¹ Students desiring certification by the ACS should enroll in the CE.ACS program and should consult with the department chair and academic advisor.

² CE-350, Research in Chemistry, is highly recommended and may be taken as free electives. Please consult with your advisor regarding the required number of free electives that must be completed.

³ Students opting for the Biochemistry Track are advised to take CE-333 (and CE-333L) from the CE-300+ elective list of courses so that they will take only 9 credits from the remaining track courses. This way the total number of credits required to graduate from the program remains 120.

⁴ Students opting for the Industry Track are advised to take CE-432 Advanced Analytical Chemistry from the list of the CE-300+ elective courses so that they will need to take only 10 credits from the remaining track courses. This way the total number of credits required to graduate from the program remains 120.

⁵ The General Education curriculum requires the completion of 45 credits. However, students may be able to share credits from within their major or interdisciplinary requirements. Please consult with your advisor to determine which General Education (<http://catalog.monmouth.edu/undergraduate-catalog/academic-programs-support-services-regulations/general-education-requirements/>) courses must be completed.

Notes

- 54 credits must be completed at the 200 level or higher.
