through lectures, discussions, and the rehearsal and performance of a variety of scenes.

**Credits: 3****TH-231 Acting III (Major)**

Prerequisite(s): TH-155 and TH-156

Course Type(s): None

Study of "styles". Beginning work on classic texts, such as Shakespeare, Moliere, or Restoration Comedy. Text analysis, scansion, and speaking with authority will be emphasized. Text work in sonnets and scenes.

**Credits: 3****TH-232 Acting IV (Major)**

Prerequisite(s): TH-155, TH-156, and TH-231

Term Offered: Spring Term

Course Type(s): None

The fourth semester will be an extension of styles of work. Advanced work in characterization, the development of physical and emotional involvement, and working with objectives, obstacles, and actions, with emphasis on classic "styles".

**Credits: 3****TH-240 Actors' Equity Workshop I**

Term Offered: Summer Term

Course Type(s): None

An introduction to the basic rules and regulations of Actors' Equity Association's Small Professional Theatre Agreement and to basic stage management principles. Lectures will be supplemented with extensive, practical "lab" hours in which the students put into practice in a professional setting those elements learned in the class.

**Credits: 3****TH-242 Introduction to Improvisation**

Term Offered: Fall Term

Course Type(s): AT

An introduction to Improvisational Acting/Performance. No prior experience in theatre is required. Acting training and stage performance is a plus. Students should be prepared to go through a series of exercises that are designed to teach and hone the ability to perform an improvisational performance.

**Credits: 3****TH-245 Theatre Performance Practicum I**

Term Offered: All Terms

Course Type(s): None

Involves actual experience performing in a University production. Credit can be specified for a student's acting, singing, and/or dancing in a department-sponsored production. The Performance Practicum can be taken in any combination simultaneously or consecutively for a total of three credits toward the Musical Theatre Concentration, Theatre Minor, or Musical Theatre Minor. Any credits for Practicum courses beyond that go towards free electives. This course is repeatable for credit.

**Credits: 1****TH-246 Theatre Performance Practicum II**

Term Offered: All Terms

Course Type(s): None

Involves actual experience performing in a University production. Credit can be specified for a student's acting, singing, and/or dancing in a department-sponsored production. The Performance Practicum can be taken in any combination simultaneously or consecutively for a total of three credits towards the Theatre or Musical Theatre Minor. Any credits for Practicum courses beyond that go towards free electives. This course is repeatable for credit.

**Credits: 1****TH-247 Theatre Performance Practicum III**

Term Offered: All Terms

Course Type(s): None

Involves actual experience performing in a University production. Credit can be specified for a student's acting, singing, and/or dancing in a department-sponsored production. The Performance Practicum can be taken in any combination simultaneously or consecutively for a total of three credits towards the Theatre or Musical Theatre Minor. Any credits for Practicum courses beyond that go towards free electives. This course is repeatable for credit.

**Credits: 1****TH-251 Introduction to Theatre Production and Design**

Term Offered: Spring Term

Course Type(s): None

Introduction to scenic, costume, lighting, and sound design and technology, including: the problems involved in executing the technical aspects of a theatrical production; preparation of working drawings, light plots, scale models; ability to hang, focus, and program theatrical lighting; solutions of make-up and costuming problems.

**Credits: 3****TH-290 Applied Theatre Design**

Prerequisite(s): TH-190 and TH-191

Term Offered: All Terms

Course Type(s): AT

Students will work intensely with a designer for a department production. Student will be responsible for the design and construction of one facet of a total design: namely, a prop, a costume, lights, or some integral part of a production design.

**Credits: 1****TH-291 Applied Theatre Management**

Prerequisite(s): TH-190 and TH-191

Term Offered: All Terms

Course Type(s): AT

Students will work intensely with a management office concerning a department production. Students will be involved with hands-on production of publicity, company management, box office, public relations, casting, historical records, and/or dramaturgy.

**Credits: 1****TH-298 Special Topics in Theatre (200 Level)**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in theatre to be announced prior to registration. If there is a prerequisite for this course it will be announced in the course schedule.

**Credits: 1-3****TH-299 Independent Study in Theatre**

Term Offered: All Terms

Course Type(s): None

Directed, individual study of theatre in areas of special interest. Prior permission of the directing professor and department chair is required to take this course.

**Credits: 1-3****TH-301 Theatre History I**

Prerequisite(s): EN-101 and EN-102 or permission of the instructor

Term Offered: Spring Term

Course Type(s): WT

The development of theatre from the Classical Greek through the Elizabethan period. Examination of plays, playwrights, architecture, scenery, costumes, mechanics, technology, historical, and sociological influences.

**Credits: 3**

**TH-310 Musical Theatre History****Credits: 3**

Term Offered: All Terms

Course Type(s): AT

The Broadway musical is considered by many to be America's greatest contribution to the world of theatre. Examines the history and evolution of American musical theatre. Special attention will be paid to composers, lyricists, directors, choreographers, and performers who have made significant contributions to the genre. Material will be discussed chronologically from minstrelsy to the contemporary mega-musical.

**TH-335 Group Techniques in Performance****Credits: 3**

Term Offered: Spring Term

Course Type(s): COCCL, COCSD

Students will learn creative group-based practices and methods of inquiry to develop original performances based on pressing social issues. Collaborative approaches will include historical research, multicultural and critical perspectives, embodied devising, verbatim theatre techniques, and adaptations of texts for public presentation. Also listed as CO-335.

**TH-340 Actors' Equity Workshop II****Credits: 3**

Prerequisite(s): TH-240

Term Offered: Summer Term

Course Type(s): None

Builds upon the basic knowledge gained in TH-240 through the in-depth study of Actors' Equity Association's two most widely used contracts, the LORT (League of Resident Theatres) and Production (Broadway, Off-Broadway, National Tour) agreements. Lectures will be supplemented with extensive, practical "lab" hours in which the students put into practice in a professional setting those elements learned in the class.

**TH-342 Improvisation II****Credits: 3**

Prerequisite(s): TH-242

Term Offered: Spring Term

Course Type(s): None

A continuation of exercises in Improvisational Acting/Performance. No prior experience in theatre is required, however students should take Introduction to Improvisation first. Acting training and stage performance is a plus. Students should be prepared to go through a series of exercises that are designed to teach and hone the ability to perform an improvisational performance.

**TH-349 Postcolonial Drama and Film****Credits: 3**

Term Offered: All Terms

Course Type(s): BI.EL, GU, RE

Study of postcolonial plays and films from Ireland, Australia, Africa, and India, including such postcolonial themes as language, religion, and race. Students will discuss the ways in which the theatrical and cinematic media are used to express the loss of, and quest for, national and individual identity in the aftermath of empire. The students will not only become versed in postcolonial theory, but also in the individual dramatic styles/structures of each of the nations discussed.

**TH-355 Dramatic Literature****Credits: 3**

Prerequisite(s): TH-150

Course Type(s): None

Analysis of representative plays of the major forms of the drama-tragedy, comedy, tragicomedy, and romance. Emphasis on the literary and performance aspects.

**TH-357 Acting for Television****Credits: 3**

Prerequisite(s): TH-154

Term Offered: Spring Term

Course Type(s): None

Techniques that the on-camera performer uses in various TV situations, commercials, daytime drama, situation comedy, and serious drama. Also listed as CO-357.

**TH-361 Play Direction****Credits: 3**

Prerequisite(s): TH-230

Term Offered: Spring Term

Course Type(s): None

Play analysis, casting procedures, composition, movement, stage business, backstage organization, rehearsal routine, and theatre management from the standpoint of the creative director.

**TH-389 Internship in Theatre****Credits: 1-3**

Term Offered: All Terms

Course Type(s): EX1

Supervised practical experience in theatre; repeatable for credit.

Departmental approval and Junior standing are required to take this course.

**TH-390 Applied Theatre Techniques III****Credits: 1**

Term Offered: All Terms

Course Type(s): AT

Students will work hands-on with an appropriate faculty member on an advanced project in theatre, musical theatre, or music production. An alternative possibility would be to do a pre-internship assignment with a local theatre.

**TH-391 Applied Theatre****Credits: 1**

Prerequisite(s): TH-190, TH-191, and either TH-290, TH-291, or TH-390

Term Offered: All Terms

Course Type(s): AT

Students will work hands on with an appropriate faculty member on an advanced project in theatre, musical theatre, or music production. An alternative possibility would be to do a pre-internship assignment with a local theatre.

**TH-398 Special Topics in Theatre (300 Level)****Credits: 3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in theatre to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**TH-399 Independent Study in Theatre****Credits: 3**

Course Type(s): None

Directed individual study of theatre in areas of special interest. Prior permission of the directing professor and department chair is required to take this course.

**TH-401 Theatre History II****Credits: 3**

Prerequisite(s): TH-301 and EN-101 and EN-102

Term Offered: Spring Term

Course Type(s): WT

The development of theatre from the Restoration through the Modern Period. Examination of plays, playwrights, architecture, scenery, costumes, mechanics, technology, historical, and sociological inferences.

**TH-441 Summer Theatre Workshop I Credits: 3**

Course Type(s): None

Basic technical theatre, theatre management, elements of acting, children's theatre, costuming and make-up, lighting and set design; four dramatic productions.

**TH-442 Summer Theatre Workshop II Credits: 3**

Course Type(s): None

Basic technical theatre, theatre management, elements of acting, children's theatre, costuming and make-up, lighting and set design; four dramatic productions.

**TH-453 Creative Dramatics Credits: 3**

Term Offered: Spring Term

Course Type(s): None

The goal of Creative Dramatics is to equip teachers with the ability to use creative dramatics, creative play, and theatre games in the classroom as a tool for teaching all subjects. Also useful for actors and recreation or community leaders who work with children and want to learn new and creative techniques. The emphasis in this class is on the participant and participation. Students should attend comfortably dressed.

**TH-480 Problems in Theatre Practice Credits: 3**

Term Offered: Spring Term

Course Type(s): None

Independent projects and intensive research under the guidance of one or more members of the department; creative work in acting, costuming, creative dramatics, directing, lighting, scenic design, and playwriting.

**TH-498 Special Topics in Theatre (400 Level) Credits: 3**

Term Offered: Spring Term

Course Type(s): None

An intensive study of a particular subject or problem in theatre to be announced prior to registration. May be conducted on either a lecture-discussion or a seminar basis. If a prerequisite is required it will be announced in the course schedule.

**TH-499 Independent Study in Theatre Credits: 1-3**

Course Type(s): None

Directed individual study of theatre in areas of special interest. Prior permission of the directing professor and department chair is required to take this course.
